

Prospectus evidence master: executed results

The program covers 36 issues: 18 qualified positives, 16 qualified negatives and 2 unresolved classifications. The regression suite passed 797 tests.

New source selections: 2/2 corporate and 2/2 capital issues. 0 use issue PDFs first acquired after the relevant method freeze without intervening method changes. Issuer discovery pages may have been visited earlier. The acquisition ledger retains 61/80 HTTP requests.

The known inventory-description and bank-fixture metadata defects were reproduced and repaired in new versioned records. Historical evidence was preserved. Every bank investigation retains fourteen obligations and grants no transaction permission.

Decision and evidence

Requirement	Result
Decision	Retain demonstrated engineering repairs and source-dependent results within their recorded scope
Primary criterion	Controller, arithmetic and regression checks pass; source identities and conditional reports replay
Veto status	See preserved failed attempts and witness review; unknown inputs do not become permission
Main uncertainty	English interpretation, complete contracts, actual authority and private/event facts
Next action	Resolve the remaining source and actual-input requirements; extend unsupported numerical profiles
Not concluded	Universal legal accuracy, population accuracy or an authorised trade

Inference question	Status
Hard veto evidence	Identity, method drift, quotation tampering, arithmetic boundaries and missing-input rules checked in stated domains
Statistically supported ranking	None
Descriptive evidence	Source availability and finite case counts only
Default readiness	Bounded engineering improvements; broader legal reliability unestablished
Next evidence	More unseen families, complete agreements, dated authority and actual client/event inputs

Source investigation

Enel December 2024 agency agreement: The issuer archive supplied the 20 December 2024 execution-version agency agreement. Page 5 identifies both Enel issuers and applies the agreement to new notes issued after its date, subject to the older-series consolidation exception. This matches the programme date named in the retained February 2025 final terms. Page 95 contains maturity redemption by reference to the applicable final terms; page 44 retains the amendment conditions.

Retrieval and a targeted date/clause correspondence review are complete. Signed execution, series-specific amendments, all 187 pages' legal effect and the full contract chain are not independently established; the original qualified classification is not promoted to complete legal clearance.

Enel guarantee and covenant: The matching dated guarantee and Enel Finance International covenant are retained. Guarantee clause 2.1 promises due payment with the clause 2.1(d) 120% principal/interest cap; clause 2.2 gives unsecured unsubordinated status. Covenant clause 1 supplies direct rights when a global note becomes void, subject to holder and clearing-system conditions.

Execution-version headings do not prove signed execution: the retained covenant's signature block is blank. No actual holder entitlement, applicable later amendment, enforcement outcome or complete governing-law analysis is established.

BASF 2032 source dependency and controlling language: The final terms identify XS2595418596 but expressly require the September 2022 programme and February 2023 supplement. The selected conditions use German as controlling language. The reader correctly abstains on the missing operative documents.

Obtain the exact dated base and supplement, inspect selected Option I and reconcile the controlling German terms. A different current programme cannot fill this gap.

LVMH 2029 repayment evidence and remaining abstention: The matching base, three supplements and final terms are retained. Item 22 equates EUR100,000 redemption with EUR100,000 denomination. Two other supposed cash witnesses were unsupported coupon/definition matches; failing counterexamples reproduced the defect and the repaired matcher removed them. Five coupon-forfeiture/partial-redemption clauses remain unresolved by the bounded reader.

The result remains unresolved. A new reviewed repair must distinguish coupon rights and principal reduced through cash payment, including mixed-clause counterexamples. All four selected cases are exposed after the repair; the preserved original frozen challenge does not establish population accuracy.

BBVA Series 15 conversion conditions: Condition 6.1 requires conversion into ordinary/Common Shares after the defined CET1 trigger, without holder approval. The separate capital-reduction mechanism in condition 6.2 allows a timely holder election against conversion; the accepted witnesses rely on 6.1.

The qualified positive establishes a conditional feature in the offering circular. No actual trigger, complete agency agreement, current Spanish-law analysis, share quantity or investor permission is established.

SEB 2024 principal extinguishment and share settlement: Condition 5A.01 converts the notes automatically after the defined trigger. Condition 5A.02 reduces principal to zero while preserving conversion-share delivery rights. The qualified positive concerns this contractual principal mechanism; share delivery or sale proceeds may retain value.

Zero principal does not mean zero economic recovery. Actual trigger determinations, share-price/rounding inputs, fiscal agency agreements, delivery notices and Swedish-law conditions remain unverified.

Unilever public agreement recovery: The issuer programme route returned HTTP 403. This is failed retrieval evidence, not evidence that the required agreement does not exist.

Applicable executed agreements, guarantees and amendments remain open; the earlier retained offering documents do not establish a complete contract set.

Lloyds primary filing recovery: The SEC primary-filing request returned HTTP 403. The existing secondary filing copy remains qualified.

Obtain and compare the original dated filing and applicable executed agreements. A failed request neither invalidates nor authenticates the secondary copy.

Current HKMA IC-1 authority: The known official PDF route returns HTTP 302 to brdr.hkma.gov.hk. That host is outside this campaign's frozen public-host policy, so its content was not retrieved.

Review the exact redirected host in a new acquisition protocol and inspect the dated current text with other applicable authority. This campaign does not establish complete or current legal coverage.

Conditional loss calculations

The existing UBS issue-specific engine is retained. Deutsche section 5(4) now has exact conditional principal-allocation and write-up-cap calculations, with explicit effectiveness, currency, issuer discretion and external-input assumptions. Worked scenarios are hypothetical. Notice/timing, actual regulatory determinations and settlement remain separate requirements. Other instruments do not inherit either profile.

Bond results

1. Tesco treasury 3.500% senior notes due 2033

Identity: XS3201918409. **Answer:** No.

No feature identified within the examined offering terms: cash principal repayment is provided (tesco-2025-final, PDF pp.2-4); no applicable principal write-down or compulsory common-share conversion was identified. This is a qualified source reading, not a proof of absence in all operative language or documents.

Offering-circular conditions and selected final terms, as supplemented. Financial statements and the separate trust/agency agreements are not reconstructed as complete legal contracts.

2. Veolia 3.690% senior notes due 2031

Identity: FR0014017P12. **Answer:** No.

No feature identified within the examined offering terms: cash principal repayment is provided (veolia-2026-base, PDF p.79); no applicable principal write-down or compulsory common-share conversion was identified. This is a qualified source reading, not a proof of absence in all operative language or documents.

Dated final terms and base-prospectus disclosures. Separate agency agreement, corporate filings and subsequent changes are not proved complete.

3. Veolia 4.122% senior notes due 2036

Identity: FR0014017P04. **Answer:** No.

No feature identified within the examined offering terms: cash principal repayment is provided (veolia-2026-base, PDF p.79); no applicable principal write-down or compulsory common-share conversion was identified. This is a qualified source reading, not a proof of absence in all operative language or documents.

Dated final terms and base-prospectus disclosures. Separate agency agreement, corporate filings and subsequent changes are not proved complete.

4. Deutsche Bank 6.75% perpetual AT1, December 2025

Identity: DE000A460DG7. **Answer:** Yes.

Yes: the principal can be reduced or cancelled under the contractual terms (deutsche-at1-2025, PDF p.9). The conditions are retained in the cited evidence; the power need not have been exercised. Selected source scope remains qualified.

5. Sogécap 6.25% perpetual restricted tier 1, July 2025

Identity: FR00140112W8. **Answer:** Yes.

Yes: the principal can be reduced or cancelled under the contractual terms (sogecap-rt1-2025, PDF p.72). The conditions are retained in the cited evidence; the power need not have been exercised. Selected source scope remains qualified.

6. UBS 5.600% SGD perpetual AT1 (June issue and July tap)

Identity: CH1357852636. **Answer:** Yes.

Yes: the bond can be compulsorily converted into common/ordinary shares under the contractual terms (ubs-sgd-at1-2024-final-published, PDF p.28). The conditions are retained in the cited evidence; the power need not have been exercised. Selected source scope remains qualified.

7. Barclays 7.625% perpetual AT1, first reset 2035

Identity: US06738EDC66. **Answer:** Yes.

Yes: the bond can be compulsorily converted into common/ordinary shares under the contractual terms (barclays-at1-2025, PDF p.57). The conditions are retained in the cited evidence; the power need not have been exercised. Selected source scope remains qualified.

8. HSBC 6.750% perpetual AT1, first reset 2031

Identity: hsbc-at1-2026-2031. **Answer:** Yes.

Yes: the bond can be compulsorily converted into common/ordinary shares under the contractual terms (hsbc-at1-2026-specific, PDF p.1). The conditions are retained in the cited evidence; the power need not have been exercised. Selected source scope remains qualified.

9. HSBC 7.000% perpetual AT1, first reset 2036

Identity: hsbc-at1-2026-2036. **Answer:** Yes.

Yes: the bond can be compulsorily converted into common/ordinary shares under the contractual terms (hsbc-at1-2026-specific, PDF p.1). The conditions are retained in the cited evidence; the power need not have been exercised. Selected source scope remains qualified.

10. Standard Chartered 7.625% perpetual AT1, January 2025

Identity: US853254DF47, USG84228GP72. **Answer:** Yes.

Yes: the principal can be reduced or cancelled under the contractual terms (standard-chartered-at1-2025-executed-deed, PDF pp.42-43). The conditions are retained in the cited evidence; the power need not have been exercised. Selected source scope remains qualified.

11. Apple Inc. 4.000% Notes due 2028

Identity: apple-senior-2025.1. **Answer:** No.

No feature identified within the examined offering terms: cash principal repayment is provided (apple-senior-2025, PDF p.16); no applicable principal write-down or compulsory common-share conversion was identified. This is a qualified source reading, not a proof of absence in all operative language or documents. Selected source scope remains qualified.

12. Apple Inc. 4.200% Notes due 2030

Identity: apple-senior-2025.2. **Answer:** No.

No feature identified within the examined offering terms: cash principal repayment is provided (apple-senior-2025, PDF p.16); no applicable principal write-down or compulsory common-share conversion was identified. This is a qualified source reading, not a proof of absence in all operative language or documents.

Selected source scope remains qualified.

13. Apple Inc. 4.500% Notes due 2032

Identity: apple-senior-2025.3. **Answer:** No.

No feature identified within the examined offering terms: cash principal repayment is provided (apple-senior-2025, PDF p.16); no applicable principal write-down or compulsory common-share conversion was identified. This is a qualified source reading, not a proof of absence in all operative language or documents.

Selected source scope remains qualified.

14. Apple Inc. 4.750% Notes due 2035

Identity: apple-senior-2025.4. **Answer:** No.

No feature identified within the examined offering terms: cash principal repayment is provided (apple-senior-2025, PDF p.16); no applicable principal write-down or compulsory common-share conversion was identified. This is a qualified source reading, not a proof of absence in all operative language or documents.

Selected source scope remains qualified.

15. Duke Energy Corporation 5.45% Senior Notes due 2034

Identity: duke-senior-2024.1. **Answer:** No.

No feature identified within the examined offering terms: cash principal repayment is provided (duke-senior-2024, PDF p.15); no applicable principal write-down or compulsory common-share conversion was identified. This is a qualified source reading, not a proof of absence in all operative language or documents.

Selected source scope remains qualified.

16. Duke Energy Corporation 5.80% Senior Notes due 2054

Identity: duke-senior-2024.2. **Answer:** No.

No feature identified within the examined offering terms: cash principal repayment is provided (duke-senior-2024, PDF p.15); no applicable principal write-down or compulsory common-share conversion was identified. This is a qualified source reading, not a proof of absence in all operative language or documents.

Selected source scope remains qualified.

17. The Southern Company Series 2025A 6.50% Junior Subordinated Notes due 2085

Identity: southern-junior-2025a.1. **Answer:** No.

No feature identified within the examined offering terms: cash principal repayment is provided (southern-junior-2025a, PDF p.10); no applicable principal write-down or compulsory common-share conversion was identified. This is a qualified source reading, not a proof of absence in all operative language or documents.

Selected source scope remains qualified.

18. Duke Energy Corporation 6.45% Fixed-to-Fixed Reset Rate Junior Subordinated Debentures due 2054

Identity: duke-junior-2024.1. **Answer:** No.

No feature identified within the examined offering terms: cash principal repayment is provided (duke-junior-2024, PDF p.12); no applicable principal write-down or compulsory common-share conversion was identified. This is a qualified source reading, not a proof of absence in all operative language or documents.

Selected source scope remains qualified.

19. NatWest Markets 4.789% senior notes due 2028

Identity: USG6382RGD47, US63906YAM03. **Answer:** Yes.

Yes: the principal can be reduced or cancelled under a disclosed statutory resolution power (nwm-2025-base, PDF p.69). The conditions are retained in the cited evidence; the power need not have been exercised.

Selected source scope remains qualified.

20. BPCE USD SOFR + 1.03% senior preferred notes due 2030

Identity: FR0014014YQ1. **Answer:** Yes.

Yes: the principal can be reduced or cancelled under a disclosed statutory resolution power (bpce-2025-base, PDF p.150). The conditions are retained in the cited evidence; the power need not have been exercised.

Selected source scope remains qualified.

21. CBA EUR ESTR + 0.26% senior notes due October 2026

Identity: XS3206613666. **Answer:** No.

No feature identified within the examined offering terms: cash principal repayment is provided (cba-2025-6700-final, PDF pp.2-4); no applicable principal write-down or compulsory common-share conversion was identified. This is a qualified source reading, not a proof of absence in all operative language or documents.

Dated offering-circular disclosures and selected supplement. The separate agency/deed documents and later law are outside the source conclusion.

22. Compass Group 3.500% senior notes due 15 January 2035

Identity: XS3232968985. **Answer:** No.

No feature identified within the examined offering terms: cash principal repayment is provided (compass-2035-final, PDF pp.2-3); no applicable principal write-down or compulsory common-share conversion was identified. This is a qualified source reading, not a proof of absence in all operative language or documents.

Dated offering disclosures and selected supplement only; incorporated financial filings and complete separate trust/agency agreements are not reconstructed.

23. ING Groep 7.000% perpetual AT1, first reset November 2032

Identity: US456837BT90. **Answer:** Yes.

Yes: the bond can be compulsorily converted into common/ordinary shares under the contractual terms (ing-at1-us456837bt90, PDF p.36). The conditions are retained in the cited evidence; the power need not have been exercised.

Selected source scope remains qualified.

24. Shell International Finance 1.000% senior notes due 10 December 2030

Identity: XS2228291279. **Answer:** No.

No feature identified within the examined offering terms: cash principal repayment is provided (shell-2030-final, PDF pp.2-3); no applicable principal write-down or compulsory common-share conversion was identified. This is a qualified source reading, not a proof of absence in all operative language or documents.

Dated offering disclosures only. Separate complete trust deeds, subsequent issuer substitutions and amendments are not reconstructed.

25. Danske Bank DKK1.25bn perpetual AT1, Series 4, August 2026

Identity: DK0030577200. **Answer:** Yes.

Yes: the bond can be compulsorily converted into common/ordinary shares under the contractual terms (danske-at1-2026-base, PDF p.110). The conditions are retained in the cited evidence; the power need not have been exercised.

Selected source scope remains qualified.

26. Lloyds 6.625% perpetual AT1, first reset September 2035

Identity: US539439BF59. **Answer:** Yes.

Yes: the bond can be compulsorily converted into common/ordinary shares under the contractual terms (lloyds-at1-2025-yahoo-filing, PDF p.1). The conditions are retained in the cited evidence; the power need not have been exercised.

Selected source scope remains qualified.

27. Banco Santander 6.000% perpetual AT1, July 2025

Identity: XS3100756637. **Answer:** Yes.

Yes: the bond can be compulsorily converted into common/ordinary shares under the contractual terms (santander-at1-2025, PDF p.103). The conditions are retained in the cited evidence; the power need not have been exercised.

Feature reading of this dated circular. Incorporated financial reports, all applicable law and later amendments are not a proved closed set.

28. Unilever Capital Corporation 2.750% notes due 22 May 2030

Identity: XS3081333547. **Answer:** No.

No feature identified within the examined offering terms: cash principal repayment is provided (unilever-2030-final, PDF pp.2-4); no applicable principal write-down or compulsory common-share conversion was identified. This is a qualified source reading, not a proof of absence in all operative language or documents.

Feature reading of the 20 May 2025 final terms and expressly named 16 May 2025 Information Memorandum. The separate 16 May 2024 Trust Deed, constitutional documents and financial reports incorporated by reference, later amendments and all applicable law are not independently reconstructed. A negative is bounded to the retained offering disclosures, not a proved absence across the complete legal contract.

29. ABN AMRO 5.750% perpetual AT1, February 2025

Identity: XS3004202811. **Answer:** Yes.

Yes: the principal can be reduced or cancelled under the contractual terms (abn-at1-2025, PDF p.1). The conditions are retained in the cited evidence; the power need not have been exercised.

Feature reading of the dated standalone offering circular. Incorporated financial reports, separate agreements, later amendments and applicable law are not a proved closed set.

30. Enel Finance International 2.625% senior notes due 24 February 2028

Identity: XS3008888953. **Answer:** No.

No feature identified within the examined offering terms: cash principal repayment is provided (enel-2025-final, PDF pp.4-7); no applicable principal write-down or compulsory common-share conversion was identified. This is a qualified source reading, not a proof of absence in all operative language or documents.

Dated final terms, selected 20 December 2024 base and 27 January 2025 supplement only. Financial and constitutional documents, separate agency/guarantee/covenant agreements, later amendments and complete applicable law remain outside proved source closure.

31. KBC Group undated EUR 1 billion AT1, May 2025

Identity: BE0390219856. **Answer:** Yes.

Yes: the principal can be reduced or cancelled under the contractual terms (kbc-at1-2025, PDF p.57). The conditions are retained in the cited evidence; the power need not have been exercised. Standalone issue terms examined; incorporated financial reports, separate agency agreement and later law/amendments not completely reconstructed.

32. Intesa Sanpaolo EUR 750 million 5.500% AT1, February 2026

Identity: XS3298382931. **Answer:** Yes.

Yes: the principal can be reduced or cancelled under the contractual terms (intesa-at1-2026, PDF p.86). The conditions are retained in the cited evidence; the power need not have been exercised. Issue-specific NC6 conditions and common disclosures examined; referenced financial/EMTN information, agency agreement, current law and amendments not completely reconstructed.

33. BASF SE 4.250% Notes due 8 March 2032

Identity: XS2595418596. **Answer:** Unresolved.

No supported yes/no answer: BASF September 9, 2022 programme prospectus with selected Option I conditions and February 27, 2023 supplement are missing.; Affirmative principal repayment terms have not been resolved; Debt status is not established from the selected terms

Only final terms are retained. The September 9, 2022 programme prospectus and February 27, 2023 supplement expressly required on page 2 remain unavailable.

34. LVMH 2.625% Notes due 7 March 2029

Identity: FR001400ZED2. **Answer:** Unresolved.

No supported yes/no answer: 5 potentially relevant clauses require scope/meaning resolution

The matching base and all three supplements named in the final terms are retained. Full agency agreements, subsequent amendments, incorporated issuer information and actual investor facts remain outside the verified offering-document scope.

35. BBVA Series 15 5.625% perpetual AT1 preferred securities, November 2025

Identity: XS3226545617. **Answer:** Yes.

Yes: the bond can be compulsorily converted into common/ordinary shares under the contractual terms (bbva-at1-2025-offering, PDF pp.115-116). The conditions are retained in the cited evidence; the power need not have been exercised.

Source classification is conditional on this dated offering circular. Incorporated accounts, agency agreement, later amendments and real capital/regulatory events are not independently established. Capital-reduction conversion has an express holder opt-out and must not be presented as unconditionally compulsory.

36. SEB USD500m 6.750% perpetual AT1 convertible notes, November 2024

Identity: XS2930103580. **Answer:** Yes.

Yes: the principal can be reduced or cancelled under the contractual terms (seb-at1-2024-information, PDF p.39). The conditions are retained in the cited evidence; the power need not have been exercised.

Retained issue-specific information memorandum only. The July 2023 fiscal agency agreement and named 2024 supplements, subsequent amendments, actual trigger determinations and holder settlement details remain unverified.

Remaining requirements

- Fixture debt label is not evidence of HKMA scope
- Actual capital, event, notice, holder and settlement inputs are absent
- Other non-UBS/Deutsche numerical profiles still require source-specific implementation
- Deutsche arithmetic does not implement all timing, regulatory determination or settlement obligations
- Source-dependent model review is not human legal adjudication or population accuracy
- Actual client, bank-policy, mandate, event and current authority inputs remain absent
- Any contracts not obtained and reviewed remain open
- Unsupported per-issue numerical mechanisms remain explicit implementation work

A passing run can still share an incomplete interpretation between extractor and checker. A wrong edition, applicable omitted condition or unsupported witness would overturn the affected conclusion. The source challenge is descriptive and too small to establish population accuracy.
