Sub-Fund Descriptions

Introduction to the Sub-Funds

The Fund exists to offer investors a range of Sub-Funds with different objectives and strategies and to offer the potential benefits of diversification and professional management to both professional investors and non-professional investors. The Sub-Funds are intended for long-term investment.

Before investing in any Sub-Fund, an investor should understand the risks, costs, and terms of investment of the Sub-Fund and of the relevant Share Class and how the investment would align with their own financial circumstances and tolerance for investment risk. Certain Sub-Funds may invest in assets that are typically illiquid, must be held for a considerable period of time, may provide late returns on investment and generally are appropriate only for investors with a long-term investment profile, and it is recommended that investors only invest a small proportion of their overall investment portfolio in such Sub-Funds.

Investors have sole responsibility for being aware of, and complying with, all laws and regulations which apply to them, whether imposed by their country of tax residence or any other jurisdiction. This includes understanding the potential legal and tax consequences and resolving any fines, claims or other penalties that arise from failure to comply.

The Board recommends that every investor obtain legal, tax and financial advice before investing initially (and under any other circumstances where legal, tax or investment concerns may be relevant) as they maintain and/or increase their investment.

Before Making an Initial Investment

WHAT TO KNOW ABOUT RISK

While each Sub-Fund takes risks that its Investment Manager considers to be appropriate in light of that Sub-Fund's stated objective and policies, investors must evaluate Sub-Fund risks in terms of whether they are consistent with their own investment goals and risk tolerances. Risk is an integral component of a Sub-Fund's return.

With these Sub-Funds, as with most investments, future performance will differ from past performance. There is no guarantee that any Sub-Fund will meet its objectives or achieve any particular level of performance.

The value of an investment in any Sub-Fund can go up and down, and a Shareholder could lose money. No Sub-Fund is intended as a complete investment plan for any Shareholder.

In addition, Shareholders may experience currency risk if the currency in which they subscribe or redeem is different to the Share Class Currency, Sub-Fund Base Currency or the currency of the Sub-Fund's assets. The exchange rates between the relevant currencies can have a significant impact on the returns of a Share Class.

Certain risks of each Sub-Fund are listed on the following pages. By consulting the list of risks and their definitions which appear in [Risk Descriptions](#), Shareholders can better understand the overall risk to an investment in a Sub-Fund. Shareholders should also review the [Risk Descriptions](#) in full.

WHO CAN INVEST IN THESE SUB-FUNDS

The Subscription, sale and holding of Shares in the Fund is

restricted to Eligible Investors subscribing on their own behalf or on behalf of other Eligible Investors (subject to Board discretion as described in this Prospectus). Shares may under no circumstances be beneficially or legally held or owned by any person who is not an Eligible Investor.

In a given jurisdiction, only certain Sub-Funds and Share Classes will be registered. Distributing this Prospectus or offering Shares for sale is legal only where the Shares are registered for sale or where offer or sale is not prohibited by local law or regulation. This Prospectus is not an offer or solicitation in any jurisdiction, or to any investor, where such a solicitation is not legally permitted.

Sub-Funds may be marketed to both Professional Investors and Retail Investors, where permitted by local law or regulation. To the extent that, in the EEA, Shares are made available to Retail Investors, a PRIIPs KID shall be provided to each prospective EEA Retail Investor before they invest in the relevant Sub-Fund within the meaning of Regulation (EU) No 1286/2014 of the European Parliament and of the Council of 26 November 2014 on PRIIPs KID.

In the United States, Shares are not and will not be registered either with the US Securities and Exchange Commission or any other entity, federal or otherwise, within the United States or any of its territories or possessions.

The Fund is not registered under the US Investment Company Act of 1940. Therefore, in principle, Shares are not available to, or for the benefit of, any US Person. In principle, the Fund and/or the AIFM will not, but reserve the right to, accept any Application.

Form from or for the benefit of or holding by a US Person, and will, in principle, not accept any direct subscription from, or direct holding by, any individual who is a US citizen or a US tax resident, or from any non-US partnership, non-US trust or similar tax-transparent non-US entity that has any partner, beneficiary or owner that is a US Person.

Unless otherwise indicated in the relevant Sub-Fund Descriptions, the Shares are being offered in reliance on the exemption from registration provided by Regulation S under the Securities Act, may not be transferred or resold except in accordance with the provisions of Regulation S promulgated under the Securities Act and will be sold only to Investors who represent in their Application Form, among other things, all of the following:

- they are acquiring the Shares for their own account, for investment purposes only and not with a view to the resale or distribution thereof
- they are aware that the Shares have not been registered under the Securities Act, their right to transfer the Shares will be restricted, and there is no market for the Shares
- they are not a US Person

The Fund may be permitted to purchase or hold securities which are subject to sanctions laws in some jurisdictions other than Luxembourg and the European Union. Investors from these jurisdictions should seek professional advice regarding local sanction laws. Investors from these jurisdictions may need to redeem their holdings in the Fund.

WHO CAN INVEST IN WHICH SHARE CLASSES

Investors should consult Share Classes and Costs to see which Share Classes they are eligible to hold. Some Shares are available to all Eligible Investors, others are available only to Eligible Investors who meet specific requirements such as qualifying as Institutional Investors. In all cases, there are minimum investment requirements which the AIFM may waive at its discretion.

Where required in a given jurisdiction, Retail Investors may be subject to an assessment of suitability prior to investing in accordance with Article 25 of MiFID II.

WHICH INFORMATION TO USE

In deciding whether to invest in a Sub-Fund, prospective investors must read this Prospectus (including the relevant [Sub-Fund Descriptions](#)), the relevant PRIIPS KID (if not a Professional Investor), any relevant local disclosure document as required in a specific jurisdiction, the Application Form including the terms and conditions, the Articles and the Fund's most recent annual report. These documents are made available, together with any more recent semi-annual report, as described in [Notices and Publications](#) under [Ongoing Communications](#). By buying Shares in a Sub-Fund, an investor is considered to have accepted the terms described in any of these documents. Together, all these documents contain the only approved information about the Sub-Funds and the Fund. Any information or representation given or made by any person which is not contained herein or in any other document which may be available for inspection by the public should be regarded as unauthorised and should accordingly not be relied upon.

The Board believes that they have taken all reasonable care to ensure that the information contained in this Prospectus is

accurate, is current at the date of this Prospectus, and does not omit any material information. In case of any inconsistency in translations of this Prospectus, the English version will prevail.

Private Markets Fund

Objective, Process, Policies and Risks

OBJECTIVE

To provide long-term capital appreciation through a diversified portfolio of private market investments.

INVESTMENT PROCESS

Investment approach

- Invests in an actively-managed portfolio of private equity investments.
- Primarily utilizes secondaries, co-investments, and opportunistic primary investments to access buyout, venture, and growth opportunities.
- Focuses on the small to middle market, which is less efficient and exhibits greater performance dispersion, making manager selection critical.

ESG approach ESG Integrated

Benchmark None.

POLICIES

Main investment exposure

The Sub-Fund invests primarily in an actively managed portfolio of private equity and other private assets (collectively, "private market investments"). The Sub-Fund's private market investments focus on private equity strategies including private equity and venture capital. The Sub-Fund's investment exposure to these strategies is implemented via a variety of investment types that include:

- investments in private equity funds ("Portfolio Funds") acquired in privately negotiated transactions from investors in these Portfolio Funds, and/or in connection with a restructuring transaction of a Portfolio Fund(s) ("Secondary Investments");
- indirect investments in the equity of private companies, alongside private equity funds and/or other private equity firms via special purpose vehicles ("Co-Investments"); and
- primary investments in newly formed Portfolio Funds ("Primary Investments").

The Sub-Fund invests principally in Secondary Investments and Co-Investments and, to a lesser extent, Primary Investments, although the allocation among those types of investments and other investments may vary from time to time.

Investments in Portfolio Funds are made in consideration of the imbedded portfolio of companies and the ability of the Portfolio Funds to successfully invest uncommitted capital and build value with the existing underlying assets. Investments in one (1) Portfolio Fund may constitute more than 25% of the Sub-Fund's NAV.

The Sub-Fund's asset allocation and amount of private market investments may be based, in part, on anticipated future capital calls from Portfolio Funds and distributions of the underlying investments. This may result in the Sub-Fund making commitments to private market investments in an aggregate amount that exceeds the total amounts invested by Investors in the Sub-Fund at the time of such commitment.

The Sub-Fund's private market investments are predominantly located in the United States and Europe, but may be located anywhere globally, including emerging markets.

The investment strategy of the Sub-Fund may be conducted through the participation of intermediary entities, including special purpose vehicles, securitisation vehicles, aggregator vehicles or Holding Companies or other intermediary structures.

Other investment exposures

Credit investments, short-term debt securities, money market instruments, money market funds and cash and/or cash equivalents for liquidity management purposes.

During normal market conditions, it is generally not expected that the Sub-Fund will hold more than 20% of its assets in such liquid assets for extended periods of time. For temporary defensive purposes, liquidity management or in connection with implementing changes in the asset allocation, the Sub-Fund may on a temporary basis hold a substantially higher amount of liquid assets and other liquid investments.

Borrowing

The Sub-Fund is permitted to borrow money or issue debt securities in an amount up to 30% of its assets for a range of purposes, including to provide liquidity for capital calls by Portfolio Funds, to satisfy redemptions, to manage timing issues in connection with the inflows of additional capital and the acquisition of Sub-Fund investments and to otherwise satisfy Sub-Fund obligations.

Maximum expected leverage Gross Method (per AIFM Regulation): 500%; Commitment Method (per AIFM Regulation): 400%.

Currencies Sub-Fund Base Currency: USD. Currencies of asset denomination: typically USD. Hedging approach: not applicable.

MAIN RISKS

The Sub-Fund is subject to **General Risks** and **Risks related to Investments from the techniques and Exposures** it uses to seek to achieve its objective.

The table below explains how these risks relate to each other and the **Outcomes to the Shareholder** that could affect an investment in the Sub-Fund.

Investors should read [Risk Descriptions](#) in full for a complete understanding of the overall risk to the Sub-Fund and for a full description of each risk mentioned below.

Investment Risks from the Sub-Fund's techniques and exposure

Exposure

Liquidity	Secondary Investments
Private Markets	Co-Investments
Private Equity

Outcomes to the Shareholder Potential impact of the risks above

Loss Shareholders could lose some or all of their money.	Volatility Shares of the Sub-Fund will fluctuate in value.	Failure to meet the Sub-Fund's objective.
---	---	--

Investor Considerations

Sub-Fund availability Investors should consult Share Classes and Costs to see which Share Classes they may hold. The Sub-Fund is available to investors that are eligible to purchase the Shares in their jurisdiction.

Liquidity Management

The Sub-Fund's underlying investments are predominantly illiquid. The AIFM uses a range of features and tools to manage this, summarised as follows and set out in more detail below under "Important Dealing and Cost Information":

- **Redemption Limit at 5% of NAV** per Redemption Day. This is a routinely applied liquidity control feature. Where the Sub-Fund's liquidity profile allows, the AIFM may, in its discretion, accommodate redemption requests exceeding the Redemption Limit. The Redemption Limit may be reduced in exceptional circumstances where the Redemption Gate is activated (as described below).
- **Redemption Gate at 2% of NAV.** This is an exceptional and temporary discretionary control to further limit redemptions, per Redemption Day, under certain limited circumstances, such as where there are stressed market conditions, a deterioration in the liquidity of the already illiquid underlying assets, circumstances where the AIFM has concerns about the Sub-Fund's ability to prudently meet redemption requests whilst operating in the manner intended, or unforeseen liabilities or obligations of the Sub-Fund that would make processing redemptions at the

Redemption Limit detrimental to the interest of Shareholders. The Redemption Gate is designed and applied by the AIFM with a view to protecting the interests of all Shareholders and is preferable to other liquidity management measures such as a full suspension of redemptions.

- **Extension of the Redemption Cut-Off Time**, this is a temporary discretionary control that extends the length of the required advance notice for redemptions if the Investment Manager needs additional time to liquidate the underlying assets
- **Temporary suspension of redemptions**, this is a measure that suspends trading and may be applied under very specific circumstances as set out under "Rights Related to Suspension of the Calculation of the NAV and Suspension of Dealings"

Investor profile

The Sub-Fund may appeal to investors who:

- seek long-term capital growth through exposure to private market investments
- intend to use the Sub-Fund as part of an investment portfolio and not as a complete investment plan

Hedging method for currency hedged Share Classes NAV hedge. For information on currency hedging at share class level, see [Share Class Naming Conventions](#) in section [Share Classes and Costs](#).

See Important dealing and Cost Information below and [Performance Fee](#).

Share Class Fees and Characteristics

One-off charges taken before or after investing (maximum)			Fees and expenses taken from the Sub-Fund over a year			
Base Class	Initial Charge	Redemption Charge	Annual Management and Advisory Fee	Distribution Fee	Operating and Administrative Expenses (Max)	Performance fee
A (perf)	5.00%	-	2.10%	-	0.50%	10.00%

SD1 (perf)*	-	-	0.50%**	0.50%	0.30%	10.00%
X	-	-	-	-	0.25%	-
X (perf)	-	-	-	-	0.25%	10.00%

Redemptions made before the expiry of a one-year period will be subject to a 2% early redemption fee, except for J, S1, SC1 and SD1 Share Classes, as detailed in Share Classes and Costs.

*S1, SC1 and SD1 - Redemptions made before the expiry of a three-year period following the Subscription Day on which a Shareholder was accepted into the Sub-Fund will be subject to an early redemption fee of 5%. Where a Shareholder has subscribed on several Subscription Days, a separate three-year period will apply to each Subscription Day, and the three-year period for a Share will start on the Subscription Day on which that specific Share was subscribed.

** Year 1 – 0%; Year 2 – 0.25%; Year 3 and thereafter – 0.50%.

For a complete description of fees and costs, see [Share Classes and Costs](#).

Private Markets Fund

Important Dealing and Cost Information

Ramp-up Period The Sub-Fund will comply with the portfolio composition, the diversification requirements and the borrowing limit mentioned above within three years from the date on which the first subscription in the Sub-Fund is accepted (the “Ramp-up Period”). These requirements and limits do not apply during any permitted period of temporary suspension.

Any potential dividend distributions associated with a particular Share Class may also be subject to the Ramp-up Period.

Subscribing for Shares Subscriptions are accepted on a monthly basis, on the first day of each calendar month, or if such day does not fall on a Business Day, the immediately following Business Day, or such other day or days as the Board and/or the AIFM may from time to time decide in its discretion, each such day, being a subscription day (the “Subscription Day”).

Prospective investors wishing to invest in the Sub-Fund must provide to the AIFM, by 14.30/2.30 p.m. C.E.T. 5 Business Days prior to the applicable Subscription Day (the “Subscription Cut-Off Time”), a subscription request (the “Subscription Notice”), in writing or by way of electronic means.

Each initial Subscription Notice shall include: (i) a completed and executed Application Form; and (ii) such information as may be required by the Fund, the AIFM or agents acting on its behalf, including, but not limited to, “know-your-customer” and anti-money laundering documentation and any other required information. Prospective investors, by executing an Application Form, agree to be bound by the Fund Documents. A Prospective investor whose Application Form has been accepted by the Fund is admitted as an Investor in the Sub-Fund (an “Investor”) as of the relevant Subscription Day. Application Forms received after the Subscription Cut-Off Time will be processed, if accepted, on the next Subscription Day.

Subscriptions must be funded by the full amount, to an account specified by the Fund, at least 3 Business Days before the relevant Subscription Day (except for certain feeder funds investing in the Sub-Fund, which may fund their subscriptions by the full amount no later than the Valuation Day, at the discretion of the AIFM). Shares will be issued as soon as practicable following the release of the Net Asset Value per Share, typically within 25 Business Days after the Valuation Day, and on the condition that the Investor has paid their Subscriptions in full, as described above. If Investors fund their Subscriptions prior to the settlement date, such amounts will be held on a collection account (which will not accrue nor bear any interest), and they will not receive Shares until after the release of the Net Asset Value per Share, as described above.

Switching Shares Permitted only between shares of the same Sub-Fund and of the same currency. Switches from S1, SC1 and SD1 Share Classes are only permitted to S1, SC1 and SD1 Share Classes of the same Sub-Fund and of the same currency. For further information on how to switch Shares, please refer to [Switching Shares](#).

Redeeming Shares

Each Shareholder shall be entitled to request that a portion or all of their Shares be redeemed without charge on or after the expiry of a one-year period following the Subscription Day on which the relevant Shareholder was accepted into the Sub-Fund. If Shareholders have subscribed on several Subscription Days, the one year period shall apply respectively to the portion of Shares subscribed to on each such Subscription Day.

Redemptions made before the expiry of the one year period will be subject to a 2% early redemption fee, except for J, S1, SC1 and SD1 Share Classes, as detailed in ‘Share Classes and Costs’.

Redemption requests are accepted on the first day of each calendar quarter (1 January, 1 April, 1 July, 1 October or if such day does not fall on a Business Day, the immediately following Business Day) (each, a “Redemption Day”).

To request redemption, a Redemption request in writing or by way of electronic means must be submitted to the AIFM (the “Redemption Notice”) specifying the number of Shares to be redeemed and the Redemption Day in respect of which the request is made. Such Redemption Notice must be received by the AIFM no later than one month prior to the relevant Redemption Day, and at the latest by 14.30/2.30 p.m. C.E.T., on the first Business Day of the calendar month preceding the applicable Redemption Day (December for the 1 January Redemption Day, March for the 1 April Redemption Day, June for the 1 July Redemption Day, September for the 1 October Redemption Day) (the “Redemption Cut-Off Time”).

Redemption Notices received after the Redemption Cut-Off Time will be deemed to have been validly submitted at the immediately following Redemption Day, subject to any notice otherwise from the AIFM. Redemption requests will only be accepted in numbers of Shares, not in currency amounts.

Redemption Notices that have been validly submitted cannot be cancelled.

The Board will use reasonable efforts to pay out redemption proceeds within 15 Business Days after the NAV of the relevant Redemption Day has been released. All payment periods can be extended by weekends, currency trading holidays.

Redemption requests will not be satisfied in kind.

Redemption Limit Redemptions are limited to 5% of the Sub-Fund’s Net Asset Value in respect of each Redemption Day (the “Redemption Limit”). This is a standard liquidity control that will be applied in respect of each Redemption Day, as follows:

- All Shares tendered for redemption on that Redemption Day will be aggregated, and each Shareholder submitting a Redemption Notice will be redeemed a pro-rata portion representing in aggregate 5% of the Sub-Fund’s Net Asset Value, based on the total amount of Shares tendered for redemption by all redeeming Shareholders.
- There will be no automatic transfer or rolling-over of the unexecuted portion of redemption requests to a subsequent Redemption Day. Any such unexecuted portion will be cancelled, and Shareholders will be

required to submit a new Redemption Notice for subsequent Redemption Days, should they wish to redeem further.

- The Redemption Limit will not apply on any Redemption Day when the Redemption Gate is in effect. Please see directly below for further detail.

Where the Sub-Fund's liquidity profile allows, the AIFM may accommodate redemption requests exceeding the Redemption Limit. The AIFM will assess the available liquidity of the Sub-Fund's underlying assets on each Redemption Day and, where it is feasible to do so without adversely affecting the interests of remaining Shareholders, may process redemptions in excess of the Redemption Limit on a discretionary basis.

Redemption Gate A Redemption Gate is an exceptional, temporary and partial restriction of the right of Shareholders to redeem their Shares. The Redemption Gate is preferable to a full suspension of redemptions as it allows partial redemptions to continue whilst protecting the interests of Shareholders.

It is a liquidity management tool that the AIFM may activate only in certain limited circumstances such as stressed market conditions, a deterioration in the liquidity of the already illiquid underlying assets, circumstances where the AIFM has concerns about the Sub-Fund's ability to prudently meet redemption requests whilst operating in the manner intended, or unforeseen liabilities or obligations of the Sub-Fund that would make processing redemptions at the Redemption Limit detrimental to the interest of Shareholders. The AIFM will only consider activating the Redemption Gate where, taking into account the best interest of Shareholders, doing so is necessary to protect the Shareholders and the Sub-Fund. The Redemption Gate will only be activated if, on any Redemption Day, the total redemption requests received exceed 2% of the Sub-Fund's Net Asset Value. In such case, the AIFM may, at its sole discretion, activate a Redemption Gate. In determining the activation of the Redemption Gate, the AIFM considers factors such as the liquidity of the underlying assets, prevailing market conditions and expected cash flows, and the interest of all Shareholders (both redeeming and remaining).

If the Redemption Gate is activated:

- The Redemption Gate shall apply per Redemption Day, and redemption requests are not aggregated across redemption periods.
- All Shares tendered for redemption on that Redemption Day will be aggregated, and each Shareholder submitting a Redemption Notice will be redeemed a pro-rata portion representing in aggregate 2% of the Sub-Fund's Net Asset Value, based on the total amount of Shares tendered for redemption by all redeeming Shareholders.
- There will be no automatic transfer or rolling-over of the unexecuted portion of redemption requests to a subsequent Redemption Day. Any such unexecuted portion will be cancelled, and Shareholders will be required to submit a new Redemption Notice for subsequent Redemption Days, should they wish to redeem further.

For the avoidance of doubt, in normal market conditions, the standard Redemption Limit per Redemption Day would apply,

and the Redemption Gate would not be activated. The AIFM will lift the Redemption Gate and return to normal redemption processing as soon as the exceptional circumstances that led to its activation have been resolved.

Extension of the Redemption Cut-Off Time

In certain circumstances, the AIFM may modify the Redemption Cut-Off Time through an extension of the standard Redemption Cut-Off Time for a period of up to around three calendar quarters (200 Business Days) prior to the applicable Redemption Day or as may be required under regulatory guidance relating to the AIFMD, as may be amended from time to time. Such circumstances may include situations where the Investment Manager needs additional time to sell underlying assets to create additional liquidity.

Full details in respect of any extension of the Redemption Cut-Off Time will be promptly disclosed to investors on the website am.jpmorgan.com/lu/.

The AIFM will aim to publish the extension detail in advance of the standard Redemption Cut-Off Time for the next Redemption Day. Any Redemption Notice submitted to the AIFM for a given Redemption Day prior to any extension of the Redemption Cut-Off Time will be accepted in respect of the Redemption Day corresponding to the Extension of the Redemption Cut-Off Time.

If the Redemption Cut-Off Time is extended, the AIFM will evaluate any extension of the Redemption Cut-Off Time on a quarterly basis, or as frequently as necessary, in line with the volume of redemption requests served to the Sub-Fund for a given Redemption Day.

Temporary Suspensions

The Board may temporarily suspend or defer the calculation of NAVs or the Subscription, redemption (where applicable) and/ or switching of Shares for one or more Sub-Funds and/ or Share Classes under certain specific circumstances as set out under "Rights Related to Suspension of the Calculation of the NAV and Suspension of Dealings".

Term

The Sub-Fund is established for an indefinite period of time.

For more information, see Liquidation of a Sub-Fund or Share Class.

Valuation/NAV Calculation

The NAV of each Share Class will be determined by the Administrator (which may be supported by third parties), under the responsibility of the AIFM, as at each Valuation Day.

A "Valuation Day" is the last Business Day of each calendar month and any other dates as the AIFM may determine, based on the fair market value of the Investments and in accordance with the provisions of the Articles, this Prospectus, and Luxembourg GAAP.

Error Correction

Any NAV that experiences a calculation error that exceeds a 3.00% tolerance threshold (positive or negative) will be addressed according to the AIFM's NAV correction policy and CSSF Circular 24/856.

Distributions

Timing of distributions The Sub-Fund will issue Accumulating Share Classes and may issue Distributing Share Classes.

The Board may but cannot guarantee that it will make

distributions, and any distributions will be made while considering the best interests of the Shareholders and the Sub-Fund as a whole. The amount, timing and manner of distributions from the Sub-Fund to the Shareholders will be at the discretion of the Board and in accordance with relevant regulations. For further information, please refer to sub-section Share Class Naming Conventions in section Share Classes and Costs.

No Distributions in kind The Sub-Fund will not make distributions in kind to Shareholders.

Costs

Annual Management and Advisory Fee The AIFM will be entitled to receive the Annual Management and Advisory Fee in respect of the relevant Share Class, payable monthly in arrears from the Sub-Fund's assets. The Annual Management and Advisory Fee shall be equal to the percentage set out in the Share Class Table above.

Performance Fee The AIFM will be entitled to receive a Performance Fee, which will be ten per cent (10%) (the "Performance Fee Rate") of the relevant Share Class positive returns in excess of the High Water Mark ("HWM") measured over the Calculation Period of the Share Class.

Please refer to Performance Fee in the Share Classes and Costs for further information, including worked examples.

One or more underlying investments may separately be subject to a performance fee or carried interest arrangement.

Investment Manager Fee The Investment Manager will be entitled to receive from the AIFM out of the Annual Management and Advisory Fee received by the AIFM a fee, in respect of its services, as agreed between the AIFM and the Investment Manager.

JPMorgan Part II —

Credit Markets Fund

Objective, Process, Policies and Risks

OBJECTIVE

To provide income and capital appreciation through credit investments.

INVESTMENT PROCESS

Investment approach

- Invests in an actively-managed portfolio of credit investments.
- Primarily utilizes primary investments, secondaries and co-investments.

ESG approach ESG Integrated

Benchmark None.

POLICIES

Main investment exposure

The Sub-Fund invests in an actively managed portfolio of credit investments, including but not limited to loans, bonds, other credit instruments, collateralized debt obligations, collateralized loan obligations, asset-backed securities, credit-linked notes or other structured finance securities (“credit investments”).

The Sub-Fund’s investment exposure to credit investments is implemented via a variety of investment types that include:

- investments in credit funds or pools of credit assets (“Portfolio Funds”) acquired in privately negotiated transactions from investors in these Portfolio Funds, and/or in connection with a restructuring transaction of a Portfolio Fund(s) (“Secondary Investments”);
- investments in credit investments, either directly or indirectly via special purpose or other vehicles sponsored and controlled by various unaffiliated asset managers (“Co-Investments”);
- primary investments in newly formed Portfolio Funds or into existing evergreen Portfolio Funds (“Primary Investments”); and
- structured finance securities.

The allocation among those types of investments and other investments may vary from time to time.

The Sub-Fund may also have exposure to privately placed debt securities and other yield-oriented investments, including without limitation syndicated and other floating rate senior secured loans issued in private placements by corporations, partnerships and other business entities, privately placed bank loans and restricted securities.

The Sub-Fund’s asset allocation and amount of credit investments may be based, in part, on anticipated future capital calls from Portfolio Funds and distributions of the underlying investments. This may result in the Sub-Fund making commitments to private market investments in an aggregate amount that exceeds the total amounts invested by Investors in the Sub-Fund at the time of such commitment. Investments in one (1) Portfolio Fund may constitute more than 25% of the Sub-Fund’s NAV.

The Sub-Fund’s credit investments are predominantly located in the United States, but may be located anywhere globally, including emerging markets.

The investment strategy of the Sub-Fund may be conducted through the participation of intermediary entities, including special purpose vehicles, securitisation vehicles, aggregator vehicles or Holding Companies or other intermediary structures.

Other investment exposures

Short-term debt securities, money market instruments, money market funds and other UCIs and cash and/or cash equivalents for liquidity management purposes.

During normal market conditions, it is generally not expected that the Sub-Fund will hold more than 20% of its assets in such liquid assets for extended periods of time. For temporary defensive purposes, liquidity management or in connection with implementing changes in the asset allocation, the Sub-Fund may hold a substantially higher amount of liquid assets and other liquid investments.

Borrowing

The Sub-Fund is permitted to borrow money or issue debt securities in an amount up to 70% of its assets for a range of purposes, including to provide liquidity for capital calls by Portfolio Funds and Co-Investments, to satisfy redemptions, to manage timing issues in connection with the inflows of additional capital and the acquisition of Sub-Fund investments and to otherwise satisfy Sub-Fund obligations.

Derivatives *Used for:* efficient portfolio management; hedging. TRS including CFD: none.

Maximum expected leverage Gross Method (per AIFM Regulation): 550%; Commitment Method (per AIFM Regulation): 450%.

Currencies *Sub-Fund Base Currency:* USD. *Currencies of asset denomination:* any. *Hedging approach:* flexible.

MAIN RISKS

The Sub-Fund is subject to **General Risks** and **Risks related to Investments from the techniques and Exposures** it uses to seek to achieve its objective.

The table below explains how these risks relate to each other and the **Outcomes to the Shareholder** that could affect an investment in the Sub-Fund.

Investors should read [Risk Descriptions](#) in full for a complete understanding of the overall risk to the Sub-Fund and for a full description of each risk mentioned below.

Investment Risks from the Sub-Fund's techniques and exposure		
Techniques	Exposure	
Derivatives	Liquidity	
Hedging	Private Markets	
	Credit Investments	
	Portfolio Funds	
	Secondary Investments	
	Co-Investments	
Other associated risks <i>Further risks the Sub-Fund is exposed to from its use of the techniques and securities above</i>		
Liquidity, Currency, Interest Rate, Market		
Outcomes to the Shareholder <i>Potential impact of the risks above</i>		
Loss Shareholders could lose some or all of their money.	Volatility Shares of the Sub-Fund will fluctuate in value.	Failure to meet the Sub-Fund's objective.

Investor Considerations

Sub-Fund availability Investors should consult Share Classes and Costs to see which Share Classes they may hold. The Sub-Fund is available to investors that are eligible to purchase the Shares in their jurisdiction.

Liquidity Management

The Sub-Fund's underlying investments are predominantly illiquid. The AIFM uses a range of features and tools to manage this, summarised as follows and set out in more detail below under "Important Dealing and Cost Information":

- **Redemption Limit at 5% of NAV** per Redemption Day. This is a routinely applied liquidity control feature. Where the Sub-Fund's liquidity profile allows, the AIFM may, in its discretion, accommodate redemption requests exceeding the Redemption Limit. The Redemption Limit may be reduced in exceptional circumstances where the Redemption Gate is activated (as described below).
- **Redemption Gate at 2% of NAV.** This is an exceptional and temporary discretionary control to further limit redemptions, per Redemption Day, under certain limited circumstances, such as where there are stressed market conditions, a deterioration in the liquidity of the already illiquid underlying assets, circumstances where the AIFM has concerns about the Sub-Fund's ability to prudently meet redemption requests whilst operating in the manner intended, or unforeseen liabilities or obligations of the Sub-Fund

that would make processing redemptions at the Redemption Limit detrimental to the interest of Shareholders. The Redemption Gate is designed and applied by the AIFM with a view to protecting the interests of all Shareholders and is preferable to other liquidity management measures such as a full suspension of redemptions.

- **Extension of the Redemption Cut-Off Time**, this is a temporary discretionary control that extends the length of the required advance notice for redemptions if the Investment Manager needs additional time to liquidate the underlying assets
- **Temporary suspension of redemptions**, this is a measure that suspends trading and may be applied under very specific circumstances as set out under "Rights Related to Suspension of the Calculation of the NAV and Suspension of Dealings"

Investor profile

The Sub-Fund may appeal to investors who:

- seek income and capital appreciation through credit investments
- intend to use the Sub-Fund as part of an investment portfolio and not as a complete investment plan

Hedging method for currency hedged Share Classes NAV hedge For information on currency hedging at share class level, see [Share Class Naming Conventions](#) in section [Share Classes and Costs](#).

Performance fee model See Important dealing and Cost Information below and [Performance Fee](#).

Share Class Fees and Characteristics

Redemptions made before the expiry of a one-year period will be subject to a 2% early redemption fee except for J Share Classes, as detailed in Share Classes and Costs.

For a complete description of fees and costs, see [Share Classes and Costs](#).

Credit Markets Fund

Important Dealing and Cost Information

Ramp-up Period The Sub-Fund will comply with the portfolio composition, the diversification requirements and the borrowing limit mentioned above within three years from the date on which the first subscription in the Sub-Fund is accepted (the “**Ramp-up Period**”). These requirements and limits do not apply during any permitted period of temporary suspension.

Any potential dividend distributions associated with a particular Share Class may also be subject to the Ramp-up Period.

Subscribing for Shares Subscriptions are accepted on a monthly basis, on the first day of each calendar month, or if such day does not fall on a Business Day, the immediately following Business Day, or such other day or days as the Board and/or the AIFM may from time to time decide in its discretion, each such day, being a subscription day (the “Subscription Day”).

Prospective investors wishing to invest in the Sub-Fund must provide to the AIFM, by 14.30/2.30 p.m. C.E.T. 5 Business Days prior to the applicable Subscription Day (the “Subscription Cut-Off Time”), a subscription request (the “Subscription Notice”), in writing or by way of electronic means

Each initial Subscription Notice shall include: (i) a completed and executed Application Form; and (ii) such information as may be required by the Fund, the AIFM or agents acting on its behalf, including, but not limited to, “know-your-customer” and anti-money laundering documentation and any other required information. Prospective investors, by executing an Application Form, agree to be bound by the Fund Documents. A Prospective investor whose Application Form has been accepted by the Fund is admitted as an Investor in the Sub-Fund (an “Investor”) as of the relevant Subscription Day. Application Forms received after the Subscription Cut-Off Time will be processed, if accepted, on the next Subscription Day.

Subscriptions must be funded by the full amount, to an account specified by the Fund, at least 3 Business Days before the relevant Subscription Day (except for certain feeder funds investing in the Sub-Fund, which may fund their subscriptions by the full amount no later than the Valuation Day, at the discretion of the AIFM). Shares will be issued as soon as practicable following the release of the Net Asset Value per Share, typically within 25 Business Days after the Valuation Day, and on the condition that the Investor has paid their Subscriptions in full, as described above. If Investors fund their Subscriptions prior to the settlement date, such amounts will be held on a collection account (which will not accrue nor bear any interest), and they will not receive Shares until after the release of the Net Asset Value per Share, as described above.

Switching Shares Permitted only between shares of the same Sub-Fund and of the same currency. For further information on how to switch Shares, please refer to

Switching Shares.

Redeeming Shares

Each Shareholder shall be entitled to request that a portion or all of their Shares be redeemed without charge on or after the expiry of a one-year period following the Subscription Day on which the relevant Shareholder was accepted into the Sub-Fund. If Shareholders have subscribed on several Subscription Days, the one year period shall apply respectively to the portion of Shares subscribed to on each such Subscription Day.

Redemptions made before the expiry of the one year period will be subject to a 2% early redemption fee except for J Share Classes, as detailed in ‘Share Classes and Costs’.

Redemption requests are accepted on the first day of each calendar quarter (1 January, 1 April, 1 July, 1 October or if such day does not fall on a Business Day, the immediately following Business Day) (each, a “Redemption Day”).

To request redemption, a Redemption request in writing or by way of electronic means must be submitted to the AIFM (the “Redemption Notice”) specifying the number of Shares to be redeemed and the Redemption Day in respect of which the request is made). Such Redemption Notice must be received by the AIFM no later than one month prior to the relevant Redemption Day, and at the latest by 14.30/2.30 p.m. C.E.T., on the first Business Day of the calendar month preceding the applicable Redemption Day (December for the 1 January Redemption Day, March for the 1 April Redemption Day, June for the 1 July Redemption Day, September for the 1 October Redemption Day) (the “Redemption Cut-Off Time”).

Redemption Notices received after the Redemption Cut-Off Time will be deemed to have been validly submitted at the immediately following Redemption Day, subject to any notice otherwise from the AIFM. Redemption requests will only be accepted in numbers of Shares, not in currency amounts.

Redemption Notices that have been validly submitted cannot be cancelled.

The Board will use reasonable efforts to pay out redemption proceeds within 15 Business Days after the NAV of the relevant Redemption Day has been released. All payment periods can be extended by weekends, currency trading holidays.

Redemption requests will not be satisfied in kind.

Redemption Limit Redemptions are limited to 5% of the Sub-Fund’s Net Asset Value in respect of each Redemption Day (the “Redemption Limit”). This is a standard liquidity control that will be applied in respect of each Redemption Day, as follows:

- All Shares tendered for redemption on that Redemption Day will be aggregated, and each Shareholder submitting a Redemption Notice

will be redeemed a pro-rata portion representing in aggregate 5% of the Sub-Fund's Net Asset Value, based on the total amount of Shares tendered for redemption by all redeeming Shareholders.

- There will be no automatic transfer or rolling-over of the unexecuted portion of redemption requests to a subsequent Redemption Day. Any such unexecuted portion will be cancelled, and Shareholders will be required to submit a new Redemption Notice for subsequent Redemption Days, should they wish to redeem further.
- The Redemption Limit will not apply on any Redemption Day when the Redemption Gate is in effect. Please see directly below for further detail.

Where the Sub-Fund's liquidity profile allows, the AIFM may accommodate redemption requests exceeding the Redemption Limit. The AIFM will assess the available liquidity of the Sub-Fund's underlying assets on each Redemption Day and, where it is feasible to do so without adversely affecting the interests of remaining Shareholders, may process redemptions in excess of the Redemption Limit on a discretionary basis.

Redemption Gate A Redemption Gate is an exceptional, temporary and partial restriction of the right of Shareholders to redeem their Shares. The Redemption Gate is preferable to a full suspension of redemptions as it allows partial redemptions to continue whilst protecting the interests of Shareholders.

It is a liquidity management tool that the AIFM may activate only in certain limited circumstances such as stressed market conditions, a deterioration in the liquidity of the already illiquid underlying assets, circumstances where the AIFM has concerns about the Sub-Fund's ability to prudently meet redemption requests whilst operating in the manner intended, or unforeseen liabilities or obligations of the Sub-Fund that would make processing redemptions at the Redemption Limit detrimental to the interest of Shareholders. The AIFM will only consider activating the Redemption Gate where, taking into account the best interest of Shareholders, doing so is necessary to protect the Shareholders and the Sub-Fund. The Redemption Gate will only be activated if, on any Redemption Day, the total redemption requests received exceed 2% of the Sub-Fund's Net Asset Value. In such case, the AIFM may, at its sole discretion, activate a Redemption Gate. In determining the activation of the Redemption Gate, the AIFM considers factors such as the liquidity of the underlying assets, prevailing market conditions and expected cash flows, and the interest of all Shareholders (both redeeming and remaining).

If the Redemption Gate is activated:

- The Redemption Gate shall apply per Redemption Day, and redemption requests are not aggregated across redemption periods.
- All Shares tendered for redemption on that Redemption Day will be aggregated, and each Shareholder submitting a Redemption Notice will be redeemed a pro-rata portion representing in aggregate 2% of the Sub-Fund's Net Asset

Value, based on the total amount of Shares tendered for redemption by all redeeming Shareholders.

- There will be no automatic transfer or rolling-over of the unexecuted portion of redemption requests to a subsequent Redemption Day. Any such unexecuted portion will be cancelled, and Shareholders will be required to submit a new Redemption Notice for subsequent Redemption Days, should they wish to redeem further.

For the avoidance of doubt, in normal market conditions, the standard Redemption Limit per Redemption Day would apply, and the Redemption Gate would not be activated. The AIFM will lift the Redemption Gate and return to normal redemption processing as soon as the exceptional circumstances that led to its activation have been resolved.

Extension of the Redemption Cut-Off Time

In certain circumstances, the AIFM may modify the Redemption Cut-Off Time through an extension of the standard Redemption Cut-Off Time for a period of up to around three calendar quarters (200 Business Days) prior to the applicable Redemption Day or as may be required under regulatory guidance relating to the AIFMD, as may be amended from time to time. Such circumstances may include situations where the Investment Manager needs additional time to sell underlying assets to create additional liquidity.

Full details in respect of any extension of the Redemption Cut-Off Time will be promptly disclosed to investors on the website am.jpmorgan.com/lu/.

The AIFM will aim to publish the extension detail in advance of the standard Redemption Cut-Off Time for the next Redemption Day. Any Redemption Notice submitted to the AIFM for a given Redemption Day prior to any extension of the Redemption Cut-Off Time will be accepted in respect of the Redemption Day corresponding to the Extension of the Redemption Cut-Off Time.

If the Redemption Cut-Off Time is extended, the AIFM will evaluate any extension of the Redemption Cut-Off Time on a quarterly basis, or as frequently as necessary, in line with the volume of redemption requests served to the Sub-Fund for a given Redemption Day.

Temporary Suspensions

The Board may temporarily suspend or defer the calculation of NAVs or the Subscription, redemption (where applicable) and/ or switching of Shares for one or more Sub-Funds and/or Share Classes under certain specific circumstances as set out under "Rights Related to Suspension of the Calculation of the NAV and Suspension of Dealings".

Term

The Sub-Fund is established for an indefinite period of time.

For more information, see Liquidation of a Sub-Fund or Share Class.

Valuation/NAV Calculation

The NAV of each Share Class will be determined by the Administrator (which may be supported by third parties),

under the responsibility of the AIFM, as at each Valuation Day.

A “Valuation Day” is the last Business Day of each calendar month and any other dates as the AIFM may determine, based on the fair market value of the Investments and in accordance with the provisions of the Articles, this Prospectus, and Luxembourg GAAP.

Error Correction

Any NAV that experiences a calculation error that exceeds a 3.00% tolerance threshold (positive or negative) will be addressed according to the AIFM’s NAV correction policy and CSSF Circular 24/856.

Distributions

Timing of distributions The Sub-Fund will issue Accumulating Share Classes and may issue Distributing Share Classes.

The Board may but cannot guarantee that it will make distributions, and any distributions will be made while considering the best interests of the Shareholders and the Sub-Fund as a whole. The amount, timing and manner of distributions from the Sub-Fund to the Shareholders will be at the discretion of the Board and in accordance with relevant regulations. For further information, please refer to sub-section Share Class Naming Conventions in section Share Classes and Costs.

No Distributions in kind The Sub-Fund will not make

distributions in kind to Shareholders.

Costs

Annual Management and Advisory Fee The AIFM will be entitled to receive the Annual Management and Advisory Fee in respect of the relevant Share Class, monthly in arrears from the Sub-Fund’s assets. The Management Fee shall be equal to the percentage set out in the Share Class Table above.

Performance Fee

The AIFM will be entitled to receive a Performance Fee, which will be five percent (5%) (the “Performance Fee Rate”) of the relevant Share Class positive returns in excess of the High Water Mark (“HWM”), subject to a five per cent (5%) Hurdle Rate and with a one hundred per cent (100%) Catch-Up measured over the Calculation Period of the Share Class.

Please refer to Performance Fee in the Share Classes and Costs for further information, including worked examples.

One or more underlying investments may separately be subject to a performance fee or carried interest arrangement.

Investment Manager Fee The Investment Manager will be entitled to receive from the AIFM out of the Annual Management and Advisory Fee received by the AIFM a fee, in respect of its services, as agreed between the AIFM and the Investment Manager.

Alternatives Allocation Fund

Objective, Process, Policies and Risks

OBJECTIVE

To deliver capital growth through a diversified, actively managed portfolio of private market investments.

INVESTMENT PROCESS

Investment approach

- Invests in a diversified portfolio of private market investments by allocating capital across private equity, private credit, and Real Asset managers globally.
- Primarily invests in evergreen private market funds with an opportunistic allocation to co-investments to enhance return potential.
- Portfolio construction emphasizes diversification by manager, asset class, geography, and strategy.

ESG approach ESG Integrated

Benchmark None.

POLICIES

Main investment exposure

The Sub-Fund invests primarily in actively managed private market investments. The Sub-Fund's private market investments may include private equity, credit and Real Assets investments. The Sub-Fund's investment exposure to these strategies may be implemented via a variety of investment types that include:

- evergreen Portfolio Funds advised or sponsored by the AIFM, its Affiliates and third-party investment managers;
- investments in private markets investments, either directly or indirectly via special purpose or other vehicles sponsored and controlled by various unaffiliated asset managers ("Co-Investments"); and
- investments in Portfolio Funds acquired in privately negotiated transactions from investors in these Portfolio Funds, and/or in connection with a restructuring transaction of a Portfolio Fund(s) ("Secondary Investments").

The Sub-Fund invests principally in existing evergreen Portfolio Funds, and, to a lesser extent, Co-Investments, although the allocation among those types of investments and other investments may vary from time to time.

Investments in a single Portfolio Fund may constitute more than 25% of the Sub-Fund's NAV.

The Sub-Fund's asset allocation and amount of private market investments may be based, in part, on anticipated future capital calls from Portfolio Funds and distributions of the underlying investments. This may result in the Sub-Fund making commitments to private market investments in an aggregate amount that exceeds the total amounts invested by Investors in the Sub-Fund at the time of such commitment.

The Sub-Fund's private market investments are predominantly located in the United States and Europe, but may be located anywhere globally, including emerging markets.

The investment strategy of the Sub-Fund may be conducted through the participation of intermediary entities, including special purpose vehicles, securitisation vehicles, aggregator vehicles or Holding Companies or other intermediary structures.

Other investment exposures

Short-term debt securities, money market instruments, money market

funds and other UCIs and cash and/or cash equivalents for liquidity management purposes.

During normal market conditions, it is generally not expected that the Sub-Fund will hold more than 20% of its assets in such liquid assets for extended periods of time. For temporary defensive purposes, liquidity management or in connection with implementing changes in the asset allocation, the Sub-Fund may hold a substantially higher amount of liquid assets and other liquid investments.

Borrowing

The Sub-Fund is permitted to borrow money or issue debt securities in an amount up to 30% of its assets for a range of purposes, including to provide liquidity for capital calls by Portfolio Funds and Co-Investments, to satisfy redemptions, to manage timing issues in connection with the inflows of additional capital and the acquisition of Sub-Fund investments and to otherwise satisfy Sub-Fund obligations.

Derivatives Used for: efficient portfolio management; hedging. TRS including CFD: none.

Maximum expected leverage Gross Method (per AIFM Regulation): 250%; Commitment Method (per AIFM Regulation): 250%.

Currencies Sub-Fund Base Currency: USD. Currencies of asset denomination: predominantly USD. Hedging approach: flexible.

MAIN RISKS

The Sub-Fund is subject to **General Risks** and **Risks related to Investments from the techniques and Exposures** it uses to seek to achieve its objective.

The table below explains how these risks relate to each other and the **Outcomes to the Shareholder** that could affect an investment in the Sub-Fund.

Investors should read [Risk Descriptions](#) in full for a complete understanding of the overall risk to the Sub-Fund and for a full description of each risk mentioned below.

Investment Risks from the Sub-Fund's techniques and exposure

Techniques	Exposure
Derivatives	Liquidity
Hedging	Private Markets
	Credit Investments
	Real Assets
	Portfolio Funds
	Secondary Investments
	Co-Investments

Other associated risks Further risks the Sub-Fund is exposed to from its use of the techniques and securities above

Liquidity, Currency, Interest Rate, Market

Outcomes to the Shareholder Potential impact of the risks above

Loss Shareholders could lose some or all of their money.	Volatility Shares of the Sub-Fund will fluctuate in value.	Failure to meet the Sub-Fund's objective.
---	---	--

Investor Considerations

Sub-Fund availability Investors should consult Share Classes and Costs to see which Share Classes they may hold. The Sub-Fund is available to investors that are eligible to purchase the Shares in their jurisdiction.

Liquidity Management

The Sub-Fund's underlying investments are predominantly illiquid. The AIFM uses a range of features and tools to manage this, summarised as follows and set out in more detail below under "Important Dealing and Cost Information":

- **Redemption Limit at 5% of NAV** per Redemption Day. This is a routinely applied liquidity control feature. Where the Sub-Fund's liquidity profile allows, the AIFM may, in its discretion, accommodate redemption requests exceeding the Redemption Limit. The Redemption Limit may be reduced in exceptional circumstances where the Redemption Gate is activated (as described below).
- **Redemption Gate at 2% of NAV.** This is an exceptional and temporary discretionary control to further limit redemptions, per Redemption Day, under certain limited circumstances, such as where there are stressed market conditions, a deterioration in the liquidity of the already illiquid underlying assets, circumstances where the AIFM has concerns about the Sub-Fund's ability to prudently meet redemption requests whilst operating in the manner intended, or

unforeseen liabilities or obligations of the Sub-Fund that would make processing redemptions at the Redemption Limit detrimental to the interest of Shareholders. The Redemption Gate is designed and applied by the AIFM with a view to protecting the interests of all Shareholders and is preferable to other liquidity management measures such as a full suspension of redemptions.

- **Extension of the Redemption Cut-Off Time,** this is a temporary discretionary control that extends the length of the required advance notice for redemptions if the Investment Manager needs additional time to liquidate the underlying assets
- **Temporary suspension of redemptions,** this is a measure that suspends trading and may be applied under very specific circumstances as set out under "Rights Related to Suspension of the Calculation of the NAV and Suspension of Dealings"

Investor profile

The Sub-Fund may appeal to investors who:

- seek income and capital appreciation through private markets investments
- intend to use the Sub-Fund as part of an investment portfolio and not as a complete investment plan

Hedging method for currency hedged Share Classes NAV hedge For information on currency hedging at share class level, see [Share Class Naming Conventions](#) in section [Share Classes and Costs](#).

Share Class Fees and Characteristics

One-off charges taken before or after investing (maximum)			Fees and expenses taken from the Sub-Fund over a year		
Base Class	Initial Charge	Redemption Charge	Annual Management and Advisory Fee	Distribution Fee	Operating and Administrative Expenses (Max)
A	5.00%	-	1.00%	-	0.30%
C	-	-	0.50%	-	0.20%
C2	-	-	0.40%	-	0.20%
D	5.00%	-	1.00%	0.75%	0.30%
D2	-	-	0.40%	0.50%	0.20%
I	-	-	0.50%	-	0.16%
I2	-	-	0.40%	-	0.16%
J	-	0.30%	0.50%	-	0.16%
X	-	-	-	-	0.15%

Redemptions made before the expiry of a one-year period will be subject to a 2% early redemption fee except for J Share Classes, as detailed in Share Classes and Costs.

For a complete description of fees and costs, see [Share Classes and Costs](#).

Alternatives Allocation Fund

Important Dealing and Cost Information

Ramp-up Period The Sub-Fund will comply with the portfolio composition, the diversification requirements and the borrowing limit mentioned above within three years from the date on which the first subscription in the Sub-Fund is accepted (the “**Ramp-up Period**”). These requirements and limits do not apply during any permitted period of temporary suspension.

Any potential dividend distributions associated with a particular Share Class may also be subject to the Ramp-up Period.

Subscribing for Shares Subscriptions are accepted on a monthly basis, on the first day of each calendar month, or if such day does not fall on a Business Day, the immediately following Business Day, or such other day or days as the Board and/or the AIFM may from time to time decide in its discretion, each such day, being a subscription day (the “Subscription Day”).

Prospective investors wishing to invest in the Sub-Fund must provide to the AIFM, by 14.30/2.30 p.m. C.E.T. 5 Business Days prior to the applicable Subscription Day (the “Subscription Cut-Off Time”), a subscription request (the “Subscription Notice”), in writing or by way of electronic means

Each initial Subscription Notice shall include: (i) a completed and executed Application Form; and (ii) such information as may be required by the Fund, the AIFM or agents acting on its behalf, including, but not limited to, “know-your-customer” and anti-money laundering documentation and any other required information. Prospective investors, by executing an Application Form, agree to be bound by the Fund Documents. A Prospective investor whose Application Form has been accepted by the Fund is admitted as an Investor in the Sub-Fund (an “Investor”) as of the relevant Subscription Day. Application Forms received after the Subscription Cut-Off Time will be processed, if accepted, on the next Subscription Day.

Subscriptions must be funded by the full amount, to an account specified by the Fund, at least 3 Business Days before the relevant Subscription Day (except for certain feeder funds investing in the Sub-Fund, which may fund their subscriptions by the full amount no later than the Valuation Day, at the discretion of the AIFM). Shares will be issued as soon as practicable following the release of the Net Asset Value per Share, typically within 25 Business Days after the Valuation Day, and on the condition that the Investor has paid their Subscriptions in full, as described above. If Investors fund their Subscriptions prior to the settlement date, such amounts will be held on a collection account (which will not accrue nor bear any interest), and they will not receive Shares until after the release of the Net Asset Value per Share, as described above.

Switching Shares Permitted only between shares of the same Sub-Fund and of the same currency. For further information on how to switch Shares, please refer to

[Switching Shares.](#)

Redeeming Shares

Each Shareholder shall be entitled to request that a portion or all of their Shares be redeemed without charge on or after the expiry of a one-year period following the Subscription Day on which the relevant Shareholder was accepted into the Sub-Fund. If Shareholders have subscribed on several Subscription Days, the one year period shall apply respectively to the portion of Shares subscribed to on each such Subscription Day.

Redemptions made before the expiry of the one year period will be subject to a 2% early redemption fee (except for ‘J’ Share Classes, as detailed in ‘Share Classes and Costs’).

Redemption requests are accepted on the first day of each calendar quarter (1 January, 1 April, 1 July, 1 October or if such day does not fall on a Business Day, the immediately following Business Day) (each, a “Redemption Day”).

To request redemption, a Redemption request in writing or by way of electronic means must be submitted to the AIFM (the “Redemption Notice”) specifying the number of Shares to be redeemed and the Redemption Day in respect of which the request is made). Such Redemption Notice must be received by the AIFM no later than two months prior to the relevant Redemption Day, and at the latest by 14.30/2.30 p.m. C.E.T., on the first Business Day of the calendar month two months preceding the applicable Redemption Day (November for the 1 January Redemption Day, February for the 1 April Redemption Day, May for the 1 July Redemption Day, August for the 1 October Redemption Day) (the “Redemption Cut-Off Time”).

Redemption Notices received after the Redemption Cut-Off Time will be deemed to have been validly submitted at the immediately following Redemption Day, subject to any notice otherwise from the AIFM. Redemption requests will only be accepted in numbers of Shares, not in currency amounts.

Redemption Notices that have been validly submitted cannot be cancelled.

The Board will use reasonable efforts to pay out redemption proceeds within 15 Business Days after the NAV of the relevant Redemption Day has been released. All payment periods can be extended by weekends, currency trading holidays.

Redemption requests will not be satisfied in kind.

Redemption Limit Redemptions are limited to 5% of the Sub-Fund’s Net Asset Value in respect of each Redemption Day (the “Redemption Limit”). This is a standard liquidity control that will be applied in respect of each Redemption Day, as follows:

- All Shares tendered for redemption on that Redemption Day will be aggregated, and each Shareholder submitting a Redemption Notice

will be redeemed a pro-rata portion representing in aggregate 5% of the Sub-Fund's Net Asset Value, based on the total amount of Shares tendered for redemption by all redeeming Shareholders.

- There will be no automatic transfer or rolling-over of the unexecuted portion of redemption requests to a subsequent Redemption Day. Any such unexecuted portion will be cancelled, and Shareholders will be required to submit a new Redemption Notice for subsequent Redemption Days, should they wish to redeem further.
- The Redemption Limit will not apply on any Redemption Day when the Redemption Gate is in effect. Please see directly below for further detail.

Where the Sub-Fund's liquidity profile allows, the AIFM may accommodate redemption requests exceeding the Redemption Limit. The AIFM will assess the available liquidity of the Sub-Fund's underlying assets on each Redemption Day and, where it is feasible to do so without adversely affecting the interests of remaining Shareholders, may process redemptions in excess of the Redemption Limit on a discretionary basis.

Redemption Gate A Redemption Gate is an exceptional, temporary and partial restriction of the right of Shareholders to redeem their Shares. The Redemption Gate is preferable to a full suspension of redemptions as it allows partial redemptions to continue whilst protecting the interests of Shareholders.

It is a liquidity management tool that the AIFM may activate only in certain limited circumstances such as stressed market conditions, a deterioration in the liquidity of the already illiquid underlying assets, circumstances where the AIFM has concerns about the Sub-Fund's ability to prudently meet redemption requests whilst operating in the manner intended, or unforeseen liabilities or obligations of the Sub-Fund that would make processing redemptions at the Redemption Limit detrimental to the interest of Shareholders. The AIFM will only consider activating the Redemption Gate where, taking into account the best interest of Shareholders, doing so is necessary to protect the Shareholders and the Sub-Fund. The Redemption Gate will only be activated if, on any Redemption Day, the total redemption requests received exceed 2% of the Sub-Fund's Net Asset Value. In such case, the AIFM may, at its sole discretion, activate a Redemption Gate. In determining the activation of the Redemption Gate, the AIFM considers factors such as the liquidity of the underlying assets, prevailing market conditions and expected cash flows, and the interest of all Shareholders (both redeeming and remaining).

If the Redemption Gate is activated:

- The Redemption Gate shall apply per Redemption Day, and redemption requests are not aggregated across redemption periods.
- All Shares tendered for redemption on that Redemption Day will be aggregated, and each Shareholder submitting a Redemption Notice will be redeemed a pro-rata portion representing in aggregate 2% of the Sub-Fund's Net Asset

Value, based on the total amount of Shares tendered for redemption by all redeeming Shareholders.

- There will be no automatic transfer or rolling-over of the unexecuted portion of redemption requests to a subsequent Redemption Day. Any such unexecuted portion will be cancelled, and Shareholders will be required to submit a new Redemption Notice for subsequent Redemption Days, should they wish to redeem further.

For the avoidance of doubt, in normal market conditions, the standard Redemption Limit per Redemption Day would apply, and the Redemption Gate would not be activated. The AIFM will lift the Redemption Gate and return to normal redemption processing as soon as the exceptional circumstances that led to its activation have been resolved.

Extension of the Redemption Cut-Off Time

In certain circumstances, the AIFM may modify the Redemption Cut-Off Time through an extension of the standard Redemption Cut-Off Time for a period of up to around three calendar quarters (200 Business Days) prior to the applicable Redemption Day or as may be required under regulatory guidance relating to the AIFMD, as may be amended from time to time. Such circumstances may include situations where the Investment Manager needs additional time to sell underlying assets to create additional liquidity.

Full details in respect of any extension of the Redemption Cut-Off Time will be promptly disclosed to investors on the website am.jpmorgan.com/lu/.

The AIFM will aim to publish the extension detail in advance of the standard Redemption Cut-Off Time for the next Redemption Day. Any Redemption Notice submitted to the AIFM for a given Redemption Day prior to any extension of the Redemption Cut-Off Time will be accepted in respect of the Redemption Day corresponding to the Extension of the Redemption Cut-Off Time.

If the Redemption Cut-Off Time is extended, the AIFM will evaluate any extension of the Redemption Cut-Off Time on a quarterly basis, or as frequently as necessary, in line with the volume of redemption requests served to the Sub-Fund for a given Redemption Day.

Temporary Suspensions

The Board may temporarily suspend or defer the calculation of NAVs or the Subscription, redemption (where applicable) and/ or switching of Shares for one or more Sub-Funds and/or Share Classes under certain specific circumstances as set out under "Rights Related to Suspension of the Calculation of the NAV and Suspension of Dealings".

Term

The Sub-Fund is established for an indefinite period of time.

For more information, see Liquidation of a Sub-Fund or Share Class.

Valuation/NAV Calculation

The NAV of each Share Class will be determined by the Administrator (which may be supported by third parties),

under the responsibility of the AIFM, as at each Valuation Day.

A “Valuation Day” is the last Business Day of each calendar month and any other dates as the AIFM may determine, based on the fair market value of the Investments and in accordance with the provisions of the Articles, this Prospectus, and Luxembourg GAAP.

Error Correction

Any NAV that experiences a calculation error that exceeds a 3.00% tolerance threshold (positive or negative) will be addressed according to the AIFM’s NAV correction policy and CSSF Circular 24/856.

Distributions

Timing of distributions The Sub-Fund will issue Accumulating Share Classes and may issue Distributing Share Classes.

The Board may but cannot guarantee that it will make distributions, and any distributions will be made while considering the best interests of the Shareholders and the Sub-Fund as a whole. The amount, timing and manner of

distributions from the Sub-Fund to the Shareholders will be at the discretion of the Board and in accordance with relevant regulations. For further information, please refer to sub-section Share Class Naming Conventions in section Share Classes and Costs.

No Distributions in kind The Sub-Fund will not make distributions in kind to Shareholders.

Costs

Annual Management and Advisory Fee The AIFM will be entitled to receive the Annual Management and Advisory Fee in respect of the relevant Share Class, monthly in arrears from the Sub-Fund’s assets. The Management Fee shall be equal to the percentage set out in the Share Class Table above.

Investment Manager Fee The Investment Manager will be entitled to receive from the AIFM out of the Annual Management and Advisory Fee received by the AIFM a fee, in respect of its services, as agreed between the AIFM and the Investment Manager.

Risk Descriptions

Whilst this Prospectus identifies what the Board believes to be the main risks of the Sub-Funds, a Sub-Fund could be affected by other risks. The [Risk Descriptions](#) form an integral part of the Prospectus and should be read in conjunction with the Prospectus as a whole. Investors should note that certain risks (if any) relevant to individual Share Classes can be found in [Share Classes and Costs](#).

For an investor in a Sub-Fund, all of the risks described below could give rise to one or more of the three basic outcomes described in each Sub-Fund description: loss, volatility and failure to achieve its objective.

To the extent a Sub-Fund invests in Portfolio Funds, the risks described below may apply to them as well.

Investors should also note that the Board, the AIFM and the Investment Manager do not have an ability to evaluate the probability of each risk arising, and accordingly each Investor must make their own assessment of the risks and rewards of an investment in the Fund.

General Risks

Redemption Rights

An investment in the Fund should be regarded as a long-term commitment. Although each Sub-Fund is open-ended, redemption terms are subject to significant limitations and restrictions. Where indicated in the relevant, Sub-Fund Description, redemptions may be subject to a redemption limit of five per cent (5%) of the net asset value of that relevant Sub-Fund on any Redemption Day. Accordingly, each Investor should not expect to be able to liquidate their investment within any particular period of time.

In seeking to satisfy a redemption request, the Investment Manager shall not be required to (i) change the portfolio construction of the relevant Sub-Fund, (ii) delay and/or modify any proposed underlying Investments, (iii) redeem or otherwise dispose of interests in any specific underlying Investment or other assets held in the relevant Sub-Fund, (iv) borrow funds, or (v) take any other specific action.

Where an underlying Investment is a Portfolio Fund, the Investment Manager may need to make a redemption request to one or more Portfolio Funds in order to satisfy any redemption request by Shareholders of a Sub-Fund or to rebalance or modify the portfolio. Any redemption requests made by the Board to a Portfolio Fund will be subject to any restrictions on redemption that exist at the Portfolio Fund level (including, without limitation, lock-up periods, availability of cash, the required notice period for withdrawals, the frequency of withdrawal dates and any other restrictions on redemption rights) and, accordingly, any such Portfolio Fund may not satisfy the redemption requests served to the Board by Shareholders in a timeframe that would enable the Board to pay redeeming Shareholders the redemption proceeds on the timeline otherwise contemplated in the Prospectus.

As described in the relevant Sub-Fund Description, redemptions may be further restricted by the application of a redemption gate in certain exceptional circumstances, in particular where the total redemption requests received in respect of a Redemption Day exceed a pre-determined redemption limit, or where the Board or the Investment Manager considers that the satisfaction of redemption requests would be prejudicial to the interests of the Fund, a Sub-Fund or the remaining Shareholders. The Board may, in such circumstances, limit the amount of redemptions that are effected on a given Redemption Day and defer the balance to subsequent Redemption Days in accordance with the terms set out in this Prospectus

As further described in the relevant Sub-Fund Description, the Redemption Cut-Off Time may be extended, extending the length of the required advance notice for redemptions if the Investment Manager needs additional time to liquidate the underlying assets.

In addition, in exceptional circumstances as described in the Prospectus, the Board may decide to suspend temporarily the determination of the net asset value and, as a consequence, the processing of redemptions, which may result in a full suspension of redemptions for a period of time.

Fund Structure

The Board may decide to liquidate a Sub-Fund under certain circumstances (see section Liquidation or Merger under Investing in the Sub-Funds). It is possible that the net proceeds of any liquidation for a Shareholder may be less than the amount they initially invested.

In the event the Board decides to suspend the calculation of the NAV per Share or to defer redemption and switch requests for a Sub-Fund, if applicable:

- Shareholders may not receive the proceeds of their investment at the desired time or price.
- If a large proportion of the Shares of a Sub-Fund are held by a small number of Shareholders, or a single Shareholder, including funds or mandates over which the Investment Manager or their Affiliates have investment discretion, the Sub-Fund is subject to the risk that these Shareholders redeem their Shares in large amounts. These transactions could adversely affect the relevant Sub-Fund's ability to conduct its investment policies and/or the Sub-Fund could become too small to operate efficiently and would need to be liquidated or merged.
- The Sub-Fund(s) have a broad investment mandate and strategy. The Investment Manager has broad flexibility to engage in any transaction within the scope of the relevant Sub-Fund's Investment strategy. There can be no assurances that such flexibility will be exercised in a manner that improves the performance of the Sub-Funds.

Regulatory

The Fund is domiciled in Luxembourg. Therefore, any protections provided by the regulatory framework of other jurisdictions may differ or may not apply.

The Fund and all Sub-Funds are subject to the investment laws, regulations and guidance set down by the European Union, the European Securities and Markets Authority and the CSSF. These laws, regulations and guidance may restrict the investment opportunities available to the Fund and its Sub-Funds. As a result of the Sub-Funds being managed by an Affiliate of JPMorgan Chase & Co. or being registered in other jurisdictions, they may in addition be subject to narrower investment restrictions which could limit their investment opportunities.

The AIFM is a member of JPMorgan Chase & Co. and is therefore subject to additional banking rules and regulations in the United States which may also impact the Fund and its Investors. For instance, under the Volcker Rule, a US regulation, JPMorgan Chase & Co., together with its employees and directors, cannot own more than 25% of the Fund and each Sub-Fund beyond the permitted seeding period (generally three (3) years); as a result, in cases where JPMorgan Chase & Co. continues to hold a seed position representing a significant portion of the Fund and/or a Sub-Fund's assets at the end of the permitted seeding period, it

may be required to reduce its seed position and the anticipated or actual redemption of Shares owned by JPMorgan Chase & Co. could be adverse. Also pursuant to Regulation Y, JPMorgan Chase & Co. may further limit its holdings in the Fund and each Sub-Fund to no more than 5% after one year if the holding above such limit would impose additional regulatory requirements on the Fund and/or JPMorgan Chase & Co. Compliance with, or modifying the impact of, the Volcker Rule, Regulation Y and any other applicable regulation may require the sale, or disposal, of Investments before it is desirable, resulting in losses to other Shareholders or could result in the liquidation of a Sub-Fund.

Political

The value of a Sub-Fund's Investments may be affected by uncertainties such as international political developments, civil conflicts and war, changes in government policies, changes in taxation, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of countries in which Investments may be made or in which Holding Companies may be formed. For example, assets could be compulsorily re-acquired without adequate compensation. Events and evolving conditions in certain economies or markets may alter the risks associated with Investments in countries or regions that historically were perceived as comparatively stable becoming riskier and more volatile. These risks are magnified in emerging market countries. Furthermore, various force majeure events (namely, events beyond the control of the party claiming that the event has occurred, including, but not limited to, acts of God, fires, hurricanes, floods, earthquakes, war, terrorism, labour strikes and outbreaks of infectious disease, pandemics or any other serious public health concerns) are beyond the control of, and are not easily foreseeable by the Board, the AIFM or the Investment Manager, and may adversely affect the ability of the Fund, its Affiliates, the Fund's Investments, counterparties of the foregoing or other persons or entities to perform their respective obligations. The occurrence of a force majeure event may, directly or indirectly, have a material adverse effect on the Fund and/or any of its Investments, and hinder an asset's operations and/or performance. Certain force majeure events (such as war or an outbreak of infectious disease) could have a broader negative impact on the world economy and international business activity generally, or otherwise adversely impact any country related to the Fund's Investments (see further below 'Exposure to catastrophic and force majeure risks').

Legal

There is a risk that legal agreements are terminated due to, for instance, bankruptcy, supervening illegality or change in tax or accounting laws. In such circumstances, a Sub-Fund may suffer losses. Furthermore, certain transactions are entered into on the basis of complex legal documents. Such documents may be difficult to enforce or may be the subject of a dispute as to interpretation in certain circumstances. Whilst the rights and obligations of the parties to a legal document may be governed by the law of other jurisdictions, in certain circumstances (for example, insolvency proceedings) other legal systems may take priority which may affect the enforceability of existing transactions.

No Operating History

While the Investment Manager may have experience investing in the types of investment sought by any Sub-Fund, there can be no assurance the relevant Sub-Fund will generate performance results equivalent to the results generated in the past by any J.P. Morgan Account or any other fund, account or other vehicle

managed by the personnel of the Investment Manager or that the relevant Sub-Fund will avoid losses. Any historical returns achieved by any J.P. Morgan Account, the AIFM or the Investment Manager are not a prediction of the future performance of the relevant Sub-Fund and there can be no assurance or guarantee the relevant Sub-Fund will achieve comparable returns or its investment objective. There can be no assurance that either the AIFM or the Investment Manager will be able to successfully identify Investments that will be appropriate for the relevant Sub-Fund's investment objective and strategies or that they will perform. For these and other unforeseeable factors, there can be no assurance the relevant Sub-Fund will achieve or sustain profitable operations or that the returns generated by the relevant Sub-Fund will equal or exceed those of other investment activities of any J.P. Morgan Account. The possibility of partial or total loss of the relevant Sub-Fund's Capital exists, and prospective investors should not subscribe unless they can readily bear the consequences of such loss.

Geographic and sector focus risks A Sub-Fund may have exposure to investments in a country, state, region, small group of countries or an industry or economic sector and as a result, may be subject to greater volatility than a more geographically or sector diversified portfolio. Investments in a country, state, geographic region, industry or economic sector that experiences adverse economic, business, political conditions or other concerns will impact the value of such a portfolio more than if the portfolio's investments were not so concentrated. In particular, a relevant Sub-Fund may make investments into countries which do not form part of the OECD. A change in the value of a single investment within the portfolio may affect the overall value of the portfolio and may cause greater losses than it would in a portfolio that holds more diversified investments.

Emerging markets Investments in emerging markets involve higher risks than those of developed markets and can be subject to greater volatility and lower liquidity. Emerging market countries may experience political, economic and social instability which can lead to legal, fiscal and regulatory changes affecting returns to investors. These may include policies of expropriation and nationalisation, sanctions or other measures by governments and international bodies. The legal environment in certain countries is uncertain. Legislation may be imposed retrospectively or may be issued in the form of non-public regulations. Judicial independence and political neutrality cannot be guaranteed, and state bodies and judges may not adhere to the requirements of the law.

Valuation

The Administrator (under the AIFM's supervision) will calculate the NAV per Share for each Share Class as at each Valuation Day. No guarantee can be given that an investment in the Fund could be realised in accordance with the relevant valuation.

The Portfolio Funds may be subject to limited redemption rights or no redemption rights and there may be restrictions on transfers as further mentioned in the Prospectus. Except in cases of bad faith or obvious mistake, the valuations prepared by the Administrator are final and binding for all Investors. The Administrator will not be liable in the event a price it regards as appropriate at its reasonable discretion turns out to be inappropriate at a later stage. Furthermore, the Fund's policy is to value portfolio holdings at their fair value. The fair value of assets that are not publicly traded may not be readily determinable.

As a result, there will be uncertainty as to the value of these Investments. Because these valuations are subjective, the fair value of the Fund's assets may fluctuate over short periods of time and the Fund's determinations of fair value may differ materially from the values that would have been used if a ready market for the assets existed.

Where a Sub-Fund holds an Investment in, or co-invests alongside, a Portfolio Fund managed, sponsored or advised by the AIFM or its Affiliates the Administrator will use the net asset value published by that Portfolio Fund for the purposes of determining the value of the Investment when calculating the NAV per Share for each Share Class. Such valuation may not be the same value that would be ascribed by a non-JPMorgan alternative investment fund manager.

Loss of investment The Sub-Fund may not be able to choose, make and realise investments and may not be able to generate returns for its Investors. No assurance can be given that any returns the Sub-Fund does generate will be commensurate with the risks of investing in the type of assets such Sub-Fund invests in. Shareholders may receive no distributions from the Sub-Fund. Accordingly, an investment in the Sub-Fund should only be considered by persons who can afford a loss of their entire investment.

Foreign currency investments and currency risk Investments may be made in currencies other than the currency of the Sub-Fund. Movements or changes in currency exchange rates could adversely affect the value of the Sub-Fund's investments and the price of the Sub-Fund's Shares.

Such risks include exchange rate risks as well as risks from transfer and exchange restrictions. These may not only lead to additional costs, but also to a considerable reduction of the returns from investments measured in the currency of the Sub-Fund, in particular as a consequence of currency devaluations or revaluations. Exchange rates can change rapidly and unpredictably for a number of reasons including changes in interest rates or in exchange control regulations. Accordingly, any hedging of currency exposure that is implemented by a Sub-Fund will primarily involve hedging back to its reference currency, but in certain circumstances may involve other hedging activities. There is no assurance that such Sub-Fund will attempt to hedge its overall currency exposure, or, if it does engage in hedging activity, that this activity will be effective.

Risks Related to Investment Exposure

Liquidity

Each Sub-Fund's Investments are largely expected to be highly illiquid, and a Sub-Fund may not be able to realise or otherwise dispose of its Investments in a timely manner at a price that reflects the most advantageous price for that Sub-Fund. In addition, in certain cases a Sub-Fund may be prohibited by contract or legal or regulatory reasons from selling certain Investments for a period of time. To the extent that there is no trading market for an Investment, the Sub-Fund may be unable to liquidate that Investment or may be unable to do so at a profit. In addition, private purchasers of a Sub-Fund's Investments may not be found.

Losses on unsuccessful Investments may be realised before profits on successful Investments are realised. Furthermore, the expenses of operating the assets of a Sub-Fund may exceed its income, thereby requiring the difference be paid from the Sub-Fund's assets.

Certain securities/ investments, especially those that trade infrequently or on comparatively small markets, may be hard to buy or sell at a desired time and price, particularly in respect of larger transaction sizes.

In extreme market situations, there may be few willing buyers and the investments cannot be readily sold at the desired time or price, and those Sub-Funds may have to accept a lower price to sell the investments or may not be able to sell the investments at all. Trading in particular securities or other instruments may be suspended or restricted by the relevant exchange or by a governmental or

supervisory authority and a Sub-Fund may incur a loss as a result. An inability to sell a portfolio position can adversely affect those Sub-Fund's value or prevent those Sub-Funds from being able to take advantage of other investment opportunities.

Liquidity risk also includes the risk that those Sub-Funds will not be able to pay redemption proceeds within the allowable time because of unusual market conditions, an unusually high volume of redemption requests, or other uncontrollable factors. To meet redemption requests, those Sub-Funds may be forced to sell investments at an unfavourable time and/or conditions.

Investments in debt securities, small and mid-capitalisation stocks and emerging market issuers will be especially subject to the risk that during certain periods, the liquidity of particular issuers or industries, or all securities within a particular investment category, will shrink or disappear suddenly and without warning as a result of adverse economic, market or political events, or adverse investor perceptions whether or not accurate.

The AIFM may implement certain tools to manage liquidity risks.

Further information about the Sub-Fund's liquidity estimates is available upon request from the registered office of the AIFM.

Private Markets

Investments in private markets, whether made directly or indirectly through investment in a fund, involve substantial risks, including: illiquidity, nature of the underlying assets and the economy and/or market in which they are held as well as the political, regulatory and legal environment of such market, lack of control, operational and environmental risk associated with the underlying assets; adverse or ineffective, as well as inconsistent, alignment of interests among management; technological change and/or obsolescence; risks related to the counterparties the asset is exposed to; financial planning misjudgment; employee or management misconduct; lack of reliable financial and other information; lack of transparency; and any number of general economic conditions that are beyond the control of both management and the Investment Manager such as: changing market sentiment; changes in economic conditions, competition and technology; changes in interest rates; inflation or deflation; changing availability, terms and costs of debt financing, changing political conditions or events; and changes in laws and regulation.

Private markets investments are subject to general market risks. Investments made in connection with acquisition transactions are subject to a variety of special risks, including the risk that the acquiring company has paid too much for the acquired business, the risk of unforeseen liabilities, the risks associated with new or unproven management or new business strategies and the risk that the acquired business will not be successfully integrated with existing businesses or produce the expected synergies.

Access to private markets investment opportunities is limited. There can be no assurance that the Investment Manager will be able to secure interests on behalf of a Sub-Fund in all of the investment opportunities that it identifies for the Sub-Fund, or that the size of the interests available to the Sub-Fund will be as large as the Investment Manager would desire.

Regulatory changes may adversely affect private markets funds. The legal, tax and regulatory environment for private equity funds is evolving, and it is possible that any future changes may have a materially adverse effect on the ability of Portfolio Funds to pursue their investment strategies. Any regulatory changes that adversely affect a Portfolio Fund's ability to implement its investment strategies could have a material adverse impact on the Portfolio Fund's

performance, and thus on a Sub-Fund's performance.

A Sub-Fund's private markets investments may be subject to risks associated with a lead investor. The Sub-Fund's ability to realize a profit on such private markets investments will be particularly reliant on the expertise of the lead investor in the transaction. While due diligence will be conducted on private investment opportunities, where the Sub-Fund invests alongside an unaffiliated lead investor, the Investment Manager may be more reliant on the lead investor's diligence. In addition, the Investment Manager may have little to no opportunity to negotiate the terms of such private investments. A Sub-Fund generally will rely on the lead investor or sponsor offering such private investment opportunity to perform certain due diligence on the relevant investment and to negotiate certain terms of the investment.

In-kind distributions from Portfolio Funds or Co-Investments may be held for an indefinite period. A Sub-Fund may receive in-kind distributions of securities from Portfolio Funds or Co-Investments. There can be no assurance that securities distributed in kind by Portfolio Funds or Co-Investments to a Sub-Fund will be readily marketable or saleable. The Investment Manager may be required to or may determine to hold such securities for an indefinite period. Timing of sales is subject to position size considerations, market liquidity, and other factors considered in the sole investment discretion of the Investment Manager. A Sub-Fund may incur additional expense in connection with any disposition of such securities.

Private Markets – investment types

A Sub-Fund's investment portfolio may include Secondary Investments, Co-Investments and Primary Investments. The Portfolio Funds and special purpose vehicles that a Sub-Fund may invest in could hold securities issued primarily by private companies. Operating results for private companies in a specified period may be difficult to determine. Such investments involve a high degree of business and financial risk that can result in substantial losses.

Portfolio Funds. A Sub-Fund may be subject to the risks of its Portfolio Funds. A Sub-Fund's investments in Portfolio Funds are subject to a number of risks. Portfolio Fund interests are expected to be illiquid, their marketability may be restricted and the realization of investments from them may take considerable time and/or be costly. Although the Investment Manager seeks to receive detailed information from each Portfolio Fund regarding its business strategy and any performance history, in most cases the Investment Manager will have little or no means of independently verifying this information. In addition, Portfolio Funds may have little or no near-term cash flow available to distribute to investors, including the Sub-Fund. Portfolio Fund interests are ordinarily valued based upon valuations provided by the manager or general partner of a Portfolio Fund (a "Portfolio Fund Manager"), which may be received on a delayed basis. Certain securities in which the Portfolio Funds invest may not have a readily ascertainable market price and are fair valued by the Portfolio Fund Managers. The Investment Manager reviews and performs due diligence on the valuation procedures used by each Portfolio Fund Manager and monitors the returns provided by the Portfolio Funds. However, neither the Investment Manager nor the Board is able to confirm the accuracy of valuations provided by Portfolio Fund Managers. A Sub-Fund may pay asset-based fees, and, in most cases, is subject to performance-based fees in respect of its interests in Portfolio Funds. In addition, performance-based fees charged by Portfolio Fund Managers may create incentives for the Portfolio Fund Managers to make risky investments, and may be payable by a Sub-Fund to a Portfolio Fund

Manager based on a Portfolio Fund's positive returns even if the Sub-Fund's overall returns are negative. Moreover, a Shareholder in a Sub-Fund will indirectly bear a proportionate share of the fees and expenses of the Portfolio Funds, and of Holding Companies through which Investments are made, including special purpose vehicles and securitisation or aggregator vehicles, or other intermediary structures in addition to its proportionate share of the expenses of the Sub-Fund.

A Sub-Fund may be subject to the risks associated with its Portfolio Funds' underlying investments. The investments made by the Portfolio Funds entail a high degree of risk and in most cases are highly illiquid and difficult to value. A Sub-Fund will not obtain or seek to obtain any control over the management of any portfolio company in which any Portfolio Fund may invest. The success of each investment made by a Portfolio Fund will largely depend on the ability and success of the management of the portfolio companies in addition to economic and market factors. For further information on the risks involved with Portfolio Funds, see below "Portfolio Funds – further risks".

Secondary Investments. A Sub-Fund may have limited Secondary Investment opportunities. A Sub-Fund may make Secondary Investments in Portfolio Funds by acquiring the interests in the Portfolio Funds from existing investors in such Portfolio Funds. In such instances, it is generally not expected that the Sub-Fund will have the opportunity to negotiate the terms of the interests being acquired, other than the purchase price, or other special rights or privileges. Moreover, there is no assurance that the Sub-Fund will be able to purchase interests at attractive discounts to net asset value, or at all. The overall performance of the Sub-Fund will depend in large part on the acquisition price paid by the Sub-Fund for its Secondary Investments, the structure of such acquisitions and the overall success of the Portfolio Fund. The acquisition of Secondary Investments generally requires the consent of the Portfolio Fund Manager of such Secondary Investment, and there can be no assurance that the Sub-Fund will be able to obtain such consent. When the Sub-Fund acquires Secondary Investments, it is expected that the Sub-Fund will not have had the opportunity to negotiate the terms of the investment or other special rights or privileges, and the Sub-Fund may acquire an interest in a Secondary Investment that contains terms that are disadvantageous for legal, tax, regulatory, or other reasons. There is significant competition for Secondary Investments. No assurance can be given that the Sub-Fund will be able to identify Secondary Investments that satisfy the Sub-Fund's investment objective or, if the Sub-Fund is successful in identifying such Secondary Investments, that the Sub-Fund will be permitted to invest, or invest in the amounts desired, in such Secondary Investments.

Co-Investments. There are additional risks associated with Co-Investments. There can be no assurance that a Sub-Fund will be given Co-Investment opportunities, or that any specific Co-Investment offered to the Sub-Fund would be appropriate or attractive to the Sub-Fund in the Investment Manager's judgment. Many entities compete with the Sub-Fund in pursuing Co-Investments. As a result of this competition, a Sub-Fund may not be able to pursue attractive Co-Investment opportunities from time to time. In addition, a Sub-Fund's ability to dispose of Co-Investments may be more limited than the Sub-Fund's ability to dispose of Secondary Investments or Primary Investments.

The AIFM and/or the Investment Manager may allocate Co-Investment opportunities to a Sub-Fund, JPM Related Funds, Other Accounts and their investors, Affiliates and other parties with whom J.P. Morgan has a relationship. The offering and allocation of Co-Investment opportunities is entirely at the discretion of the AIFM and/or the Investment Manager, and there can be no assurance that any particular Co-Investment opportunity will be made available to a Sub-Fund. Co-Investments offered by J.P. Morgan will be on such terms

and conditions (including as to management fees, performance-based compensation and other fees) as J.P. Morgan determines appropriate in its sole discretion on a case-by-case basis and these terms can be expected to differ among co-investors with respect to the same Co-Investment.

A Sub-Fund may participate in Co-Investments alongside JPM Related Funds and/or Other Accounts or co-investment vehicles established or managed by the AIFM, the Investment Manager or an Affiliate (which may benefit from rights and/or terms that are more favourable than those of the Sub-Fund and may in some cases have priority rights to participate in Co-Investment opportunities). Co-Investments alongside JPM Related Funds, and/or such other vehicles that are sponsored or otherwise managed by J.P. Morgan, may give rise to conflicts of interest for the AIFM and the Investment Manager, including with respect to the identification and allocation of investment opportunities (including Co-Investment opportunities), the timing and terms of acquisitions and disposals, the making of follow-on investments and the exercise of rights (including governance and voting rights) in respect of underlying portfolio investments. The AIFM and the Investment Manager will allocate Co-Investment opportunities among the relevant Sub-Fund, JPM Related Funds and Other Accounts in accordance with their internal conflicts of interest and allocation policies. The economic terms applicable to JPM Related Funds and/or other co-investors (including management fees, performance fees, carried interest or similar compensation) may be more or less favourable than the terms applicable to a Sub-Fund, and such differences in economics create incentives for the AIFM and the Investment Manager when allocating investment opportunities.

In addition, where a Sub-Fund invests in a Co-Investment alongside one or more JPM Related Funds and/or Other Accounts, the AIFM and/or the Investment Manager may, from time to time and in their discretion, adjust or rebalance the relative interests of such vehicles in the relevant Portfolio Fund or Co-Investment (including following initial allocation, additional subscriptions, transfers or partial disposals) in accordance with their internal conflicts of interest and allocation policies. Any such rebalancing may result in the Sub-Fund holding a larger or smaller interest in a particular investment than it would have held in the absence of rebalancing, may affect the timing and amount of cash flows to the Sub-Fund (including distributions and realisation proceeds) and may give rise to conflicts of interest for the AIFM and the Investment Manager when determining the extent and direction of any adjustment. There can be no assurance that any rebalancing will be effected on terms that are favourable to the Sub-Fund, and, in certain circumstances, the Sub-Fund may be allocated a greater portion of an underperforming investment and/or a lesser portion of an investment that performs more favourably.

Where a Sub-Fund and one or more JPM Related Funds or Other Accounts invest in the same Portfolio Fund or Co-Investment, decisions in relation to such investment (including decisions on disposals, restructurings or the exercise of governance rights) may be taken having regard to the interests of all participating vehicles as a whole and may, at times, result in outcomes that are more favourable to a JPM Related Fund or Other Account than to the Sub-Fund, or vice versa. The existence and use of such Co-Investment structures and vehicles may, in certain circumstances, result in the Sub-Fund investing less than it otherwise would in particular investments and in fewer investment or Co-Investment opportunities being available to the Sub-Fund and its Shareholders.

Private Equity

Less information may be available with respect to private company investments and such investments offer limited liquidity. Private companies are generally not subject to regulatory reporting requirements, are not required to maintain their accounting records

in accordance with generally accepted accounting principles, and are not required to maintain effective internal controls over financial reporting. As a result, there is risk that a Sub-Fund may invest on the basis of incomplete or inaccurate information, which may adversely affect the Sub-Fund's investment performance. Private companies in which the Sub-Fund may invest also may have limited financial resources, shorter operating histories, more asset concentration risk, narrower product lines and smaller market shares than larger businesses, which tend to render such private companies more vulnerable to competitors' actions and market conditions, as well as general economic downturns. These companies generally have less predictable operating results, may from time to time be parties to litigation, may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence, and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position. In addition, investments in private companies generally are in restricted securities that are not traded in public markets and subject to substantial holding periods. There can be no assurance that a Sub-Fund will be able to realize the value of such investments in a timely manner.

Private equity transactions may result in new enterprises that are subject to extreme volatility, require time for maturity and may require additional capital. In addition, they frequently rely on borrowing significant amounts of capital, which can increase profit potential but at the same time increase the risk of loss. Leveraged companies may be subject to restrictive financial and operating covenants. The leverage may impair the ability of these companies to finance their future operations and capital needs. Also, their flexibility to respond to changing business and economic conditions and to business opportunities may be limited. A leveraged company's income and net assets will tend to increase or decrease at a greater rate than if borrowed money was not used. Although these investments may offer the opportunity for significant gains, such buyout and growth investments involve a high degree of business and financial risk that can result in substantial losses, which risks generally are greater than the risks of investing in public companies that may not be as leveraged.

Venture Capital Risks. Venture capital investments are in private companies that have limited operating history, are attempting to develop or commercialize unproven technologies or to implement novel business plans or are not otherwise developed sufficiently to be self-sustaining financially or to become public. Although these investments may offer the opportunity for significant gains, such investments involve a high degree of business and financial risk that can result in substantial losses, which risks generally are greater than the risks of investing in public or private companies that may be at a later stage of development.

Credit Investments

A Sub-Fund may invest in debt securities and other yield-oriented investments issued by private companies acquired in privately negotiated transactions and/or in connection with a restructuring transaction. Credit strategies involve a variety of debt investing, which is subject to a high degree of financial risk. Credit investments may be adversely affected by tax, legislative, regulatory, credit, political or government changes, interest rate increases and the financial conditions of issuers, which may pose significant credit risks (i.e., the risk that an issuer of a security will fail to pay principal and interest in a timely manner, reducing the associated total return) that result in issuer default.

Senior Secured Loans. When a Portfolio Fund makes a unitranche loan or standalone first or second lien loan to a portfolio company, the Portfolio Fund generally takes a security interest in the available assets of the portfolio company, including the equity interests of its

subsidiaries, which the Portfolio Fund expects to help mitigate the risk that the Portfolio Fund will not be repaid. However, there is a risk that the collateral securing the Portfolio Fund's loans may decrease in value over time, may be difficult to sell in a timely manner, may be difficult to appraise, and may fluctuate in value based upon the success of the business and market conditions, including as a result of the inability of the portfolio company to raise additional capital. In addition, deterioration in a portfolio company's financial condition and prospects, including its inability to raise additional capital, may be accompanied by deterioration in the value of the collateral for the loan. Consequently, the fact that a loan is secured does not guarantee that a Portfolio Fund will receive principal and interest payments according to the loan's terms, or at all, or that the Portfolio Fund will be able to collect on the loan should it be forced to enforce its remedies. In addition, senior secured credit facilities are generally syndicated to a number of different financial market participants. The documentation governing the facilities typically requires either a majority consent or, in certain cases, unanimous approval for certain actions in respect of the facility, such as waivers, amendments, or the exercise of remedies. In addition, voting to accept or reject the terms of a restructuring of a facility pursuant to a court-ordered plan of reorganization in an insolvency proceeding may be done on a class basis. As a result of these voting regimes, the Portfolio Fund may not have the ability to control any decision in respect of any amendment, waiver, exercise of remedies, restructuring or reorganization of debts owed to the Portfolio Fund.

Subordinated Debt. Portfolio Funds generally may make investment in subordinated debt, which is subordinated to senior secured loans on a payment basis and typically is unsecured and ranks *pari passu* with other unsecured creditors. As such, other creditors may rank senior to a Portfolio Fund in the event of an insolvency. This may result in an increased risk of default as well as recovery values being lower than other more senior sources of capital. In addition, many of the obligors are highly leveraged and many of the investments will be in securities which are unrated or rated below investment grade. The Investment Manager considers debt securities to be below investment grade if, at the time of investment, they are rated below the four highest categories by at least one independent credit rating agency or, if unrated, are determined by the Investment Manager to be of comparable quality. Such investments are subject to additional risks, including an increased risk of default during periods of economic downturn, the possibility that the obligor may not be able to meet its debt payments and limited secondary market support, among other risks.

Bank Loans and Participations. A Sub-Fund may invest a portion of its assets indirectly in bank loans and participations. These obligations are subject to unique risks, including, without limitation: (a) the possible invalidation of an investment transaction as a fraudulent conveyance under relevant creditors' rights laws, (b) so-called lender liability claims by the issuer of the obligations, (c) environmental liabilities that may arise with respect to collateral securing the obligations, (d) adverse consequences resulting from participating in such instruments with other institutions with lower credit quality and (e) limitations on the ability of the Sub-Fund to directly enforce its rights with respect to participations. The loans indirectly invested in by the Sub-Fund may include term loans and revolving loans, may pay interest at a fixed or floating rate, and may be senior or subordinated. Successful claims by third parties arising from these and other risks, absent bad faith, may be borne by the Sub-Fund. Bank loans are frequently traded on the basis of standardized documentation which is used in order to facilitate trading and market liquidity. There can be no assurance, however, that future levels of supply and demand in bank loan trading will provide an adequate degree of liquidity that the current level of liquidity will continue, or that the same documentation will be used

in the future. The settlement of trading in bank loans often requires the involvement of third parties, such as administrative or syndication agents, and there presently is no central clearinghouse or authority which monitors or facilitates the trading or settlement of all bank loan trades. Often, settlement may be delayed based on the actions of any third party or counterparty, and adverse price movements may occur in the time between trade and settlement, which could result in adverse consequences for the Sub-Fund. Portfolio Funds may invest in bank loans either directly (by way of sale or assignment) or indirectly (by way of participation). The purchaser of an assignment typically succeeds to all the rights and obligations of the assigning institution and becomes a contracting party under the credit agreement with respect to the debt obligation; however, its rights can be more restricted than those of the assigning institution. In addition, if the Sub-Fund invests in loans pursuant to an assignment, it is possible that the Sub-Fund's claims may be subject to attack (i.e., equitable subordination or disallowance) on account of the conduct of the transferee. Participation interests in a portion of a debt obligation typically result in a contractual relationship only with the institution participating in the interest and not with the borrower. In purchasing participations, the Sub-Fund may have no right to enforce compliance by the borrower with the terms of the loan agreement, nor any rights of set-off against the borrower, and the Sub-Fund may not directly benefit from the collateral supporting the debt obligation in which it has purchased the participation. As a result, the Sub-Fund may assume the credit risk of both the borrower and the institution selling the participation to the Sub-Fund. In certain circumstances, investing in the form of a participation may be the most advantageous or only route for the Sub-Fund to make or hold any such Investment, including in light of limitations relating to local laws or the willingness of administrative agents or borrowers to allow the Sub-Fund to become a direct lender. Some of the bank loans acquired by the Fund may be below investment grade. In terms of liquidity with respect to such Investments, there can be no assurance that levels of supply and demand in bank loan trading will provide an adequate degree of liquidity for the Sub-Fund's Investments therein. In addition, the Sub-Fund may make investments in stressed or distressed bank loans which are often less liquid than performing bank loans.

High-Yield Debt. A Sub-Fund may invest directly or indirectly in debt securities that may be classified as "higher-yielding" (and, therefore, higher-risk) debt securities. In most cases, such debt will be rated below "investment grade" or will be unrated and face ongoing uncertainties and exposure to adverse business, financial or economic conditions and the issuer's failure to make timely interest and principal payments. The market for high-yield securities has experienced periods of volatility and reduced liquidity. High-yield securities may or may not be subordinated to certain other outstanding securities and obligations of the issuer, which may be secured by substantially all of the issuer's assets. High-yield securities may also not be protected by financial covenants or limitations on additional indebtedness. The market values of certain of these debt securities may reflect individual corporate developments. General economic recession or a major decline in the demand for products and services in the industry in which the borrower operates would likely have a materially adverse impact on the value of such securities or could adversely affect the ability of the issuers of such securities to repay principal and pay interest thereon and increase the incidence of default of such securities. In addition, adverse publicity and investor perceptions, whether or not based on fundamental analysis, may also decrease the value and liquidity of these high-yield debt securities.

Bonds and Other Fixed Income Securities. Portfolio Funds may invest in bonds and other fixed income securities. Portfolio Funds will invest in these securities when they offer opportunities for capital appreciation (or capital depreciation in the case of short positions) and may also invest in these securities for temporary defensive purposes and to

maintain liquidity. Fixed income securities include, among other securities: bonds, notes and debentures issued by corporations; securities or debt securities issued or guaranteed by a government; municipal securities; and mortgage-backed and asset-backed securities. These securities may pay fixed, variable or floating rates of interest, and may include zero coupon obligations. Fixed income securities are subject to the risk of the issuer's inability to meet principal and interest payments on its obligations (i.e., credit risk) and are subject to price volatility resulting from, among other things, interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity (i.e., market risk).

Securitisations

Certain Sub-Funds may invest (including in "equity" or residual tranches) in asset-backed securities and other securitisations, which are generally limited recourse obligations of a special purpose vehicle issuer of such instruments ("Securitisation Vehicles") payable solely from the underlying assets ("Securitisation Assets") of the issuer or proceeds thereof. Consequently, holders of equity or other securities issued by Securitisation Vehicles must rely solely on distributions on the Securitisation Assets or proceeds thereof for payment in respect thereof. The Securitisation Assets may include, without limitation, broadly-syndicated leveraged loans, middle-market bank loans, collateralized debt obligation debt tranches, trust preferred securities, insurance surplus notes, asset-backed securities, consumer loans, other receivables, mortgages, REITs, high yield bonds, mezzanine debt, second-lien leverage loans, credit default swaps and emerging market debt and corporate bonds, which are subject to liquidity, market value, credit, interest rate, reinvestment and certain other risks.

The investment characteristics of asset-backed securities differ from traditional debt securities. Among the major differences are that interest and principal payments are made more frequently, usually monthly, and that the principal can generally be prepaid at any time because the underlying loans or other assets generally can be prepaid at any time.

The collateral supporting asset-backed securities is generally of shorter maturity than certain other types of loans and is less likely to experience substantial prepayments. Asset-backed securities are often backed by pools of any variety of assets, including, for example, leases, mobile home loans and aircraft leases, which represent the obligations of a number of different parties and use credit enhancement techniques such as letters of credit, guarantees or preference rights. The market value of an asset-backed security is affected by changes in the market's perception of the asset backing the asset-backed securities and the creditworthiness of the servicer for the loan pool, the originator of the loans or the financial institution providing any credit enhancement, as well as by the expiration or removal of any credit enhancement.

The value of asset-backed securities, like that of traditional fixed income securities, typically increases when interest rates fall and decreases when interest rates rise. The price paid by the Sub-Fund for such securities, the yield the Sub-Fund expects to receive from such securities and the average life of such securities are based on a number of unpredictable factors, including the anticipated rate of prepayment of the underlying assets, and are therefore subject to the risk that the asset-backed security will lose value. Asset-backed securities are also subject to the general risks associated with investing in physical assets such as real estate; that is, they could lose value if the value of the underlying asset declines. Holders of asset-backed securities bear various other risks, including credit risks, liquidity risks, interest rate risks, market risks, operations risks, structural risks and legal risks.

Credit risk arises from (i) losses due to defaults by obligors under the underlying collateral and (ii) the issuing vehicle's or servicer's failure to perform their respective obligations under the transaction

documents governing the asset-backed security.

These two risks can be related, as, for example, in the case of a servicer that does not provide adequate credit-review scrutiny to the underlying collateral, leading to a higher incidence of defaults.

Market risk arises from the cash flow characteristics of the asset-backed securities, which for most asset-backed securities tend to be predictable. The greatest variability in cash flows comes from credit performance, including the presence of wind-down or acceleration features designed to protect the investor in the event that credit losses in the portfolio rise well above expected levels.

Interest rate risk arises for the issuer from (x) the pricing terms on the underlying collateral, (y) the terms of the interest rate paid to holders of the asset-backed securities and (z) the need to mark to market the excess servicing or spread account proceeds carried on the issuing vehicle's balance sheet. For the holder of the security, interest rate risk depends on the expected life of the asset-backed security, which can depend on prepayments on the underlying assets or the occurrence of wind-down or termination events. If the servicer becomes subject to financial difficulty or otherwise ceases to be able to carry out its functions, it could be difficult to find other acceptable substitute servicers and cash flow disruptions or losses can occur, particularly with underlying collateral comprised of non-standard receivables or receivables originated by private retailers who collect many of the payments at their stores.

Structural and legal risks include the possibility that, in a bankruptcy or similar proceeding involving the originator or the servicer (often the same entity or affiliates), a court having jurisdiction over the proceeding could determine that, because of the degree to which cash flows on the assets of the issuing vehicle potentially have been commingled with cash flows on the originator's other assets (or similar reasons), (a) the assets of the issuing vehicle could be treated as never having been truly sold by the originator to the issuing vehicle and could be substantively consolidated with those of the originator, or (b) the transfer of such assets to the issuer could be voided as a fraudulent transfer. The time and expense related to a challenge of such a determination also could result in losses and/or delayed cash flows.

In addition, investments in subordinated asset-backed securities involve greater credit risk of default than the senior classes of the issue or series. Default risks can be further pronounced in the case of asset-backed securities secured by, or evidencing an interest in, a relatively small or less diverse pool of underlying loans. Certain subordinated securities in an asset-backed securities issue generally absorb all losses from default before any other class of securities in such issue is at risk, particularly if such securities have been issued with little or no credit enhancement equity. Such securities, therefore, possess some of the attributes typically associated with equity investments. Another risk associated with asset-backed securities is that the collateral that secures an asset-backed security, such as credit card receivables, could be unsecured. In the case of credit card receivables, debtors are additionally entitled to the protection of a number of state and federal consumer loan laws, many of which give such debtors the right to set off certain amounts owed on the credit cards, thereby reducing the balance due. For asset-backed securities that are backed by automobile receivables, such asset-backed securities pose a risk because most issuers of such asset-backed securities permit the servicers to retain possession of the underlying obligations. Because of the large number of vehicles involved in a typical issuance and technical requirements under state laws, the trustee for the holders of the asset-backed securities potentially will not have a proper security interest in all of the obligations backing such asset-backed securities. Therefore, there is a possibility that recoveries on repossessed collateral will not, in some cases, be available to support payments on these securities. As the foregoing shows, an underlying risk of investing in asset-backed securities is the dependence on debtors to timely pay their consumer loans.

In the case of asset-backed securities structured using Securitisation

Vehicles, Securitisation Assets are typically actively managed by an investment manager, which may be the Adviser or its affiliates, and as a result, the Securitisation Assets will be traded, subject to rating agency and other constraints, by such investment manager. The aggregate return on these equity securities will depend in part upon the ability of each such investment manager to actively manage the related portfolio of Securitisation Assets.

Collateralized Loan Obligations ("Clos") and Collateralized Debt Obligations ("CDOS")

Certain Sub-Funds may invest in CLOs and CDOs. CLOs and CDOs are created by the grouping of certain private loans and other lender assets/collateral into pools. A sponsoring organization establishes a SPV to hold the assets/collateral and issue securities. Interests in these pools are sold as individual securities. Payments of principal and interest are passed through to investors and are typically supported by some form of credit enhancement, such as a letter of credit, surety bond, limited guaranty or senior/subordination. Payments from the asset pools may be divided into several different tranches of debt securities, offering investors various maturity and credit risk characteristics. Some tranches entitled to receive regular installments of principal and interest, other tranches entitled to receive regular installments of interest, with principal payable at maturity or upon specified call dates, and other tranches only entitled to receive payments of principal and accrued interest at maturity or upon specified call dates. Different tranches of securities will bear different interest rates, which may be fixed or floating. Investors in CLOs and CDOs bear the credit risk of the assets/collateral. Tranches are categorized as senior, mezzanine, and subordinated/equity, according to their degree of credit risk. If there are defaults or the CDO's collateral otherwise underperforms, scheduled payments to senior tranches take precedence over those of mezzanine tranches, and scheduled payments to mezzanine tranches take precedence over those to subordinated/equity tranches. Senior and mezzanine tranches are typically rated, with the former receiving S&P Global Ratings ("S&P") ratings of A to AAA and the latter receiving ratings of B to BBB. The ratings reflect both the credit quality of underlying collateral as well as how much protection a given tranche is afforded by tranches that are subordinate to it. Because the loans held in the pool often may be prepaid without penalty or premium, CLOs and CDOs can be subject to higher prepayment risks than most other types of debt instruments. Prepayments may result in a capital loss to the Sub-Fund to the extent that the prepaid securities purchased at a market discount from their stated principal amount will have accelerated the recognition of interest income by the Sub-Fund, which would be taxed as ordinary income when distributed to the Shareholders. The credit characteristics of CLOs and CDOs also differ in a number of respects from those of traditional debt securities. The credit quality of most CLOs and CDOs depends primarily upon the credit quality of the assets/collateral underlying such securities, how well the entity issuing the securities is insulated from the credit risk of the originator or any other affiliated entities, and the amount and quality of any credit enhancement to such securities. CLOs and CDOs are typically privately offered and sold, and thus, are not registered under the securities laws, which means less information about the security may be available as compared to publicly offered securities and only certain institutions may buy and sell them. As a result, investments in CLOs and CDOs may be characterized by the Sub-Fund as illiquid securities. An active dealer market may exist for CLOs and CDOs that can be resold in Rule 144A transactions, but there can be no assurance that such a market will exist or will be active enough for the Sub-Fund to sell such securities. In addition to the typical risks associated with fixed-income securities and asset-backed securities, CLOs and CDOs carry other risks including, but not limited to: (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the risk that the collateral may default, decline in value or quality,

or be downgraded by a rating agency; (iii) the Sub-Fund may invest in tranches of CLOs and CDOs that are subordinate to other tranches, diminishing the likelihood of payment; (iv) the structure and complexity of the transaction and the legal documents could lead to disputes with the issuer or unexpected investment results; (v) risk of forced "fire sale" liquidation due to technical defaults such as coverage test failures; and (vi) the manager of the CLO or CDO may perform poorly.

Structured Finance Securities

The CLOs and other CDOs in which certain Sub-Funds may invest are structured finance securities. Holders of structured finance securities bear risks of the underlying assets and are subject to counterparty risk. Sub-Funds may have the right to receive payments only from the structured finance security and generally does not have direct rights against the issuer or the entity that sold the assets to be securitized. While certain structured finance securities enable the investor to acquire interests in a pool of securities without the brokerage and other expenses associated with directly holding the same securities, investors in structured finance securities generally pay their share of the structured finance security's administrative and other expenses. Although it is difficult to predict whether the prices of assets underlying structured finance securities will rise or fall, these prices (and, therefore, the prices of structured finance securities) will be influenced by the same types of political and economic events that affect issuers of securities and capital markets generally. If the issuer of a structured finance security uses shorter-term financing to purchase longer-term securities, the issuer may be forced to sell its securities at below-market prices if it experiences difficulty in obtaining short-term financing, which may adversely affect the value of the structured finance securities owned by the Sub-Fund. Certain structured finance securities may be thinly traded or have a limited trading market. CLOs, CDOs and credit-linked notes are typically privately offered and sold. As a result, investments in structured finance securities may be characterized by the Investment Manager as illiquid securities. In addition to the general risks associated with fixed-income securities, structured finance securities carry additional risks, including, but not limited to: (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the possibility that the investments in structured finance securities are subordinate to other classes or tranches thereof; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

Equity Investments. When the Sub-Fund, through a Portfolio Fund, invests in unitranche loans, standalone first and second lien loans or subordinated debt, such Portfolio Fund may acquire equity securities in a portfolio company. In addition, Portfolio Funds may invest directly in the equity securities of portfolio companies. The Portfolio Fund's goal is ultimately to dispose of such equity interests and realize gains upon the Portfolio Fund's disposition of such interests. However, the equity interests a Portfolio Fund receives may not appreciate in value and, in fact, may decline in value. Accordingly, a Portfolio Fund may not be able to realize gains from its equity interests, and any gains that the Portfolio Fund does realize on the disposition of any equity interests may not be sufficient to offset any other losses the Portfolio Fund experiences. The timing of ultimate realization is highly uncertain and these securities will have no readily available market for liquidity. As a result, the holding period for these securities may be lengthy. In addition, underlying investments are likely to be in lower-grade obligations. The lower-grade underlying investments may be rated below investment grade by one or more nationally recognized statistical rating agencies at the time of investment, or may be unrated but determined by the Portfolio Funds to be of comparable quality. Loans or debt securities rated below investment grade are considered speculative with respect to the issuer's capacity to pay interest and repay principal. Further, in the event of a bankruptcy, liquidation or reorganization or similar proceeding relating to a Portfolio Fund, the

Sub-Fund will participate with all other equity holders of such Portfolio Fund in the assets remaining after the Portfolio Fund has paid all of its indebtedness, including subordinated indebtedness.

Non-controlling investments A Sub-Fund may hold a non-controlling interest in each of its Investments and, therefore, have a limited ability to protect its position in such Investments. In such cases, the Sub-Fund will typically be significantly reliant on management with whom the Sub-Fund is not affiliated. Further, the Sub-Fund will have limited consent and control rights, and such rights may not be effective in view of the expected proportion of such holding of interests.

Investments in Portfolio Funds being compulsorily withdrawn A Sub-Fund's investments in Portfolio Funds may be compulsorily withdrawn (or equivalent) and/or subject to additional fees and expenses due to such compulsory withdrawal (or equivalent) in certain circumstances, including, (i) where a Sub-Fund ceases to be an eligible investor in the relevant Portfolio Fund; (ii) where the continued holding of an investment in a Portfolio Fund by the relevant Sub-Fund would cause the Portfolio Fund, one of its related parties and/or Affiliates, or an actual or potential asset of such Portfolio Fund, to violate a law or regulation, to become subject to a material regulatory or other burden or to suffer material taxation or other economic disadvantages; (iii) where a Sub-Fund has breached applicable representations made to the Portfolio Fund; or (iv) otherwise, the Portfolio Fund or one of its related parties deem such compulsory withdrawal (or equivalent) to be in the best interests of the Portfolio Fund. This could have an adverse effect on the relevant Sub-Fund's financial condition, results of operations and prospects.

Exposure to catastrophic and force majeure risks Certain investments may be exposed to catastrophic events and other force majeure events during their construction, technical and/or operational phases. These events could include fires, floods, earthquakes, adverse weather conditions, assertion of eminent domain (that is, the right of a government to expropriate property for public use, typically with the payment of compensation), strikes, wars, riots, terrorist acts, acts of God and similar risks. These events could result in the partial or total loss of an investment (for example, a real estate asset such as an office building, a transport asset such as an aircraft or ship, or an infrastructure asset such as a power plant could be destroyed in a catastrophe) or significant down time resulting in lost revenues, among other potentially detrimental effects. Some force majeure risks are generally uninsurable and, in some cases, project agreements can be terminated if the force majeure event is so catastrophic that it cannot be remedied within a reasonable time period. While the Portfolio Funds in which a Sub-Fund invests will seek to use insurance and other risk management products (to the extent available on commercially reasonable terms) to mitigate the potential loss resulting from catastrophic events and other risks customarily covered by insurance, this may not always be practicable or feasible. Moreover, it may not be possible to insure against all such risks, and insurance proceeds may be inadequate. In general, losses related to terrorism are difficult and expensive to insure against, as many insurers exclude terrorism coverage from their all-risk policies. A catastrophic or force majeure event could therefore have an adverse effect on the relevant Sub-Fund's financial condition, results of operations and prospects, with a consequential adverse effect on the market value of the Shares.

Environmental liability impacting the underlying assets A Sub-Fund be exposed to substantial risk of loss from environmental claims arising in respect of its underlying assets that have environmental problems, and the loss may exceed the value of such underlying Real Assets. Furthermore, changes in environmental laws and regulations or in the environmental condition of investments may

create liabilities that did not exist at the time of acquisition of an underlying Real Asset and that could not have been foreseen. It is also possible that certain underlying Real Assets to which a Sub-Fund will be exposed could be subject to risks associated with natural disasters (including fire, storms, hurricanes, cyclones, typhoons, hail storms, blizzards and floods) or man-made disasters (including terrorist activities, acts of war or incidents caused by human error). Generally, the Investment Manager intends to perform or cause to be performed market practice environmental due diligence of all of the investments to identify potential sources of pollution, contamination or other environmental hazard for which such investment may be responsible and to assess the status of environmental regulatory compliance. There can be no assurance, however, that such due diligence will reveal all or any of the environmental liabilities relating to such underlying Real Assets. There is also a substantial risk that the involvement of an underlying Real Asset in which a Sub-Fund has an interest in an environmental disaster may harm the Fund's reputation, which in turn may have an adverse effect on results of operations and/or financial condition. This in turn could have an adverse effect on the relevant Sub-Fund's financial condition, results of operations and prospects, with a consequential adverse effect on the market value of the Shares.

Regulatory risks Government authorities at all levels are actively involved in the promulgation and enforcement of regulations relating to matters affecting the ownership, use and operation of transport assets and infrastructure assets in particular, as well as potentially certain real estate assets. The institution and enforcement of such regulations could have the effect of increasing the expenses, and lowering the income or rate of return, as well as adversely affecting the value, of any of the investments to which a Sub-Fund be exposed. Many of the investments to which the relevant Sub-Fund may be exposed may be subject to varying degrees of statutory and regulatory requirements, including those imposed by zoning, environmental, health and safety, labour and other regulatory or political authorities. Such investments may require numerous regulatory approvals, licences and permits to commence and continue their operations. The failure to obtain relevant permits or approvals, or the delay in obtaining such permits or approvals, could hinder construction or operation which may result in fines or additional costs for the project entity. This could have an adverse effect on the investments. Where the ability to operate a business is subject to a concession or lease from the government, the concession or lease may restrict the ability to operate the business in a way that maximises cash flows and profitability. Adoption of new laws or regulations, or changes in interpretations of existing ones, or any of the other regulatory risks mentioned above could have an adverse effect on the relevant Sub-Fund's financial condition, results of operations and prospects, with a consequential adverse effect on the market value of the Shares.

Sanctions and anti-corruption risks Exposure in Real Assets may expose a Sub-Fund to the risk of trade and economic sanctions and other restrictions imposed by the U.S., the EU and other governments or organisations. Violation of such sanctions and wider conduct of business laws and regulations and could carry criminal penalties. Under these laws and regulations, various government agencies may require export licences, may seek to impose modifications to business practices, including cessation of business activities in sanctioned countries or with sanctioned persons or entities, and modifications to compliance programmes, which may increase compliance costs, and may subject investments to fines, penalties and other sanctions. A violation of these laws or regulations could adversely impact the relevant Sub-Fund's and financial condition. There can be no assurance that the current sanctions or any further sanctions imposed by the EU, the U.S. or other international interests will not materially adversely affect

the investments to which the Fund will be exposed or the Fund's operations.

Real Assets

Real estate

Investments in real estate may be subject to certain risks associated with the ownership of real estate and real estate-related assets and the real estate industry in general, including: the burdens of ownership of real estate and real estate-related assets; local, national and international economic and political conditions; the supply of and demand for property; the financial condition of tenants, buyers and sellers of property; changes in interest rates and the availability of debt financing which may render the sale or refinancing of real estate and real estate-related assets difficult or impracticable; changes in environmental laws and regulations; changes in planning laws, governmental rules and fiscal and monetary policies; environmental claims arising in respect of assets acquired with undisclosed or unknown environmental problems or as to which inadequate reserves have been established; environmental accidents, contamination or pollution; changes in applicable tax policies and rates; changes in energy and commodities prices; property losses or damage; accidents caused by human error; natural disasters, weather patterns, storms, and climate changes; the risk of an explosion, fire or flooding; force majeure acts; political unrest or the interference of government agencies or political bodies, armed conflicts and war; acts of piracy; terrorist events; acts of God; under-insured or uninsurable losses; and other factors which are beyond the reasonable control of the Investment Manager. The nature, timing and degree of changes in real estate conditions are unpredictable. In addition, real estate and real estate-related assets are subject to long term cyclical trends that give rise to significant volatility in values. Many of these factors could cause fluctuations in occupancy rates, rent schedules or operating expenses, causing the value of real estate assets to decline. The value of real estate assets may fluctuate significantly due to these factors and may be significantly diminished in the event of a sudden downward market for real estate and real estate-related assets. The returns available from real estate assets depend on the amount of income earned and capital appreciation generated by the relevant underlying properties, as well as expenses incurred in connection therewith. The types of operating expenses to which real estate assets may be exposed and which may be subject to increase beyond current estimates include labour, repairs and maintenance costs and insurance premiums. If real estate and real estate-related assets do not generate income sufficient to meet operating expenses, including amounts owed under any third party borrowings and capital expenditures, their return will be adversely affected. In addition, the cost of complying with governmental laws and regulations and the cost and availability of third party borrowings may also affect the market value of and returns from real estate assets. The returns would be adversely affected if a significant number of tenants were unable to pay their rent or if properties could not be rented on favourable terms. Certain significant fixed expenditures associated with purchasing real estate and real estate-related assets (such as third party borrowings, taxes and maintenance costs) may stay the same or increase even when circumstances cause a reduction in returns from real estate and real estate-related assets.

Transport assets

An investment in transport assets may be subject to certain risks including those associated with the ownership of commercial seagoing vessels, energy related transportation assets, passenger and cargo aircraft, rolling stock, containing boxes, vehicles and other transport assets and the maritime, energy

logistics, air, rail, vehicle and other sectors of the transport industry in general, including: the burdens of ownership of such assets; local, national and international economic and political conditions; the costs of fuel and raw materials used to construct such assets; developments in international trade and changes in seaborne, energy logistics and other transportation patterns; changes in the tourism and holiday travel market; the financial condition of charterers, lessees, pool operators, buyers and sellers of such assets; changes in interest rates and the availability of debt financing which may render the sale or refinancing of such assets difficult or impracticable; changes in environmental laws and regulations; changes in governmental rules and fiscal and monetary policies; environmental claims arising in respect of assets acquired with undisclosed or unknown environmental problems or as to which inadequate reserves have been established; environmental accidents, contamination or pollution; changes in applicable tax policies and rates; changes in energy and commodities prices including bunker prices; negative developments in the economy that depress global trade and transportation activity; business interruptions caused by mechanical error; exposure to emerging markets and politically unstable regions and countries; embargoes and strikes; port and canal closures; cargo and property losses or damage; accidents caused by human error; uninsured casualties; maritime vessels, energy logistics, aircraft, rolling stock and other transport disasters including collisions, groundings, capsizing, crashes and derailings or incidents relating to design failures of such assets; natural disasters, weather patterns, storms and climate changes; the risk of an explosion, fire or flooding; force majeure acts; political unrest or the interference of government agencies or political bodies; the use of the assets for criminal enterprise by the operator, the lessee or their personnel; armed conflicts and war; acts of piracy; terrorist events; acts of God; under-insured or uninsurable losses; epidemics and widespread transmission of communicable diseases (such as the outbreak of Severe Acute Respiratory Syndrome in 2003, which was linked to air travel, the outbreak of Middle East Respiratory Syndrome in 2012 and the outbreak of Ebola in Western Africa in 2014-2015); and other factors which are beyond the reasonable control of the Investment Manager. The nature, timing and degree of changes in conditions in the maritime, energy logistics, air, rail and other sectors of the transport industry are unpredictable. In addition, as recent experience has demonstrated, commercial seagoing vessels, energy logistics, passenger and cargo aircraft, rolling stock, vehicles and other transport assets are subject to long term cyclical trends that give rise to significant volatility in values in terms of charter or lease rates, profitability and, consequently, asset values. The time lag in the maritime, energy logistics air and rail industries between orders and deliveries heightens this cyclicity. In addition, significant contraction in demand for imported commodities such as iron ore, coal, crude oil, petroleum products, energy-related gases and manufactured goods, as a result of economic downturns or changes in government policies in certain regional markets, could depress freight and passenger rates, as well as the general demand for commercial seagoing vessels, energy logistics assets, passenger and cargo aircraft, rolling stock and vehicle assets. A decline in demand for, and level of consumption of, crude oil and related products, including frac sand, ethanol and other petrochemical products, could cause demand for tank vessel and tank car capacity and charter rates to decline. The future demand for carriers and related charter rates will be dependent upon continued demand for imported commodities, economic seasonal and regional changes in demand, and changes to the capacity of the world fleet. A decline in demand for commodities and finished goods transported in seagoing vessels or an increase in supply of vessels could cause a significant decline in charter rates. The supply of vessel capacity is also a function of the delivery of new

vessels and the number of older vessels scrapped, in lay-up, converted to other uses, reactivated or removed from active service. Supply may also be affected by the regulation of maritime transportation and other types of governmental regulation, including that of international authorities. Many of these factors could cause fluctuations in charter or lease hire and pooling rates or operating expenses, causing the value of transport assets to decline. The value of transport assets may fluctuate significantly due to these factors and may be significantly diminished in the event of a sudden downward market for such assets. The returns available from transport assets depend on the amount of income earned and capital appreciation generated by the relevant underlying assets, as well as expenses incurred in connection therewith. The types of operating expenses to which transport assets may be exposed and which may be subject to increase beyond current estimates include labour, repairs and maintenance costs, the costs of periodic dry-docking of vessels and insurance premiums. If the transport assets do not generate income sufficient to meet operating expenses, including amounts owed under any third party borrowings and capital expenditures, their returns will be adversely affected. In addition, the cost of complying with governmental laws and regulations and the cost and availability of third party borrowings may also affect the market value of and returns from transport assets. Transport asset returns may be adversely affected if a significant number of charterers or lessees were unable to pay their charter or lease rates or if commercial seagoing vessels, energy logistics assets, passenger and cargo aircraft, rolling stock, vehicles or other transport assets could not be chartered, leased or pooled on favourable terms. Certain significant fixed expenditures associated with purchasing commercial seagoing vessels, energy logistics assets, passenger and cargo aircraft, rolling stock, vehicles and other transport assets (such as third party borrowings, taxes and maintenance costs) may stay the same or increase even when circumstances cause a reduction in returns from such assets.

Infrastructure

Investments in infrastructure may be subject to certain risks, including: the burdens of ownership of infrastructure; local, national and international economic conditions; the supply and demand for services from and access to infrastructure; the financial condition of users and suppliers of infrastructure; changes in interest rates and the availability of funds which may render the purchase, sale or refinancing of infrastructure difficult or impracticable; changes in environmental laws and regulations, and planning laws and other governmental rules; regulators, including public utility commissioners, taking action which changes the risk and return profile of regulated sectors or individual assets; elected officials or public policy taking action which results in outcomes that are inconsistent with asset projections; nationalisation and other government enforcement actions across sectors or on individual assets; environmental claims arising in respect of infrastructure acquired with undisclosed or unknown environmental problems or as to which inadequate reserves have been established; changes in energy and commodities prices; property losses or damage; accidents caused by human error; natural disasters, weather patterns, storms, and climate changes; the risk of an explosion, fire or flooding; political unrest or the interference of government agencies or political bodies, armed conflicts and war; acts of piracy; terrorist events; acts of God; changes in fiscal and monetary policies; negative developments in the economy that depress travel; uninsured casualties; force majeure acts, terrorist events, underinsured or uninsurable losses; and other factors which are beyond the reasonable control of the Investment Manager.

Portfolio Funds – further risks

Investing in Portfolio Funds generally There can be no assurance the Investment Manager will be able to allocate a Sub-Fund's assets to Portfolio Funds in a manner that is profitable to the relevant Sub-Fund. Gaining access to funds managed by high-quality fund managers is difficult and there can be no assurance the Investment Manager will be able to secure opportunities to

invest in such Portfolio Funds. Competition for investment opportunities is intense and the relevant Sub-Fund may be competing for opportunities with other investors that have substantially larger pools of available capital, longer histories of investing in Portfolio Funds and other qualities that may make them more attractive to Portfolio Funds' managers.

Staged investments Portfolio Funds may make investments that require multiple fundings over time or are structured as "revolvers" or "delayed-draws". These types of investments generally have funding obligations that extend over a period of time, and which may extend beyond their respective investment period. In such circumstances, the Portfolio Funds may be required to reserve undrawn capital commitments to which the relevant Sub-Fund has committed for future funding obligations and may be required to fund such obligations after the termination of their respective investment period. However, there can be no assurance that the reserved funds will ultimately be used for investment, which may result in the relevant Portfolio Fund not fully deploying its committed capital.

A further risk lies in the nature of the Portfolio Funds' deployment approach that have a queuing system of commitment and drawdown. The relevant Sub-Fund is not guaranteed a place in the queues until it has made individual applications to the commitment queues of the Portfolio Funds in which such Sub-Fund shall invest.

The size of the commitment queue to each Portfolio Fund is impacted by various factors, including, but not limited to, other investors have committed to it, redemptions requests served to it, the amount of income to be reinvested, and finally the assets available to the Portfolio Funds to purchase. All of these impact the timing of the drawdown of capital from the commitment queues into the Portfolio Fund's asset pools. While it is expected the relevant Portfolio Fund's investment manager will do its best to ensure the efficient deployment of the relevant Sub-Fund's Capital, there can be no guarantee it will meet its intended deployment schedule.

The above scenarios could have an adverse effect on a Sub-Fund's ability to pursue its investment objective and strategy and, in turn, could have an adverse effect on such Sub-Fund's returns.

Withdrawal of the Sub-Fund's Investments The Sub-Fund may be subject to withdrawal restrictions of a given Portfolio Fund in which it will invest, and it is expected that withdrawal rights will be limited in respect of certain investments in Portfolio Funds. Accordingly, the Investment Manager may not be permitted to withdraw invested assets from a particular Portfolio Fund at a time that would be most advantageous to the Sub-Fund or at a time what would allow the Sub-Fund to comply with its redemption requests from its Shareholders.

Any lack of liquidity at Portfolio Fund level may affect the liquidity of the Shares of the relevant Sub-Fund and the value of its Investments. For such reasons, the treatment of Shareholders' redemption requests at the level of a Sub-Fund may be postponed in exceptional circumstances including if a lack of liquidity may result in difficulties in determining the NAV of the Shares, a suspension of issues and redemptions of Shares. Consequently, the Shareholders may be unable to liquidate their investment promptly in the event of an emergency or for any other reason.

Forced withdrawal of investors A forced withdrawal may result in a Sub-Fund having to dispose of its interests in a Portfolio Fund at a time when the Sub-Fund does not wish to exit the Portfolio Fund and/or at time which could result in the Sub-Fund realising a loss of its investment in the Portfolio Fund.

Early termination If a Portfolio Fund terminates its investment program or term earlier than anticipated at the time of a Sub-Fund's investment therein or if the investors of a Portfolio Fund remove the investment manager or general partner (or similar managing entity)

of such Portfolio Fund, the Sub-Fund's intended investments in such Portfolio Fund might be substantially delayed, or otherwise complicated, or prevented, which could have a negative effect on such Sub-Fund's return and/or the execution of its investment strategy.

Sale or distribution of assets on dissolution It could take several years to liquidate a Portfolio Fund's assets, and the liquidator shall have the right to maintain such Portfolio Fund in existence, as and to the extent necessary for an orderly winding-up and liquidation of a Portfolio Fund. Subject to the alternative arrangement described below, to the extent that certain investments remain unsold at the end of the liquidation period, which prevent the Portfolio Fund from being finally wound up, the liquidator may decide to distribute property in-kind to the relevant Sub-Fund.

Indirect portfolio companies' investments The Portfolio Funds will be making investments in portfolio companies the managers of these Portfolio Funds will believe to be appropriately structured, compensated and valued. All investments are speculative in nature and the possibility of partial or total loss of capital will exist. There generally will be little or no publicly available information regarding the status and prospects of private transactions or portfolio companies. Many investment decisions will be dependent upon the ability of the relevant Portfolio Fund's management team to obtain relevant information from non-public sources. The relevant Portfolio Fund's management team will often be required to make decisions without complete information or in reliance upon information provided by third parties that is impossible or impracticable to verify.

The marketability and value of each investment will depend upon many factors beyond the relevant Portfolio Fund's management team's control. Transactions and portfolio companies may have substantial variations in operating results from period to period, face intense competition and experience failures or have substantial declines in value at any stage. Transactions and portfolio companies may need substantial additional capital to support growth or to achieve or maintain value or a competitive position. Such capital may not be available on attractive terms or not available at the Portfolio Funds. This could negatively affect the relevant portfolio company as well as the economic position of the Portfolio Funds in such portfolio company.

There can be no guarantee that any transaction or portfolio company investment made by a Portfolio Fund will result in a liquidity event via refinance, sale, public offering, merger, acquisition or otherwise. There is a significant risk that Portfolio Funds' investments will yield little or no return.

In some cases, the investments made by Portfolio Funds could be illiquid and difficult to value, and there will be little or no collateral to protect an investment once made. The Portfolio Funds may hold some illiquid securities at the time of the Portfolio Funds dissolution, with the result that such securities may be distributed in kind or sold for a price that reflects their illiquid nature.

Dependence on managers The AIFM and/or the Investment Manager of the relevant Sub-Fund is responsible for the allocation of the Sub-Fund's assets but will not have control over the management of the Portfolio Funds or any of their investments. The relevant Sub-Fund will therefore be highly dependent upon the expertise and abilities of the Portfolio Funds' managers and their personnel, who will have investment discretion over the Portfolio Funds' assets and, therefore, the death, incapacity or retirement of any of the managers' principals may adversely affect the investment results of the Portfolio Funds and of the relevant Sub-Fund.

As an investor in the Portfolio Funds, the relevant Sub-Fund will receive periodic reports from the Portfolio Funds' managers at the same time as any other investor in such Portfolio Funds. The AIFM and/or the Investment Manager will request detailed information on

a continuing basis from each Portfolio Fund manager regarding the manager's historical performance and investment strategies. Further, it is intended that any Sub-Fund will be disenfranchised of the voting rights attached to any shares, units or interests of Portfolio Funds managed or sponsored by the AIFM and other J.P. Morgan Affiliates.

Although the AIFM and/or the Investment Manager will attempt to select for investment only those Portfolio Funds whose managers will invest the Portfolio Funds' assets with the highest level of integrity, the AIFM and/or the Investment Manager does not have control over the operations of any of the Portfolio Funds or the managers for any Portfolio Funds. As a result, there can be no assurance that these key investment professionals or other persons employed by the Portfolio Funds will continue to be associated with, or available to, the managers engaged by the relevant Portfolio Fund throughout the term of the underlying Investments. The loss of the services of one or more of such persons could have an adverse impact on the relevant Sub-Fund's ability to realise its investment objective.

In addition, in order to facilitate investment by the Portfolio Funds in investment opportunities, such Portfolio Funds may own vehicles established and operated by Affiliates of JPMorgan Chase & Co. In particular, an aggregation vehicle may be established to facilitate the execution and management of the Portfolio Fund's investment strategy. The formation, operational and other expenses of any such vehicle would generally be borne by the Portfolio Fund on a pro rata basis (based on commitments or Subscriptions to such vehicle). While the goal of such aggregation vehicle would be to achieve efficiencies and other benefits, the use of such aggregation vehicle may present certain risks, including, but not limited to, managing and coordinating different

investment objectives of such Portfolio Fund and managing different investment, tax, regulatory and other interests with respect to such Portfolio Fund. The failure of another investor in such aggregation vehicle to meet a funding obligation to the aggregation vehicle could have adverse consequences for the Portfolio Fund.

Expedited transactions Investment analyses and decisions may frequently be required to be undertaken on an expedited basis to take advantage of investment opportunities. In such cases, the information available at the time of making an investment decision may be limited. Therefore, no assurance can be given that investment managers will have knowledge of all circumstances that may adversely affect the investments.

In addition, investment managers may rely upon independent consultants in connection with its evaluation of proposed Portfolio Funds' investments, and no assurance can be given as to the accuracy or completeness of the information provided by such independent consultants.

Disincentives to remove the Advisor and/or the Managing Entities

Third parties dealing with a Portfolio Fund, or its investments may insist that such Portfolio Fund's investment advisor and any managing entities of the Portfolio Fund continue to perform their respective functions for and on behalf of the Portfolio Fund, as a condition to doing business with the Portfolio Fund. Such Target Fund investors may have disincentives to terminate or remove the general partner and/or the investment advisor (or similar entity) of the Portfolio Fund, if doing so would trigger a change of control provision, a default or an event of default under the documents governing the relations of such Portfolio Fund or its investments with such other third parties.

Style drift The Sub-Fund may be affected by a Portfolio Fund's "style drift" (i.e. the risk that a Portfolio Fund over time may deviate from its stated or expected investment strategy) or the failure of a Portfolio Fund to adhere to its own investment guidelines. A Portfolio Fund's style drift can occur abruptly if, for example, the Portfolio Fund's investment manager believes it has identified a particular investment

opportunity that may produce higher returns than investments within the Portfolio Fund's stated strategy from a different approach (and the Portfolio Fund's investment manager disposes of an interest quickly to pursue this approach) or it can occur gradually if, for instance, a "value"-oriented underlying Investment gradually increases the Portfolio Fund in "growth" stocks. Style drift poses a particular risk for multiple-manager structures since, as a consequence, the Sub-Fund may be exposed to particular markets or strategies to a greater extent than was anticipated by the Investment Manager due to resulting overlap of investment strategies among various Portfolio Funds. In addition, "style drift" may affect the investment categorisation of a Portfolio Fund as relating to particular discipline, and, as a result, may affect the Investment Manager's attempts to monitor the Sub-Fund's diversification guidelines.

Offsetting positions The Portfolio Funds invest wholly independently of one another and may at times hold economically offsetting positions.

Diversification of the asset class All investment decisions in respect of the Portfolio Funds will be made by the investment managers of the Portfolio Funds and it is possible that the investment managers of different Portfolio Funds will take positions or engage in transactions in the same securities or in issues of the same asset class, industry, currency, country or commodity at the same time, which may have an impact on the effective diversification that will be achieved in respect of a Sub-Fund's portfolio.

Capital calls and use of subscription lines and asset-backed facilities A Portfolio Fund may obtain one or more revolving credit facilities in order to be able to make investments or pay management fees or other fund expenses and liabilities attributable to it. A Portfolio Fund may also pledge its assets and guarantee the indebtedness of others (including portfolio entities and entities through which investments by a Portfolio Funds are held). If a Portfolio Fund obtains a subscription facility, it is generally expected that such Portfolio Fund's interim capital needs would be satisfied through borrowings under such subscription facility, and drawdowns of investor subscriptions by a Portfolio Fund, including those used to pay interest on subscription facilities, would generally be expected to be "batched" together into larger, less frequent drawdowns (although actual timing and amounts may vary). Although there may be limitations regarding the amount of time borrowings by a Portfolio Fund under a subscription facility may remain outstanding, there is no limitation on the amount of time guarantees by a Portfolio Fund may remain outstanding, and the interest expense and other costs of any such borrowings and guarantees will be fund expenses and, accordingly, may decrease net returns of a Portfolio Fund.

In addition, the use of a subscription facility (or other long-term leverage) with respect to investments will result in a higher reported gross internal rate of return and net internal rate of return at the Portfolio Fund than if such subscription facility (or other long-term leverage) had not been used and instead the investors' capital had been contributed at the inception of each such investment. That is because the calculation would incorporate shorter periods of time given that calculations of gross internal rate of return and net internal rate of return at the Portfolio Fund level use (a) the date of subscription by investors to a Portfolio Fund for the relevant investment (i.e. the due date for the call notice, and not the date the investment was made, if funded by a subscription facility that was later repaid with investor subscription(s)) and (b) the date of distribution from a Portfolio Fund to investors (i.e. the date a Portfolio Fund wires cash to investors).

To the extent that a Portfolio Fund is unable to obtain a subscription facility, access to such facility becomes unavailable or the general partner (or similar managing entity) of a Portfolio Fund otherwise

determines not to use such facility, the general partner (or similar managing entity) of the Portfolio Fund may draw down capital commitments in advance and hold them in reserve in order to make investments, satisfy fees and expenses and other capital needs as such needs arise in the future. Estimating the appropriate amount of such reserves is difficult and inadequate or excessive reserves could impair the investment returns to the investors. If a Portfolio Fund's reserves are inadequate and the general partner (or similar managing entity) of a Portfolio Fund is unable to draw down commitments pursuant to the governing documents of a Portfolio Fund, a Portfolio Fund may be unable to take advantage of attractive investment opportunities or to protect its existing investments from dilutive or other punitive terms.

Leverage; subscription lines; repurchase agreements An underlying Investment may, from time to time, either directly, or indirectly through one or more entities, enter into one or more credit facilities, including, without limitation, one or more subscription lines, which may be on a recourse or non-recourse, secured or unsecured basis, and may include guarantees and other forms of credit enhancement and one or more repurchase agreements. It is anticipated that to the extent any such credit facility is recourse debt financing such credit facility may contain a number of covenants typically associated with secured lending that, among other things, may restrict the ability of such Portfolio Fund to: (i) acquire or dispose of assets or businesses; (ii) incur additional indebtedness; (iii) make capital expenditures; (iv) make cash distributions; or (v) make capital calls to investors. In addition, such recourse debt financing would likely require a Portfolio Fund to maintain specified financial ratios and to comply with certain tests, including a minimum interest coverage ratio, a maximum leverage ratio, a minimum net worth and minimum equity capitalisation requirements. The use of third-party leverage may also involve cross collateralising multiple Investments and thus entail an increased risk of loss. Principal and interest payments on any indebtedness incurred will be payable regardless of whether the Portfolio Fund has sufficient cash available.

Further, there can be no assurance that a Portfolio Fund will be able to obtain credit facilities on terms that are acceptable to such Portfolio Fund or at all. The inability to obtain debt financing at all, or at a higher than anticipated cost, may materially affect the ability of a Portfolio Fund to achieve its investment objective or other objectives and affect the performance of the relevant Sub-Fund. The Sub-Fund may have no right to have its unpaid commitments cancelled or to otherwise withdraw from its Portfolio Fund unpaid commitments subject to any commitment cancellation right or to have their interests redeemed, transferred or repurchased. Accordingly, the Sub-Fund may be required to bear the financial risk of their investment for a significant period of time.

Investments in Portfolio Funds by affiliates of their lenders Certain affiliates of one or more lenders of a Portfolio Fund may invest in such Portfolio Fund and, as a result, may have access to certain information regarding such Portfolio Fund that is provided to the lenders. Such lenders may have affiliates who invest in the Portfolio Funds and may improperly use or disclose confidential information regarding the Portfolio Funds to such affiliates, which may not otherwise be provided to the Portfolio Funds' investors, including the relevant Sub-Fund. It is not always possible to deter misconduct by such lenders and their affiliates and the precautions the investment manager (or similar entity) takes to detect and prevent this activity may not be effective in all cases.

Reserves for capital calls In managing a Sub-Fund, the AIFM and/or the Investment Manager will establish reserves for capital calls from Portfolio Funds, operating expenses, liabilities, currency fluctuations and other matters. Estimating the amount necessary for such reserves is difficult, particularly because Portfolio Funds may not call all of the

capital that the relevant Sub-Fund has committed to such funds. Inadequate or excessive reserves could have a material adverse effect upon the investment returns to investors.

Over-commitment risk A Sub-Fund may adopt an over-commitment strategy by committing to invest in Portfolio Funds an aggregate amount exceeding its available liquidities/assets. This strategy relies on the assumption that Portfolio Funds will not, at the same time and before having made significant distributions, draw down all of the Sub-Fund's capital commitments from the Sub-Fund. If this assumption proves incorrect, or if the Sub-Fund is otherwise unable to meet capital calls made by any Portfolio Fund, the Sub-Fund may be subject to stringent default provisions imposed by one or more Portfolio Funds. Such default measures may include the forfeiture of all or part of the Sub-Fund's interest in the relevant Portfolio Fund. As a result, the Sub-Fund may lose some or all of the capital it has committed or invested.

Ability to enter into side letters The general partners of the Portfolio Funds (or similar entity) are authorised to enter into side letter agreements with one or more Portfolio Fund investors, which may amend, supplement, restate or otherwise modify the terms applicable to the relevant Portfolio Fund investor, which may result in such investor being provided with different treatment than that provided to other investors in the Portfolio Fund, including the relevant Sub-Fund.

Investment vehicles A Portfolio Fund's advisors may form, or permit the formation of, inter alia, alternative investment vehicles, parallel funds and feeder funds and/or any other type of investment structures irrespective of their corporate or contractual form. Such investment vehicles, parallel funds and feeder funds could create conflicts of interest to the extent J.P. Morgan (or its Affiliates) are simultaneously representing the interests of the Sub-Fund in the Portfolio Fund and the investors in such other investment vehicles, parallel funds and feeder funds.

A Portfolio Fund may be a fund with no fixed life and the ability to accept additional commitments continuously and utilises a multiple-entity structure, may result in actual or deemed taxable dispositions of a portion of such Portfolio Fund's and the Sub-Fund's Investments without any corresponding receipt or distribution of cash and that such actual or deemed taxable dispositions may have an adverse tax impact on redeeming and continuing Portfolio Fund investors.

Likewise, the Sub-Funds may invest through investment vehicles that are designed to aggregate investments across any parallel vehicles alongside which the Sub-Funds fully or partially invest. While these aggregating vehicles are designed to channel and facilitate the execution and management of investments, they may present certain risks, including, but not limited to, managing and coordinating different investment, tax, regulatory and other needs of the parallel vehicles. Circumstances at the level of such parallel vehicles such as the failure of a parallel vehicle to meet a funding obligation to the aggregation vehicle or redemptions at the level of such parallel vehicle could potentially have adverse consequences for the Sub-Funds.

Diversity of Investors Investors in the Portfolio Funds, including among such investors the relevant Sub-Fund, will include taxable and tax-exempt entities, and persons or entities residing in or organised in various jurisdictions, and may, therefore, have conflicting investment, tax and other interests with respect to their investment in the Portfolio Funds. Conflicting interests of investors may relate to or arise from, among other things, the structuring and nature of the Portfolio Fund's investments and the timing of disposition of such investments. Such factors are anticipated to result in different after-tax returns being realised by different Portfolio Fund's investors. Conflicts may also arise in connection

with decisions made by the Portfolio Fund investment manager and/ or the Portfolio Fund that may be beneficial for one or more Portfolio Funds' investors but not others, particularly with respect to each such investors' tax consequences and status. In advising a Portfolio Fund in connection with its investments and the structuring of its investments, the Portfolio Fund investment manager, subject to the intentions stated herein in relation to the structuring of certain classes of investments, will consider the Portfolio Fund's investment objective as a whole rather than the investment objectives, or particular tax or regulatory status of, or consequences to, any particular investor, including the relevant Sub-Fund.

Performance fee The investment managers of the Portfolio Funds may be entitled to a performance fee based on the appreciation of the portfolio of the Portfolio Fund. The performance fee may create an incentive for the relevant investment managers to make riskier and more speculative investments and trades. In addition, the performance fee may be calculated on the basis of unrealised appreciation of the Portfolio Fund's portfolio which may result in a non-refundable overpayment if the relevant unrealised assets are not subsequently realised as expected.

Performance fee not correlated to the overall performance of a Sub-Fund Each investment manager of a Portfolio Fund may be compensated based on the performance of that Portfolio Fund. Consequently, the performance fee may be payable in respect of one or more of the Portfolio Funds when the overall performance of a Sub-Fund's portfolio has depreciated or has not met the level which would entitle the applicable Investment Manager to charge the performance fee.

Duplication of costs, fees and expenses Each Sub-Fund will be allocated costs and fees of its own management, administration and other services. In addition, a Sub-Fund investing in a Portfolio Fund will bear similar costs in its capacity as an investor in that Portfolio Fund including, without limitation, any subscription fees. However, there will be no duplication of subscription fees and management or advisory charges (with the exception of performance fees) in relation to investments in the Portfolio Funds in relation to which a company of JPMorgan Chase & Co. acts as investment manager or management company. For the avoidance of doubt, performance fees may be payable at the Portfolio Fund level including those Portfolio Funds where a company of JPMorgan Chase & Co. acts as investment manager or management company. Accordingly, prospective investors should note that the aggregate fees and costs are likely to exceed the fees and costs that would typically be incurred in respect of an investment that is not a fund of funds.

Securities

Equity securities The value of equities may go down as well as up in response to the performance of individual companies and general market conditions, sometimes rapidly or unpredictably.

Equity exposure may also be obtained through equity-related securities such as warrants, depositary receipts, convertible securities, index and participation notes and equity-linked notes, which may be subject to greater volatility than the underlying reference asset and are also exposed to the risk of counterparty default.

Smaller companies Stocks of smaller companies which may be less liquid, more volatile and tend to carry greater financial risk than stocks of larger companies.

Equity-linked notes Equity-linked notes are exposed not only to movements in the value of the underlying assets, but also to the risk that the issuer defaults or becomes bankrupt, which could result in the loss of the full market value of the note (counterparty risk).

Participation notes Participation notes are exposed not only to movements in the value of the underlying equity, but also to the risk

of counterparty default, both of which could result in the loss of the full market value of the participation note.

Preferred securities Preferred equities are susceptible to interest rate and credit risk as they comprise certain characteristics of bonds. They are often less liquid than other securities of the same issuer, and their right to receive dividends before other shareholders still does not guarantee that any dividends will be paid. In certain instances, preferred securities may be redeemed by the issuer prior to a specified date, which may negatively impact the return of the security.

Debt securities All debt securities (bonds) including those issued or guaranteed by governments and their agencies carry credit risk and interest rate risk.

Investment grade debt With investment grade debt securities, the likeliest form of credit risk is a credit downgrade, which typically will cause a security's value to fall. It is unlikely, though not unknown, for an investment grade bond to go into default. The downgrading of debt securities may affect the liquidity of investments in bonds. Other market participants may be attempting to sell debt securities at the same time as a Sub-Fund, causing downward pricing pressure and contributing to illiquidity. The ability and willingness of bond dealers to "make a market" in debt securities may be impacted by both regulatory changes as well as the growth of bond markets. This could potentially lead to decreased liquidity and increased volatility in the debt markets.

Bonds are particularly susceptible to interest rate changes and may experience significant price volatility. If interest rates increase, the value of a Sub-Fund's investments typically declines. In a historically low interest environment, risks associated with rising interest rates are heightened. On the other hand, if interest rates fall, the value of the investments generally increases. Securities with greater interest rate sensitivity and longer maturities tend to produce higher yields but are subject to greater fluctuations in value.

Below investment grade debt Below investment grade debt securities are typically more volatile and less liquid than investment grade debt and have significantly greater risk of default. They are typically lower rated and will usually offer higher yields to compensate for the reduced creditworthiness of the issuer.

Credit downgrades are more likely than for investment grade bonds and can lead to more significant changes in value than for investment grade bonds. Below investment grade bonds are sometimes less sensitive to interest rate risk, but are more sensitive to general economic news, as issuers of below investment grade bonds tend to be in weaker financial health and therefore are presumed to be more vulnerable in a deteriorating economy.

Subordinated debt Subordinated debt securities are more likely to suffer a partial or complete loss in the case of any default or bankruptcy of the issuer because all obligations to holders of senior debt must be satisfied first.

Certain subordinated bonds are callable, meaning the issuer has the right to buy it back at a specified date and price. If the bond is not "called", the issuer can extend the maturity date further or defer or reduce the coupon payment.

Unrated debt The credit quality of bonds that have not been rated by an independent rating agency will be determined by the Investment Manager at the time of the Investment. Investments in unrated bonds are subject to those risks of a rated security of comparable quality.

Distressed debt Distressed debt or securities of underlying Investments involved in workouts, liquidations, reorganisations, bankruptcies and similar situations can carry substantial uncertainty concerning the outcome of transactions involving such underlying Investments. Therefore, there is a high degree of risk of

loss, including loss of the entire investment.

Inflation-linked securities Inflation-linked debt securities are subject to the effects of changes in market interest rates caused by factors other than inflation (real interest rates). In general, the price of an inflation-linked security tends to decrease when real interest rates increase and can increase when real interest rates decrease. Interest payments on inflation-linked securities are unpredictable and will fluctuate as the principal and interest are adjusted for inflation.

In the case of inflation-indexed bonds, their principal value is periodically adjusted according to the rate of inflation. If the index measuring inflation falls, the principal value of inflation-indexed bonds will be adjusted downward, and consequently the interest payable on these securities (calculated with respect to a smaller principal amount) will be reduced.

There can also be no assurance that the inflation index used will accurately measure the real rate of inflation in the prices of goods and services. A Sub-Fund's Investment in inflation-linked securities may lose value in the event the actual rate of inflation is different than the rate of the inflation index.

MBS/ABS Mortgage-backed and asset-backed securities (MBS and ABS) depend on the cash flows from a specified pool of financial assets and are subject to greater credit, liquidity and interest rate risk and may be more volatile than other bonds.

MBS/ABS prices and yields typically reflect the assumption that they will be paid off before maturity. When interest rates fall, these securities are often paid off early, as the borrowers of the underlying debt refinance at lower interest rates (prepayment risk). Subsequently, a Sub-Fund may have to reinvest in lower-yielding securities. When interest rates rise, the underlying debt tends to be repaid later than expected, and can therefore increase the duration, and hence the volatility, of these securities. In addition, investments in MBS/ABS may be less liquid than other bonds.

To-be-announced (TBA) securities, which are MBS or ABS that are purchased sight unseen 48 hours before they are issued, can fall in value between the time a Sub-Fund commits to the purchase and the time of delivery.

Credit-linked notes Credit linked notes are exposed to the risk of the underlying reference asset (such as a bond) being downgraded or defaulting and also to the risk of the issuer defaulting or becoming bankrupt which could result in the loss of the full market value of the note.

Contingent convertible bonds Contingent convertible bonds are likely to be adversely impacted should specific trigger events occur (as specified in the contract terms of the issuer). This may result in the bond converting to equity at a discounted share price, the value of the bond being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.

Contingent convertible bonds can perform poorly even when the issuer and/or its equities are performing well. Contingent convertible bonds are structured such that the occurrence of a trigger event (such as the issuer's capital ratio or share price falling to a particular level for a certain period of time) may render the bond worthless or may trigger a conversion to equity that is likely to be disadvantageous to the bondholder. With contingent convertible bonds, the date and amount of any repayment of principal is uncertain as their termination and redemption require regulatory approval, which may not be granted in certain circumstances.

Privately placed securities Privately placed securities held by a Sub-Fund (or target entities in which a Sub-Fund invests) may involve special registration risks, liabilities and costs, as well as valuation or other liquidity-related difficulties. In addition, the target entities in which a Sub-

Fund investments will be subject to the risk of breach of the purchase agreements by the issuers of such securities.

Settlement No guarantee can be given that all entitlements attaching to securities acquired by the Fund and the relevant Sub-Fund, including interest and dividends, can be realised. Neither the AIFM, the Investment Manager nor any of their agents or Affiliates makes any representation or warranty about, or any guarantee of, the operation, performance, settlement, clearing and/or registration of a Sub-Fund's Investments or the credit risk associated with dealing in any Sub-Fund's Investments.

Restrictions with respect to managing registered securities A Sub-Fund may invest directly or indirectly in securities of non-public companies that may subsequently register their equity securities and list them for public trading while such Sub-Fund owns such securities. The Investment Manager, on behalf of the relevant Sub-Fund, as a holder of securities of a non-public company, may also determine it is in the Sub-Fund's interest to encourage such a company to register its equity securities and to list them for public trading as part of the Sub-Fund's investment or exit strategy. In connection with such registration and listing, it may be in the interest of the Sub-Fund that members of the Investment Manager or other J.P. Morgan Interested Persons serve on the board of such company. However, applicable securities laws and internal policies of J.P. Morgan could limit the ability of such persons to serve on such board. If such persons serve on the board of a public company, such persons and the Fund will likely be subject to certain investment and trading limitations arising from such board member's access to material, non-public information. Such limitations may be adverse to a Sub-Fund.

Derivatives

Derivatives generally The value of derivatives can be volatile. This is because a small movement in the value of the underlying asset can cause a large movement in the value of the derivative and therefore, investments in such instruments may result in losses in excess of the amount invested by the Sub-Fund.

The pricing and volatility of many derivatives sometimes diverge from strictly reflecting the pricing or volatility of their underlying reference asset(s). In difficult market conditions, it might be impossible or unfeasible to place orders that would limit or offset the market exposure or financial losses created by certain derivatives.

Changes in tax, accounting, or securities laws could cause the value of a derivative to fall or could force the relevant Sub-Fund to terminate a derivative position under disadvantageous circumstances.

OTC derivatives As OTC derivatives are private agreements between the Fund on behalf of a specific Sub-Fund and one or more counterparties, they are less regulated than market-traded derivatives. OTC derivatives carry greater counterparty risk and liquidity risk, and it could be more difficult to force a counterparty to meet its obligations to the Fund. If a counterparty ceases to offer a derivative that a Sub-Fund is using or is planning to use, the Sub-Fund might not be able to find a comparable derivative elsewhere. This in turn could cause the Sub-Fund to miss an opportunity for gain or find itself unexpectedly exposed to risks or losses, including losses from a derivative position for which it was unable to buy an offsetting derivative.

It may not always be possible for the Fund to divide its OTC derivative transactions among a wide variety of counterparties and the inability to trade with any one counterparty could cause significant losses.

Conversely, if any Sub-Fund experiences any financial weakness or fails to meet an obligation, counterparties might become

unwilling to do business with the Fund, which could leave the Fund unable to operate efficiently and competitively.

Exchange-traded derivatives While exchange-traded derivatives are generally considered lower risk than OTC derivatives, there is still the risk that a suspension of trading in derivatives or in their underlying assets could make it impossible for a Sub-Fund to realise gains or avoid losses, which in turn could cause a delay in handling redemptions of Shares. There is also a risk that settlement of exchange-traded derivatives through a transfer system might not happen when or as expected.

Hedging Any measures that a Sub-Fund takes that are designed to offset specific risks could work imperfectly, might not be feasible at times, or could fail completely. The Sub-Fund can use hedging within its portfolio to mitigate currency, duration, market, interest rate or credit risk, and, with respect to any designated Share Classes, to hedge currency exposure of the Share Class. Hedging involves costs, which reduce investment performance.

If the Fund were to enter into any hedge agreements, the Fund would be able to reduce the hedged amount of any hedge agreement in connection with distributions of the Shares to the Investors. In the case of such a hedged amount reduction or any early termination of any hedge agreement, the Fund may be required to make a payment to a hedge counterparty, and any amounts that would be required to be paid by the Fund to enter into replacement hedge agreements will reduce amounts available for payments on the Shares. If this were to occur, there can be no assurance that the remaining payments on the collateral would be sufficient to make distributions on the Shares.

Termination of hedge agreements Generally, if the Fund and, as applicable, the relevant Sub-Fund were to enter into any hedge agreements, a Sub-Fund would be able to reduce the hedged amount of any hedge agreement in connection with distributions of the Shares to the Investors. In the case of such a hedged amount reduction or any early termination of any hedge agreement, a Sub-Fund may be required to make a payment to a hedge counterparty, and any amounts that would be required to be paid by a Sub-Fund to enter into replacement hedge agreements will reduce amounts available for payments on the Shares. If this were to occur, there can be no assurance that the remaining payments on the collateral would be sufficient to make distributions on the Shares.

Collateral Operational failure/issues could result in the value of collateral being incorrectly determined or monitored. This could then result in delays in posting or recalling of collateral. There may be time gaps between the calculation of risk exposure to a counterparty's provision of additional collateral or substitutions of collateral, or the sale of collateral in the event of default by a counterparty.

Other Risks

Borrowing/leverage A Sub-Fund (or any aggregator or intermediate vehicle) may leverage its Investments with debt financing. Although the use of leverage may enhance returns and increase the number of investments that can

be made, it may also substantially increase the risk of loss of principal. It may also be difficult for the Sub-Fund (or any aggregator or intermediate vehicle) to secure leverage in certain economic periods. The Sub-Fund (or such aggregator or intermediate vehicle) may enter into borrowing agreements which may contain financial covenants that could, among other things, require it to maintain certain financial ratios. Should the Sub-Fund (or such aggregator or intermediate vehicle) breach the financial or other covenants contained in any such borrowing agreement, the Sub-Fund (or such aggregator or intermediate vehicle) may be required immediately to

repay such borrowings in whole or in part, together with any attendant costs. If the Sub-Fund (or such aggregator or intermediate vehicle) does not have sufficient cash resources available to make such repayments, it may be forced to sell some or all of the assets comprising its portfolio. Moreover, any failure to repay such borrowings or, in certain circumstances, other breaches of covenants under the Sub-Fund's (or such aggregator's or intermediate vehicle's) borrowing agreements could result in the Sub-Fund (or such aggregator or intermediate vehicle) being required to suspend payment of its distributions.

Notwithstanding anything to the contrary in the borrowing restrictions applicable to the Fund, a Sub-Fund (or such aggregator or intermediate vehicle) may enter into credit facilities or other borrowing arrangements. The Sub-Fund (or such aggregator or intermediate vehicle) may subscribe for shares or interests of Portfolio Funds with proceeds from such facilities. The interest expense and other costs of any such borrowings will be underlying Investment Expenses and, accordingly, may decrease net asset value of the Sub-Fund.

Counterparty and creditworthiness A Sub-Fund may engage in transactions in securities and/or other financial instruments that involve counterparties, and no counterparty exposure limits have been imposed on these transactions. Under certain conditions, a counterparty to a transaction could default. In addition, a Sub-Fund could suffer losses if there were a default or bankruptcy by third parties, including, without limitation, brokerage firms and banks with which a Sub-Fund does business, or to which securities have been entrusted for custodial purposes.

Custody The safekeeping of the Fund's assets, especially abroad, is associated with a risk of loss that can result from insolvency, duties of care being breached or force majeure. In particular, the liability of the Depositary and any sub-depositary or central securities depositary instructed by the Depositary may be reduced.

Inflation Generally, a potential occurrence of inflation carries a devaluation risk with regard to all assets. The same applies also to the Investments held by a Sub-Fund. The inflation rate could possibly exceed the gain in value of the relevant Sub-Fund.

Deflation Deflation could reduce the value of the Sub-Fund's Investments as economic growth is often negatively impacted by consumers and businesses delaying purchase decisions as prices reduce. Periods of deflation are often characterised by a tightening of money supply and credit, which could limit a Sub-Fund's ability to find suitable investments and so limit the number and size of investments that the Sub-Fund may make and affect the rate of return to Investors.

Uncertain exit strategies Due to the illiquid nature of some of the Investments which a Sub-Fund intends to acquire, the AIFM is unable to predict with confidence what the exit strategy will ultimately be for any given Investment, or that one will definitely be available. Exit strategies which appear to be viable when an Investment is initiated may be precluded by market, economic, legal, political or other factors by the time the Investment is ready to be realised. Furthermore, the timing of the disposition of a Sub-Fund's Investments, if any, is uncertain, and the timing of any disposition may be disadvantageous to some or all of the Shareholders. A Sub-Fund may make Investments which may not be advantageously disposed of prior to the expiration of the term or otherwise. A Sub-Fund may have to sell, distribute or otherwise dispose of Investments at a disadvantageous time as a result of dissolution or otherwise. There can be no assurances with respect to the timeframe in which the winding-up and the final distribution of proceeds to the Shareholders will occur.

Effect of substantial losses Substantial redemption requests at the level of a Sub-Fund could be triggered by a number of events,

including, without limitation, unsatisfactory performance, events in the markets, significant change in personnel or management of the Investment Manager, legal or regulatory issues that Investors perceive to have a bearing on a Sub-Fund or the Investment Manager, or other events. Actions taken to meet large redemption requests at the level of a Sub-Fund could result in prices of the underlying Investments (and indirectly the Sub-Fund) decreasing and in the Sub-Fund's expenses increasing (e.g., transaction costs and the costs of terminating agreements). The overall value of the Sub-Fund may decrease because the liquidation value of certain underlying assets may be materially less than their cost or mark-to-market value. The Sub-Fund may be forced to sell its more liquid positions, which may cause an imbalance in the portfolio that could have a material adverse effect on the remaining investors.

Large redemption requests could also significantly restrict a Sub-Fund's ability to obtain financing or transact with counterparties needed for its investment strategies, which would have a further material adverse effect on such Sub-Fund's performance.

Blind pool A Sub-Fund may be a "blind pool", if no assets have been acquired by such Sub-Fund at the time this Prospectus is drafted. Consequently, the risks connected with the investments are at this time assessable only to a limited extent. The Investors have no possibility to analyse the investments prior to an investment made by a Sub-Fund.

Competition for investment opportunities A Sub-Fund may operate in a highly competitive market for investment opportunities. The Sub-Fund will hence compete for investments with various other investors. Many competitors are substantially larger and have considerably more financial and other resources. Other funds, including Other Accounts, may have investment objectives that overlap with a Sub-Fund, which may create competition for investment opportunities with limited supply. Competitive pressure could impair the Fund's business, financial condition and results of operations.

Due diligence Before making an investment, the Investment Manager will seek to assess the strengths and weaknesses of a potential investment including factors and characteristics that are material to the performance of the potential investment. In making the assessment and otherwise conducting due diligence, the Investment Manager will rely on resources available to it and, in some cases, an investigation by third parties. There can be no assurance that the Investment Manager's due diligence process will be comprehensive or uncover all relevant facts or that any investment will be successful.

Investment leverage A Sub-Fund's Investments may include companies that incur debt, including through secured or unsecured debt facilities or convertible notes. Such Investments, or other structures, will be subject to the inherent risks of debt, including economic downturns and rising interest rates. If a company cannot generate adequate cash flows to meet its debt obligations, the Sub-Fund may suffer a partial or total loss of debt or equity invested in such company.

Capital facilities A Sub-Fund (or such aggregator or intermediate vehicle) may be authorised to borrow money through one or more secured or unsecured credit facilities, to fund investments in advance of drawdowns from the Shareholders (where a Sub-Fund is commitment-based) or for other purposes in the discretion of the Investment Manager and, to the extent applicable, the AIFM. The credit facilities may be secured by a pledge, transfer and/or grant of security interest to the lender(s) of any or all of the Sub-Fund's assets including: (i) the right to draw all or a portion of the aggregate Unused Subscriptions, as relevant, of any or all Shareholders of the relevant Sub-Fund (regardless of whether such Subscription(s)/ Capital Commitment(s) is/(are) used by the lender to determine the amount to be loaned under a credit facility); or (ii) collateral account(s) into which the payments by the

Shareholders of Subscription(s)/Capital Commitment(s) in respect of their Unused Subscriptions are made.

A Sub-Fund may participate in, guarantee and borrow funds under a credit facility at its level or at the level of an aggregator or intermediate vehicle or together with any Other Account and/or one or more investments thereof on any basis the Investment Manager, and/or the AIFM determines is fair and reasonable to the relevant Sub-Fund, except subject to the limitations described in the relevant Sub-Fund Descriptions.

The use of credit facilities will cause the relevant Sub-Fund (or aggregator or intermediate vehicle) to incur interest and other expenses. As is typical of credit arrangements, the Sub-Fund's credit agreements may include a number of different terms which permit the lender to materially reduce or terminate the credit line or increase the cost of such facility upon the occurrence of certain events. Also, as is typical, a credit facility provider may terminate the facility for events of default tied to events relating to the Sub-Fund (or aggregator or intermediate vehicle), the Investment Manager, the AIFM, the Shareholders or other circumstances, even if those events are not reasonably related to the relevant Sub-Fund's (or aggregator's or intermediate vehicle's) ability to repay the borrowing. In the event a credit facility is materially reduced or terminated, there can be no assurance the relevant Sub-Fund (or aggregator or intermediate vehicle) would be able to find suitable replacement credit arrangements.

Certain terms of credit facilities may have the effect of imposing constraints on the Sub-Fund's investment programme, including requiring the lender's consent to make new or additional investments or remove cash from the Sub-Fund even if the Sub-Fund is not in default.

Multiple rounds of financing A Sub-Fund may make investments in companies which may be expected to require additional financing to satisfy their working capital requirements or acquisition or growth strategies. The amount of such additional financing needed will depend upon the maturity and objectives of the particular Investment. Each round of financing (whether from the Sub-Fund or other investors) is typically intended to provide an Investment with enough capital to reach the next major corporate milestone. If the funds provided are not sufficient, an Investment may have to raise additional capital at a price unfavourable to the existing investors, including the Sub-Fund. In addition, the Sub-Fund may make additional equity investments to preserve the Sub-Fund's proportionate ownership when a subsequent financing is planned, or to protect the Sub-Fund's Investment when an Investment's performance does not meet expectations. The availability of capital is generally a function of capital market conditions that are beyond the control of the Sub-Fund or any Investment thereof. If additional capital is needed by an Investment of the Sub-Fund, it may not be available on reasonable terms, or at all.

Bridge financing From time to time, a Sub-Fund may make interim investments in companies in anticipation of a future issuance of equity, long-term debt securities, other refinancing, or syndication. Such bridge loans would typically be convertible into a more permanent, long-term security. However, for reasons not always in the Sub-Fund's control, such long-term securities issuance or other refinancing or syndication may not occur and such bridge loans and interim investments may remain outstanding. In such event, the terms of such interim investments may not adequately reflect the risk associated with the position taken by the Sub-Fund.

Bankruptcy Investments in companies or other entities involved in bankruptcy proceedings involve a number of significant risks. Many of the events within a bankruptcy litigation are adversarial and often beyond the control of the creditors. While creditors generally are

afforded an opportunity to object to significant actions, there can be no assurance that a bankruptcy court would not approve actions which could be contrary to the interests of the Fund or Sub-Funds. Furthermore, there are instances where creditors and equity holders lose their ranking and priority as such if they are considered to have taken over management and functional operating control of a debtor. This is particularly the case in those jurisdictions which are considered to have 'debtor-friendly' insolvency or bankruptcy regimes and give a comparatively high priority to preserving the debtor company as a going concern or, alternatively, which seek to protect the interests of creditors with higher-ranking claims in bankruptcy or of other key stakeholders such as certain employees, pension trustees and/or trade creditors.

Contingent liabilities on disposition of Investments In connection with the disposition of an Investment, a Sub-Fund may be required to make representations about the business and financial affairs of such company typical of those made in connection with the sale of a business. A Sub-Fund also may be required to indemnify the purchasers of such investment to the extent that any such representations are inaccurate or with respect to certain potential liabilities.

Regulatory capital trades Any investments by a Sub-Fund in entities that have regulatory capital requirements may require pre-approval by self-regulatory organisations or regulatory agencies and there can be no assurance such approval will be granted. In addition, entities that need regulatory capital relief to comply with regulatory capital requirements may be experiencing significant financial or business difficulties. A Sub-Fund may lose a substantial portion or all of its investment in such entities. Among the risks inherent in investments in entities experiencing significant financial or business difficulties is the fact that it frequently may be difficult to obtain information as to the true condition of such entities. Such investments also may be adversely affected by laws relating to, among other things, fraudulent conveyances, voidable preferences, lender liability and the bankruptcy court's discretionary power to disallow, subordinate or disenfranchise particular claims. In addition, a financial institution may become subject to restrictions imposed by the applicable central government as the result of such financial institution accepting an offer of recapitalisation by such government; such restrictions may include restrictions on the paying out of dividends to shareholders.

Inability to make follow-on investments Following its initial acquisition of an Investment, a Sub-Fund may be called upon to provide additional capital to any such existing Investment or may have the opportunity to increase its participation in Investments. There can be no assurance a Sub-Fund will have sufficient resources or will otherwise be able to make any such "follow-on" investments. Any decision by the Investment Manager not to make follow-on investments or a Sub-Fund's inability to make follow-on investments may have a negative impact on a Sub-Fund's existing Investments including a loss of rights or a dilution of its holding or may result in missed opportunities for a Sub-Fund to increase its participation in Investments or to protect against detrimental dilution of its interest in existing Investments.

Dilution at subsequent Subscription Continued investments into a Sub-Fund by new and existing Investors will dilute the participation of existing Shareholders in such Sub-Fund. Such inflows of cash in the Sub-Fund will increase the share of available liquidity, including cash or near cash-instruments. While seeking investment opportunities, the Investment Manager may invest part of the Sub-Fund's available liquidity in liquid investments in order to maximise the use and the return of cash flow. While the Investment Manager has established and maintains a cash management strategy aligned with the Sub-Fund's investment objective and strategy, excess of cash following new Subscriptions for Shares in a Sub-Fund may negatively impact the financial performance of such Sub-

Fund as liquid investments usually result in a lower yield than other assets.

Reliance on projections and models Projections for performance may be incorrect or rely on incorrect assumptions. The Investment Manager will generally establish the pricing of transactions and the capital structure of Sub-Fund's investments, at least in part, on the basis of financial projections and other information provided by such Investments. Projected operating results will normally be based primarily on management judgements. Projections are only estimates of future results based on assumptions made at the time the projections are developed. Projected results may not be obtained, and actual results may vary significantly from the projections. General economic, political and market conditions, which are not predictable, may have a material adverse impact on the reliability of such projections.

Sub-Fund Share Risks

No certainty of return There is no certainty that Investors will receive any return on their investment or repayment of the capital they have invested in the Fund and, as applicable, the relevant Sub-Fund and Investors cannot rely on valuations as a conclusive indicator of future sales proceeds. An investment in a Sub-Fund is only appropriate for Investors who have the financial resources necessary to withstand the risk of a potential loss of their entire investment.

No certainty of distributions There is no certainty of an Investor receiving any distributions from the Fund and, as applicable, the relevant Sub-Fund.

Distributions in kind In case an Investor accepts that a distribution is not made in cash but made as a distribution in kind, such distribution may consist of securities of entities unable to make distributions, or securities lacking a public market or subject to transfer restrictions or only disposable at a significant discount.

Recourse to all assets All assets of a Sub-Fund are available to satisfy all liabilities and obligations of the relevant Sub-Fund. Parties seeking to impose a liability on the Fund may not only be limited to the asset representing the investment giving rise to such liability.

Appraisals and valuations Neither a Sub-Fund nor its Investment Manager will generally be part of the valuation process of the Portfolio Funds; nor will they have any rights to appoint or dismiss the persons responsible for valuations of the Portfolio Funds. In addition, a Portfolio Fund may not apply the same valuation methodology applied to a Sub-Fund or any other Portfolio Fund evaluating their respective portfolios.

The value of the Portfolio Funds may be established by the applicable Portfolio Funds' investment manager (or similar entity) by utilising its investment manager's then-applicable valuation policies and procedures. The Portfolio Funds' policies may provide that a valuation committee established by such Portfolio Funds' investment manager shall determine the fair market value of its investments, based on certain factors, such as the performance of the underlying asset and information collected from independent dealers, subject to upward or downward adjustments.

Many of the Portfolio Funds' investments are expected to be highly illiquid and may not be publicly traded or readily marketable. The applicable Portfolio Funds, therefore, will not have access to readily ascertainable market prices when establishing valuations of the Portfolio Funds' investments. As a result of the illiquidity of a substantial portion of such Portfolio Funds, there can be no assurance that any given Portfolio Fund could be sold at a price equal to the market value ascribed to such investment in connection with the Portfolio Fund's investment manager's valuation thereof.

Sustainability Risks –

Sustainability Sustainability risk is defined in the EU Sustainable Finance Disclosure Regulation as “an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investments”. The AIFM considers sustainability risks as risks that are reasonably likely to have a material negative impact on the financial condition or operating performance of a company or an issuer and therefore the value of that investment. In addition to a material negative impact on the value of a Sub-Fund, sustainability risk may increase a Sub-Fund's volatility and/or magnify pre-existing risks to the Sub-Fund.

Sustainability risks may be particularly acute if they occur in an unanticipated or sudden manner, and they may also cause investors to reconsider their investment in the relevant Sub-Fund and create further downward pressure on the value of the Sub-Fund.

Evolving laws, regulations and industry norms may affect the sustainability of many companies/issuers, particularly in respect of environmental and social factors. Any changes to such measures could have a negative impact on the relevant companies/issuers which may result in a material loss in value of an investment in them. Sustainability risks may impact a specific country, region, company or issuer or have a broader impact regionally or globally and adversely affect markets or issuers across several countries or regions.

Assessment of sustainability risks requires subjective judgements, which may include consideration of third-party data that is incomplete or inaccurate. There can be no guarantee an Investment Manager will assess the impact of sustainability risks on a Sub-Fund's Investments correctly.

The AIFM has adopted a policy in respect of the integration of sustainability risks in the investment decision-making process for all actively managed strategies, including all Sub-Funds, with the purpose (at a minimum and where reasonably possible/ practicable) of identifying and acting to manage sustainability risks. Further information on this policy is available on the website

am.ipmorgan.com/lu.

All Sub-Funds are exposed to sustainability risks to a varying degree. The likely impacts of sustainability risks on the returns of a Sub-Fund are assessed in reference to the Investment Manager's approach to sustainability risk management in the Sub-Fund's investment process.

The results of this assessment are set out below.

- For those Sub-Funds that promote ESG characteristics or include “sustainable” in their name, sustainability risks are considered to have a lower likely impact on their returns relative to other Sub-Funds. This is due to the sustainability risk-mitigating nature of their investment strategies which may implement exclusions, forward-looking investment policies seeking sustainable financial return and active engagement with companies/issuers.
- For all other Sub-Funds which have sustainability risks integrated in their investment decision-making process, sustainability risks are considered to have a moderate/higher likely impact on their returns relative to the Sub-Funds referred to above.
- For those Sub-Funds which do not have sustainability risks integrated in their investment decision-making process, sustainability risks are considered to have the highest likely impact on their returns relative to other Sub-Funds.

EU SFDR classification When a Sub-Fund qualifies as Article 8 or Article 9 of the EU SFDR, as the case may be, the AIFM has determined that the relevant Sub-Fund promotes environmental characteristics and/or social characteristics (as the case may be) or has sustainable investment objective(s) and that the Sub-Fund is required to disclose under Article 8 or Article 9 of the EU SFDR, as the

case may be. However, prospective investors should note that the EU SFDR is not a labelling regime; accordingly, investors should not rely on the AIFM's determination of the classification of such Sub-Fund as one subject to Article 8 or Article 9 of the EU SFDR, as the case may be, when making any decision to invest in such Sub-Fund. It is at the Investor's own risk to rely on a particular classification under the EU SFDR. The AIFM notes that the regulatory framework remains uncertain, and it is not yet clear how certain aspects of the EU SFDR, and any implementing acts or related guidelines should be interpreted. The AIFM's views on which article of the EU SFDR such Sub-Fund should be subject to may change or develop over time, including in response to amendments to the EU SFDR and any implementing acts, new or amended regulatory guidance, changes in industry approach to interpretation of the requirements of the EU SFDR, or a court decision.

European Commission action plan on financing sustainable growth

The European regulatory environment for alternative investment fund managers and financial services firms continues to evolve and increase in complexity, making compliance more costly and time-consuming. On 6 July 2021, the European Commission published its "strategy for financing the transition to a sustainable economy", which built on previous initiatives and reports including the Commission's March 2018 Action Plan on Financing Sustainable Growth (collectively, the "EU Action Plan"), to set out an updated EU strategy for sustainable finance. The EU Action Plan identified several legislative initiatives, including the EU SFDR which began to apply from 10 March 2021, and the EU Taxonomy Regulation which began to apply from 1 January 2022. Both the EU SFDR and the EU Taxonomy Regulation are intended to produce greater transparency for investors in assessing the environmental and social impacts of their investments. The EU SFDR requires transparency with regard to the integration of sustainability risks and the consideration of adverse sustainability impacts in an alternative investment fund manager's process and the provision of sustainability-related information with respect to funds, which may have an impact on the AIFM and the Sub-Fund.

The AIFM may also be impacted by a series of other ongoing legislative initiatives at EU and UK level. On 21 April 2021, the European Commission also published, as part of the Action Plan, a number of delegated regulations amending MiFID II Delegation Regulation 2017/565, the so-called "Level 2 MiFID II" and Commission Delegated Regulation (EU) 231/2013, the so-called "Level 2 AIFMD", on the integration of ESG considerations and sustainability risks into investment advice and portfolio management. The delegated regulations are applicable in the EEA member states and started applying as of the beginning of August 2022.

The Sub-Funds will bear the costs and expenses of compliance with the EU SFDR, the EU Taxonomy Regulation and any other applicable legislation or regulations related to the EU Action Plan, including costs and expenses of collecting and calculating data and the preparation of policies, disclosures and reports, in addition to other matters that relate solely to marketing and regulatory matters which otherwise would apply solely to the Sub-Funds. It is difficult to predict the full extent of the impact of the EU SFDR, the EU Taxonomy Regulation and the EU Action Plan on a Sub-Fund and the AIFM. The AIFM reserves the right to adopt such arrangements as it deems necessary or desirable to comply with any applicable requirements of the EU SFDR, the EU Taxonomy Regulation and any other applicable legislation or regulations related to the EU Action Plan or other sustainable finance initiative inside or outside the EU.

Other Associated Risks

Credit risk A bond will generally lose value if the issuer's financial health deteriorates, or appears likely to. An issuer could go into

default (become unwilling or unable to make payments on their bonds), which often will make the bond illiquid or worthless.

Currency risk Movements or changes in currency exchange rates could adversely affect the value of the Sub-Fund's investments and the price of the Sub-Fund's Shares. Exchange rates can change rapidly and unpredictably for a number of reasons including changes in interest rates or in exchange control regulations.

Interest rate risk When interest rates rise, bond prices tend to fall. This risk is greater the longer the maturity or duration of the bond. It also can affect investment grade bonds more than below investment grade bonds.

Market risk The value of the underlying investments in which a Sub-Fund invests changes continually and can fall based on a wide variety of factors affecting financial markets generally or individual sectors.

Economies and financial markets throughout the world are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Furthermore, global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics may also negatively affect the value of the Sub-Fund's Investments.

Operational risk The Sub-Funds are exposed to operational risk, which is the risk of loss resulting from inadequate or failed internal processes, people, systems, or external events. Operational risk arises from causes such as human error, processing and communication errors, provision or receipt of erroneous or incomplete data, errors of agents, service providers, counterparties or other third parties, failed or inadequate processes, governance and technology or systems failures. Such risk may, among other impacts, subject the Funds to errors affecting valuation, pricing, accounting, tax reporting, financial reporting, custody and trading. While the AIFM implements controls, procedures, monitoring and oversight of service providers to seek to reduce the occurrence and mitigate the effects of operational risk, it is not possible to predict, identify, completely eliminate or mitigate all operational risk and there may still be failures that could cause losses to a Sub-Fund. Operational risk may go undetected for long periods of time, and even if the specific risk issue is detected and resolved/mitigated it may not be possible to recover any potential compensation.

Investment Restrictions, Powers and Leverage

GENERAL INVESTMENT POLICIES

This section describes the types of assets, investments and instruments that are permitted as a matter of law and regulation, as well as the applicable limits, restrictions and requirements. Each Sub-Fund, and the Fund itself, must comply with all applicable EU and Luxembourg laws and regulations, notably the 2010 Law, the 2013 Law as well as certain circulars, guidelines and other requirements.

Within this section, all statements are consistent with these regulations, including the meaning of capitalised terms used in the regulations. The Investments of each Sub-Fund, and the Fund itself, can be conducted through the participation of intermediary entities, including special purpose vehicles and securitisation or aggregator vehicles or Holding Companies, or other intermediary structures.

The investment limits provided below and in the relevant Sub-Fund Description shall not apply during the Ramp-up Period. However, each Sub-Fund must not be exposed to excessive risks or conflicts of interest that had not been previously identified during a Ramp-up Period. If after the end of the Ramp-up Period any of the investment restrictions is breached for reasons beyond the control of the AIFM or the Investment Manager (as applicable), the Investment Manager, in collaboration with the AIFM, must within an appropriate period, and with due regard to the best interests of the Shareholders, take the necessary measures to rectify the situation, as consistent with CSSF Circular 24/856 or any other regulation concerning the remediation a breach or excess.

Except where noted, all percentages and restrictions apply to each Sub-Fund individually, and all asset percentages are measured as a percentage of the Sub-Fund's Net Asst Value.

Permitted Assets, Investments and Instruments

The investment objective and strategy of the Fund is to place the funds available to it in assets with the purpose of spreading investment risks and making available to Investors the benefits of the professionally managed portfolios.

The Fund seeks to achieve its investment objective by opportunistically allocating its assets across a range of strategies globally including private equity, private credit, infrastructure, real estate and/or other investments.

Each Sub-Fund's specific investment objective and investment strategy, and any specific investment restrictions (including those restrictions required to comply with the CSSF Circular applicable to a particular strategy), will be set out in the relevant Sub-Fund Description. Unless provided otherwise in the relevant Sub-Fund Description, this section [Investment Restrictions, Powers and Leverage](#) shall apply.

The Fund shall specify, in the relevant Sub-Fund Descriptions, more detailed and specific investment policies and restrictions on a Sub-Fund by Sub-Fund basis subject to the following general guidelines in compliance with Circular 25/901, whereby any given Sub-Fund of the Fund shall not in principle invest, inter alia, more than 25% of its assets in securities issued by the same issuer or in the same asset, provided that such diversification will be assessed on a look-through basis where such securities are acquired through an intermediary vehicle. An asset whose economic viability is closely linked to another asset forming a single economic entity cannot be considered a distinct asset. This limit does not apply to securities issued or guaranteed by a country part of the OECD or its regional or local authorities or by the European Union, regional or global supranational institutions and bodies.

No remedial action will be required if such restriction is exceeded for any reason other than the acquisition of new investment (including the exercising of rights attaching to an investment). In such circumstances, the AIFM and/or, where applicable, the Investment Manager shall take reasonable steps to bring the Sub-Fund within this 25% diversification requirement, except where the AIFM and/or, where applicable, the Investment Manager reasonably believes doing so would be prejudicial to the interests of the Sub-Fund or any of its Investors.

The 25% diversification requirement shall apply to investment in Portfolio Funds, unless such Portfolio Funds are subject to risk diversification requirements comparable or stricter to those applicable to the Sub-Fund. For the avoidance of doubt, each compartment of a Portfolio Fund is to be considered as a distinct issuer provided that the principle of segregation of the different compartments towards third parties is ensured. Investors should note that Portfolio Funds invested in by a Sub-Fund may not always be subject to the supervision of a competent financial authority comparable to the CSSF and with which the CSSF may cooperate.

Unless otherwise specified in its Sub-Fund Description, each Sub-Fund may invest up to 50% of its net assets in one single infrastructure investment. For the avoidance of doubt, an investment in an infrastructure asset may consist of (i) the direct acquisition of such asset or (ii) any form of exposure thereto.

Subject to the individual restrictions of the respective Sub-Fund Description, each Sub-Fund may:

- in the event of cash excess and for liquidity management purposes, invest in liquid assets comprising, among others, fixed and/or floating rate corporate bonds, corporate inflation-linked bonds, as well as money market instruments such as commercial paper (including short-term papers issued by credit institutions), short-term government bonds (including short-term debt issued by governments), short-term fixed income securities, exchange traded funds, certificates of deposits, money market funds (including money market funds managed by affiliates of JPMorgan Chase & Co), financial instruments designed to track equity indexes and in cash and short-term securities.

- enter into, for efficient portfolio management or hedging purposes, financial derivatives transactions, complex derivatives or structured instruments of any kind. Where financial derivative instruments are used by a Sub-Fund, the Sub-Fund shall ensure observance of the principle of risk spreading through a sufficient diversification of the underlying assets. Furthermore, counterparty risk that is not offset by a clearing house nor mitigated by collateral such as a pledge or a transfer of ownership may not, in principle, exceed 25% of the Sub-Fund's assets. Unless stated otherwise in the relevant Sub-Fund Description, a Sub-Fund may not engage in securities financing transactions as defined in point (11) of Article 3 of Regulation 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse in relation to any of the Sub-Funds.

Unless stated otherwise in the relevant Sub-Fund Description, the Fund does not intend to use indices covered by the Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014. Notwithstanding the preceding, the Fund may use indices in its marketing materials or other documents in order to give investors an overview of a Sub-Fund's performance compared to such indices.

Short sales may not result in a Sub-Fund holding a short position in securities issued by the same entity representing more than 25% of its assets.

Furthermore, certain Sub-Funds, if so provided in the relevant Sub-Fund Description, may invest in asset-backed securities, mortgage-

backed securities and/or collateralised loan obligations, including any securitisation covered by Regulation (EU) 2017/2402 of the European Parliament and of the Council of 12 December 2017 laying down a general framework for securitisation and creating a specific framework for simple, transparent and standardised securitisation, all of the foregoing on the terms set out in such relevant Sub-Fund Description.

Subject to the conditions provided for in the 2010 Law, each Sub-Fund may subscribe, acquire and/or hold securities to be issued or issued by one or more Sub-Funds of the Fund under the following conditions:

- the target Sub-Fund does not, in turn, invest in the Sub-Fund invested in this target Sub-Fund; and
 - no more than 10% of the net asset value of the target Sub-Fund whose acquisition is contemplated may be invested in aggregate in shares of other target Sub-Funds of the Fund; and
 - voting rights, if any, attaching to the relevant securities are suspended for as long as they are held by the Sub-Fund concerned and without prejudice to the appropriate processing in the accounts and the periodic reports; and
- In any event, for as long as these securities are held by the Fund, their value will not be taken into consideration for the calculation of the net asset value of the Fund for the purpose of verifying the minimum threshold of the net asset value imposed by the 2010 Law.

The investment limits and restrictions set out in this section this section [Investment Restrictions, Powers and Leverage](#) and the relevant Sub-Fund Description shall cease to apply during the wind-down of the relevant Sub-Fund.

Investments through aggregators, holding or other intermediate vehicles

Each Sub-Fund may conduct its investment activities through aggregators, SPVs, holding or other intermediate vehicles that are established to facilitate, hold, channel or aggregate investments across several separate vehicles.

To the extent additional vehicles are established in parallel to an aggregator (an **"Aggregator Parallel Vehicle"**), such aggregator's relevant Sub-Fund and any parallel vehicle(s), as applicable, may, to the extent possible, rebalance their interests among the Aggregator Parallel Vehicles in order to maintain a consistent holding in each separate Aggregator Parallel Vehicle.

Likewise, each Sub-Fund may participate in financing transactions and may make use of facilities entered into at the level of an aggregator, SPV, holding or other intermediate vehicle. In such event, the Board may, for the account of each participating Sub-Fund, give guarantees and/or grant any types of security interest including in favor of such intermediate vehicle or the Board with respect to the latter, over any of such Sub-Fund's assets, in order to secure the obligations or the Sub-Fund or any such aggregator, SPV, holding or other intermediate vehicle.

Fees, costs and expenses may be incurred at the level of such intermediate vehicles, and will be paid, as applicable, either at the level of such intermediate vehicle or allocated as deemed equitable to all vehicles participating in the relevant investment or financing.

While such intermediate vehicles are designed to enable, channel or facilitate the management of investments, they may also present certain risks, such as (without limitation), the need to reconcile potentially diverging investment, tax, regulatory and other characteristics or events across various participating vehicles. Circumstances at the level of such other participating vehicles, e.g. a default of another vehicle to meet funding obligations or high redemptions, liquidity events or other circumstances at the level of another participating vehicle could potentially trigger adverse consequences for the relevant Sub-Fund.

BORROWING AND LEVERAGE

Borrowing

Each Sub-Fund may incur borrowing within the limits set out in the relevant Sub-Fund Description and subject to the restrictions of the relevant CSSF Circular applicable to such Sub-Fund. Where relevant, temporary borrowing arrangements that are fully covered by capital commitments of Shareholders are not regarded as borrowings.

Leverage

The 2013 Law requires the AIFM to disclose and report regularly on the leverage used by each Sub-Fund. The AIFM has set a maximum level of leverage (not including leverage at the level of Investments) for each Sub-Fund. The maximum total aggregate leverage for each Sub-Fund is calculated using the gross method and commitment method and stated in Sub-Fund Descriptions. Note that these stated levels of leverage are not necessarily a statement concerning the overall risk profile of a Sub-Fund.

ESG Integration

This section describes what Environmental, Social and Governance information is and how it may be integrated into the investment decision making process. It does this by defining ESG Integration.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE

Environmental, Social and Governance (“ESG”) issues are non-financial considerations that may positively or negatively affect the revenues, costs, cash flows, value and/or liabilities of an investment.

- Environmental issues relate to the quality and functioning of the natural environment and natural systems such as carbon emissions, environmental regulations, water stress and waste.

- Social issues relate to the rights, wellbeing and interests of people and communities such as labour management and health and safety.
- Governance issues relate to the management and oversight of companies and other investee entities such as board, ownership and pay.

ESG issues can impact the value of assets and limit access to financing. Companies, issuers, entities, and or fund investment managers that address these issues by adopting sustainable business practices seek to manage the risks and to find related opportunities to create long-term value.

The table below sets out more information on ESG Integration.

ESG Integration	ESG Integration is a base requirement across all funds managed by the AIFM (with the exception of passive funds) and relates to the consideration of environmental, social or governance events or conditions that, if they occur, could cause an actual or a potential material negative impact on the value of the investment. ESG Integration is the systematic inclusion of ESG issues in investment analysis and investment decisions. ESG Integration for a Sub-Fund requires all of the following: ■ sufficient ESG information on the Sub-Funds’ investment universe to be available ■ the Investment Manager to consider proprietary research on the financial materiality of ESG issues on the Sub-Fund’s investments the Investment Manager’s research views and methodology to be documented throughout the investment process. ESG Integration also requires appropriate monitoring of ESG considerations in ongoing risk management and portfolio monitoring. ESG determinations may not be conclusive, and underlying investments may be purchased and retained, without limit, by the Investment Manager regardless of potential ESG impact. The impact of ESG Integration on a Sub-Fund’s performance is not specifically measurable as investment decisions are discretionary regardless of ESG considerations. At the date of this Prospectus, the Sub-Funds are categorized as “ESG Integrated” and do not qualify as Article 8 or Article 9 financial products under the EU SFDR. Further information with respect to the ESG Integration can be found on am.jpmorgan.com/lu.
ESG Integration – JPMorgan Part II – Private Markets Fund	The Investment Manager’s primary focus is on generating the best possible risk-adjusted returns that align with the objective of the Sub-Fund. ESG integration does not change the Sub-Fund’s investment objective, exclude specific types of companies or constrain the Sub-Fund’s investable universe. The Investment Manager will generally not subordinate the Sub-Fund’s performance or increase the Sub-Fund’s investment risks as a result of (or in connection with) the consideration of any ESG factors nor will the Investment Manager promote environmental or social characteristics ahead of other investment considerations. As part of its investment strategy, the Sub-Fund seeks to assess the financially material environmental, social and governance behaviors and practices of third-party sponsors and direct investments with the goals of managing risk and improving long-term returns. The Investment Manager views sustainability issues as financially material factors that may impact performance and therefore must be carefully considered as part of the investment review process. The Investment Manager believes that sustainability risks and opportunities should be reviewed holistically and may make companies or underlying managers more or less attractive for investment. ESG Integration is dependent upon the availability of sufficient ESG information relevant to the applicable investment universe. ESG factors may not be considered for each and every investment decision. ESG determinations may not be conclusive and investments may be made by the Investment Manager regardless of potential ESG impact. The impact of ESG integration on the Sub-Fund’s performance is not specifically measurable as investment decisions are made regardless of ESG considerations. The Sub-Fund is not designed for investors who wish to screen out particular types of companies or investments on the basis of ESG, or are looking for products that meet specific ESG goals.
Principal adverse sustainability impacts of investment decisions on sustainability factors (“PAI”)	AIFM Considerations The AIFM considers PAI in accordance with SFDR. A statement with respect to PAI is published on am.jpmorgan.com/lu.
EU SFDR “Sustainable Investments” and EU Taxonomy criteria for environmentally sustainable economic activities	Whilst the Sub-Funds do not make any commitment with respect to Sustainable Investments, they may gain exposure to financial products that have Sustainable Investment on an incidental basis only. No minimum percentage of Sustainable Investments is targeted by the Sub-Funds. Unless otherwise disclosed in the Sub-Funds’ Descriptions, the investments underlying a Sub-Fund do not take into account the criteria for environmentally sustainable economic activities, including enabling or transitional activities, within the meaning of the EU Taxonomy Regulation and the Sub-Funds will only hold such investments on an incidental basis.

Share Classes and Costs

Share Classes

Within each Sub-Fund, the Board can create and issue Share Classes with various characteristics and investor eligibility requirements.

BASE SHARE CLASSES AND THEIR CHARACTERISTICS

		Minimum investment and holding amounts. USD-equivalent amounts in other currencies are determined each business day.		
Base Share Class	Eligible Investors	Initial Investment	Additional Investment	Holding Amount
A	All Eligible Investors	USD 35,000	USD 5,000	USD 10,000
C	All Eligible Investors	USD 10 million	USD 1,000	USD 10 million
C2	Clients of Distributors who receive advice and directly pay for that advice under a separate fee arrangement where no other form of ongoing remuneration from the AIFM is received and retained by the AIFM in relation to this service and the Distributor has represented this to the AIFM. In addition, the Distributor meets a Minimum Amount of Assets Under Management.	USD 100 million	USD 1,000	USD 100 million
D	Distributors buying Shares on behalf of their clients, by agreement with the AIFM	USD 35,000	USD 5,000	USD 10,000
D2	Clients of Distributors who receive advice and do not directly pay for that advice under a separate fee arrangement. In addition, the Distributor meets a Minimum Amount of Assets Under Management.	USD 100 million	USD 1,000	USD 100 million
I	EU: Eligible Counterparties and Additional Investors Non-EU: Institutional Investors	USD 10 million	USD 1,000	USD 10 million
I2	EU: Eligible Counterparties and Additional Investors Non-EU: Institutional Investors	USD 100 million	USD 1,000	USD 100 million
J	Investors who are unable to track early redemption fees and by Agreement with the AIFM.	USD 10 million	USD 1,000	USD 10 million
S1	EU: Eligible Counterparties and Additional Investors Non-EU: Institutional Investors	USD 10 million	USD 1,000	USD 10 million
S2	EU: Eligible Counterparties and Additional Investors Non-EU: Institutional Investors	USD 100 million	USD 1,000	USD 100 million
SC1	Clients of Distributors who receive advice and directly pay for that advice under a separate fee arrangement where no other form of ongoing remuneration from the AIFM is received and retained by the AIFM in relation to this service and the Distributor has represented this to the AIFM.	USD 10 million	USD 1,000	USD 10 million
SC2	Clients of Distributors who receive advice and directly pay for that advice under a separate fee arrangement where no other form of ongoing remuneration from the AIFM is received and retained by the AIFM in relation to this service and the Distributor has represented this to the AIFM.	USD 10 million	USD 1,000	USD 10 million
SD1	Clients of Distributors who receive advice and do not directly pay for that advice under a separate fee arrangement.	USD 10 million	USD 1,000	USD 10 million
SD2	Clients of Distributors who receive advice and do not directly pay for that advice under a separate fee arrangement.	USD 10 million	USD 1,000	USD 10 million
X	EU: Eligible Counterparties and Additional Investors, Non-EU: Institutional Investors by agreement with the	On application	On application	On application

S1, SC1 and SD1 – Close permanently to new subscriptions and switches in after the first Subscription Day, or such Subscription Day as determined by the AIFM, when assets in the Share Classes reach a level determined by the AIFM. Once closed the Share Classes will not be reopened. Redemptions made before the expiry of a three-year period following the Subscription Day on which a Shareholder was accepted into the Sub-Fund will be subject to an early redemption fee of 5%. Where a Shareholder has subscribed on several Subscription Days, a separate three-year period will apply to each Subscription Day, and the three-year period for a Share will start on the Subscription Day on which that specific Share was subscribed.

S2, SC2 and SD2 – Close permanently to new investors when the aggregate subscriptions in these Share Classes reach a level determined by the AIFM. Automatically switch to I2, C2 or D2 Share Classes on the third anniversary of the launch of the first S2, SC2 or SD2 Share Class respectively for the Sub-Fund. This may create tax liability. Under certain circumstances, the automatic switch may be deferred or waived at the sole discretion of the AIFM. In these circumstances, this will be communicated to all Shareholders in advance of the third anniversary of the launch of the share class.

Automatic switches are processed free of charge based on the NAV of both Share Classes on the switch date or on the next Valuation Day if the anniversary is not a Valuation Day. Following the switch, Shareholders are subject to the rights and obligations of the new Share Class. The switch dates for S2, SC2 and SD2 Share Classes can be found at www.jpmorganassetmanagement.com

J Share Classes are subject to a redemption fee, which is deducted from the Redemption Price (as defined below) of the J Share Class and payable to the relevant Sub-Fund. Unless otherwise indicated in the relevant Sub-Fund Description, redemptions of J Share Classes are not subject to early redemption fees.

WAIVERS AND REDUCED MINIMUMS

The AIFM can, at its discretion reduce or waive the minimums described above with respect to any Sub-Fund, Share Class or Shareholder.

C Share Class Minimums do not apply at the discretion of the AIFM to the underlying clients of financial intermediaries or distributors ("Intermediary") who receive advice from the Intermediary and directly pay for this advice under a separate fee arrangement where the Intermediary has represented this to the AIFM. In addition the Intermediary does not receive and retain any other forms of ongoing remuneration from the AIFM in relation to this service.

SHARE CLASS NAMING CONVENTIONS

Share Class names are structured as follows: "JPM" + Sub-Fund designation + base Share Class + one or more suffixes, as appropriate. All of these elements are explained below.

JPM	Sample Fund	C	(perf)	(dist)	-USD	(hedged)
1	2	3	4	5	6	7

1 **JPM** All Share Classes begin with this prefix.

2 **Sub-Fund designation** All Share Classes include the designation of the relevant Sub-Fund. For example, a Share Class of the Private Markets Fund, will be denoted "Private Markets A (perf) (acc) – EUR".

3 **Base Share Class** One of those shown in the previous table.

4 **(perf)** If present, indicates that the Share Class has a performance fee. For additional information on the performance fee see Performance Fee, below.

5 **Dividend Policy** Each Sub-Fund may issue Accumulating (acc) Share Classes and Distributing Share Classes (dist).

If investors are unsure which Share Class they are eligible to invest in, they should contact their financial advisor or Distributor.

The Fund and/or the AIFM reserve the right, as described in redemption and withdrawal in section Investing in the Sub-Funds, to redeem all Shares upon receipt of a redemption notice that would leave a holding that is lower than the minimum holding amount. Where the relevant Share Class remains open for new Subscriptions, Shareholders will be given not less than six (6) months' prior notice to increase their holding above the minimum. Any fall below the minimum holding amount owing to Sub-Fund performance will not cause the closing of an account. See Investing in the Sub-Funds.

Retail Investors may only subscribe for Shares through Intermediaries.

■ **No dividends paid** Share Classes which do not pay dividends are referred to as the "Accumulating Share Classes".

(acc) This Share Class does not pay dividends. Earned income is retained in the NAV.

(acc UK RFS) This Share Class does not pay dividends. Earned income is retained in the NAV. This Share Class intends to seek UK Reporting Fund Status ("UK RFS"). Further information on UKRFS is available at jpmorganassetmanagement.lu

■ **Dividends paid** All other types of Share Class can pay dividends. Dividends may vary and are not guaranteed. Dividends will be declared and the NAV of the relevant Share

Class reduced by the amount distributed.

Additional dividends can be declared as determined by the Board. No Share Class will make a dividend payment if the assets of the Fund are below the minimum capital requirement, or if paying the dividend would cause that situation to occur.

(div) Share Classes intend to distribute income quarterly based on the net income (income, typically, in the form of dividends from stocks, interest from debt securities and, if any, securities lending income, less expenses) attributable to the Share Class (net income). In the case of (div) Shares, Shareholders cannot request reinvestment and dividends will automatically be paid to Shareholders. Dividends are paid in the Share Class Currency, to the bank account details on file for a Shareholder's account.

(div UK RFS) Share Classes intend to distribute income quarterly based on the net income (income, typically, in the form of dividends from stocks, interest from debt securities and, if any, securities lending income, less expenses) attributable to the Share Class (net income). In the case of (div UKRFS) Shares, Shareholders cannot request reinvestment and dividends will automatically be paid to Shareholders. Dividends are paid in the Share Class Currency, to the bank account details on file for a Shareholder's account. This Share Class intends to seek UK Reporting Fund Status ("UK RFS"). Further information on UKRFS is available at jpmorganassetmanagement.lu

(dist) Share Classes intend to distribute income annually. Shareholders are entitled to dividends for Shares in the relevant Share Class held on the dividend record date. Dividends due on such Shares for which payment has not yet been received will be withheld until the Subscription has been settled and such Shares have been issued accordingly.

Dividend payments remaining unclaimed five years after the dividend record date will be forfeited and returned to the Sub-Fund. The Board may carry out authentication procedures which could result in the delay of any dividend payment.

All dividends paid out prior to the annual general meeting of Shareholders are considered interim dividends and are subject to confirmation, and potentially to revision, at that meeting.

6 **Currency code** All Share Classes include a three-letter code that indicates the Share Class Currency, which may or may not be the same as the Base Currency of the Sub-Fund.

7 **Hedging** Share Classes may be unhedged or currency-hedged.

(hedged) Indicates that the Shares use one of the two currency hedging models explained below. These Shares can be denominated in any currency shown in Currency Abbreviations in Using This Prospectus, or in any other currency subject to the agreement of the Board.

■ **NAV-hedged Share Class** This Share Class seeks to minimise the effect of exchange rate fluctuations between the Sub-Fund's Base Currency and the Share Class Currency. It is typically used when most portfolio assets are either denominated in, or hedged back to, the Sub-Fund's Base Currency. In the NAV-hedged Share Classes, the Sub-Fund's Base Currency is systematically hedged to the Share Class Currency of the hedged Share Class. In the NAV-hedged Share Classes, the Shareholder receives an excess return or loss similar to that of Shares issued in the Base Currency of the Sub-Fund.

■ **Portfolio-hedged Share Classes** This Share Class seeks to minimise the effect of exchange rate fluctuations between the currency exposures of the assets in the Sub-Fund's portfolio and the Share Class Currency. It is typically used when most portfolio assets are neither denominated in, nor hedged back to, the Sub-Fund's Base Currency. In these Share Classes, the currency exposures are systematically hedged back to the Share Class Currency of the hedged Share Class in proportion to the currency-hedged Share Classes share of the NAV of the Sub-Fund, unless for specific currencies it is impractical or not cost effective to hedge the exposure. In the portfolio-hedged Share Classes the Shareholder will not benefit or suffer loss caused by exchange rate fluctuations between the currencies of the portfolio assets being hedged and the Share Class Currency, whereas Shares in the Base Currency of the Sub-Fund will.

To see which hedging model is used for Share Classes in a Sub-Fund uses, see "Hedging method for currency hedged Share Classes" in [Sub-Fund Descriptions](#).

Risks associated with certain Share Classes

Distribution from capital Where a Share Class distributes more net income than it has earned, the dividend will be paid out of the excess of realised and unrealised capital gains over realised and unrealised losses, or even capital, resulting in erosion of the capital invested. Dividend payments resulting in capital erosion will reduce the potential for long-term capital growth. This may also be tax-inefficient in certain countries.

Currency-hedged Share Classes The currency hedging used to minimise the effect of exchange rate fluctuations will not be perfect. Shareholders may have exposure to currencies other than the Share Class Currency and are also exposed to the risks associated with the instruments used in the hedging process.

Spill-over from Share Classes to other Share Classes As there is no legal segregation of assets and liabilities between different Share Classes in the same Sub-Fund, there is a risk that, under certain circumstances, hedging / FX transactions relating to currency-hedged / non Sub-Fund Base Currency Share Classes could have an adverse impact on other Share Classes in the same Sub-Fund.

Although a spill-over risk will be mitigated, it cannot be fully eliminated, as there may be circumstances where it is not possible or practical to do so. For example, where the Sub-Fund needs to sell securities to fulfil financial obligations specifically related to a currency-hedged Share Class which may adversely affect the NAV of the other Share Classes in the Sub-Fund.

For a list of Share Classes with a potential spill-over risk, go to am.ipmorgan.com/lu.

Non-currency-hedged Shares Share Classes may be offered in a currency different to the one in which the Sub-Fund makes its investments, maintains its books, and makes distributions and each Sub-Fund may make investments in multiple currencies. Accordingly, fluctuations in currency values could adversely affect the currency of the Sub-Fund's investments and as such if the currency in which the Sub-Fund receives dividends, interests or other types of payments declines in value against the currency of the relevant Share Class, the currency value of these payments could be adversely affected.

Costs

This section describes the various fees and charges that a Shareholder bears and how they work. The AIFM may, at its sole discretion, pay some or all of the amounts received for certain charges and fees as commission, retrocession, rebate or discount to some or all investors, financial intermediaries, or Distributors, on the basis of factors such as the size, nature, timing or commitment of their investment, among others.

COSTS RELATED TO THE ACQUISITION OF ASSETS

The costs related to the acquisition of assets comprises all administrative, brokerage, regulatory, depositary, custodial, professional service and audit costs related to the acquisition of the assets of the Fund. These costs shall be charged as they are incurred.

- Brokerage fees and commissions;
- transaction costs associated with buying and selling actual and potential Sub-Fund's investments, including professional advisers, interest, taxes, governmental duties, insurance, charges and levies;
- other transaction related costs and expenses.

EXTRAORDINARY EXPENSES

- interest and full amount of any duty, levy and tax or similar charge imposed on a Sub-Fund;
- costs incurred as a result of a Shareholder being in Default;
- actual or threatened litigation mediation, arbitration or other dispute resolution expenses, including any judgement, other award or settlement entered into in connection therewith, and costs incurred in connection with any audit, examination, investigation or other proceeding or enquiry by any tax, regulatory or governmental authority;
- costs of any activities with respect to protecting the confidential or non-public nature of any information or data (including any costs incurred in connection with the data protection law, public records access laws, freedom of information or similar laws and other laws and other disclosure requests);
- indemnification expenses (including any fees, costs and expenses incurred in connection with indemnifying any person pursuant to sub-section Indemnification, and advancing fees, costs and expenses incurred by any such person in defence or settlement of any claim that may be subject to a right of indemnification pursuant to this Prospectus, except as otherwise set forth in this Prospectus);
- unreimbursed costs and expenses incurred in connection with any Transfer or proposed Transfer of Shares
- that the Sub-Fund is unable to recover from the applicable transferor or transferee;
- costs associated with amendments to, and waivers, consents or approvals pursuant to, the constituent documents of the Sub-Funds, AIFM, and the Investment Manager, including the preparation, distribution and implementation thereof (including, without limitation, any changes to the management structure and operation of the Sub-Fund and the terms of this Prospectus, the Investment Management Agreement (or the agreements with any delegate of the Investment Manager) and any agreement with any other provider of services to or in respect of the Sub-Fund) as the Investment Manager considers to be necessary or desirable to comply with the provisions of AIFMD); the termination, liquidation, winding-up or dissolution of the Sub-Funds and any entities owned directly or indirectly by the Sub-Funds; and
- any extraordinary expenses or other unforeseen charges.

MANAGEMENT FEE AND INVESTMENT MANAGER FEE

MANAGEMENT FEE

The AIFM will be entitled to receive an annual management and advisory fee in respect of the relevant Share Class (the "Management Fee") monthly in arrears from the Sub-Fund's assets as remuneration for its services relating to the management of the Sub-Fund's assets. Unless otherwise set out in the Sub-Fund Descriptions, the Management Fee shall commence as of the date of the establishment of the relevant Sub-Fund, or as the case might be, the day following the First Closing or the Subscription Day, until the completion of the liquidation of the relevant Sub-Fund. The Management Fee will be paid by the Sub-Fund in respect of each Shareholder and will reduce the NAV of the relevant Share Class. The Management Fee and the basis on which it is calculated shall be set out in the Sub-Fund Descriptions.

When a Sub-Fund invests in a JPM Related Fund, double charging of management fees will either be avoided or rebated. However, if the underlying investment charges a higher management fee, the difference may be charged to the investing Sub-Fund. If the underlying J.P. Morgan entity or J.P. Morgan Affiliate undertaking combines management fees and other fees and charges into a single total expense ratio, such as in exchange traded funds, the whole total expense ratio may be waived. Where a Sub-Fund invests in undertakings not affiliated with J.P. Morgan, the fee shown in the Sub-Fund Descriptions may be charged regardless of any fees reflected in the price of the shares or units of the underlying undertaking.

The AIFM can vary the Management Fee, at any time and for intervals as short as a single day, to any amount between zero and the stated maximum. For X Share Class, the Management Fee is not charged at the Share Class level; instead, the applicable JPMorgan Chase & Co. entity may collect a fee for these services directly from the Shareholder.

Where the AIFM appoints an Investment Manager to provide portfolio management services in respect of any of the Sub-Funds, pursuant to an investment management agreement (the "Investment Management Agreement"), the Investment Manager will be paid by the AIFM out of the Management Fee. Where the Investment Manager delegates the whole or a portion of the portfolio management services in respect of a Sub-Fund to a delegate investment manager (the "Sub-Investment Manager"), the Sub-Investment Manager will receive from the Investment Manager an amount equal to a percentage of the Investment Manager Fee (the "Sub-Investment Manager Fee").

For the avoidance of doubt, the AIFM will not receive an amount exceeding the Management Fee for its services relating to the management of the Sub-Fund's assets and there will be no double charge as a result of the Investment Manager Fee and (if relevant) Sub-Investment Manager Fee.

PERFORMANCE FEE

PERFORMANCE FEE – Description

With certain Share Classes of certain Sub-Funds, the AIFM may be entitled to receive a performance fee. The Investment Manager may be entitled to receive part or all of the performance fee under the relevant investment management agreement.

The Performance Fee is designed to reward the Investment Manager for outperformance relative to a benchmark, a hurdle rate and/or a HWM (or a combination of them) during the relevant calculation period (as defined below), while also ensuring consistency with the relevant Sub-Fund's investment objective, strategy and policy, and alignment of interests between the Investment Manager and the investors.

The ESMA Guidelines on performance fees in UCITS and certain types of AIFs do not apply to the Sub-Funds as they follow a private equity strategy as described in this Prospectus.

PERFORMANCE FEE CALCULATION

JPMorgan Part II – Private Markets Fund

Calculation Period

Performance is measured over a calendar quarter ("Private Markets Fund Calculation Period"). If a Share Class adds a performance fee, or is launched during the calendar quarter, the first Private Markets Fund Calculation Period in respect of such Share Class shall be the period starting on the Valuation Day used as a reference for the launching of such Share Class or the addition of a performance fee with respect to such Share Class and ending on the last Valuation Day of the same calendar quarter (i.e., a period less than one calendar quarter).

The performance is determined, and a performance fee is accrued (where applicable) on every Valuation Day. Each such accrual is reflected in the NAV.

For each Private Markets Fund Calculation Period, the performance fee in respect of each Share Class will be equal to a rate defined in the Share Class Fees and Characteristics Table (the "Performance Fee Rate") as set out in the Sub-Fund Description, multiplied by the appreciation in the NAV per Share (net of all costs, fees, charges and expenses but gross of all actual or deemed distributions, if any) in excess of the HWM. As different Share Classes will usually have different NAVs, the actual performance fee charged often varies by Share Class. In respect of currency hedged Share Classes, the performance fee accrues before the currency hedging and therefore is exposed to the spot foreign exchange rates applicable.

The performance fee is only payable where the relevant Share Class achieved a positive performance in excess of the HWM during the Private Markets Fund Calculation Period.

Performance fees payable to the AIFM in any Private Markets Fund Calculation Period are not refundable in any subsequent Private Markets Fund Calculation Period.

Performance fee model and crystallisation

A performance fee is accrued at each Valuation Day only where the NAV per Share, net of costs, charges and expenses but gross of all actual or deemed distributions (if any) (the "Performance NAV") is higher than (i) the Performance NAV per Share Class at the initial offering period or, if later, (ii) the Performance NAV per Share Class in respect of which the last Performance Fee was paid (i.e. the HWM).

Where a performance fee is not paid at the end of the Private Markets Fund Calculation Period, any underperformance against the HWM will be carried forward over the whole life of the Fund and no performance fee is paid merely for making up earlier underperformance against the HWM. The HWM cannot be reset.

Adjustment for X Share Classes In determining whether a Performance Fee is due in respect of the X Share Classes the HWM will be increased by 0.75% because investors in this Share Class pay a management fee separately rather than as a Share Class fee. Without this adjustment, investors in X Share Classes would pay a higher performance fee than is warranted.

Crystallisation

A performance fee accrual crystallises (becomes payable) under any of the following circumstances:

- on the last Valuation Day of the Private Markets Fund Calculation Period;
- on redemption (applies to those Shares only);
- when a Sub-Fund or, where applicable, a Share Class is merged or liquidated.

Underlying investments and Portfolio Funds

The Investments made by the Sub-Fund, including those made through Portfolio Funds, may separately be subject to fees based on the performance of those underlying Investments. The performance fee payable in respect of the Share Class will be calculated based on the returns of the Share Class after taking into account any applicable fees and expenses, including management and performance fees paid at the level of Portfolio Funds, incurred in respect of the Investments.

JPMorgan Part II – Credit Markets Fund

Calculation Period

Performance is measured over the Fund's Financial Year ("Credit Markets Fund Calculation Period"). If a Share Class adds a performance fee, or is launched during the Financial Year, the first Credit Markets Fund Calculation Period in respect of such Share Class shall be the period starting on the Valuation Day used as a reference for the launching of such Share Class or the addition of a performance fee with respect to such Share Class and ending on the last Valuation Day (i.e., 31 December) of the same Financial Year (i.e., a period less than one calendar year).

The performance is determined, and a performance fee is accrued (where applicable) on every Valuation Day. Each such accrual is reflected in the NAV.

For each Credit Markets Fund Calculation Period, the performance fee in respect of each Share Class will be equal to a rate defined in the Share Class Fees and Characteristics Table (the "Performance Fee Rate") as set out in the Sub-Fund Description, multiplied by the appreciation in the NAV per Share (net of all costs, fees, charges and expenses but gross of all actual or deemed distributions, if any) in excess of the HWM and hurdle. As different Share Classes will usually have different NAVs, the actual performance fee charged often varies by Share Class. In respect of currency hedged Share Classes, the performance fee accrues before the currency hedging and therefore is exposed to the spot foreign exchange rates applicable.

The performance fee is only payable where the relevant Share Class achieved a positive performance in excess of the HWM and Hurdle Rate during the Credit Markets Fund Calculation Period.

Performance fees payable to the AIFM in any Credit Markets Fund Calculation Period are not refundable in any subsequent Credit Markets Fund Calculation Period.

Performance fee model and crystallisation

This model applies a HWM subject to a hurdle rate and Catch-Up. A performance fee is accrued at each Valuation Day only where the NAV per Share, net of costs, charges and expenses but gross of all actual or deemed distributions (if any) (the "Performance NAV") cumulatively satisfies the following conditions:

- it exceeds, a 5% annual hurdle rate, prorated per Valuation Day

(net of all costs, fees, charges and expenses) (the “Hurdle Rate”); and

- it is higher than (i) the Performance NAV per Share Class at the initial offering period or, if later, (ii) the Performance NAV per Share Class in respect of which the last Performance Fee was paid (i.e. the HWM).

The Hurdle Rate is calculated with respect to the HWM. The Hurdle Rate will be reset each Credit Markets Fund Calculation Period and a new Calculation Period will begin irrespective of whether a performance fee is paid.

Where a performance fee is not paid at the end of Credit Markets Fund Calculation Period, any underperformance against the HWM will be carried forward over the whole life of the Fund and no performance fee is paid merely for making up earlier underperformance against the HWM. The HWM cannot be reset.

The Catch Up

Once the Hurdle Rate is met, the AIFM will be entitled to receive 100% of the Share Class positive performance until it is paid a Performance Fee equal to the Performance Fee Rate multiplied by the positive performance of the Share Class in excess of the HWM. Thereafter the AIFM will be entitled to receive 5% of the Sub-Fund’s positive performance. The Catch-Up is intended to provide the AIFM with the performance fee of 5% of the Share Class positive performance during the Credit Markets Fund Calculation Period. The Catch-Up makes the AIFM whole as the performance fee is based on the total positive return/performance of the Share Class in excess of the HWM and not just the return above both the HWM and the Hurdle Rate.

Adjustment for X Share Classes In determining whether a Performance Fee is due in respect of the X Share Classes the hurdle rate will be increased by 0.75% because investors in these Shares pay a management fee separately rather than as a Share Class fee. Without this adjustment, investors in X Share Classes would pay a higher performance fee than is warranted.

Crystallisation

A performance fee accrual crystallises (becomes payable) under any of the following circumstances:

- on the last Valuation Day of the Financial Year;
- on redemption (applies to those Shares only);
- when a Sub-Fund or, where applicable, a Share Class is merged or liquidated.

Underlying investments and Portfolio Funds

The Investments made by the Sub-Fund, including those made through Portfolio Funds, may separately be subject to fees based on the performance of those underlying investments. The performance fee payable in respect of the Share Class will be calculated based on the returns of the Share Class after taking into account any applicable

fees and expenses, including management and performance fees paid at the level of Portfolio Funds, incurred in respect of the investments.

ONE-OFF CHARGES

Shareholders may be required to pay an additional one-off charge to the AIFM (“One-Off Charge”) on Subscriptions.

Initial Charge Charged on Subscriptions for Shares; calculated as a percentage of the amount being invested; may be waived in whole or in part at the discretion of the AIFM. For information on any Subscription Charge in connection with each Sub-Fund, see [Sub-Fund Descriptions](#).

DISTRIBUTION FEE

A Distributor may be entitled to receive a distribution fee (the “Distribution Fee”). The AIFM typically uses some or all of the Distribution Fee to compensate Distributors for their services in connection with marketing and distributing the D, D2 and SD2 Share Classes. The AIFM can vary this fee, at any time and for intervals as short as a single day, to any amount between zero and the stated maximum. The Distributor(s) may be permitted to engage one or more additional distributors or sub-distributors, in each case including, without limitation, banks, investment advisors, registered broker-dealers, trust companies and others on such terms as the Distributor may determine (any such person, a “Sub-Distributor”). Investors should be aware that they may be charged additional fees, costs or expenses by Sub-Distributors and financial intermediaries when they are entering into arrangements in connection with their investment in the Fund. For information on the Distribution Fee in connection with each Sub-Fund, see [Sub-Fund Descriptions](#).

OPERATING AND ADMINISTRATIVE EXPENSES

The Sub-Funds will bear Operating and Administrative Expenses as described in this Prospectus. Such Operating and Administrative Expenses will be capped for each Share Class and the fee will not exceed the amount stated in the relevant Sub-Fund Descriptions. The AIFM will bear any Operating and Administrative Expenses that exceed the maximum rate specified.

The components of the operating and administrative expenses are:

- Fund servicing fee which is paid to the AIFM for various services it provides to each Sub-Fund, excluding the Management Fee. The fund servicing fee is reviewed annually by the Board.

Direct fund expenses Sub-Fund expenses paid directly by each Sub-Fund and include, but are not limited to:

- Depositary fee;
- audit fees and expenses, including any ESG reporting expenses;
- Valuation agent fees
- fees paid to directors of the Fund; and
- Fund administration fee (excluding Transfer Agent fees).
- the Luxembourg taxe d’abonnement, calculated and payable quarterly, on the total net assets of the relevant Sub-Fund at the end of each quarter, as follows:
 - Share classes I, I2, S1, S2, X: 0.01%
 - Share classes A, C, C2, D, and D2, SC1, SC2, SD1, SD2: 0.05%

Indirect fund expenses Sub-Fund expenses which are directly contracted by the AIFM on behalf of each Sub-Fund and include, but are not limited to:

- legal fees and expenses;
- all fees and cost associated with complying with any law or regulation related to the activities of each Sub-Fund or any Holding Company and/or the validation or other confirmation of any payments (including as a result of any anti-money laundering laws, rules or regulations), legal fees and expenses with respect thereto (including all expenses and costs arising pursuant to the AIFMD and excluding any regulatory and compliance expenses not related to the relevant Sub-Fund or its activities);
- the costs associated with maintaining substance in applicable jurisdictions;
- transfer agency expenses covering registrar and transfer agency services;
- ESG consulting;
- administrative services (including any costs, expenses, charges and fees charged or specifically attributed or allocated by the Investment Manager and/or its Affiliates to provide administrative services to each Sub-Fund, provided that any such expenses, fees, charges or related costs shall not be greater than what the Investment Manager believes would

be paid to an unaffiliated third party for substantially similar services), and domiciliary agent services;

- ongoing registration, listing and quotation fees, including translation expenses;
- documentation costs and expense, such as preparing, printing and distributing the Prospectus, KIDs or any other offering document, as well as Shareholder Reports and any other documents made available to Shareholders;
- the cost of developing, licensing, implementing, maintaining or upgrading any web portal, extranet tools, computer software (including accounting, investor reporting, ledger systems, financial management and cybersecurity) or other administrative or reporting tools for the benefit of each Sub-Fund;
- the fees and reasonable out-of-pocket expenses of the paying agents and representatives;
- the cost of publication of the Share prices, and costs of postage, telephone, facsimile transmission and other electronic means of communication;
- the preparation, distribution or filing of Sub-Funds-related or investment-related financial statements, books and records, or other reports, tax returns, tax estimates, Schedule K-1s (or equivalents), or any other administrative, or reports or disclosures;
- costs of compliance or regulatory matters related to the Sub-Funds or Investments, including compliance consultant and anti-money laundering officers, compliance with any tax or financial account reporting regime, including FATCA, the OECD Standards for Automatic Exchange of Financial Account Information – Common Reporting Standard and any similar laws, rules and regulations, third-party service providers and professionals related to the foregoing; any third-party experts (including ESG experts), including independent appraisers, engaged by the AIFM, the Investment Manager in connection with the Sub-Funds considering, making or holding (directly or indirectly) an investment;
- all fees, costs and expenses incurred with the diligencing, establishment, implementation, assessment, attestation, monitoring and/or measurement of any ESG-related programs and initiatives with respect to the Sub-Fund (including all fees, costs and expenses incurred in connection with ESG metrics assessments and any other such assessments, measurements, advice, verification assurance or reports prepared on, conducted as part of implementing, monitoring, standardizing, disclosing and maintaining such ESG-related programs or initiatives, to the extent implemented);
- all fees, costs and expenses related to ESG or sustainability related investing (including, without limitation, the EU SFDR and the EU Taxonomy Regulation);
- costs of insurance, including directors and officers liability, fidelity bond, cybersecurity, errors and omissions liability, crime coverage and general partnership liability premiums and other insurance (including costs related to any retention or deductibles and insurance broker costs and commissions), any consultants or other advisors used in the procurement, review, maintenance and analysis of insurance and regulatory expenses;
- costs of travel, lodging, meals and entertainment expenses reasonably incurred; and
- establishment costs. Unless otherwise stated in the relevant Sub-Fund Descriptions, each Sub-Fund shall pay all out-of-pocket costs and expenses attributable to the establishment, organisation and authorisation of the Sub-Fund and, as the case may be, of any intermediary entities, including special purpose vehicles, securitisation, aggregator vehicles, Holding Companies or other intermediary structures in relation to that Sub-Fund, as well as regarding the offer of Shares in the Sub-Fund to prospective investors, including, without limitation, legal, regulatory, compliance (including compliance

contemplated by the EU SFDR, the EU Taxonomy Regulation or any other similar laws, rules or regulations related to the EU Action Plan and any related regulations), tax, professional advisors (including ESG advisors consultants), reasonable travel (including lodging, meals and entertainment expenses), reasonable incurred accounting, filing, fundraising, printing, translation and capital raising as well as (i) costs, fees and expenses involved in filing a notification, registering and maintaining the registration of one or more of the Sub-Funds or any entity involved in the management of these Sub-Funds, including any filings to be made by J.P. Morgan in this respect with any regulatory or governmental agencies in any country, (ii) costs, fees and expenses of any paying agent and/or representative, (iii) other organisational expenses, and (iv) any other similar costs, fees and expenses. The Board may further decide to allocate the costs relating to the establishment of the Fund to one or several Sub-Funds, as deemed appropriate.

The AIFM, the Investment Manager or their Affiliates, at their discretion, can temporarily meet the Operating and Administrative Expenses on a Sub-Fund's behalf and the relevant Sub-Fund will reimburse the AIFM, the Investment Manager or their Affiliates. The AIFM can also waive all or part of the Fund servicing fee.

OTHER FEES AND EXPENSES NOT INCLUDED IN ANY OF THE ABOVE

Most operating expenses directly relating to the Fund are included in the fees and expenses described above. However, in addition each Sub-Fund bears all other costs incurred by it and any Holding Company it holds an interest in, including investment expenses, transaction fees and extraordinary expenses such as:

Investment expenses

All costs and expenses incurred in identifying, originating, evaluating, pursuing, negotiating, structuring, consummating, financing, acquiring, selling, valuing, winding-up, or otherwise disposing of, as applicable, the Sub-Fund's portfolio companies, and the Sub-Fund's actual and potential Investments, including the costs and expenses related to the use, acquisition, holding, or disposal of any actual or potential investment or otherwise facilitating the Sub-Fund's Investment activities, or seeking to do any of the foregoing whether or not the contemplated transaction or investment is consummated and whether or not such activities are successful.

Costs incurred by or associated with any Holding Company or other entity owned in whole or in part by the Fund, or any vehicle to which the Carried Interest (where relevant) is payable (including, without limitation, professional costs and expenses, audit costs, directors' fees, D&O insurance costs and administration costs incurred by such entities).

DEALING CHARGES AND COSTS

Shareholders are responsible for all charges associated with their purchases, switches and redemptions of Shares, as described in the Sub-Fund Descriptions. Shareholders are also responsible for paying any bank fees, taxes, and any other fees or costs incurred by investors in connection with dealing requests.

BORROWING

Costs associated with any borrowing, indebtedness of, or guarantees made by, the Sub-Fund (and any intermediate vehicle, aggregator, Holding Company or other entity owned in whole or in part by the Fund) or the Investment Manager on behalf of the Sub-Fund (including any credit facility, letter of credit or similar credit support), including interest with respect thereto, or seeking to put in place any such indebtedness or guarantee.

Investing in the Sub-Funds

MAKING AN INVESTMENT

Share Issuance, Ownership and Shareholders Rights

ISSUE OF SHARES

Unless otherwise provided for in the Sub-Fund Descriptions, the Board shall be authorised, without limitation, at any time and for any period, to issue an unlimited number of fully or partly-paid Shares of any Share Class at a price and in accordance with the conditions and procedures provided for in the Sub-Fund Descriptions, without granting to existing Shareholders a preferential right to subscribe for the Shares to be issued. Within each Sub-Fund, the Board can create and issue Share Classes with various characteristics and investor eligibility requirements, including potentially different fee, dealing, switch, redemption, Subscription, transfer, information disclosure, liquidity arrangements, distribution policies, investor types, or any other criteria to be determined by the Board. Such different terms and conditions may be preferential to the Shareholders of the other relevant Share Classes. Such Share Classes may be made available to any type of Shareholder, whether or not such Shareholder has legal or economic links to the AIFM or the Fund.

Shares will be issued in accordance with the procedures provided for in the Sub-Fund Descriptions and the Articles. If banks or interbank settlement systems in the country of the settlement currency or the Share Class Currency are closed or not operational on the Subscription Day, settlement will be delayed until they are open and operating. Unless otherwise provided for in the Sub-Fund Descriptions, no Share will be issued until Investors have funded their Subscriptions by the full amount, to an account specified by the Fund, on or prior such date as defined in the relevant Sub-Fund Description.

A Sub-Fund may be characterised as being of an open-ended type or a closed-ended type. Although either type may share certain features with the other, they have certain differences. Fundamentally, an open-ended Sub-Fund allows Investors to request the redemption of their Shares under certain conditions as set out in the Sub-Fund Descriptions. It typically has the inherent ability by its terms to increase or decrease its paid-in share capital over its lifetime in response to Investor-requested Subscriptions and redemptions, respectively. A closed-ended Sub-Fund will not grant Investors a right to redeem their Shares. In practice, fundamentally this means that its maximum paid-in share capital is defined in one or more closings at the outset of the Sub-Fund and Investors do not thereafter have the option to request the redemption of their Shares.

In case of suspension of issue of Shares, the Fund informs the CSSF without delay.

The issue of Shares is prohibited:

- during any period where there is no Depositary; and
- where the Depositary is put into liquidation or declared bankrupt or seeks an arrangement with creditors, a suspension of payment or a controlled management or is the subject of similar proceedings.

OWNERSHIP

Registered Shares Shares are issued in registered form only, meaning that the Shareholder's name is recorded in the Fund's register of Shareholders. A contract note will be sent to the Shareholders.

Investing through a sales agent or Distributor vs. directly with the Fund When a Subscription is made through an entity that holds the Shares under its own name (a Financial Intermediary Account), that entity is legally entitled to exercise rights associated with those Shares, such as voting rights. The entity maintains its own records and periodically provides the Underlying Investor with information concerning Shares of the Sub-Funds that it holds on an Underlying Investor's behalf.

Unless the laws of an Underlying Investor jurisdiction prohibit it, the Underlying Investor can, if permitted to do so by the Board and/or the AIFM, invest directly with the Fund, or through an intermediary that does not use Financial Intermediary Accounts, and in so doing can retain all Shareholder rights. Where permitted, an Underlying Investor can claim direct title to any Shares held for that owner in a Financial Intermediary Account. However, in some jurisdictions, a Financial Intermediary Account is the only option available, and an Underlying Investor does not have the right to claim direct ownership from the Financial Intermediary.

FUND RIGHTS RELATED TO SHARES

The Fund and, where applicable, the AIFM, at their sole discretion, reserve the right to do any of the following at any time:

Rights related to Shares and dealing requests

- Decline to issue any Shares and decline to register any transfer of Shares when it appears that such issue or transfer may result in the allocation of ownership of the Shares to a person who is not authorised to hold Shares in the Fund.
- Accept a request to switch Shares into Share Classes that are identical except for having lower fees when a Shareholder's holding meets the investment minimum for the Share Class with the lower fees.
- Delay or reject any request to subscribe for Shares - in part or in full, for an initial or additional investment - for any reason. This particularly applies to requests from anyone who is a US Person. Requests to purchase Shares reserved for Eligible Counterparties, Additional Investors or Institutional Investors which may be delayed until the AIFM is satisfied that the investor qualifies as such. Neither the Fund nor the AIFM will be held liable for any gain or loss associated with a delayed or rejected request.
- Accept securities as payment for Shares or fulfil redemption payments with securities if permitted by the relevant Sub-Fund Descriptions and accepted by the redeeming Shareholder (Subscription or redemption in kind). In cases where Shareholders wish to request a purchase or redemption in kind, if allowed under the relevant Sub-Fund Descriptions, they must obtain advance approval from the Board. Shareholders must pay all costs associated with the Subscription or redemption in kind (broker fees, compulsory audit report, etc.). The value of the Subscription or redemption in kind will be certified by an auditor's report. The Board can also request that a Shareholder accepts a redemption in kind. In this case the Fund will bear the

associated costs, and Shareholders are free to reject the request.

- Offer different cut-off times to certain Investors, such as those in different time zones, so long as the cut-off time is always before the time the applicable NAV is calculated and the underlying client instruction was received by the Distributor prior to the Sub-Fund cut-off time.

Rights Related to Suspension of the Calculation of the NAV and Suspension of Dealings

The Board may temporarily suspend or defer the calculation of NAVs or the Subscription, redemption (where applicable) and/ or switching of Shares for one or more Sub-Funds and/or Share Classes when any of the following is true:

- any exchange or market, on which a substantial portion of the Sub-Fund's investments is traded, is closed, otherwise than for public holidays, or while dealings on any such exchange or market are restricted or suspended;
- the Fund is unable to repatriate funds for the purpose of making payments on the redemption of the Shares of the relevant Sub-Fund or during which any transfer of funds involved in the realisation or acquisition of Investments or payments due on redemption of Shares cannot, in the opinion of the Board or the Investment Manager, be effected at normal prices or rates of exchange or be effected without prejudicing the interests of the Shareholders or the Fund;
- a breakdown exists in the means of communications or computation normally employed in determining the price or value of any of the Fund's assets, or there is any other reason that the price or value of any of the Fund's assets cannot be promptly and accurately ascertained;
- the Fund, the Sub-Fund or a Share Class is being, or may be, wound up on or following the date on which notice is given of the meeting of Shareholders at which a resolution to wind up the Fund, the Sub-Fund or a Share Class is proposed;
- any state of affairs exists that, in the view of the Board, constitutes an emergency as a result of which disposal or valuation of Investments of the relevant Sub-Funds by the AIFM is impracticable;
- the Board has determined that there has been a material change in the valuation of a substantial proportion of the Investments of the Fund attributable to a particular Sub-Fund, and has further decided, in order to safeguard the interests of the Shareholders and the Fund, to delay the preparation or use of a valuation or carry out a later or subsequent valuation;
- in the case of a suspension of the calculation of the NAV of one or several Portfolio Fund(s) in which a Sub-Fund has invested a substantial portion of assets;
- in the case of a merger, if the Board deems this to be justified for the protection of the Shareholders;
- in the event the legal, political, economic, military or monetary environment, or an event of force majeure, prevents the Fund from being able to manage the assets of a Sub-Fund in a normal manner and/or prevent the determination of their value in a reasonable manner;
- if any other circumstance exists where a failure to do so might result in the Fund or its Shareholders incurring any liability to taxation or suffering other pecuniary disadvantages or other detriment that the Fund or its Shareholders might not otherwise have suffered.

A suspension will apply to all types of deals in Shares and will apply at the Sub-Fund or Share Class level, as applicable.

In connection with suspensions, the Fund will refuse to accept requests to buy, switch or redeem Shares during the time the Board has suspended the calculation of NAV. During this time, Shareholders may withdraw their requests. Any requests that

are not withdrawn will be dealt with on the next possible dealing day once the suspension is over, subject to any suspension mechanism described in section Suspension of redemptions or further imposition of the Redemption Gate.

Shareholders will be informed of any suspension or deferral, as appropriate.

Rights related to accounts and ownership

The Board may close (or re-open) any Sub-Fund or Share Class to further investment, either from new investors or all investors, for an indefinite period without advance notice, so long as it is consistent with the interests of the Shareholders. This may happen where a Sub-Fund reaches a size such that the capacity of the market and/or the Investment Manager has been reached, and permitting further inflows would be detrimental to the performance of the Sub-Fund. Once closed, a Sub-Fund or Share Class will not be re-opened until, in the opinion of the Board, the circumstances that required the closure no longer exist. For information on the status of Sub-Funds and Share Classes, contact the AIFM.

The Board may redeem all Shares upon receipt of a Redemption Notice that would leave a holding that is lower than the minimum holding amount. Shareholders will be given not less than six (6) months' prior notice to increase their holding above the minimum. Any fall below the minimum holding amount owing to Sub-Fund performance will not cause the closing of an account. The Board may forcibly redeem some or all of a Shareholder's Shares and send them the proceeds, subject to the availability of cash, or switch a Shareholder's holding to another Share Class, if it appears that the Shareholder is precluded from owning the Shares in accordance with the Articles and/or this Prospectus. This applies to any investor who, whether investing alone or with others (i) appears to be a US Person, (ii) appears to be holding Shares in violation of law or regulation or requirement of any country or governmental authority, (iii) appears to be holding Shares without having met the criteria for the relevant Share Class (including complying with the minimum holding amount), (iv) appears to have exceeded any limitation applicable to their investment, (v) appears to have breached any representation or warranty given by it in connection with the acquisition of Shares or (vi) where it appears that such holding might result in the Fund (including its Shareholders) or any of its delegates incurring any liability to taxation or suffering any sanction, penalty, burden or other disadvantage (whether pecuniary, administrative or operational) which the Fund (including its Shareholders) or its delegates might not otherwise have incurred or suffered or otherwise be detrimental to the interests of the Fund (including its Shareholders). The Fund will not be required to sell Investments ahead of time to make such payments. The Fund will not be held liable for any gain or loss associated with such actions.

The Board or the AIFM will require that Financial Intermediaries compulsorily redeem Shares held by a US Person.

SHAREHOLDER RIGHTS

Voting rights: each Share has one (1) vote in all matters brought before a general meeting of Shareholders and of any meeting of its Sub-Funds. Fractional Shares are issued to one one-thousandth (1/1000) of a Share (three decimal places). Fractional Shares do not have voting rights.

To the extent permitted by the 1915 Law, the 2010 Law or any other Luxembourg laws or regulations, a secure electronic platform may be used for the transmission of all notifications and announcements of the Board and the Fund, such as for instance, information notices, financial reports and corporate information.

Subscription Process

SUBSCRIPTION

The subscription process applicable in respect of a Share Class in each Sub-Fund will be set out in the Sub-Fund Descriptions and may be made by means of either paid-in subscription, or Capital Calls subject to any further provisions as set forth in the Sub-Fund Descriptions.

The Subscription for, and transfer or switching of, Shares and any future transactions shall not be processed until the applicant has provided in writing or by means of electronic communication accepted by the Board, at their sole discretion:

- (i) a duly completed and executed Application Form;
- (ii) the information required by the Fund or agents acting on its behalf, including, but not limited to, the required know your customer and anti-money laundering documentation and any other required information.

No prospective investor will be admitted as an Investor in the relevant Sub-Fund until the Board has explicitly accepted the Application Form.

By duly completing and signing the Application Form, each Investor fully adheres to and accepts the Fund Documents which determine the contractual relationship between the Investors, the Fund, the Board, the AIFM and any other agents of the Fund, as well as among the Investors themselves. All Shareholders are entitled to the benefit of, are bound by, and are deemed to have notice of, the provisions of the Articles, copies of which are available on the Luxembourg Business Registers (lbr.lu). The provisions of the Articles are binding on the Fund, the Shareholders and all persons claiming through them. The Fund Documents are governed by Luxembourg law, and the courts of the Grand Duchy of Luxembourg shall have exclusive jurisdiction in relation to them.

The Board is entitled to refuse any Subscription, transfer or switch application in whole or in part for any or no reason, and may in particular prohibit or limit the sale, transfer or switching of Shares to individuals or corporate bodies in certain countries if such transaction might be detrimental to the Fund or result in the Shares being held directly or indirectly by a prohibited person who is not an Eligible Investor or if such Subscription, transfer or switch in the relevant country is in contravention of the local applicable laws.

In the case of both open-ended and closed-ended Sub-Funds, no Subscription in kind will be accepted unless otherwise stated in the Sub-Fund Descriptions or if approved by the Board, if they consider it to be in the best interest of a Sub-Fund.

Subject to a separate agreement with a Distributor or Sub-Distributor, the Board may accept a new Investor in a Sub-Fund based on the information provided separately in the Application Form and in the form determined by the Board or a delegate as sufficient for that purpose.

Unless otherwise provided for in the Sub-Fund Descriptions, Shares will be issued on the condition that the Investor has paid their Subscriptions in full no later than on the date referred to in the relevant Sub-Fund Description. If Investors fund their Subscriptions prior to the Subscription Day, or such later date as is set out in the Sub-Fund Description, such amounts will be held on a collection account (which will not accrue nor bear any interest), and they will not receive Shares until the NAV per Share with respect to that Subscription Day has been determined.

The Subscription for, and transfer or switch for Shares and any future transactions shall not be processed until the information

required by the Fund or Service Providers, including but not limited to know your customer and anti-money laundering checks, is received.

Open-ended sub-funds

In the case of open-ended Sub-Funds, each Investor whose Application Form is accepted and that is admitted as an Investor will be required to make a cash payment up-front or, in some cases, one cash payment, or by way of multiple drawdowns or Capital Calls on the Investor's Capital Commitment as further described below, to the relevant Sub-Fund in satisfaction of such Investor's Subscription as further described in the relevant Sub-Fund Descriptions.

In the case of an open-ended Sub-Fund, Investors will be admitted to such Sub-Fund and may subscribe to and redeem from such Sub-Fund at such times and on such basis as described in the relevant Sub-Fund Descriptions.

Irrespective of whether Shares have been fully paid-up or an amount thereof has been committed, each Sub-Fund may require a minimum Subscription amount, and may distinguish between a minimum initial subscription amount and a minimum subsequent Subscription amount, and such Subscription amount may also cover the fees described in the Sub-Fund Descriptions, if any (including any applicable taxes thereon) and such Investor's pro rata Share of all fees, costs and expenses of the Fund, including organisational, operational and offering expenses, as further described under Share Classes and Costs. To the extent possible under applicable laws, the Board may decide in its sole discretion to accept a lesser amount from any particular Investor.

In the event the Board determines that the total initial Subscription amount in relation to a Sub-Fund is insufficient, the offering of Shares in relation to such Sub-Fund may be terminated at the sole discretion of the Board. In such event the relevant Investors shall be released from their obligation to pay their Subscription amounts, and any amounts already contributed to the Sub-Fund shall be returned to the Investors without penalties nor interest. The Board may however decide to reopen the offering and to establish the Sub-Fund at a later date.

Closed-Ended Sub-Funds

In the case of closed-ended Sub-Funds, each Investor whose Application Form is accepted and who is admitted as an Investor will typically be required to make one or several cash payments to the relevant Sub-Fund from time to time (as required) in satisfaction of such Investor's Capital Commitment as further described in the relevant Sub-Fund Descriptions.

A Sub-Fund may require a minimum Capital Commitment, and such Capital Commitment may also cover the fees described in the Sub-Fund Descriptions, if any (including any applicable taxes thereon) and such Investor's pro rata share of all fees, costs and expenses of the Fund, including organisational, operational and offering expenses, as further described under "Costs and Expenses". To the extent possible under applicable laws, the Board may decide, in its sole discretion, to accept a lesser amount from any particular Investor. Any decisions of the Board to accept a lesser amount will be applied to all prospective investors in the same Share Class in that Sub-Fund.

Each closed-ended Sub-Fund may have one or more Closing Date(s) or Subscription Day(s) at such frequency and under such conditions as further described in the Sub-Fund Descriptions, at which Investors will be admitted to the Fund in respect of the relevant Sub-Fund. A closed-ended Sub-Fund may hold multiple closings during which new Investors may be admitted and existing Investors may increase their Subscriptions by subscribing for additional Shares (both hereinafter a "Subsequent Investor"). A Subsequent Investor may be subject to equalisation adjustments, as

further described in the Sub-Fund Descriptions.

Default and Late Payment

Unless provided otherwise in the Sub-Fund Descriptions, if at any time any Investor shall fail to timely pay in full any requested Subscription, no Share in the Fund shall be issued to such Investor. Where an Investor has failed to timely pay in full a Subscription as specified in the Capital Call Notice (a "Default"), the amount of such Default (the "Default Amount") shall accrue interest equal to the amount set out in the relevant Sub-Fund Descriptions. Upon the occurrence of any Default, the Fund shall promptly notify the Investor who has committed such Default of the occurrence of such Default, provided that a failure by the Fund to deliver such notice shall not constitute a waiver of such Default and no notice shall be required for the accrual of interest as set forth in this paragraph.

Any Default that shall not have been:

- (i) cured by the Investor who committed such Default within five (5) Business Days (or such other time as may be specified in the relevant Sub-Fund Descriptions after the Fund has delivered notice of the occurrence of such Default to such Investor); or
- (ii) waived by the Fund on such terms as determined by the Board in its discretion, shall be an "Event of Default" and the Investor having committed a Default that has become an Event of Default, a "Defaulting Investor".

Upon the occurrence of an Event of Default, subject to anything to the contrary contained herein (including in the relevant Sub-Fund Descriptions), the Fund, in its discretion, may exercise any or all of the rights set forth in this paragraph with respect to any Shares previously subscribed, paid by and issued to a Defaulting Investor:

- cause the Defaulting Investor to forfeit all or any portion of distributions from the Fund made or to be made after such Event of Default;
- apply an additional interest rate against the Default Amount, as set out in the Sub-Fund Descriptions, if any, and cause distributions that would otherwise be made to the Defaulting Investor to be applied as satisfaction of such amount;
- apply to the Defaulting Investor's Shares any additional costs incurred by the relevant Sub-Fund as a result of such Default;
- cause a forced sale or redemption of the Defaulting Investor's Shares or Undrawn Commitment to any person (including, in the discretion of the Fund, one or more of the other Investors), equal to such price that the Fund reasonably determines is attainable in light of market conditions. Such person or persons shall, if applicable, after executing such instruments and delivering such opinions and other documents as are in form and substance satisfactory to the Board, be admitted to the Fund as a substituted Shareholder ("Substituted Shareholder") or Shareholder with respect to such Shares, and shown as such on the books and records of the Fund. After giving effect to any forced sale, the Defaulting Investor shall be treated as having no further interest in the Fund;
- cause the Defaulting Investor to forfeit its right to participate in any portion of a Sub-Fund's direct or indirect investments funded after such Event of Default;
- withhold from the Defaulting Investor any reports or other information with which the Defaulting Investor would otherwise be entitled to receive;
- suspend the right of the Defaulting Investor to participate in any vote, approval or consent of the Investors;

In addition, the Fund may, in its sole discretion, cause the Defaulting Investor to indemnify the Fund as a result of a Default to cover costs and expenses the Fund had to incur for having to draw the Default Amount on a bridge facility, as the case may be

and institute proceedings against the Defaulting Investor to recover the Default Amount.

In completion or derogation from the above, each Sub-Fund may provide for specific mechanisms in relation to an Event of Default.

The rights and remedies referred to in this section Default and Late Payment shall be in addition to, and not in limitation of, any other rights or remedies available to the Fund or the Board under this Prospectus or at law. An Event of Default by any Investor in respect of any Subscription shall not relieve any other Investor of its obligation to make Subscription under this Prospectus.

In addition, an Event of Default by such Defaulting Investor shall not relieve such Investor of its obligation to make Subscriptions subsequent to such Event of Default.

RECALLS, TRANSFER, REDEMPTIONS, SWITCHES, WITHDRAWALS

The information in this section is for use by Financial Intermediaries and for Investors conducting business directly with the Fund. Shareholders investing through a financial advisor or other intermediary can use this information as well, but in general it is recommended that they place all dealing requests through their intermediary unless there is reason not to.

No Recall of distributions

Any recall of distributions to Retail Investors by the Board, the AIFM or any person to whom such powers have been delegated is not permitted under this Prospectus.

The Board may recall distributions previously made to the Shareholders which qualify as Professional Investors, if applicable, pursuant to the terms set out in the Sub-Fund Descriptions. In such event, the Fund will notify the Professional Investors through a recall notice (the "Recall Notice").

In the event Professional Investors are required to return distributions following the receipt of a Recall Notice and in accordance with the Sub-Fund Descriptions, the Fund will distribute the amounts returned to the Sub-Fund in accordance with the Sub-Fund Descriptions and with the principle of equal treatment of investors. For the avoidance of doubt, the Fund and each of its Sub-Funds are not permitted to recall distributions for the purpose of paying claims, liabilities or damages incurred by the Board, the AIFM, the Investment Manager and any of their respective officers, directors, partners, managing directors, stockholders, member equity owners, employees or Controlling Persons as a direct consequence of the negligence (whether through an act or omission), fraud or wilful misconduct on the part of these persons.

In the event Professional Investors which are required to return distributions do not return distributions within the period as specified in the Recall Notice, the Professional Investors will be considered to be in default (the "Clawback Default Investors"). The Sub-Fund Descriptions will disclose the consequences for the investors in the event a Professional Investor becomes a Clawback Default Investor.

Redemption and Withdrawal

The Shares issued in connection with the incorporation of the Fund will be compulsory redeemed by the Board for the subscription price which will be returned to the holder of such Shares no later than three (3) years from the date of incorporation of the Fund.

Shareholder redemption in closed-ended Sub-Funds Shares of such Sub-Funds are not redeemable at the request of Shareholders before the termination of these Sub-Funds, unless otherwise specified in the Sub-Fund Descriptions. After the termination of the Sub-Funds, all investors will be deemed to have submitted their redemption request.

Shareholder redemption in open-ended Sub-Funds The redemption policy and the precise terms and conditions on which an Investor in an open-ended Sub-Fund will be permitted to redeem their Shares from the Sub-Fund will be specified in the relevant Sub-Fund Description. The Board shall ensure that Shareholders are treated fairly.

The Board, in collaboration with the AIFM, may decide to satisfy a Redemption Notice prior to the applicable Redemption Day provided there are sufficient liquid investments and that such early redemption does not negatively impact the interests of the remaining Shareholders or the Sub-Fund's ability to pursue its investment objective.

Redemption proceeds will be paid to the Shareholder identified in the register of Shareholders according to the bank account details on file for such Shareholder's account. Any delays in payment, associated with verification of the bank account of details of the registered Shareholder which the Board might undertake will not delay the acceptance of the Shareholder's redemption request but may affect the timing of the release of redemption proceeds. The Board and the Sub-Fund will not be held responsible for any delay in payment in such circumstances. Shares shall be redeemed at a price based on the NAV per Share of the relevant Class as of the relevant Redemption Day reduced by the fees, commissions, or expenses allocable to it, but including any dividend declared and not yet paid (if any) (the "Redemption Price").

Until the relevant Redemption Day, the Shares to be redeemed shall remain in issue and the redeeming Shareholders shall have all rights (including but not limited to voting rights and rights to distributions) and obligations in relation to such Shares. After the relevant Redemption Day, redeeming Shareholders will not be entitled to or be capable of exercising any rights arising under the Articles or this Prospectus with respect to the Shares being redeemed (including any right to receive notice of, attend or vote at any meeting of the Sub-Fund) save the right to receive the Redemption Price (as defined above) and any dividend which has been declared prior to the relevant Redemption Day but not yet paid (in each case with respect to the Shares being redeemed). Such Shareholders will be treated as creditors of the Sub-Fund with respect to the Redemption Price and will rank accordingly in the priority of the Sub-Fund's creditors.

Redemption Gate A Redemption Gate is an exceptional, temporary and partial restriction of the right of Shareholders to redeem their Shares. The Redemption Gate is preferable to a full suspension of redemptions as it allows partial redemptions to continue whilst protecting the interests of Shareholders.

It is a liquidity management tool that the AIFM may activate only in certain limited circumstances such as stressed market conditions, a deterioration in the liquidity of the underlying assets, circumstances where the AIFM has concerns about the Sub-Fund's ability to prudently meet redemption requests whilst operating in the manner intended, or unforeseen liabilities or obligations of the Sub-Fund that would make processing redemptions at the Redemption Limit detrimental to the interest of Shareholders. The AIFM will only consider activating the Redemption Gate where, taking into account the best interest of Shareholders, doing so is necessary to protect the Shareholders and the Sub-Fund. In such case, the AIFM may, at its sole discretion, activate a Redemption Gate. In determining the activation of the Redemption Gate, the AIFM considers factors such as the liquidity of the underlying assets, prevailing market conditions and expected cash flows, and the interest of all

Shareholders (both redeeming and remaining).

If the Redemption Gate is activated:

- The Redemption Gate shall apply per Redemption Day, and redemption requests are not aggregated across redemption periods.
- All Shares tendered for redemption on that Redemption Day will be aggregated, and each Shareholder submitting a Redemption Notice will be redeemed a pro-rata portion (as defined in the Sub-Fund Description) of the Sub-Fund's Net Asset Value, based on the total amount of Shares tendered for redemption by all redeeming Shareholders.
- There will be no automatic transfer or rolling-over of the unexecuted portion of redemption requests to a subsequent Redemption Day. Any such unexecuted portion will be cancelled, and Shareholders will be required to submit a new Redemption Notice for subsequent Redemption Days, should they wish to redeem further.

For the avoidance of doubt, in normal market conditions, the standard rules for redeeming Shares in a Sub-Fund would apply, and the Redemption Gate would not be activated. The AIFM will lift the Redemption Gate and return to normal redemption processing as soon as the exceptional circumstances that led to its activation have been resolved.

For further detail, please see the conditions set out in the relevant Sub-Fund Descriptions.

Suspension of redemption In case of suspension of redemption of Shares, the Fund informs the CSSF without delay.

In the interest of Shareholders, redemptions may be suspended by the CSSF if the legal, regulatory or statutory provisions concerning the activity and operation of the Fund are not observed.

The redemption of Shares is prohibited:

- during any period where there is no Depositary; and
- where the Depositary is put into liquidation or declared bankrupt or seeks an arrangement with creditors, a suspension of payment or a controlled management or is the subject of similar proceedings.

Switching Shares

Unless otherwise provided for in the relevant Sub-Fund Descriptions, any Shareholder may request the switching of whole or part of their Shares of one Share Class into existing or new Shares of another Share Class according to a formula to be decided by the Board, provided that the Board may impose such restrictions or prohibitions as to, inter alia, switches or frequency of switches, and may make switches subject to payment of a charge, as it shall consider to be in the interest of the Fund and its Shareholders generally.

Transferring Shares

Shareholders can transfer ownership of Shares to another investor, by submitting a properly executed transfer instruction to the relevant Distributor or sales agent, or to the AIFM. Typically, only the Shareholder's signature will be required to process such instructions. Before initiating a transfer, Shareholders are recommended to contact the relevant Distributor or sales agent, or to the AIFM to ensure they have the right documentation completed.

Transfers and the receiving investor are subject to all applicable eligibility requirements and holding restrictions including those that relate to prohibited investors. The Fund can reject the request if all

the necessary requirements are not met.

Investors shall obtain legal, tax and financial advice before transferring their Shares.

SHAREHOLDER OBLIGATIONS

Be aware of, and follow, all applicable rules and regulations. As noted in the beginning of this Prospectus, each Shareholder must obtain the appropriate professional advice (tax, legal, investing) and is responsible for identifying, understanding and following all laws, regulations and other restrictions applicable to their investment in the Fund.

Notify us of changes in information. Shareholders must promptly inform the AIFM of any changes in personal or bank information. The Fund will require adequate proof of authenticity for any request to change information held on record, including any bank account details, associated with a Shareholder's investment.

Inform us of changes in circumstances that could affect eligibility to own Shares. Shareholders must also promptly inform the AIFM of any circumstances that change or come to light that result in a Shareholder being ineligible to own any Shares, put a Shareholder in violation of the laws or regulations of Luxembourg or any other applicable jurisdiction, or create a risk of any loss, cost, or other burden (financial or otherwise) for the Sub-Fund, other Shareholders, or any individuals or entities associated with the management and operations of the Sub-Fund.

Privacy of Personal Data and Confidential Information

Potential investors and Shareholders must provide information that is personal and/or confidential for various purposes, such

- share it as required by applicable law or regulation (Luxembourg or otherwise)

In communicating by phone, whether to give investment instructions or otherwise, potential investors and Shareholders are considered to have agreed that their phone calls with the AIFM or its delegates can be recorded, monitored and stored, and that the AIFM or JPMorgan Chase & Co. can use them for any allowable purpose, including in legal proceedings.

The Fund takes reasonable measures to ensure the accuracy and confidentiality of personal data and/or confidential information and does not use or disclose it beyond what is described in this Prospectus and in the Privacy Policy without the Shareholder's or potential investor's consent. At the same time, neither the Fund, the AIFM nor any J.P. Morgan entity accepts liability for sharing personal and/or confidential information with third parties, except in the case of negligence by the Fund, the AIFM, a J.P. Morgan entity or any of their employees or officers. This information is held only as long as applicable laws indicate.

Subject to applicable law, Investors may have rights in respect of their personal data, including a right to access to and rectification of their personal data, and, in some circumstances, a right to object to the processing of their personal data.

Moreover, Investors have the right to lodge a complaint with the competent supervisory authority and, where processing is based on their consent, to withdraw that consent at any time.

The Privacy Policy is available at jpmorgan.com/emea-privacy-policy. Hard copies are available on request from the AIFM.

Measures to Protect Shareholders and to Prevent Anti-Money Laundering, Crime and Terrorism

In accordance with applicable European and Luxembourg laws and regulations on the fight against money laundering and financing of terrorism, the AIFM and the Board of Directors of the Fund have instituted policies and procedures to prevent and

as to process requests, provide Shareholder services, and to comply with applicable laws and regulations. The Privacy Policy is designed to comply with all applicable laws or regulations (Luxembourg or otherwise).

Potential investors and Shareholders acknowledge that the AIFM or JPMorgan Chase & Co., acting as data controllers, can do the following with this information:

- gather, store, modify, process and use it in physical or electronic form (including making recordings of telephone calls to or from investors or their representatives) allow its agents, delegates and certain other third parties in countries where the Fund, the AIFM or JPMorgan Chase & Co. do business or have service providers to use it; these third parties may or may not be J.P. Morgan entities, and some could be based in countries with lesser data protection standards (including emerging markets) and statutory protections than the EU to store, modify and process such information. In that context, investor data may be shared with central administration agent(s) to which the AIFM and/or the Fund has outsourced certain administrative and/or transfer agency functions. These agents may also outsource certain functions such as recording investor static data, trade placements and payment information. This outsourcing results in the transfer relevant investor data such as name and address and trading actions (e.g. Subscriptions, redemptions and switches) from the agents to their affiliates and/or sub-contractors. These agents and the entities to which they outsource may be located in any location globally including in EMEA, USA, Canada, India, Singapore, Malaysia, Philippines and Hong Kong;

detect money laundering and financing of terrorism. All investors will be subject to "know-your-customer" due diligence and will be required to provide the Fund or its appointed service provider with information deemed necessary to meet these obligations.

The AIFM and/or its Investment Manager(s) also apply, on a risk based approach anti-money laundering due diligence measures to the investments made on behalf of the relevant Sub-Fund, the extent and duration of such due diligence depends on the nature of the investment and the parties involved.

The Fund, or any delegate thereof, will further provide the Luxembourg beneficial owner register (the "RBO") created pursuant to the law of 13 January 2019 establishing a register of beneficial owners, as may be amended from time to time, with relevant information about any Shareholder or, as applicable, beneficial owner(s) thereof, qualifying as beneficial owner of the Fund within the meaning of the 2004 Law. In addition, the subscriber acknowledges that failure by a Shareholder, or, as applicable, beneficial owner(s) thereof, to provide the Fund, or any delegate thereof, with any relevant information and supporting documentation necessary for the Fund to comply with its obligation to provide same information and documentation to the RBO is subject to criminal fines in Luxembourg.

To comply with Luxembourg laws aimed at preventing crime and terrorism, including the crime of money laundering, investors must provide certain types of documents and/or information as notably set out below.

Customer Identification Before being approved to open an account, each Investor must provide, at a minimum, the following identification:

- natural persons: a copy of an identity card or passport duly certified by a public authority (such as a notary, police official or ambassador) in their country of residence;

- corporations and other entities: a certified copy of the entity's incorporation documents, published accounts or other official statutory document plus, for the entity's owners or other economic beneficiaries, the identification described above for natural persons.

Shareholders typically will be asked to provide additional documentation as well (either before opening an account or at any time afterward), and processing of their deal requests may be delayed if these materials are not received in a timely fashion or are not considered to be adequate.

Excessive Trading and Market Timing

Buying and redeeming Shares for short-term profits can

disrupt portfolio management and increase Sub-Fund expenses, to the detriment of other Shareholders. The Fund does not knowingly allow any market timing transactions, and takes various measures to protect Shareholder interests, including rejecting, suspending or cancelling any request that appears to represent excessive trading or to be linked to an investor or trading pattern associated with market timing. The Fund has the right to forcibly redeem a Shareholder's investment, at that Shareholder's sole cost and risk, if it appears that the Shareholder has engaged in excessive trading which has resulted in a detrimental impact to the Fund or other Shareholders.

OTHER CONSIDERATIONS FOR INVESTORS

Taxation

This summary does not purport to be a comprehensive description of all Luxembourg tax laws and Luxembourg tax considerations that may be relevant to a decision to invest in, own, hold, or dispose of Shares and is not intended as tax advice to any particular investor or potential investor.

Taxation of the Fund and its investments

- **Fund taxation** The Fund is not subject to taxation in Luxembourg on its income, profits or gains. The Fund is subject to a subscription tax ("taxe d'abonnement"). Details of the amount charged for each Share Class can be found under Direct fund expenses under Operating and Administrative Expenses.
- **Taxation of income and capital gains** Interest income, dividend income and capital gains received by the Fund in respect of some of its securities and cash deposits, including certain derivatives, may be subject to non-recoverable withholding taxes at varying rates in the countries of origin. The Fund may further be subject to tax on the realised or unrealised capital appreciation of its assets in the countries of origin. The AIFM reserves the right to provide for appropriate tax on gains, thus impacting the valuation of the Sub-Fund. With the uncertainty over whether and how certain gains are to be taxed, any such provision for taxation made by the AIFM may be excessive or inadequate to meet final tax liabilities on gains.
- **Taxation of assets invested through Belgian financial intermediaries** The Fund is subject to an annual tax of 0.0925% on the part of the value of the Shares of the Fund placed through Belgian financial intermediaries. This tax is included under Fees and expenses taken from the Share Class over a year (Annual Fees) of those Sub-Funds. The tax is payable to the Kingdom of Belgium as long as the Fund is registered for public distribution in such country.
- **Taxation of investments that generate "effectively connected income"** The Fund may make investments that generate income that is considered "effectively connected with the conduct of a trade or business within the United States" for U.S. federal income tax purposes ("Effectively Connected Income" or "ECI"). Any ECI earned by the Fund would be subject to U.S. federal income tax and branch profits tax, as well as applicable U.S. state and local taxes. Because the Fund is treated as a corporation for U.S. federal income tax purposes, investors in the Fund generally will not be directly subject to U.S. federal income tax and will not be required to file U.S. federal income tax returns as a consequence of the Fund's investments; however, any U.S. federal, state and local tax paid by the Fund in respect of its investments that generate ECI would decrease an

investor's return on its investment in the Fund.

General tax risks

- Changes in tax laws or their interpretation could lead to an increase in the tax liabilities of the Fund or any Holding Company and could affect the intended tax treatment of Investments, resulting in the after-tax returns of the Fund being reduced.
- In particular, pursuant to the OECD's BEPS project and several initiatives from the EU, certain areas of tax laws are rapidly evolving with considerable uncertainty. This could have a material and adverse effect on the Fund, its operations, and its subsidiaries.
- The Fund retains complete discretion over the manner and timing of distributions and Shareholders should be aware that the tax implications of such distributions may vary across jurisdictions. Shareholders should further be aware that the distribution method employed may not be the most tax-efficient for their particular situations and the tax characterisation of the income (e.g., capital gain versus ordinary or dividend income) may materially and adversely impact their situation. No undertaking is given that amounts distributed or allocated to Shareholders will have any particular characteristics or that any specific tax treatment will be efficient.

Taxation and reporting of Shareholders

- **Taxpayers in Luxembourg** Shareholders whom Luxembourg considers to be residents or otherwise to have permanent establishment there, currently or in the past, typically will be subject to Luxembourg taxes.
- **Taxpayers in other countries** Shareholders who are not Luxembourg taxpayers are not subject to any Luxembourg capital gains, income, withholding, gift, estate, inheritance or other taxes. However, an investment in a Sub-Fund typically will have tax implications in any jurisdiction that considers Shareholders to be taxpayers.
- **CRS and FATCA** To comply with legislation implementing the OECD Common Reporting Standard (CRS), the US Foreign Account Tax Compliance Act (FATCA) and other intergovernmental agreements and EU directives concerning the automatic exchange of information to improve international tax compliance, the Fund (or its agent) will collect information about Shareholders and their identity and tax status, and will report this information to the relevant Luxembourg authorities. Under Luxembourg law, the Fund or the Sub-Funds as the case may be are a Reporting Luxembourg Financial Institution, and the Fund intends to comply with the Luxembourg laws that apply to such entities.
- **DAC 6** Under the EU Council Directive of 25 May 2018 (DAC 6),

advice given and services rendered regarding cross-border tax planning arrangements that qualify as so-called Reportable Cross-border Arrangements (within the meaning of DAC 6) may need to be reported to the relevant tax authorities by intermediaries or by the taxpayer itself. The relevant tax authorities will thereafter automatically exchange this information within the EU through a centralised database. The Fund or any arrangement relating to its activities may constitute or form part of Reportable Cross-border Arrangements for the purposes of DAC 6. The Fund is not responsible for considering potential DAC 6 implications regarding Shareholders. Shareholders must consult with their own advisors with respect to the consequences of investing in the Shares in the context of DAC 6.

Shareholders must provide all tax certifications or other information requested. Shareholders that are Reportable Persons (and Controlling Persons of certain entities that are Passive Non-Financial Entities) will be reported to the relevant Luxembourg tax authority, and by that tax authority to any relevant overseas tax authorities. The Privacy Policy sets out the appropriate information for investors regarding the circumstances in which JP Morgan Asset Management may process personal data. The AIFM may refuse any Subscription from prospective investors or request compulsory redemption of existing Shareholders in case they do not provide the requested information to the Fund.

Conflicts of Interest

CONFLICTS OF INTEREST GENERALLY

An investment in the Fund or a Sub-Fund is subject to a number of actual or potential conflicts of interest. The AIFM, Investment Manager and other J.P. Morgan Affiliates have adopted policies and procedures reasonably designed to prevent, limit or mitigate conflicts of interest. In addition, these policies and procedures are designed to comply with applicable law where the activities that give rise to conflicts of interest are limited or prohibited by law, unless an exception is available. The AIFM reports any material conflicts of interest that cannot be managed to the Board.

The AIFM and/or other J.P. Morgan Affiliates provide a variety of different services to the Fund, for which the Fund compensates them. As a result, the AIFM and/or other J.P. Morgan Affiliates have an incentive to enter into arrangements with the Fund, and face conflicts of interest when balancing that incentive against the best interests of the Fund. The AIFM, together with other J.P. Morgan Affiliates to which it delegates responsibility for investment management, also face conflicts of interest in their role as investment manager to other funds or clients, and, from time to time, make investment decisions that differ from and/or negatively impact those made by the Investment Manager for the Fund.

As further described below, conflicts of interest will arise whenever J.P. Morgan has an actual or perceived economic interest or other incentive in its management of client assets, including the Fund, and to act in a way that benefits J.P. Morgan or any J.P. Morgan Interested Persons and/or to comply with applicable laws and regulations they are subject to. As a major international financial services firm, J.P. Morgan and its Affiliates engage in and provide a broad range of banking and financial, advisory and investment activities and services. While the relationships and activities of J.P. Morgan and its Affiliates should enable them to offer attractive opportunities and services to the Fund, such relationships and activities also will give rise to circumstances in which the interests of J.P. Morgan, its Affiliates or their other clients conflict with the interests of the Fund and its Investors. Conflicts will result, for example, because of the relationship that J.P. Morgan has with other clients or when J.P. Morgan acts for its own account, as

further described in detail below. As the Fund's investment programme develops over time, an investment in the Fund will likely be subject to additional and different risks and potential conflicts of interest. J.P. Morgan has adopted policies and procedures reasonably designed to appropriately prevent, limit or mitigate conflicts of interest. In addition, many of the activities that create these conflicts of interest are limited and/or prohibited by law, unless an exception is available.

In addition, J.P. Morgan provides a broad range of services and products to its clients and is a major participant in the global currency, equity, commodity, fixed-income and other markets in which the Fund may invest. In certain circumstances by providing services and products to its clients, J.P. Morgan's activities may disadvantage or restrict the Fund and/or benefit its Affiliates. In this context, where applicable, the Fund has authorised the Investment Manager to execute trades, not only through third-party market counterparties, but also through JPMorgan Chase Bank, N.A. (JPMCB), including SEC-registered Affiliates of the JPMorgan Chase & Co. group of companies, as and where permitted under applicable law and subject to the AIFM's conflicts of interest policies and procedures.

The AIFM and/or the Investment Manager may also acquire material non-public information that would negatively affect the Fund's ability to transact in securities affected by such information.

The AIFM managing the Fund and undertakings that belong to the same group as an AIFM managing the Fund, and their staff, may co-invest in that Fund and co-invest with the Fund in the same asset, provided that the AIFM has put in place organisational and administrative arrangements designed to identify, prevent, manage and monitor conflicts of interest and provided that such conflicts of interest are adequately disclosed.

No contract or other transaction between the Fund and any other company or firm shall be affected or invalidated by the fact that the members of the Board or the AIFM or any one or more of each of their managers, associates, officers, employees or shareholders is interested in, or is a manager, associate, officer, employee or shareholder of such other company or firm. Any manager, associate, officer, employee or shareholder of the AIFM or member of the Board who serves as a manager, associate, officer, employee or shareholder of any company or firm, with which the Fund shall contract or otherwise engage in business shall, by reason of such affiliation with such other company or firm, be prevented from considering and voting or acting on any matters with respect to such contract or other business.

The Fund and the Sub-Funds will be dependent on the Service Providers to identify and manage conflicts of interest. The Service Providers will use commercially reasonable efforts to manage material issues involving actual or potential significant conflicts of interest, methods of valuation and certain other matters. If conflicts of interest do exist, the Service Providers will ensure that the Fund and/or relevant Sub-Fund is treated in a fair and equitable manner and shall endeavour to ensure that any conflicts of interest are resolved fairly and in the best interests of Investors, having regard to the relevant agreements pursuant to which such Service Provider is bound in relation to the Fund or any Sub-Fund. This may include disclosure of such potential or actual conflicts of interest, unless the Service Provider has been advised by counsel that such disclosure is or may reasonably be prohibited for regulatory or legal reasons (in which case, where the conflict cannot be satisfactorily resolved, the applicable transaction may not be consummated).

Subject to any special requirements for dealing with particular conflicts of interest outlined below, any actual or potential conflicts of interest of the Service Providers or their Affiliates which relate to the Fund and/or a Sub-Fund will be discussed and resolved on a case-by-case basis.

In the Application Form, Shareholders will be required to acknowledge and consent to the existence of the conflicts of interest described in this Conflicts of Interest section. Any restrictions on the activities of the Service Providers, their personnel and/or the Distributor or Sub-Distributor or agent on behalf of a Sub-Fund (as described in this Prospectus and/or set out in the documents described in this Prospectus) may not apply to any other business lines, teams or groups within other Affiliates of the Service Providers (including the Investment Manager).

SPECIFIC DISCLOSURES

Relationship between the Fund, the AIFM and the Investment Manager

The AIFM and/or the Investment Manager face a conflict of interest between their responsibility to act in the best interest of the Fund, on the one hand, and any benefit, monetary or otherwise, that could result to the AIFM and/or the Investment Manager or their Affiliates from the operation of the Fund, on the other hand. For example, an Affiliate of the AIFM and/or the Investment Manager is/are entitled to receive a Performance Fee and/or Carried Interest Distributions based on the performance of the Fund, and the underlying investments in which the Fund may invest, which will create an incentive for the AIFM and/or the Investment Manager to recommend more speculative investments for the Fund than they would otherwise in the absence of such performance-based compensation.

The AIFM and/or the Investment Manager have rendered in the past, and will render in the future, various services to others (including investment vehicles and accounts which have the same or similar investment objective or strategy as the Fund, and the ability to participate in the same or similar types of investments as those of the Fund) and perform a variety of other functions that are unrelated to the management of the Fund and the selection, acquisition, management and disposition of the Fund's investments.

The fees and allocations that the Investment Manager and their Affiliates are entitled to receive from the Fund may be higher than the fees and allocations certain other investment managers charge in the market. Each Investor is strongly encouraged to review the fees, allocations and expenses to determine whether an investment in the Fund and the relevant Sub-Fund is appropriate for such Investor.

Relationship between the Fund, the AIFM and the Investment Manager and J.P. Morgan; Agency Cross Transactions

The Fund and the portfolio companies in which it invests may have relationships with J.P. Morgan that lead to conflicts of interest. In certain instances, the Fund and the portfolio companies are permitted to establish a relationship with J.P. Morgan to facilitate and improve execution with respect to transactions of the Fund and the portfolio companies. Certain laws applicable to J.P. Morgan may also have an impact on the ability of J.P. Morgan to conduct business with the Fund and the portfolio companies, which may have a negative impact on the Fund. J.P. Morgan is permitted to execute agency cross transactions between the Fund and/or portfolio companies and other persons, as well as to receive commissions from both parties to such transactions, in all cases subject to applicable law and the obligation of the Investment Manager to seek best execution for such trades on behalf of the Fund. In addition, the Investment Manager may cause the Fund and/or portfolio companies to execute the purchase or the sale of investments through J.P. Morgan as agent or to select J.P. Morgan as executing broker in transactions for the Fund or the portfolio companies, and J.P. Morgan will receive fees or commissions in connection with such transactions. Subject to compliance with applicable law, J.P. Morgan is permitted to retain any commissions, remuneration or other profits from the services and transactions described above, and such amounts will not be shared

with the Fund or its investors. These agency cross transactions create a conflict of interest between the Investment Manager's duty to seek best execution on all transactions for the Fund and in limiting or reducing the fees paid by the Fund, and its interest in generating additional profits and fees for J.P. Morgan. In addition, from time to time, the Investment Manager is permitted to use electronic communication networks ("ECNs") or other alternative trading systems in which J.P. Morgan has an ownership interest.

J.P. Morgan typically receives compensation based upon its ownership percentage in relation to the transaction fees charged by the ECNs.

J.P. Morgan's Investment Banking, Trading, Advisory, and Other Activities

Banking services. J.P. Morgan is a diversified financial services firm that provides a broad range of services, including, but not limited to, financial, consulting, investment banking, advisory, brokerage and other services and products to its clients and is a major participant in the equity, fixed income and other markets in which the Fund and its portfolio companies may invest. In providing services and products to its clients other than the Fund, Affiliates of the AIFM and Investment Manager, and at times the AIFM and Investment Manager itself, face conflicts of interest with respect to activities recommended to or performed for the Fund, on the one hand, and for J.P. Morgan's other clients, on the other hand. For example, J.P. Morgan has, and continues to seek to develop, banking and other financial and advisory relationships with numerous US and non-US persons and governments. J.P. Morgan also advises and represents potential buyers and sellers of businesses worldwide. The Fund and portfolio companies could have invested in, or could wish to invest in, such an entity represented by J.P. Morgan or with which J.P. Morgan or a J.P. Morgan Interested Person has a banking or other financial relationship. In addition, certain clients of J.P. Morgan could invest in entities in which J.P. Morgan, or a J.P. Morgan Interested Person holds an interest, including the Fund, and in providing services to its clients, J.P. Morgan will from time to time recommend activities to other clients, and will engage in activities on a proprietary basis, that would compete with or otherwise adversely affect the Fund or its investments. It should be recognised that such relationships, including legal and regulatory restrictions which apply to J.P. Morgan, might at times directly or indirectly preclude the Fund from engaging in certain transactions and constrain the Fund's investment flexibility.

J.P. Morgan will, from time to time, receive certain fees for transactions with or services performed for or on behalf of the Fund or any other person in which the Fund holds (directly or indirectly) investments, including fees relating to: (A) the Fund's investments, directly or indirectly, for advisory, sale, development, redevelopment, construction, leasing or financing services performed by J.P. Morgan; and (B) financing, investment banking, investment advisory, investment management, portfolio management, transaction arrangement, depositary, accounting or administrative services or other products or services provided, directly or indirectly, to the Fund or any other person in which the Fund holds (directly or indirectly) investments. Although such services by J.P. Morgan will generally be offered on an arm's length basis, at market rates and on terms similar to those offered by third-party financing sources or third-party Service Providers, as appropriate, it is possible that the resulting terms could nevertheless be less favourable from the Fund's perspective than if the counterparty had been an independent third party.

The AIFM and the Investment Manager will make determinations of proficiency, capability and market rates based on its consideration of a number of factors, including one or more of the following: (i) the

AIFM's or Investment Manager's experience with non-affiliated Service Providers, (ii) benchmarking data, and (iii) other methodologies determined by the AIFM or Investment Manager to be appropriate under the circumstances. In certain situations, relevant comparisons may not be available for a number of reasons, including, without limitation, as a result of a lack of a substantial market of providers or users of such services or the confidential and/or bespoke nature of such services. Therefore, such market comparisons may not result in precise market terms for comparable services, if available.

The Management Fee or Carried Interest Distributions (or any other fee, charge, or payment due under any agreement relating to the Fund) will not to be reduced or set off by any portion of any such fees and all fees that J.P. Morgan receives for transactions with, or services performed for or on behalf of, the Fund or any other person in which the Fund holds (directly or indirectly) such investments will be retained by J.P. Morgan for its own account, except as may otherwise be agreed to by the AIFM, Investment Manager or any other J.P. Morgan Affiliate in their absolute discretion.

Subject to compliance with applicable law, J.P. Morgan derives ancillary benefits from providing investment advisory, distribution, administrative and other services to the Fund. For example, providing such services to the Fund or fees paid to third-party Service Providers engaged by the AIFM or Investment Manager on behalf of the Fund generally help J.P. Morgan enhance its relationships with various parties, facilitate additional business development and enable J.P. Morgan to obtain additional business and generate additional revenue. In addition, although the AIFM and Investment Manager will make decisions for the Fund in accordance with its obligations to manage the Fund in a manner consistent with its fiduciary duties, the fees, allocations, compensation and other benefits to J.P. Morgan (including benefits relating to business relationships of J.P. Morgan) arising from those decisions will at times be greater as a result of certain portfolio, investment, Service Provider or other decisions (including decisions to either in-source or outsource certain processes or functions in connection with a variety of services that the AIFM or Investment Manager provides to the Fund) made by the AIFM or Investment Manager for the Fund than they would have been had other decisions been made which also might have been appropriate for the Fund.

In the ordinary course of its business, J.P. Morgan and its representatives also generate, or receive from third parties, information regarding potential investment opportunities or other information that could be useful to someone such as the AIFM or Investment Manager in the performance of its advisory services to the Fund. However, while such information will, from time to time, be shared with other J.P. Morgan clients and their Affiliates (to the extent J.P. Morgan is not prohibited by law or contract from doing so), it might not be made available to the AIFM or Investment Manager or J.P. Morgan may otherwise act on such information in ways that have an adverse effect on the Fund. J.P. Morgan will not be under any obligation to disseminate such information.

Relationship with the Fund, the Affiliates and portfolio companies. From time to time, J.P. Morgan also has relationships with, and represents, investors that have invested or wish to invest in companies in which the Fund (directly or indirectly) invests or will invest. In addition, J.P. Morgan will from time to time represent, or provide acquisition financing to, a client competing with the Fund for an investment in a company. In providing services to its clients, J.P. Morgan from time to time recommends activities that compete with or otherwise adversely affect the Fund's investments.

In addition, as a result of J.P. Morgan's various other businesses and clients, J.P. Morgan from time to time comes into possession of

information about certain markets and investments, some of which is material, non-public or confidential information of particular issuers or the securities of such issuers, which, at times, will limit the AIFM's or Investment Managers' ability to dispose of or retain or increase interests in investments for the Fund or acquire certain investments for the Fund until the information has been publicly disclosed or is no longer deemed material. J.P. Morgan also from time to time becomes subject to contractual "stand-still" obligations and/or confidentiality obligations that limits the AIFM's Investment Manager's ability to manage or liquidate certain Fund investments. These limitations on the AIFM's Investment Manager's ability to manage investments for the Fund could materially adversely affect the investment results of the Fund. In addition, J.P. Morgan's internal information barriers that are designed to prevent the flow of certain types of information, including material, non-public, confidential information, from one area or part of J.P. Morgan to another area or group thereof, restrict the AIFM's and Investment Manager's ability to access information even when such information would be relevant to its management of the Fund and/or its management of its investments or potential investments. Therefore, Affiliates of the AIFM and Investment Manager can trade differently from the Fund potentially based on information not available to the AIFM or Investment Manager. It should also be recognised that, under certain circumstances, J.P. Morgan internal policies or identified actual or potential conflicts arising from such relationships will preclude the Fund from engaging in certain transactions, constrain the Fund's investment flexibility and/or require the Fund to dispose of an investment sooner or later than desired.

A Sub-Fund may invest in JPM Related Funds. Such JPM Related Funds, may themselves invest in other JPM Related Funds. As a general matter, to the extent one or more of such JPM Related Funds fall within the investment strategy and parameters of a Sub-Fund, the Investment Manager may prefer such JPM Related Funds. While JPM Related Funds, if any, will generally align well with the Investment Manager's forward-looking views or the investment strategy for a Sub-Fund, and the Investment Manager will be familiar with the investment processes, as well as the risk and compliance philosophy of such JPM Related Funds, it is important to note that this preference creates conflicts of interest, as J.P. Morgan receives more overall fees when a Sub-Fund invests in JPM Related Funds. There is no limitation on the percentage of a Sub-Fund's assets that may be invested in JPM Related Funds. When a Sub-Fund invests in a JPM Related Fund, any double charging of management fees will either be avoided or rebated. In addition, the Sub-Fund may benefit from any retrocessions, rebates or other fee-sharing arrangements received from such JPM Related Funds. For further details, please see 'Management Fee' under Share Classes and Costs.

Where a Sub-Fund participates in Co-Investments alongside JPM Related Funds, the AIFM or its Affiliates may receive management fees, performance fees, carried interest or similar compensation at the level of such JPM Related Funds, co-investment vehicles or portfolio entities. Such fees and compensation arrangements may be greater or less than the fees and compensation payable by the relevant Sub-Fund and may not be subject to management fee offset or rebate arrangements in favour of the Sub-Fund.

If permitted by applicable law, including the Volcker Rule, the Fund may make short-term investments of excess cash in money- market funds and other instruments sponsored and/or managed by J.P. Morgan. In connection with any of these investments, the Fund will pay all applicable fees pertaining to investments in such money-market funds, and, in such event, no portion of any fees otherwise payable by the Fund will be offset against fees payable in accordance with any of these investments (i.e. there could be "double fees" involved in making any of these investments). In these circumstances, as well as in other circumstances in which

J.P. Morgan receives any fees or other compensation in any form relating to the provision of services, no accounting or repayment to the Fund will be required.

The AIFM and Investment Manager will, to the extent not prohibited by applicable law, have the right to cause the Fund's cash to be maintained in accounts at or associated with J.P. Morgan and to render services associated with such cash and the investment thereof through J.P. Morgan, including, without limitation, the conversion and reconversion of cash from one currency to another and the provision of cash management services, provided that the fees charged and/or terms and conditions associated with such services will be no less favourable to the Fund than would be if obtained from third parties on an arm's length basis, as determined by the AIFM or Investment Manager in good faith.

J.P. Morgan provides financing, consulting, investment banking, management, custodial, transfer agency, shareholder servicing, treasury oversight, administration, distribution, underwriting, including participating in underwriting syndicates, brokerage (including prime brokerage) or other services to its clients, including portfolio companies in which the Fund may invest, and may receive customary compensation from issuers of equity or debt securities purchased or held by the Fund or the portfolio companies in which the Fund invests. These relationships generate revenue to J.P. Morgan and could influence the AIFM or Investment Manager in deciding whether to select or recommend such portfolio companies for investments by the Fund, in deciding how to manage such investments, and in deciding when to realise

such investments. For example, if J.P. Morgan earns compensation from portfolio companies for providing certain services, then the AIFM and Investment Manager may have an incentive to favour such portfolio companies over other portfolio companies with which J.P. Morgan has no relationship when investing on behalf of, or recommending investments to, the Fund because such investments potentially increase J.P. Morgan's overall revenue. In addition, J.P. Morgan derives ancillary benefits from providing these services. For example, allocating the Fund's assets to a portfolio company or investing the Fund's assets in a portfolio company enhances J.P. Morgan's relationship with such portfolio company and their Affiliates and could facilitate additional business development or enable J.P. Morgan, the AIFM or the Investment Manager to obtain additional business and generate additional revenue. In providing these services, J.P. Morgan could also act in a manner that is detrimental to the Fund, such as when J.P. Morgan is providing financing services and it determines to close a line of credit to, to not extend credit to, or to foreclose on the assets of, a portfolio company in which the Fund invests, or when J.P.

Morgan advises a client and such advice is adverse to the Fund. In addition, when a J.P. Morgan broker-dealer serves as underwriter with respect to securities of a portfolio company in which the Fund invests directly or indirectly, in such capacity, it may require certain equity holders, which may include the Fund, to be subject to a lock-up period following the offering under applicable regulations, during which time such equity holders' ability to sell any securities is restricted. In addition, J.P. Morgan internal policies or identified actual or potential conflicts arising from the role of such broker-dealer could preclude the Fund from selling into a public offering of such securities. These factors would prejudice the Fund's ability to dispose of such securities at an opportune time and thereby adversely affect the Fund. Any fees or other compensation received by J.P. Morgan in connection with such activities will not be shared with the Fund or any investor in the Fund. Such compensation could include financial advisory fees, monitoring fees, advisor

fees or fees in connection with restructurings or mergers and acquisitions, as well as underwriting or placement fees, financing or commitment fees, trustee fees and brokerage fees. On the occurrence of IPOs, sales or other change of control events related to a

portfolio company, future fee streams, including, in particular future monitoring fees (if any) that would otherwise be payable by a portfolio company may be accelerated as may or may not be agreed with J.P. Morgan. Moreover, when J.P. Morgan provides or arranges financing to a portfolio company in which the Fund has invested, or an investor in such portfolio company, the holder of the senior securities (including J.P. Morgan and its clients) may have, and in the event of the portfolio company's financial distress or insolvency will have, interests substantially divergent from those of the Fund. There can be no assurance that J.P. Morgan will be able to accommodate the interests of the Fund or that of the Shareholders.

In addition, the AIFM and Investment Manager's management of the Fund benefits J.P. Morgan in other ways. For example, the Fund may, subject to applicable law, invest directly or indirectly in the securities or other obligations of companies affiliated with J.P. Morgan or in which a J.P. Morgan Account has an equity, debt or other interest. In addition, the Fund may engage in investment transactions that result in J.P. Morgan Accounts being relieved of obligations or otherwise divesting of investments. The purchase, holding and sale of investments by the Fund at times will likely enhance the profitability of J.P. Morgan's or J.P. Morgan Accounts' own investments in and its activities with respect to such companies.

Regulatory restrictions and overall position limits. From time to time, the activities of the Fund may be restricted because of regulatory requirements applicable to J.P. Morgan or its internal policies designed to comply with, limit the applicability of, or otherwise relate to such requirements. There will likely be periods when the AIFM or Investment Manager cannot initiate or recommend certain types of transactions or is otherwise restricted or limited with respect to advising as to certain securities issued by or related to companies for which J.P. Morgan is performing investment banking, market making or other services or has proprietary positions. For example, when J.P. Morgan is engaged in an underwriting or other distribution of securities of, or advisory services for, a company, the Fund will be prohibited from or limited in purchasing or selling securities of that company. In addition, there will be certain investment opportunities, investment strategies or actions that the AIFM or Investment Manager will not undertake on behalf of the Fund in view of J.P. Morgan's client or firm activities. J.P. Morgan maintains certain overall investment limitations on positions in securities or other financial instruments due to, among other things, investment restrictions imposed upon J.P. Morgan by law, regulation, contract or liquidity concerns. Such limitations could preclude the Fund from purchasing particular securities or financial instruments or investing in certain portfolio companies, even if such investments would otherwise meet the Fund's objectives. For example, there are limits on the aggregate amount of investments by affiliated investors in certain types of securities that cannot be exceeded without additional regulatory or corporate consent. If certain aggregate ownership thresholds are reached or certain transactions are undertaken, the ability of the Fund to purchase or dispose of investments, exercise rights or undertake business transactions, will be restricted. An investment fund not affiliated with J.P. Morgan would not be subject to these restrictions or considerations in relation to transactions involving J.P. Morgan.

Restrictions on the AIFM and Investment Manager with respect to managing registered securities. The Fund may invest directly or indirectly in securities of non-public companies that may subsequently register their equity securities and list them for public trading while the Fund owns such securities. The AIFM and Investment Manager, on behalf of the Fund, as a holder of securities of a non-public company, may also determine that it is in the Fund's interest to encourage such a company to register its equity securities and to list them for public trading as part of the Fund's investment or exit strategy. In connection with such registration and listing, it may be in the interest of the Fund that

members of the AIFM and Investment Manager or other J.P. Morgan Interested Persons serve on the board of such company. However, applicable securities laws and internal policies of J.P. Morgan could limit the ability of such persons to serve on such board. In addition, if such persons serve on the board of a public company, such persons and the Fund will likely be subject to certain investment and trading limitations arising from such board member's access to material, non-public information, as described above in "J.P. Morgan's Investment Banking, Trading, Advisory and Other Activities – Relationship with the Fund, the Affiliates and portfolio companies". Such limitations may be detrimental to the Fund.

Conflicts among the Other Accounts managed and allocation of Investments

The AIFM, the Investment Manager and other J.P. Morgan Affiliates currently manage other collective investment vehicles or managed accounts using overlapping or similar strategies to the Fund and, as applicable, relevant Sub-Fund. In addition, during the term of the Fund, the AIFM, Investment Manager and J.P. Morgan Affiliates may sponsor or manage collective investment vehicles or managed accounts with investment strategies that are substantially similar or similar to, or otherwise overlapping with, the Fund (the "Other Accounts"). As a result, the AIFM, the Investment Manager and J.P. Morgan will from time to time have a conflict of interest between acting in the best interests of the Fund and of the Other Accounts and circumstances may arise where investment opportunities will be available to the Fund that are also suitable for one or more Other Account(s). In particular with respect to the allocation of investment opportunities, the types of Investments made by the Fund will generally also be appropriate for Other Accounts and there is no assurance that the Fund will be allocated those investments it wishes to pursue or given equal allocations to such investments as the Other Accounts. The Fund does not have priority in allocation of investments over Other Accounts and J.P. Morgan will not be under any obligation or fiduciary or other duty to make such investments available to a Sub-Fund. Such opportunities may be allocated in whole or in part to a Sub-Fund or to Other Accounts, investors in a Sub-Fund or in such Other Accounts, J.P. Morgan or other co-investors or third parties, including J.P. Morgan for its own account or investment vehicles organised to facilitate investment by its current or former directors, partners, trustees, managers, members, officers, consultants, employees, and their families and related entities, including employee benefit plans in which they participate, in addition, as a result of other factors, including information barriers, other areas of J.P. Morgan may receive investment opportunities that would otherwise be appropriate investments for a Sub-Fund. As an example of a conflict of interest, when the AIFM or Investment Manager manage Other Accounts that pays or could potentially pay a higher fee or allocation of carried interest and follows the same or similar strategy as the Fund or invests in substantially similar assets as the Fund, the AIFM and Investment Manager will have an incentive to favour the Other Account paying a potentially higher fee or allocation of carried interest. In addition, the AIFM and Investment Manager will have a conflict with respect to allocating opportunities to larger Other Accounts, Other Accounts in which certain large and/or strategic investors are invested, Other Accounts in which clients with which the AIFM or Investment Manager would like to develop a new relationship are invested, J.P. Morgan Accounts or Other Accounts that share a common consultant.

J.P. Morgan is actively engaged in advisory and management services for multiple investment vehicles, funds and accounts. J.P. Morgan also sponsors numerous registered and unregistered investment funds. Those activities include managing assets of employee benefit plans. J.P. Morgan expects to sponsor or manage additional investment

vehicles, funds and accounts in the future. J.P. Morgan may employ the same or different strategies for the various J.P. Morgan Accounts it manages or otherwise advises. Such J.P. Morgan Accounts will from time to time compete with the AIFM, Investment Manager and the Fund for allocation of investment opportunities. Investment opportunities that are appropriate for the Fund may also be appropriate for J.P. Morgan Accounts. As a general matter, clients of the AIFM and Investment Manager, including the Fund, will not receive any allocation with respect to investment opportunities sourced by J.P. Morgan groups outside of the AIFM and Investment Manager, even if they fall within the investment guidelines of the Fund. Under certain circumstances, the Fund may invest in connection with a transaction in which J.P. Morgan or J.P. Morgan Accounts have already invested or are expected to participate. Any such investment by the Fund may be unequal in size with investments made by J.P. Morgan or J.P. Morgan Accounts.

In order to manage these conflicts of interest, the AIFM, the Investment Manager and other J.P. Morgan Affiliates have developed policies and procedures to seek to allocate investment opportunities and make purchase and sale decisions among the Fund and the Other Accounts and J.P. Morgan Accounts in a manner that they determine to be fair and equitable. In many cases, these policies result in the pro rata allocation of limited opportunities across accounts, but in other cases investment allocations will be adjusted as the AIFM or Investment Manager determines to be appropriate to reflect numerous other factors based on their good faith assessment of the best use of such limited opportunities relative to the objectives, limitations and requirements of each of the Other Accounts and apply a variety of factors. There can be no assurance that the allocation of an investment opportunity will be as favourable as it would be if the potential conflict of interest did not exist.

In addition, the allocation of investment opportunities between a Sub-Fund, on the one hand, and Other Accounts and J.P. Morgan's Accounts and other customers and, subject to the Volcker Rule, J.P. Morgan, on the other hand, will be in the discretion of J.P. Morgan, consistent with the AIFM's and Investment Manager's policies. In allocating such investment opportunities, J.P. Morgan will take into account various factors, including, without limitation, (i) investment horizons and terms, investment objectives, guidelines and restrictions (including legal and regulatory considerations), (ii) differences in investment mandates, (iii) different Other Accounts with different investment amounts, (iv) different levels of investment for different strategies, (v) tax sensitivity, (vi) relevant contractual provisions, (vii) availability of other investment opportunities, (viii) targeted rates of return, (ix) diversification requirements, (x) available capital commitments and Subscription, (xi) size of the investment opportunity, (xii) expected duration and anticipated magnitude of the overall investment program, (xiii) expected future capacity, portfolio composition, (xiv) source of the investment opportunity, (xv) whether the investment represents an "add-on" opportunity, and (xvi) whether a fund is expected to provide expertise or other advantages in connection with a particular investment and other factors deemed relevant by J.P. Morgan and that may change from time to time. Suitability considerations, reputational matters and other considerations may also be considered. Suitability considerations can include: relative attractiveness of an investment opportunity; concentration of investments; risk tolerance, risk parameters and strategy; growth strategy; and/or industry concentration. The methodology for this allocation of investment opportunities will likely vary over time and on a case-by-case basis. Allocations of investment opportunities constitute conflicts of interest, particularly in circumstances where the availability of such investment opportunities is limited, and investment opportunities that are suitable for a Sub-Fund may nonetheless be allocated (in whole or in part) to, among others, Other Accounts. In addition, the Investment Manager may determine

that a Sub-Fund should not pursue all or a portion of an investment opportunity for various reasons, including such opportunity's risk/return profile and a Sub-Fund's diversification, among others. The Investment Manager has broad discretion in determining to whom and in what relative amounts to allocate investment opportunities and whilst the Investment Manager will seek to be fair and equitable with respect to allocations decisions on the whole, any particular allocation decision may benefit Other Accounts instead of the Fund and may be detrimental to the Fund.

In addition, Other Accounts will be subject to different fee structures, be subject to different constraints, have more frequent or different investor reporting, be subject to different regulatory restrictions and focus on different investments than the Fund and, therefore, the strategies employed by such Other Accounts and the Fund will likely diverge. The Investment Manager may also make a different investment recommendation to Other Accounts as compared to the Fund with respect to any particular investment as a result of such considerations. Therefore, the performance of the investment activities of the Fund may differ significantly from the results achieved by Other Accounts that implement the same or a similar investment strategy as the Fund. There is no specific limit as to the number of accounts which may be managed or advised by the AIFM or the Investment Manager.

In addition, the terms of the Fund's direct or indirect investment in a portfolio company may be different from the terms of the investment in such portfolio company by Other Accounts. In such cases, conflicts could arise between the Fund and Other Accounts with respect to the relevant issuer's strategy, growth and financing alternatives and with respect to the manner and timing of the Fund's exit from the investment compared to another client's exit. For example, the Fund may invest in an entity in which one or more Other Accounts has an existing investment. Any such investment made by the Fund may be at a price or valuation higher than the price or valuation paid by such other clients and may be made on terms and conditions less favorable than those available to such Other Accounts. One or more Other Accounts may make an investment in an entity in which the Fund has already invested. Any such investment made by such clients may be at a price or valuation lower than the price or valuation paid by the Fund and may be made on terms and conditions more favorable to such clients than those available to the Fund (e.g., the Other Account may negotiate and receive a liquidation preference with respect to the securities it purchases, which could impact the return the Fund is ultimately entitled to upon an exit). The Fund will in certain circumstances have interests and objectives with respect to investments which conflict with those of Other Accounts.

As a result, in certain cases, the Fund will not be afforded the chance to participate in attractive investment opportunities in which Other Accounts are given the opportunity to participate, or in some cases will be allocated a small part of an investment opportunity within the investment objectives of the Fund when other clients of the Other Accounts are allocated a larger portion. The Fund may also at times be prohibited (due to, for example, exclusivity rights granted to Other Accounts, regulatory limitations, or a limit placed by an underlying manager on the number of clients of Investment Manager which are allowed to participate in an opportunity) from pursuing certain investment opportunities, or the ability of the Fund to participate in any particular opportunity may be substantially limited due to the considerations of Other Accounts.

Potential conflicts in calculation and allocation of costs and expenses

The AIFM, the Investment Manager and other J.P. Morgan Affiliates may from time to time incur expenses on behalf of the relevant Sub-Fund and the Other Accounts. The AIFM, the Investment

Manager and other J.P. Morgan Affiliates will attempt to allocate such expenses on a basis they consider to be equitable. If any expenses (including transaction expenses) are incurred jointly for the account of the Fund and any Other Account or J.P. Morgan Account, such expenses generally will be allocated pro rata or in such other manner as the AIFM or the Investment Manager considers more equitable. Similarly, if any expenses (including transaction expenses) are incurred jointly for the account of the Fund and any other J.P. Morgan Account, such expenses will be allocated among the Fund and such other

J.P. Morgan Account in proportion to the relative size of the accounts, in proportion to each account's relative participation in the investment opportunity or opportunities to which the expense relates, or in such other manner as the Investment Manager considers more equitable. Certain expense allocation decisions may involve the subjective judgment of the AIFM and the Investment Manager, and the AIFM and the Investment Manager may be faced with conflicts of interest in determining the appropriate allocation of expenses among the Fund, Other Accounts and any J.P. Morgan Account.

Transactions with portfolio companies

From time to time, a portfolio company in which the Fund is invested may engage in transactions, including buying products or services from, or selling products or services to, another portfolio company in which an Other Account or J.P. Morgan Account has invested or is contemplating to invest. The AIFM and Investment Manager will have an incentive to cause the portfolio company in which the Fund is invested to transact with such other portfolio company in which an Other Account or J.P. Morgan Account is invested. The AIFM and Investment Manager believes that such potential conflicts of interest are mitigated by the fact that the Fund will generally hold minority, non-controlling

interests in its portfolio companies, and any decision by a portfolio company in which the Fund is invested to enter into any such transactions will be made by such portfolio company's own management team. However, the AIFM and Investment Manager cannot guarantee that the terms of each such arrangement will be entirely at arm's length, even in situations where the Fund has a seat on the portfolio company's board.

Investments in different classes and issuer's capital structure

A conflict could arise when an Other Account, a J.P. Morgan Interested Person or one or more J.P. Morgan Accounts directly or indirectly invest in different instruments or classes of securities of the same issuer than those in which the Fund invests. For example, the AIFM and the Investment Manager may serve as the AIFM or the investment manager to an Other Account, a J.P. Morgan Interested Person or a J.P. Morgan Account, which has an investment strategy and objectives that may, at times, overlap with the investment strategy and objectives of the Fund. At times, the Fund and these various accounts may hold interests in the same portfolio company with different economic and governance rights that misalign their interests. In certain circumstances, one or more Other Accounts or J.P. Morgan Accounts will have different investment objectives and could pursue or enforce rights with respect to a particular issuer in which the Fund has invested, and those activities could have an adverse effect on the Fund. For example, an issuer in which the Fund invests may use the proceeds of the Fund's investment to refinance or reorganize its capital structure which could result in repayment of debt held by an Other Account or J.P. Morgan Account. If the issuer performs poorly following such refinancing or reorganisation, the Fund's results will suffer whereas the other client's performance will not be affected because such client no longer has an investment in the issuer. In addition, the Fund, along with Other Accounts and J.P. Morgan Accounts, may pursue or enforce rights with respect to a particular issuer, or the AIFM or the Investment

Manager and/or J.P. Morgan may pursue or enforce rights with respect to a particular issuer on behalf of the Fund, Other Accounts or other J.P. Morgan Accounts. The Fund could be negatively impacted by the activities by or on behalf of such Other Account or J.P. Morgan Accounts, and transactions for the Fund could be impaired or effected at prices or terms that are less favorable than would otherwise have been the case had a particular course of action with respect to the issuer of the securities not been pursued with respect to such

Other Accounts or J.P. Morgan Accounts. These conflicts are magnified with respect to issuers that become insolvent. Furthermore, it is possible that in connection with an insolvency, bankruptcy, reorganisation, or similar proceeding the Fund will be limited (by applicable law, courts or otherwise) in the positions or actions it will be permitted to take due to other interests held or actions or positions taken by J.P. Morgan, J.P. Morgan Accounts or Other Accounts. Finally, in certain instances, personnel of J.P. Morgan may obtain information about the issuer that is material to the management of Other Accounts or J.P. Morgan Accounts and that will at times limit the ability of the AIFM or the Investment Manager to buy or sell securities of the issuer on behalf of the Fund.

Potential conflicts in calculation and allocation of costs and expenses

If any expenses (including transaction expenses) are incurred jointly for the account of the Fund and one or more other portfolio companies of the Fund/Sub-Funds, and the relevant such expenses generally will be allocated among the Fund and such other constituent entities pro rata (based on Subscriptions/ Capital Commitments) or in such other manner as the AIFM or Investment Manager considers more equitable. Similarly, if any expenses (including transaction expenses) are incurred jointly for the account of a Sub-Fund and any Other Account or J.P. Morgan Account, such expenses will be allocated among the relevant Sub-Fund and such Other Account or J.P. Morgan Account in proportion to the relative size of the accounts, in proportion to each account's relative participation in the investment opportunity or opportunities to which the expense relates, or in such other manner as the AIFM or Investment Manager considers more equitable. Certain expense allocation decisions may involve the subjective judgement of

the AIFM or Investment Manager, and the AIFM and Investment Manager may be faced with conflicts of interest in determining the appropriate allocation of expenses among the relevant Sub-Fund, any Other Account and/or any J.P. Morgan Account (including, without limitation, in cases where an Other Account or J.P. Morgan Account is subject to an expense cap).

Valuation matters

It is anticipated that the Fund's investments will generally be illiquid and difficult to value. The AIFM be responsible for valuing the Fund's investments based on available information. The AIFM may utilise valuation data provided by certain valuation teams internal to J.P. Morgan for such purposes that are generally separate from the investment team. However, because the investment performance of the Fund and related reports prepared by the AIFM will be derived from the valuation of the Fund's assets, the AIFM faces a conflict in valuing the Fund's portfolio.

The AIFM will seek to mitigate these conflicts by independently reviewing valuation data and may use third-party sources for valuation in certain instances; however, such third-party sources may not be available for many instruments.

The AIFM and the Investment Manager have wide-ranging authority to make determinations, including those related to investment purchases and dispositions (and their timing), valuation and other matters that have the potential to affect the compensation of the

AIFM

Investment Manager and potentially J.P. Morgan Affiliates. In making such determinations, the AIFM and the Investment Manager are subject to potential conflicts of interest. For example, the potential to earn additional compensation can create an incentive for the Investment Manager to make investments and to hold investments longer than otherwise would be the case in the absence of the compensation arrangements. In order to generate greater ongoing Management Fees and, potentially, larger performance fees than would otherwise be the case if such investments had not been made or held (or if such determination had not been made), including because of the possibility that the investments' values will appreciate in the future.

Service Provider discounts

Certain advisors, vendors or other Service Providers to or in respect of the Fund may also provide goods or services to — or have business, personal, financial or other relationships with — the AIFM, the Investment Manager, J.P. Morgan or their Affiliates. Such advisors, vendors and Service Providers may include accountants, administrators, lenders, bankers, brokers, attorneys, consultants, placement agents and investment or commercial banking firms ("Service Providers"). Such Service Providers may be Investors in the Fund, Affiliates or employees of the AIFM, the Investment Manager, sources of investment opportunities to the Fund, co-investors with the Fund or commercial counterparties of the Fund. Some Service Providers may receive preferential economic terms with respect to their investment in the Fund. Additionally, the AIFM, Investment Manager, J.P. Morgan or their Affiliates may have family members or relatives that are employees of, investors in, consultants to, or otherwise have business relationships with, a Service Provider or an Affiliate thereof, including relationships where such family members or relatives receive financial benefits from the Service Provider or an Affiliate thereof. These relationships may influence the AIFM or Investment Manager in deciding whether to select or recommend such a Service Provider to perform services for the Fund. Notwithstanding the foregoing, the AIFM and Investment Manager will only select a Service Provider to perform services for the Fund to the extent the AIFM or Investment Manager has determined that doing so is appropriate for the Fund given all surrounding facts and circumstances and is consistent with the AIFM's and Investment Manager's responsibilities under applicable law; provided, however, that the AIFM or Investment Manager may not necessarily seek out the lowest-cost option when engaging such Service Providers as other factors or considerations may prevail over cost.

Diverse Investor group

The Investors in the Fund may have conflicting investment, tax, legal, regulatory, accounting and other interests with respect to their investments in the Fund. In selecting and structuring investments appropriate for the Fund, the AIFM and Investment Manager will consider the investment and tax objectives of the Fund and its Investors as a whole, not the investment, tax, legal, regulatory, accounting or other objectives of any investor individually.

Preferential treatment

The AIFM and Investment Manager may receive preferential treatment (for example, discounted fee rates) from legal and other advisors in relation to own account work. Where it is reasonable to do so, the AIFM and the Investment Manager will seek for such preferential treatment to be extended to work conducted on the account of the Fund or its investments. However, this may not be possible, and work conducted on the account of the Fund or its investments may be conducted on less beneficial terms.

From time to time, the Board may permit certain Investors to invest

in the Fund on different terms from time to time provided however that all such preferential or otherwise different terms be objectively justified, granted to all investors in the same situation, and that any such treatments are adequately disclosed in the relevant Sub-Fund Description in accordance with the 2013 Law. Such objective reasons may include, but are not limited to, subscription of an investor at an early stage of a Sub-Fund ("early bird" investor), volume or amount of subscription by an investor, investor's status as a cornerstone or anchor investor, investor's specific legal, regulatory or tax requirements, compliance with applicable law, regulation or guidance.

All preferential treatment will be granted on a fair basis and only where such treatment is consistent with the interests of the Fund and its investors as a whole.

Notwithstanding anything to the contrary hereabove, the Fund may enter into agreements with investors regarding the entitlement to receive a rebate equal to 10% of the Management Fee for the sole purpose of incentivizing the Subscription for Shares in a Sub-Fund at an early deployment stage of such Sub-Fund. The relevant Sub-Fund Description shall further disclose whether any such rebate is intended to be offered and the conditions thereof.

Co-investment opportunities

If an investment opportunity is fully subscribed by the relevant Sub-Fund and any Other Accounts, or the Investment Manager determines investments cannot, or (for any reason) should not, be made solely by the Fund and/or any Other Accounts, the Investment Manager may make co-investment opportunities available to Other Accounts or J.P. Morgan Accounts and/or other persons. The Investment Manager has full discretion in allocating co-investment opportunities. In such circumstances, the Investment Manager may in its discretion determine to provide co-investors, including, without limitation, particular (but not necessarily all) investors of the Other Accounts, third parties and/or such other parties, in each case, as selected by the Investment Manager in its discretion, the opportunity to invest alongside the Funds in the Investment and/or to purchase a portion of the Investment from one or more funds ("Co-Investment Opportunities"). Furthermore, the Sub-Fund and any Other Accounts will often have different investment objectives and limitations, such as return objectives, leverage limitations and maximum lock-up periods. As a result of the foregoing, there may be conflicts of interest in the Investment Manager's decisions regarding such Co-Investment Opportunities, and even where the Sub-Fund and the Other Accounts invest in the same securities on similar terms, conflicts of interest may arise as a result of differing investment profiles of the participating investors. The allocation of any such Co-Investment Opportunities may or may not be applicable to investors in Other Accounts and may involve different terms and fee structures in respect of the same investment opportunities. As such, a Sub-Fund may receive a smaller allocation in the particular investment than it otherwise might have received if J.P. Morgan had not provided other co-investors with the Co-Investment Opportunity. Moreover, it is possible that certain terms and fee structures offered to Other Accounts may be more (or less) favourable to J.P. Morgan than those offered to the relevant Sub-Fund, which may incentivise the Investment Manager to make more (or less) of such Co-Investment Opportunities available.

The Investment Manager will determine whether to present a co-invest opportunity to potential co-investors based on a number of factors, including, but not limited to, deal size, timing requirements, offering restrictions, legal, regulatory and/or tax considerations, certainty of closing, client and portfolio company or advisor relationships, a co-investor's potential influences on and/or

benefits for the portfolio company, the size and timing, or Other Accounts managed by the Investment Manager or its Affiliates and internal policies of J.P. Morgan with respect thereto.

In some cases, the Investment Manager may invite certain other J.P. Morgan personnel to co-invest with the relevant Sub-Fund in part because co-investing with such person might provide the Fund or the portfolio company in which the Fund directly or indirectly invests with certain benefits.

The Investment Manager has broad discretion in determining to whom and in what relative amounts to allocate Co-Investment Opportunities. Factors the Investment Manager may take into account, in its discretion, include (but are not limited to) the magnitude and nature of a potential recipient's relationship with J.P. Morgan, if any, whether such potential recipient is able to assist or provide a benefit to the Fund, the Other Accounts and/or J.P. Morgan in connection with the potential transaction or otherwise, whether the potential recipient is expected to provide expertise or other advantages in connection with a particular Investment, as well as such other factors as the Investment Manager determines in its discretion to be relevant and which may change from time to time.

Any Sub-Fund may enter into Co-Investments Opportunities with Other Accounts, and may do so where such Other Accounts have certain governance rights for legal, regulatory or other reasons.

Furthermore, the Investment Manager may allocate Co-Investment Opportunities as the Investment Manager determines in its discretion, and the Investment Manager may give preference to investors in other investment vehicles, or investors that have made commitments over a certain threshold, or investors who have committed to other multi-strategy investment vehicles or otherwise, as opposed to other investors, and the recipients of Co-Investment Opportunities may include no Investors, or one or more Investors and not others (including others that may be similarly situated to those receiving allocations of Co-Investment Opportunities), clients or potential clients of J.P. Morgan, J.P. Morgan, employees of J.P. Morgan, or funds or accounts established for any such persons or Other Accounts, and on such terms as the Investment Manager determines in its discretion. Any third-party co-investors could have significant financial and business relationships with the Investment Manager or J.P. Morgan, which likely present certain conflicts of interest as the Investment Manager or J.P. Morgan have an incentive to offer such Co-Investment Opportunities to such parties in order to maintain their existing relationship with such parties or to influence such parties' decisions to participate in other financial or business relationships.

J.P. Morgan and/or the Investment Manager has established, and may in the future establish, co-investment vehicles (including "standing", dedicated or committed co-investment vehicles, which may be "opt-in", "opt-out" or committed vehicles where J.P. Morgan and/or the Investment Manager, and not the investor, has discretion in determining whether the vehicle will participate in co-investment opportunities) for one or more investors (including Other Accounts) in order to co-invest alongside a Sub-Fund in one or more investments. These co-investment vehicles may only participate in Co-Investment Opportunities after the initial acquisition of an investment. The amount and frequency of co-investment by any Other Accounts will be determined by J.P. Morgan and/or the Investment Manager in their discretion, subject to the terms of the relevant vehicle. The terms on which co-investors invest in a transaction, either directly or through a co-investment vehicle alongside the Fund, may be substantially different, and potentially more favourable, than the terms on which the Fund invests. In particular, such co-investors may be subject to management fees and carried

interest or performance fees which are different, and potentially less than, the Management Fee, Performance Fee and/or Carried Interest Distributions to which the Fund is subject. Additionally, the terms on which J.P. Morgan personnel invest may be substantially different, and potentially more favourable, than the terms on which other Investors in the Fund invest. The Investment Manager may also allocate a portion of an investment opportunity to a co-investor who sourced or otherwise helped consummate the transaction. There may be situations where the Investment Manager reduces the amount of an investment allocable to the Fund in order to ensure significant capacity is available for co-investors which may be necessary to ensure the successful completion of the transaction. Accordingly, the initial proposed allocation of an investment to the Fund and Other Accounts may change by the time such investment opportunity is consummated. For example, actual allocation of an investment to the Fund may increase or decrease from the initial proposed allocation depending on the Investment Manager's ability to identify and consummate co-invest transactions in such timeframe. The Investment Manager seeks to make all allocation decisions of Co-Investment Opportunities on a fair and equitable basis, although such allocation decisions will necessarily involve the exercise of judgment and discretion and may give rise to actual or potential conflicts of interest.

The Investment Manager reserves the right to charge no management fee, performance fees or not apply Carried Interest to co-investors with respect to Co-Investment Opportunities or a management fee and/or carried interest that are less than the Management Fee and/or Carried Interest applicable to a Sub-Fund. As a result of these differences, the returns to the investors of in the relevant Sub-Fund are expected to differ from the returns to other investors, including investors in the Other Accounts. In particular, such investors' net returns with respect to Co-Investment Opportunities are expected to differ from Investors' net returns with respect to a Sub-Fund, particularly for those investors in Co-Investment Opportunities whose investment will not be subject to any (or will be subject to reduced) management fees, performance fees or carried interest or similar compensation payable to the Investment Manager or its Affiliates.

Fees, costs and expenses among the Fund and Other Accounts (including co-investment vehicles) which invest together in an investment will be allocated on a fair and equitable basis based on determinations made by the Investment Manager. With respect to consummated transactions, co-investors will typically bear their pro rata share of fees, costs and expenses related to the discovery, investigation, development, acquisition, ownership, maintenance, monitoring, hedging and disposition of their co-investments. In certain circumstances, co-investors will also be required to pay their pro rata share of fees, costs and expenses related to potential investments that are not consummated, such as break-up fees or broken deal expenses. The Investment Manager will endeavour to allocate such fees, costs and expenses on a fair and equitable basis; however, co-investors may not agree to pay or otherwise may not bear such fees, costs and expenses if such co-investors have not been identified as of the time such potential investment ceases to be pursued and/or if such co-investors did not agree to pay such fees, costs and expenses as a condition to participating in the co-investment opportunity. In that event, such fees, costs and expenses will be considered fund expenses and be borne by the Fund.

Given the amount the Investment Manager has with respect to the allocation of Co-Investment Opportunities and associated expenses, there will be conflicts of interest between the AIFM, Investment Manager and the Fund and Other Accounts participating in such opportunities.

Securities Owned by Related Persons

Subject to compliance with the internal policies of J.P. Morgan, certain principals, partners, directors, officers or employees of the AIFM and its Affiliates (each such person, a "Related Person") may buy and sell securities or other investments for their own accounts. Additionally, a Related Person may have received or purchased, and may in the future receive or purchase, securities as a result of other activities performed in such Related Person's capacity as a principal, partner, director, officer or employee of the AIFM or its Affiliates or in connection with a position held by such

Related Person prior to becoming a Related Person. The securities owned by a Related Person may include securities in a portfolio company that are the same, different from or made at different time than investments made by the Fund, and the relevant Sub-Fund in such portfolio company. The investment decisions of a Related Person with respect to such securities may differ from those made by the AIFM with respect to the relevant Sub-Fund and could conflict with the transactions and strategies employed by the AIFM with respect to the Fund and the relevant Sub-Funds.

THE ABOVE DOES NOT PURPORT TO BE A COMPREHENSIVE LIST OF ALL ACTUAL OR POTENTIAL CONFLICTS OF INTEREST. ADDITIONAL CONFLICTS MAY EXIST THAT ARE NOT PRESENTLY KNOWN TO THE INVESTMENT MANAGER OR THAT ARE CURRENTLY DEEMED IMMATERIAL. OTHER PRESENT AND FUTURE ACTIVITIES OF THE INVESTMENT MANAGER, J.P. MORGAN OR THEIR AFFILIATES MAY GIVE RISE TO ADDITIONAL CONFLICTS OF INTEREST. SHAREHOLDERS WILL GENERALLY NOT BE CONSULTED WITH RESPECT TO THE MANNER IN WHICH SUCH CONFLICTS ARE RESOLVED AND WILL HAVE NO MEANS OF DETERMINING WHETHER SUCH CONFLICTS ARE BEING EQUITABLY RESOLVED. NONE OF THE BOARD, THE INVESTMENT MANAGER OR THEIR RESPECTIVE PARTNERS, DIRECTORS, OFFICERS, EMPLOYEES OR AFFILIATES IS OBLIGATED TO RESOLVE ANY CONFLICTS IN FAVOUR OF THE FUND. For more information about conflicts of interest, see

am.ipmorgan.com/lu.

Liquidation or Merger

LIQUIDATION OF THE FUND

The Fund may be dissolved and liquidated in any of the following ways:

- at any time by a resolution of the general meeting of Shareholders in accordance with the quorum and majority requirements necessary for the amendment of the Articles. At the same meeting, one or more liquidators will be appointed to liquidate the Fund's assets in the best interest of Shareholders and in accordance with Luxembourg law
- by the law itself upon the dissolution of the last Sub-Fund under the same conditions as above.
- by a simple majority of the votes of Shareholders present and represented at a general meeting of Shareholders convened (without a quorum) to consider the question of the dissolution of the Fund in the event the capital of the Fund falls below two thirds of the minimum capital determined under the 2010 Law
- by the votes of Shareholders holding one quarter of the Shares present or represented at a general meeting of Shareholders convened (without a quorum) to consider the question of the dissolution of the Fund in the event the capital of the Fund falls below one quarter of the minimum capital under the 2010 Law

The Fund will pay all costs associated with the liquidation of the Fund.

Unless otherwise stated in Sub-Fund Descriptions, the Shareholders of a Sub-Fund may request redemption of their Shares upon or before the liquidation at the applicable liquidation NAV.

The costs and expenses of any liquidation may be borne by the Fund or relevant Sub-Fund or Share Class, up to the capped level of

Operating and Administrative Expenses, or may be borne by the AIFM. In any event, the AIFM will bear any costs and expenses of any liquidation that exceeds the maximum rate of Operating and Administrative Expenses described in Share Classes and Costs, sub-section Operating and Administrative Expenses.

LIQUIDATION OF A SUB-FUND OR SHARE CLASS

The Board typically will decide to liquidate any Sub-Fund or Share Class under any of the following circumstances:

- if a Sub-Fund's net asset value has decreased, to or failed to reach, an amount determined by the Board
- the liquidation is justified by a change in economic or political situations impacting the Sub-Fund
- the liquidation is part of an economic rationalisation
- the laws and regulations applicable to the Fund or any of its Sub-Funds or Share Classes justifies it
- the Board believes the liquidation would be in the best interests of Shareholders
- in any other circumstances stated in the relevant Sub-Fund Descriptions

If a decision to liquidate a Sub-Fund (or a Share Class) is taken, all Shareholders in that Sub-Fund (or a Share Class) will be notified prior to the effective date of the liquidation (the "Liquidation Date") and the notice will indicate the reasons for, and the procedures of, the liquidation.

The Board may also decide to submit the liquidation decision to a meeting of the Shareholders of the relevant Sub-Fund. No quorum is required and the decision will be considered approved if supported by a simple majority of the votes cast at the meeting. The liquidation of the last Sub-Fund must be decided by a general meeting of Shareholders.

Shareholders of the relevant Sub-Fund can continue to redeem or switch their Shares, free of any redemption and switching charges up to the Liquidation Date, but typically no further Subscriptions will be accepted. The prices at which these redemptions and switches are executed will reflect any costs relating to the liquidation. The Board can suspend or refuse these redemptions and switches if it believes it is in the best interest of Shareholders or is necessary to ensure Shareholder equality.

Shareholders will be paid the net liquidation proceeds as at the Liquidation Date. Amounts from any liquidations that cannot be distributed to the Shareholders will be deposited with the Caisse de Consignation in accordance with Luxembourg law.

MERGER OF THE FUND

To the extent allowed by applicable laws, in the case of a merger of the Fund into another fund where, as a result, the Fund ceases to exist, the merger will be decided by a meeting of Shareholders. No quorum is required and the merger will be considered approved if it receives the simple majority of the votes cast at the meeting.

MERGER OF A SUB-FUND

To the extent allowed by applicable laws, the Board may decide to merge a Sub-Fund with any other sub-fund, whether within the Fund or in another Fund. The Board can also refer the decision of a merger to a meeting of the Shareholders of the relevant Sub-Fund. No quorum is required; the merger will be considered approved if supported by a simple majority of votes cast at the meeting.

Shareholders whose investments are involved in any merger will receive at least one calendar month prior notice of the merger and will be able to redeem or switch their Shares free of any redemption and switch charges.

A merger having as effect that the Fund as a whole will cease to

exist must be decided by the General Meeting. No quorum is required, and the decision shall be taken at a simple majority of the shareholders present or represented and voting.

REORGANISATION OF A SUB-FUND

Under the same circumstances described above, the Board may decide to merge a Share Class into another Share Class or to reorganise a Sub-Fund or Share Class by dividing it into two or more Sub-Funds or Share Classes or by consolidating or splitting the Shares.

Shareholders will be notified of the decision of the Board at least one month in advance of the reorganisation, during which time they will be able to redeem or switch their Shares free of any redemption and switch charges. The Board can also refer the decision of reorganisation to a meeting of the relevant Shareholders. No quorum is required, and the reorganisation will be considered approved if it receives the simple majority of the votes cast at the meeting.

FAIR TREATMENT OF INVESTORS

The AIFM has put in place policies and procedures to ensure that all Investors in a Share Class are treated equally and that no preferential treatment or specific economic benefits are granted to any investor(s) in the Share Class.

To the extent it would not violate the fair treatment requirements, the AIFM may provide additional information, or advance notification of information, to the Shareholders, their agents or Financial Intermediaries to permit them to comply with any regulatory, reporting or other type of obligations they may have with their underlying investors.

Calculation of Share Prices

TIMING AND FORMULA

The NAV for each Share Class of each Sub-Fund is calculated at least once a year and at any other times as described in [Sub-Fund Descriptions](#). Each NAV is stated in the respective Share Class Currency, and is calculated to two (2) decimal places. The NAV for each Share Class of each Sub-Fund is calculated using this formula:

$$\frac{(\text{assets} - \text{liabilities})}{\text{number of outstanding Shares}} = \text{NAV}$$

ERROR CORRECTION

Any NAV that experiences a calculation error that exceeds the tolerance threshold (positive or negative) set out in the relevant Sub-Fund Descriptions will be addressed according to the AIFM's NAV correction policy and CSSF Circular 24/856.

The right of Underlying Investors to be indemnified for any NAV error calculation exceeding the tolerance threshold provided for under the relevant Sub-Fund Description or other errors covered by CSSF Circular 24/856 may be affected by the fact that they have subscribed for their Shares through a financial intermediary.

Valuation of Assets

In general, the AIFM determines the value of each Sub-Fund's assets, as of each NAV calculation, as follows:

- **Cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued but not yet received.** Valued at full value, minus any appropriate discount the AIFM applies based on its

assessments of any circumstances that make full payment unlikely.

- **Securities and instruments of all types that are listed on an official stock exchange or traded on any other Regulated Market.** Valued based on the last available price on the principal market on which such securities, financial instrument, or money market instruments are traded, as supplied by a recognised pricing service;
- **Private equities.** Valued at fair value under the direction of the AIFM in accordance with the IPEV Guidelines or other prevailing industry or professional standards.
- **Real estate assets.** Valued at fair value and, where the standards of the 2013 law apply or where otherwise appropriate, with the assistance of one or more independent valuers.
- **Participations in investment funds.** Valued based on their most recent available valuation and generally in accordance with the methods that apply to the investment funds.
- **Swaps.** Valued at market value, which in turn reflects the level and volatility of the underlying asset, market interest rates, residual term of the swaps and any other applicable factors. Any adjustments required as a result of issues and redemptions are carried out by means of an increase or decrease in the nominal value of the swaps, traded at market value.
- **Transferable securities and derivatives that are quoted or dealt in on any stock exchange or traded in any other regulated market.** Generally valued at the most recent quoted price. Where these assets trade on more than one market, the AIFM can choose to use the prices of the primary market.
- **Derivatives that are not listed on any official stock exchange or are traded over the counter.** Valued in a reliable and verifiable manner, consistent with market practice.
- **Money market instruments and liquid assets.** Generally valued at nominal value plus interest or amortised cost. Where practice allows, all other assets can be valued in the same manner.
- **Assets or liabilities in currencies other than Base Currency.** Valued at the applicable spot rate (applies to currencies held as assets and when translating values of securities denominated in other currencies into the Base Currency of the Sub-Fund).
- **All other assets.** Valued in good faith at a prudent estimate of their expected sales price.

Any asset or liability not attributable to a particular Sub-Fund will be allocated pro-rata to the NAV of each Sub-Fund. All liabilities attributable to a particular Sub-Fund are binding solely on that Sub-Fund. For each Sub-Fund, adequate provisions will be made for expenses incurred and due account will be taken of any off-balance sheet liabilities in accordance with fair and prudent criteria.

For each Sub-Fund and for each Share Class, the NAV per share shall be calculated in the relevant reference currency and as per the relevant valuation rules as described in the Sub-Fund Descriptions by dividing the net assets attributable to such Sub-Fund or Share Class (which shall be equal to the assets minus the liabilities attributable to such Sub-Fund or Share Class) by the number of Shares issued and in circulation in such Sub-Fund or Share Class; assets and liabilities expressed in foreign currencies shall be converted into the relevant reference currency, based on the relevant exchange rates.

Suspension of the Calculation of the NAV

The Board may suspend the determination of the NAV as provided for in sub-section Rights Related to Suspension of the Calculation of the NAV and Suspension of Dealings in the section Investing in the Sub-Funds and in the Articles.

Fund Rights Related to NAV Calculation and Dealing Arrangements

- **Calculate a NAV more often than what is contemplated under the relevant Sub-Fund Descriptions,** whether temporarily or permanently. Examples of circumstances that might lead to additional NAV calculations include where the AIFM considers that there had been a material change to the market value of the Investments in one or more Sub-Funds, or where there is an in kind Subscription and the AIFM believes it is in the best interest of the Shareholders to value such a Subscription separately or where an additional NAV calculation (which may be to more than two (2) decimals) regarding a Sub-Fund merger will allow for a more precise calculation of the conversion ratio in the best interest of Shareholders in both merging and receiving Sub-Funds. If the AIFM decides to alter the frequency of the NAV calculation permanently, the Prospectus will be amended, and Shareholders informed accordingly.
- **Alter dealing arrangements,** whether temporarily or permanently. If the AIFM decides to alter the dealing arrangements permanently, the Prospectus will be amended, and Shareholders informed accordingly.
- **Apply alternative valuation methods.** When it believes the interests of Shareholders or the Fund justify it, the AIFM may apply valuation methods other than those described above, such as:
 - drawing upon other available pricing sources;
 - valuing securities at either their bid or offer prices, given the prevailing market conditions and/or the level of Subscriptions or redemptions relative to the size of the relevant Sub-Fund; or
 - adjusting the NAV for dealing charges incurred by a Sub-Fund;
 - authorising, at its discretion and in good faith, the use of other methods of valuation if it considers that such methods would enable the fair value of any asset of the Fund to be determined more accurately.

The AIFM will only use alternative valuation methods when it believes such a step is warranted for an asset or for the NAV or in light of unusual market circumstances. Any fair value adjustments will be applied consistently to all Share Classes within a Sub-Fund. For the avoidance of doubt, the NAV will be calculated by the Administrator (which may be supported by third parties) under the supervision of the AIFM.

Best Execution

In choosing broker-dealers to execute trades involving portfolio securities, the Investment Manager and the Fund have fiduciary and regulatory requirements to seek the broker-dealer that offers the “best execution”. As the value of research services that a broker-dealer provides can be included when determining which firm offers “best execution”, the Investment Manager can choose a broker-dealer that charges a higher commission on trades if the Investment Manager determines, in good faith, that the commission paid is reasonable in relation to the value of the brokerage and research services provided.

The Investment Manager (or its delegate, such as a Sub-Investment Manager) makes such a determination based upon either a particular transaction or the overall responsibilities of the adviser with respect to the accounts over which it exercises investment discretion. Therefore, research may not necessarily benefit all accounts that pay commissions to a broker-dealer.

The research services in question are typically not available on a stand-alone basis from broker-dealers. The research can include research from an affiliate of the broker-dealer or access to unaffiliated industry experts.

The Investment Manager (or its delegate) can also use brokerage commissions to acquire research from independent providers and broker-dealers through commission-sharing arrangements ("CSAs"). The Investment Manager uses CSA credits only to obtain research designed to assist in the investment decision-making process.

In relation to best execution as it relates to EPM techniques specifically, a range of execution factors are taken into account in order to deliver best execution. The factors considered when delivering best execution include pricing, speed, execution efficiency and any other consideration relevant to the execution of an order.

Notices and Publications

The following table shows which most recent official materials are typically made available through which channels:

Information/document	Sent	Media	Online	Office

Sent To the Shareholders at the address on the register (physically, electronically, or as an emailed link, if appropriate).

Media Published in newspapers or other media (such as newspapers in Luxembourg and other countries where Shares are available, or electronic platforms), as well as in the RESA.

Online Posted online on am.jpmorgan.com/lu, except for the Articles, which are available at Luxembourg Business Registers (lbr.lu).

Office Available free upon request to the Fund and the AIFM, and available for inspection at the registered offices of the Fund and the AIFM. Except for the Core Service Providers agreements, the information/documents set out in the table above may also be available from the Depositary and local Distributors. "Core Service Providers agreements" include those with the AIFM and the Depositary.

"Other notices from the Board" include notices of Prospectus changes, the merger or liquidation of Sub-Funds or Share Classes, suspension of trading in Shares, and all other items for which a notice is required. Notices will be sent to the Shareholders where required by Luxembourg law or CSSF regulation or practice.

The Fund will inform potential investors, upon their request, of the expected target size of the relevant Sub-Fund. If the Board determines that the relevant Sub-Fund will not reach its intended target size, it will promptly inform such potential investors by informing them of the decision not to launch the relevant Sub-Fund and not to offer Shares in that Sub-Fund.

Statements and contract notes are sent when there are transactions in a Shareholder's account, although they are also sent at a minimum every six (6) months. Other items are sent when issued.

Information on past performance, where applicable, appears in the PRIIPs KID for each Sub-Fund, by Share Class, and in the Shareholder Reports.

The Shareholders will be regularly informed, at least once a year as part of the Shareholder Reports, of the jurisdictions in which the assets of each Sub-Fund are located.

Additional information is made available by the AIFM at its registered office, upon request, in accordance with the provisions of Luxembourg law and regulations. This additional information includes procedures relating to complaints handling, the strategy followed for the exercise of voting rights of the Fund, the policy for placing orders to deal on behalf of the Fund with other entities, and the best execution policy as well as the arrangements relating to the fee, commission or non-monetary benefits associated with the investment management and administration of the Fund.

As required by the 2013 Law and the 2010 Law, the Fund and its Sub-Funds shall provide, within six (6) months after the end of each Financial Year of the Fund, each person that was a Shareholder during such period with the annual audited report of the Fund which includes (i) annual audited financial statements (which shall include a balance sheet, income statement, statement of changes in equity and statement of net assets attributable to the Shareholders) for the Fund and for each of the Sub-Funds respectively, (ii) a report on the activities of the past Financial Year, and (iii) any further information required by the 2013 Law, the 2010 Law and applicable laws and regulations, including any EU SFDR or ESG reporting.

As required by the 2013 Law and the 2010 Law, the Fund and its Sub-Funds shall provide by electronic means, within three (3) months after the end of the relevant semi-annual period, each person that was a Shareholder during such period with the unaudited semi-annual report of the Fund prepared in accordance with the 2013 Law and the 2010 Law which includes: (i) the unaudited balance sheet of the Fund and of each of the Sub-Funds respectively for such semi-annual period, (ii) an unaudited income statement of the Fund and of each of the Sub-Funds respectively for such semi-annual period, and (iii) any further information required by the 2013 Law, the 2010 Law and applicable laws and regulations, including any EU SFDR or ESG reporting.

Retail Investors may obtain a paper copy of the annual report upon request at any time and free of charge. Retail Investors may also be provided upon request with additional information relating to the quantitative limits that apply to the risk management of the Fund and its Sub-Funds, the risk management methods applied by the AIFM and the recent evolution of the main risks and yields of the different categories of assets. Shareholders which qualify as Professional Investors shall be provided with the annual report by electronic means.

The financial information of the Fund shall be prepared in accordance with Luxembourg GAAP, provided that the Board may decide to use different accounting methods in respect of any Sub-Fund, as set forth in the relevant Sub-Fund Descriptions.

The Board may establish further reports as determined in respect of a given Sub-Fund as set forth in the relevant Sub-Fund Descriptions. In accordance with the AIFMD, the 2010 Law, the EU SFDR and the EU Taxonomy Regulation, all of the information detailed below will also be set out in the Fund's periodic reports:

- the percentage of the relevant Sub-Fund's assets which are subject to special arrangements arising from their illiquid nature;
- any new liquidity management arrangements;

- any new right of the reuse of collateral or any new guarantee granted under a leveraging arrangement;
- the total amount of leverage employed by the relevant Sub-Fund;
- details of the current risk profile of the relevant Sub-Fund and the risk management systems employed to manage those risks; and
- details on the EU SFDR and the EU Taxonomy Regulation periodic disclosures (such as the attainment of the characteristics promoted, sustainability indicators performance, sustainable investments proportion, EU Taxonomy Regulation alignment).

In addition, and if applicable, the relevant Sub-Fund shall make available the issue, sale and repurchase price of Shares each time it issues, sells, or repurchases its Shares subject to the conditions and the frequency set out in the 2010 Law.

Shareholders shall provide the Fund with an address to which all notices and announcements may be sent or, if the addressees have individually agreed to receive the notices and announcements by another means of communication ensuring access to the information – including any means of electronic communication, details of such means of communication. Such address(es) will also be entered into the register of Shareholders.

Shareholder Meetings

The annual general meeting of Shareholders shall be held in accordance with the Articles. The first Financial Year of the Fund will commence on the Fund's incorporation date and end on 31 December 2026. Any other Financial Year will start on the first day of January and end on the last day of December of each calendar year. Other Shareholder meetings can be held at other places and times as provided for in the Articles. If any Shareholder meetings are scheduled, notices will be distributed to the Shareholders and will be published as required by the Articles and the 1915 Law.

Resolutions concerning the interests of all Shareholders generally will be taken in a general meeting; those concerning the rights of the Shareholders of a specific Sub-Fund/Share Class will be discussed in a meeting of that Sub-Fund's/Share Class's Shareholders. The meeting notice will indicate any applicable quorum requirements. When no quorum is required, decisions will normally be taken if approved by a majority of those Shareholders that actually vote on the matter, whether in person or by proxy.

To fully exercise all rights as a Shareholder, including voting rights, Shares must be registered in a Shareholder's name, not that of an intermediary.

Indemnification

Each of the Board, the AIFM, the Investment Manager or each of their respective Affiliates and personnel will be entitled to indemnification by the Fund for all actions, proceedings, claims, losses, liabilities, damages, costs and expenses brought against, suffered or incurred as a result of acting on behalf of the Fund or otherwise arising out of or in connection with the Fund, the Sub-Fund and its Investments, unless such relevant conduct is found to have constituted gross negligence (*faute lourde*), wilful misconduct (*dol*) and/or fraud (*fraude*).

Each of the Administrator and the Depositary will be entitled to indemnification by the Fund for all actions, proceedings, claims, losses, liabilities, damages, costs and expenses incurred by it by reason of its performance or non-performance of its obligations or duties under the terms of the Administration Agreement and Depositary Agreement and as further described and subject to the terms of the respective agreements.

Auditors, Distributors, Sub-Distributors, placement agents, finders, advisors and other service providers to the Fund may be

entitled to indemnification by the Fund as may be described and subject to the terms of their appointment.

Amendments

The Board shall be authorised to amend this Prospectus in order to:

- make any change that is necessary or desirable to cure any ambiguity or to correct or supplement any provision of this Prospectus that would otherwise be inconsistent with the Articles;
- correct typographical or other minor errors;
- make all changes necessary to satisfy the requirements of the AIFMD, and other legal or regulatory requirements or to minimise the adverse effect of any legal or regulatory changes on the Fund or a Sub-Fund;
- make all changes necessary to allow the replacement of the AIFM by a substitute authorised alternative investment fund manager within the meaning of the 2013 Law to ensure that the Fund is managed in compliance with the AIFMD;
- make all changes necessary to replace any of the Service Providers;
- make a change that is necessary or desirable to satisfy any applicable requirements, conditions or guidelines contained in any opinion, directive, order, statute, rule or regulation of any governmental entity, so long as the change is made in a manner which minimises any adverse effect on Investors;
- make any other amendment that in the reasonable opinion of the Board may be necessary or desirable, including in particular to reflect the establishment of new Sub-Funds;

provided that in each case (i) the amendment does not adversely affect Investors in a material respect unless Investors are given free exit rights, (ii) the Investors are duly informed in advance of any such amendments and (iii) the amendment is subject to the prior approval of the CSSF.

Amendments which may adversely affect Investors in a material respect, are subject to the approval of Investors representing 75% of the Shares (or impacted Share Class) in the relevant Sub-Fund or, where applicable, at least one (1) month's prior notice to enable Investors to request that their Shares be redeemed free of any charge in the relevant Sub-Fund before the amendments are effective.

Notwithstanding the foregoing, any amendment of this Prospectus impacting the Articles is subject to the quorum and majority rules set out in the Articles for any amendment to the Articles.

Any amendment to this Prospectus is subject to the prior approval of the CSSF.

Queries and Complaints

Any person who would like to receive information about the Fund or who wishes to make a complaint about the operation of the Fund should contact the AIFM.

INFORMATION FOR INVESTORS IN CERTAIN COUNTRIES

Investors in each country where the Sub-Fund has been registered with the relevant regulatory authority can obtain the Prospectus, the Key Information Document(s), the Articles and the most recent annual report (and if subsequently published, the semi-annual report) at no cost from the relevant sales agent in that country or electronically at <https://www.eifs.lu/jpmorgan> for investors in certain countries. Net asset value of Shares and other information for investors in such countries may also be obtained electronically at <http://www.eifs.lu/jpmorgan>. Financial statements appearing in the annual reports are audited by independent auditors.

EEA

The Fund is an alternative investment fund (AIF) pursuant to Article 4(1)(a) of the Directive EU on Alternative Investment Fund Managers, as amended (the "AIFMD"), as implemented in the Grand Duchy of Luxembourg with the Luxembourg law of 12 July 2013 on alternative investment fund managers. The AIFM has been appointed and acts as alternative investment fund manager within the meaning of the AIFMD in respect of the Fund. For these purposes, the AIFM is fully authorised and regulated in Luxembourg by the CSSF for the purposes of managing AIFs.

The distribution of this Prospectus in the European Economic Area (EEA) is carried out pursuant to the rights of the AIFM under the passporting regime established by Articles 31 and 32 of the AIFMD. Investors can request from the AIFM details of jurisdictions where notification of the exercise of such rights has been given to the CSSF.

In relation to each member state of the EEA (each a "Member State") which has implemented the AIFMD, this Prospectus may only be distributed and Shares in the Fund may only be offered or placed in a Member State to the extent that: (1) the Fund is permitted to be marketed to professional investors in the relevant Member State in accordance with the AIFMD (as implemented into the local law/regulation of the relevant Member State); or (2) this Prospectus may otherwise be lawfully distributed and the Shares may otherwise be lawfully offered or placed in that Member State (including at the exclusive initiative of the investor).

Furthermore, in the event any Sub-Fund is marketed to Retail Investors, facilities will be made available for making subscriptions, making payments to shareholders, repurchasing or redeeming Shares and for making available the information the relevant Sub-Fund and the AIFM are required to provide under applicable law. In particular, appropriate procedures and arrangements for dealing with complaints submitted by Retail Investors in one of the official languages of the Retail Investors' country shall be established.

For the avoidance of doubt, marketing to Retail Investors may take place, but only where this is permitted under applicable local law and to the extent that (where required) a PRIIP KID has been made available to any Retail Investors.

Austria

This Prospectus is being made available only to professional investors as defined in section 1 no. 13 and qualified private customers (Qualifizierte Privatkunden) as defined in Sec 2 para. 1 no. 42 of the Austrian Securities Supervision Act of 2018 (Wertpapieraufsichtsgesetz 2018) and is not, and may not be, distributed to any other person in Austria. None of this Prospectus, or any other document relating to the Fund or the Shares, may be distributed, passed on or disclosed to any other person in Austria, save as specifically agreed with the AIFM. This Prospectus is distributed subject to such restrictions. By accepting this Prospectus, the recipient undertakes to comply with such restrictions.

Belgium

The Fund has not been and will not be registered with the Belgian Financial Services and Markets Authority (Autoriteit voor Financiële Diensten en Markten / Autorité des services et marchés financiers) (the FSMA) as a public foreign alternative collective investment scheme under Article 259 of the Belgian Law of 19 April 2014 on alternative collective investment institutions and their managers (the Law of 19 April 2014). Accordingly, any offering material relating to the offering has not been, and will not be, approved by the FSMA.

The Shares in the Fund may only be marketed, offered and/or issued in Belgium to professional investors, as defined in Article 3, 30° of the Law of 19 April 2014, or to investors making a minimum investment of at least EUR 250,000 (or equivalent in the relevant foreign currency) per investor. Accordingly, this offering as well as any documents and materials relating to the offering have been provided to the intended recipients for personal use only and exclusively for the purposes of the offering. Therefore, they may not be advertised, offered or distributed in any other way, directly or indirectly, to any other person in Belgium.

Denmark

For the purposes of the Danish Consolidated Act on Managers of Alternative Investment Funds etc. (the "Danish AIFM Act"), the Fund will constitute an EU AIF whose AIFM is JPMorgan Asset Management (Europe) S.À R.L. itself an EU AIFM (each term, as defined in the AIFMD and as implemented in the Danish AIFM Act). The shares of the Sub-Funds may thus not and will not be offered, sold, transferred or delivered and neither this supplement nor any offering material relating to the shares may be distributed or made available (in whole or in part) in Denmark, directly or indirectly, except as permitted by sections 5(5) and 88 of the Danish AIFM Act and executive orders issued pursuant thereto implementing article 32 of AIFMD into Danish law.

Germany

The content of this Prospectus (including any supplements) has not been verified by the German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin").

The Shares in the Fund may only be marketed or acquired within Germany in accordance with the German Capital Investment Code (Kapitalanlagegesetzbuch – KAGB) and any laws and regulations applicable in Germany governing the issue, offering, marketing and sale of the Shares.

In respect of any Sub-Fund, the Shares are permitted to be marketed in Germany only to "professional investors" and "semiprofessional investors" as defined in the KAGB and the AIFMD.

Notwithstanding the references to any Sub-Fund or fund vehicle other than the Fund or any interest in any such Sub-Fund or vehicle other than the Fund in this Prospectus, no interest other than the Shares are being offered hereby to prospective German investors. To the extent that this Prospectus provides information on compartments or fund vehicles other than the Fund, such information is for investor disclosure purposes only. The interests in any such compartment or other fund vehicle must not be marketed in Germany within the meaning of § 293 para. 1 KAGB.

Each potential investor is advised to consider possible tax consequences and to consult his own tax counsel. Prospective German investors are strongly advised to consider possible tax consequences of an investment in the Fund and should consult their own tax advisors in that respect.

Greece

PAYING AGENT

Alpha Bank S.A.

Eurobank S.A.

Piraeus Bank S.A.

Neither the Fund nor the Prospectus have been, and will not be, authorised or approved by the Hellenic Capital Market Commission (HCMC). Accordingly, any offering material relating to the offering has not been, and will not be, approved by the HCMC.

The offering and the distribution of the Fund in Greece is addressed only a) to professional investors, namely professional clients (per se or upon request) within the meaning of Annex II of Greek law 4514/2018, as amended (implementing Directive 2014/65/EU (MiFID II) in Greece) and b) to retail investors who make a minimum investment of at least EUR 100,000 per the Fund or per the Fund's investment compartment, where applicable. The offering and the distribution of the Fund in Greece takes place following the notification letter of the CSSF to the HCMC pursuant to article 32 (EU passport) of Greek law 4209/2013, as amended (implementing article 32 of the AIFMD) and in compliance with the conditions of articles 41 and 41B of Greek law 4209/2013 (implementing articles 43 and 43a of AIFMD). The Fund or the Shares may not be advertised, distributed, offered or in any way sold, directly or indirectly, to any other person in Greece. This Prospectus is distributed subject to such restrictions.

Hong Kong

The contents of this prospectus have not been reviewed by any regulatory authority in Hong Kong. You are advised to exercise caution in relation to the offer. If you are in any doubt about any of the contents of this prospectus, you should obtain independent professional advice.

The Fund is a collective investment scheme but is not authorized under Section 104 of the Securities and Futures Ordinance of Hong Kong by the Securities and Futures Commission of Hong Kong. Accordingly, the distribution of this prospectus, and the placement of interests in Hong Kong, is restricted. This prospectus may only be distributed, circulated or issued to persons who are professional investors under the Securities and Futures Ordinance and any rules made under that ordinance or as otherwise permitted by the Securities and Futures Ordinance.

Italy

REGISTERED REPRESENTATIVE

JPMorgan Asset Management (Europe) S.à r.l., Milan Branch
Via Cordusio 3
20123 Milan, Italy

Regular Savings Plans, redemption and switch programmes are available in Italy. In addition to the fees and expenses indicated in this Prospectus, Italian Shareholders are charged fees relating to paying agent. For further information on Regular Savings Plans and paying agent fees, see the current Italian application form.

The AIFM can choose to accept deal requests that are not signed by the Shareholder so long as an authorised Distributor holds a valid power of attorney from the Shareholder.

The AIFM may apply exclusive settlement arrangements to certain representatives / paying agents. Such arrangements will not be more favourable than the terms outlined under Investing in the Sub-Funds and may, for example, require certain paying agents / representatives to provide cleared settlement for subscriptions within a shorter timeframe than that detailed under Investing in the Sub-Funds.

For further information please refer to the Italian application form.

This Prospectus and the offer of the Shares of any Sub-Fund is addressed to professional investors as defined in the Italian Consolidated Law on Finance no. 58 of February 24, 1998, as amended from time to time (the "FCA") and in the regulations of the commissione nazionale per le società e la borsa ("CONSOB") issued pursuant to it, in accordance with the framework of Directive 2014/65/EU of 15 May, 2014 on Markets and Financial Instruments and Regulation (EU) No 600/2014 of 15 May, 2014 on Markets and Financial Instruments. In addition to professional investors, the Shares of any Sub-Fund may be offered to the following categories of investors

(collectively, "Italian Qualifying Investors"):

- a) Investors who subscribe or purchase Shares of the Fund for an initial, not fractionable amount of 500,000 Euro;
- b) Entities authorized to provide portfolio management services who, in execution of their investment mandate, subscribe or purchase Shares of the Fund for an initial amount of not less than 100,000 Euro on behalf of a retail investor; and
- c) Investors who subscribe or purchase Shares of the Fund for an initial, not fractionable amount of 100,000 Euro, provided that the following two conditions jointly apply: (i) the investor's commitments in alternative investment funds reserved to professional investors do not exceed the 10% of the aggregate investor's financial portfolio; and (ii) the investor is making the commitment on the basis of the investment advice received from an entity duly licensed to provide such services.

The addressee acknowledges and confirms the above and hereby agrees not to circulate this Prospectus in Italy unless expressly permitted by, and in compliance with, applicable law.

In addition, any investor will be required to agree and represent that any on-sale or offer of any Share by such investor (in accordance with the Fund's documents) shall be made in compliance with all applicable laws and regulations.

Netherlands

In the Netherlands, Shares in the Fund are only offered, sold, transferred or delivered to investors who meet at least one of the following criteria: (a) minimum investment amount per investor is at least EUR 100,000; or (b) nominal value of the investment per share is at least EUR 100,000.

Norway

The Fund is an alternative investment fund, and the AIFM is the alternative investment fund manager for the purposes of the AIFMD. The Fund may be marketed in Norway only to "professional investors" as defined in Section 1-2 (k) of the Norwegian Alternative Investment Fund Management Act (the "NAIFMA") (i.e. a "professional client" in MiFID II Annex 2). This Prospectus and the offering of the Shares has not been approved by or registered with the Norwegian Financial Supervisory Authority (Finanstilsynet) save as strictly required by for the purposes of Article 32 of the AIFM Directive.

This Prospectus has not been produced in accordance with the prospectus requirements laid down in chapter 7 of the Norwegian Securities Trading Act of 2007, and has not been approved or disapproved by, or registered with, the Oslo Stock Exchange, the Finanstilsynet or the Norwegian Registry of Business Enterprises for the purpose of such prospectus requirements.

The offer to participate in the subscription contained in this Prospectus is only and exclusively directed to the addressees of this offer, which also must be a "professional investor" as defined in Section 1-2 (k) of the NAIFMA (i.e. a "professional client" in MiFID Annex 2).

Singapore

Certain Sub-Funds (the "Restricted Sub-Funds") may from time to time be entered onto the list of restricted schemes maintained by the Monetary Authority of Singapore (the "MAS") for purpose of restricted offer in Singapore pursuant to section 305 of the Securities and Futures Act 2001 of Singapore, as amended or modified, Chapter 289 of Singapore (the "SFA") and the list of Restricted Sub-Funds may be accessed at the MAS website at <https://eservices.mas.gov.sg/cisnetportal/jsp/list.jsp>.

The Shares of the Restricted Sub-Funds are "capital markets products other than prescribed capital markets products" (as defined in the Securities and Futures (Capital Markets Products) Regulations 2018) and Specified Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

A restricted offer or invitation to subscribe for Shares of each Restricted Sub-Fund, which is the subject of this Prospectus, does not relate to a collective investment scheme which is authorised under Section 286 of the SFA or recognised under Section 287 of the SFA. The Restricted Sub-

Funds are not authorised or recognised by the MAS, and the Shares of the Restricted Sub-Funds are not allowed to be offered to the retail public in Singapore.

This Prospectus and any other document or material issued in connection with this restricted offer or sale of the Shares of the Restricted Sub-Funds is not a prospectus as defined in the SFA and, accordingly, statutory liability under the SFA in relation to the content of prospectuses does not apply, and you should consider carefully whether the investment is suitable for you after reviewing this Prospectus.

This Prospectus has not been registered as a prospectus with the MAS. Accordingly, this Prospectus and any other document or material in connection with the restricted offer or sale, or invitation for subscription or purchase, of the Shares of the Restricted Sub-Funds may not be circulated or distributed, nor may the Shares of the Restricted Sub-Funds be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (a) to an institutional investor (as defined in the SFA, a "Singapore Institutional Investor") under section 304 of the SFA; (b) to a relevant person (as defined in Section 305(5) of the SFA) pursuant to section 305(1), or any person pursuant to section 305(2) of the SFA (each a "Relevant Investor"), and in accordance with the conditions specified in section 305 of the SFA, and where applicable, the conditions specified in Regulation 3 of the Securities and Futures (Classes of Investors) Regulations 2018; or (c) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA. Where Shares of the Restricted Sub-Funds are initially subscribed or purchased under: (a) section 304 of the SFA by a Singapore Institutional Investor, subsequent transfers of the Shares of the Restricted Sub-Funds can only be made to another Singapore Institutional Investor; and (b) section 305 of the SFA by a Relevant Investor, subsequent transfers of the Shares can only be made to a Singapore Institutional Investor or another Relevant Investor. Additionally, where Shares of the Restricted Sub-Funds are subscribed or purchased under section 305 of the SFA by a relevant person which is:

(i) a corporation (which is not an accredited investor as defined in section 4A of the SFA) the sole business of which is to hold investments, and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or

(ii) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary of the trust is an individual who is an accredited investor;

securities (as defined in section 2(1) of the SFA) of that corporation or the beneficiaries' rights and interest (howsoever described) in that trust shall not be transferred within six months after that corporation or that trust has acquired the Shares of the Restricted Sub-Funds pursuant to an offer made under section 305 of the SFA except:

- a) to a Singapore Institutional Investor or to a relevant person defined in section 305(5) of the SFA, or to any person arising from an offer referred to in section 275(1A) or section 305A(3)(c)(ii) of the SFA;
- b) where no consideration is or will be given for the transfer;
- c) where the transfer is by operation of law; or
- d) as specified in section 305A(5) of the SFA.

Investors should note further that the other Sub-Funds of the Fund referred to in this Prospectus other than the Restricted Sub-Funds, are not available to Singapore investors and references to such other Sub-Funds are not and should not be construed as an offer of Shares of such other Sub-Funds in Singapore.

Investors in Singapore should note that past performance information and the financial reports of the Restricted Sub-Funds are available at relevant Distributors.

Spain

Sales Agent

JPMorgan Asset Management (Europe) S.à r.l., Sucursal en España

Paseo de la Castellana, 31

28046 Madrid, Spain

+34 91 516 12 00

Further information for Spanish investors is included in the Spanish marketing memorandum which has been filed with the Comisión Nacional del Mercado de Valores ("CNMV") and is available from the local Distributors.

Sweden

The issue and distribution of this Prospectus is restricted by law. This Prospectus has not been, and will not be, registered with or approved by the Swedish Financial Supervisory Authority (Sw. Finansinspektionen). Accordingly, this Prospectus may not be made available, nor may the Shares otherwise be marketed and offered for sale, in Sweden, other than under circumstances that are deemed not to constitute an offer to the general public in Sweden or qualify as an exemption from the requirement to publish a prospectus under the EU Prospectus Regulation 2017/1129. Furthermore, this Prospectus is not intended to, and may not be, made available, nor may the Shares otherwise be marketed and offered for sale, in Sweden, other than where the Investment Manager has obtained the necessary licences and/or approvals under the Swedish Alternative Investment Funds Managers Act (2013:561). This Prospectus is under all circumstances not intended for other investors than those who are defined as both qualified investors (as defined in the EU Prospectus Regulation 2017/1129) and professional investors (Sw. professionella investerare, as defined in the Swedish Act on Managers of Alternative Investment Funds) or, where applicable, retail investors, (Sw. icke-professionella investerare, such as defined in Chapter 5, Section 7 and Chapter 4, Section 5 in the Swedish Alternative Investment Funds Managers Act) except that a limited number (less than 150) of investors in Sweden may be professional investors or, where applicable, retail investors (as defined in Chapter 5, Section 7 and Chapter 4, Section 5 in the Swedish Alternative Investment Funds Managers Act), without being qualified investors.

Switzerland

The offer and marketing of the Fund in Switzerland will be exclusively made to, and directed at, qualified investors (the "Qualified Investors"), as defined in Article 10(3) and (3ter) of the Swiss Collective Investment Schemes Act ("CISA") and its implementing ordinance.

Accordingly, the Fund has not been and will not be registered with the Swiss Financial Market Supervisory Authority ("FINMA"). This offering memorandum and/or any other offering or marketing materials relating to the interests in the Fund may be made available in Switzerland solely to Qualified Investors.

In respect of its offer and marketing in Switzerland to qualified investors with an opting-out pursuant to Art. 5(1) of the Swiss Federal Act on Financial Services ("FinSA") and without any portfolio management or advisory relationship with a financial intermediary pursuant to Article 10(3ter) CISA, the Fund has appointed a Swiss representative and paying agent:

Swiss representative: JPMorgan Asset Management (Switzerland) LLC, Dreikönigstrasse 37, 8002 Zurich, Switzerland. The legal documents as well as the latest annual and semi-annual financial reports, if any, of the Fund may be obtained free of charge from the Swiss representative.

Swiss paying agent: J.P. Morgan (Suisse) SA, Rue du Rhône 35, 1204 Geneva, Switzerland

Place of performance and place of jurisdiction: as regards the offering in Switzerland, the place of performance is at the registered office of the representative. The place of jurisdiction is at the registered office of the representative or at the registered office/place of residence of the investor.

Taiwan

The Shares are not registered for public offering in Taiwan. The

Shares are being made available in Taiwan only by way of private placement, through a locally licensed bank, securities broker, Securities Investment Trust Enterprise or Securities Investment Consulting Enterprise (the "Placement Agent"), and only to the permitted qualified end investors of the relevant Placement Agent, in accordance with applicable Taiwan laws and regulations. No other offering, sale, distribution or solicitation of the Shares is permitted in Taiwan. **United Kingdom**

The Fund is an unregulated collective investment scheme as defined in the Financial Services and Markets Act 2000 of the United Kingdom ("FSMA 2000"). The Fund has not been authorized, or otherwise recognized or approved by the UK Financial Conduct Authority ("FCA") and, as an unregulated scheme, it accordingly cannot be promoted in the United Kingdom ("UK") to the general public.

In the UK, the contents of this Prospectus have not been approved by an authorized person within the meaning of section 21 of FSMA 2000. Approval is required unless an exemption applies under section 21 of FSMA 2000. Reliance on this Prospectus for the purpose of engaging in any investment activity may expose an individual to a significant risk of losing all the property or other assets invested. This Prospectus will only be communicated to persons to whom a financial promotion can be made lawfully by an unauthorized person (without prior approval of an authorized person) pursuant to the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended) (the "FPO") and then, if made by an authorized person, only where it can also be made under the Financial Services and Markets Act 2000 (Promotion of Collective Investment Schemes) (Exemptions) Order 2001 (as amended) (the "PCISO"). It will therefore only be communicated to:

- a) persons believed on reasonable grounds to fall within one of the categories of "investment professionals" as defined in Article 19(5) of the FPO and Article 14 PCISO;
- b) persons believed on reasonable grounds to be "high net worth companies, unincorporated associations etc" within the meaning of Article 49 of the FPO and Article 22 PCISO;
- c) persons who are "certified sophisticated investors" as described in Article 50 of the FPO and Article 23 PCISO, namely persons who hold a current certificate and who have signed a statement in the form prescribed by the FPO not more than twelve

(12) months prior to the date of this Prospectus;

d) a person who is a "self-certified sophisticated investor" as described in Article 50A of the FPO and Article 23A PCISO, namely a person who has completed and signed a statement in the form prescribed by the FPO and PCISO not more than twelve (12) months prior to the date of this Prospectus and whose completion of that statement indicates that they satisfy the conditions set out in the statement to be classified as a self-certified sophisticated investor;

e) a person who is a "high net worth individual" as defined in Article 48 FPO and Article 21 PCISO, namely a person who has completed and signed not more than twelve (12) months prior to the date of this Prospectus, a statement complying with the requirements of Part 1 of Schedule 5 to FPO and Part 1 of the Schedule to PCISO and whose completion of the statement indicates that they satisfy the conditions set out in the statement to be classified as a high net worth individual;

f) persons to whom this Prospectus may otherwise lawfully be provided in accordance with FSMA 2000, and the FPO (as amended); and

g) if communicated by a firm authorized by the FCA, to persons who fall within the exemptions set out in Rule 4.12B.7R(5) of the FCA Conduct of Business Sourcebook ("FCA COB").

Any person who is in any doubt about the investment to which this Prospectus relates should consult an authorized person specialized in advising on investments of the kind in question. Transmission of this Prospectus to any other person in the UK is unauthorized and may contravene FSMA 2000.

The AIFM intends to seek UK Reporting Fund Status ("UKRFS") for certain Share Classes, including but not necessarily limited to the (div UKRFS) and (acc UK RFS) Share Classes. For further information on UKRFS, including details of the reportable income of each relevant Share Class (available annually within 6 months of the end of the relevant reporting period), go to jpmorganassetmanagement.lu

Incorporated 16 February 2026.

Duration Indefinite.

Articles Dated 16 February 2026 and available for inspection with the Registre de Commerce et des Sociétés.

Regulatory authority

Commission de Surveillance du Secteur Financier (“CSSF”) 283, route d’Arlon
L-1150 Luxembourg, Grand Duchy of Luxembourg
Tel +352 262 511
Fax +352 262 512 601

Registration number B305329.

Financial year 1 January – 31 December.

Capital Sum of the net assets of all the Sub-Funds, in USD.

Minimum capital EUR 1.25 million or equivalent in another currency, to be reached within 12 months of the Fund’s authorisation date.

Par value of Shares None.

The Fund is an “umbrella fund” under which the Sub-Funds are created and operate. Each Sub-Fund shall be comprised of all that has been disposed of or received on the Shares in the relevant Sub-Fund including payments, subscriptions, benefits, dividends, debts, liabilities, and other commitments incurred by the Fund for the account of such Sub-Fund.

Each Sub-Fund and, if applicable, each Share Class issued in each Sub-Fund may have its own investment, Subscription, redemptions and profit allocation and/or distribution policy. The introduction of a Sub-Fund is made pursuant to a decision by the Board setting the terms and conditions of the relevant Sub-Fund. Each Sub-Fund may have similar or different investment strategies and other specific features (including, but not limited to, upfront or on-call Subscriptions, specific investment advisor(s)/manager(s)/administrator(s), specific fee structures, permitted investments, investment restrictions, distribution policies and permitted Eligible Investors) as the Board shall determine from time to time in respect of each Sub-Fund.

The assets and liabilities of each Sub-Fund shall be segregated from the assets and liabilities of all other Sub-Funds, with creditors having recourse only to the assets of the Sub-Fund concerned. As between the Shareholders, each Sub-Fund will be deemed to be a separate entity. The rights and obligations of the Shareholders are limited to the assets of the Sub-Fund(s) in which they invest. In terms of the relationship between the Shareholders, each Sub-Fund is treated independently. Each Sub-Fund may be liquidated individually, without this resulting in the liquidation of another Sub-Fund or the Fund. Nevertheless, the liquidation of the last remaining Sub-Fund will trigger the dissolution and liquidation of the Fund as a whole.

Variations in the capital of the Fund occur by operation of law and are not required to be published or to be filed with the Luxembourg RCS.

The Fund and each of its Sub-Funds qualify as an AIF under the 2013 Law. The Fund has appointed the AIFM as its alternative investment fund manager.

This Prospectus shall be governed by and construed in accordance with the laws of the Grand Duchy of Luxembourg. Any legal disputes involving the Fund, the AIFM, the Depositary, the Administrator or any Shareholder will be subject to the jurisdiction of the courts of the City of Luxembourg, although the Fund can submit itself to the competent court of other jurisdictions in disputes that concern activities or Shareholders in that jurisdiction.

The courts of Luxembourg will recognize as valid, and will enforce, any final, conclusive and enforceable civil judgment obtained in a court of an European Union Member State in respect of any contracts relating to the Fund where the parties to such contract have submitted to the jurisdiction of the courts of such European Union Member State in accordance with the provisions of the Brussels Regulation. The Court of Appeal of Luxembourg may refuse to recognize and enforce a foreign judgment given on the basis of the Brussels Regulation by the district courts of Luxembourg, but only on grounds specified in articles 45 and 46 of the said Brussels Regulation.

In addition, Luxembourg is party to the Brussels Convention. Therefore, judgments obtained from the courts of territories excluded from the Brussels Regulation pursuant to article 355 of the Treaty on the Functioning of the European Union, would be recognized and enforceable by the Luxembourg courts in accordance with the applicable enforcement proceedings provided for in the Brussels Convention.

Luxembourg is also party to the Lugano Convention. Judgments obtained in the courts of Iceland, Norway or Switzerland would therefore be recognized and enforceable by the Luxembourg courts in accordance with the applicable enforcement proceedings provided for in the Lugano Convention.

The courts of Luxembourg will recognize as valid, and will enforce, without reconsideration of the merits, any final, conclusive and enforceable civil judgment obtained against the Fund in the courts of a competent jurisdiction outside the scope of the Brussels Regulation, Brussels Convention or Lugano Convention, subject to and in accordance with general Luxembourg rules applicable to the recognition and enforcement of foreign court decisions. Luxembourg courts may refuse to recognize and enforce such a judgment if one or several of the following requirements are not met:

- (i) the foreign court judgment must be enforceable in the country in which it was rendered;
- (ii) the foreign court must have had jurisdiction according to the Luxembourg conflict of jurisdictions rules;
- (iii) the foreign procedure must have been regular in light of the laws of the country in which the judgment was rendered, in particular with the rights of defence;
- (iv) the foreign court must have applied to the matter submitted to it the proper law which is designated by the Luxembourg conflict of laws rules;
- (v) the judgment of the foreign court must not be contrary to the Luxembourg international public policy; and
- (vi) the foreign judgment must not have been obtained by fraud.

This Prospectus is construed under Luxembourg Law. Investors should read all of these documents before investing.

The proceeds of the issue of Shares in respect of each Sub-Fund will be invested for the exclusive benefit of the relevant Sub-Fund in accordance with the investment policy determined by the AIFM and/or the Investment Manager from time to time in respect of the relevant Sub-Fund and as set forth in this Prospectus. All Shares of the same Share Class in a particular Sub-Fund shall have equal rights as to dividends declared (if any), income, realised and unrealised investment gains, distribution or redemption rights, redemption proceeds and liquidation proceeds, subject to any arrangements to the contrary as may be agreed from time to time with a Shareholder when permitted under the relevant laws and regulations.

Financial Intermediaries

Investors will invest in the Fund either (i) directly or (ii) via a financial intermediary holding the Shares on behalf of or as trustee for such Investor (such financial intermediaries being hereinafter referred to as “Financial Intermediaries”).

In respect of those Investors that invest indirectly in the Fund through a Financial Intermediary (the “Underlying Investors”), any reference in this Prospectus to “Investors” or “Shareholders” is to the relevant Financial Intermediary and/or where appropriate the Underlying Investors and any penalties, sanctions and requirements that can be imposed on an Investor will be, in respect of the relevant Financial Intermediary, applied to the relevant pro-rata portion of the relevant Financial Intermediary’s Shares corresponding to the relevant Underlying Investor(s), in accordance with, and subject to the terms of, this Prospectus. Likewise, voting rights will be exercised by Financial Intermediaries through, depending on the terms of the relevant arrangement with each of the Underlying Investors, either a split vote following voting instructions from the Underlying Investors or exercising voting rights further to a general power of attorney to vote on behalf of the relevant Underlying Investors. Any such Underlying Investor must qualify as an Eligible Investor which will be verified by the Financial Intermediary. In addition, each participation by a Financial Intermediary on account of any single Underlying Investor will be treated as a separate participation from that Financial Intermediary’s other participations (e.g., for equalisation purposes and the treatment of subsequent and existing Investors, for distribution purposes and reinvestment, Investor’s clawback purposes, default provisions, etc.) in accordance with, and subject to the terms of, this Prospectus.

The Fund draws the attention of Investors to the fact that each Investor can only assert each of their Investor rights (in particular the right to take part in Shareholders’ meetings) in their entirety directly against the Fund if such Investor is enrolled in their own name in the Fund’s register of Shareholders. In cases where an Underlying Investor makes their investment in the Fund via a Financial Intermediary, which makes the investment in its own name but for the Underlying Investor’s account, not all Investor rights can necessarily be asserted by the Underlying Investor directly against the Fund. Indeed, except in certain circumstances related to the Default of the Financial Intermediary or an Underlying Investor, the Underlying Investor will not act as a Shareholder in the Fund and will have no direct rights of recourse against the Fund or the AIFM. Investors are advised to obtain information on their rights.

Where Shares are subscribed through a Financial Intermediary, enhanced due diligence measures will be undertaken in accordance with Article 3 of the CSSF Regulation N° 12-02.

Board of Directors

A majority of the Board consists of independent Directors. No Directors have executive powers within the Board.

INDEPENDENT DIRECTORS

Graham Goodhew

Independent Director

17, Boulevard de Kockelscheuer, L-1821 Luxembourg, Grand Duchy of Luxembourg.

Olivia Moessner

Independent Director

17, Boulevard de Kockelscheuer, L-1821 Luxembourg, Grand Duchy of Luxembourg.

Sophie Mosnier

Independent Director

17, Boulevard de Kockelscheuer, L-1821 Luxembourg, Grand Duchy of Luxembourg.

CONNECTED DIRECTORS

Massimo Greco

Managing Director, JPMorgan Asset Management (Europe) S.à r.l., Milan Branch

Via Cordusio 3

Milan, IT-25, 20123, Italy

The Board is responsible for the overall management and administration of the Fund and has broad powers to act on its behalf, including:

- appointing and supervising the AIFM and the other service providers indicated below
- setting investment policy and approving the appointment of the Investment Manager and of any Sub-Investment Managers that are not JPMorgan entities
- making all determinations regarding the launch, modification, merger or liquidation of Sub-Funds and Share Classes, including such matters as timing, pricing, fees, Valuation Days, dividend policy and other conditions, including whether a new Sub-Fund will be open or closed-ended
- determining whether to list a Sub-Fund’s Shares on the Luxembourg Stock Exchange or any other stock exchange
- determining when and in what manner the Fund will exercise any of the rights reserved in this Prospectus or by statute, and making any associated Shareholder communications
- ensuring that the appointment of the AIFM and the Depositary is consistent with the 2013 Law, the 2010 Law and any applicable contracts of the Fund

The Board has overall responsibility for the Fund’s investment activities and other operations. The Board has delegated the day-to-day management of the Fund and its Sub-Funds to the AIFM, which in turn has delegated some or all of its duties to various Investment Managers and other Service Providers. The AIFM, under the supervision of the Board, remains responsible for the delegated duties and acts.

The Board is responsible for the information in this Prospectus and has taken all reasonable care to ensure that it is materially accurate and complete.

The Board also sets the fees to be paid to independent Directors, subject to approval by Shareholders (no Director’s fees are paid to Directors who are employed by any entity of JPMorgan Chase & Co.). Directors serve until their term ends, they resign, or they are revoked, in accordance with the Articles. Any additional Directors will be appointed in accordance with the Articles and Luxembourg law.

Directors are reimbursed for out-of-pocket expenses in connection with the performance of their duties as a Director.

Conducting Officers

Philippe Ringard
Benjamin Jarvis
Janice Murgio
Robert Kaylor
Louise Mullan
James Stuart
Kathy Vancomerbeke
Cecilia Vernersson

The conducting officers supervise and coordinate the activities of the AIFM and are responsible for the day-to-day management of the AIFM in accordance with Luxembourg law.

The AIFM is responsible for the investment management for the Sub-

Funds as well as the registrar, transfer agency, client communication and alternative investment fund management functions.

The AIFM can delegate to third parties some or all of its activities, subject to applicable laws. For example, so long as it retains control, monitoring and supervision, the AIFM can appoint one or more Investment Managers (to handle the day-to-day management of Sub-Fund assets,) advisors (to provide investment information, recommendations and research concerning prospective and existing investments), or registrars and transfer agents (to perform those functions). The AIFM can also appoint various Service Providers; further details can be obtained from its registered office. The AIFM is subject to the 2013 Law.

Notwithstanding any delegation of its duties to third parties, the AIFM remains fully responsible towards the Fund for the monitoring of the execution of such duties by third parties. As of the date of this Prospectus, the AIFM has retained the registrar and transfer agency function.

In view of its overall responsibilities, the AIFM agrees that it shall coordinate with such third parties, as reasonably requested by the Board, as may be necessary for the AIFM to perform its own functions in respect of the Fund.

The AIFM typically serves for an indefinite period and the Board can replace the AIFM. In turn, the Investment Manager and all Service Providers typically serve for an indefinite period and the AIFM can replace them periodically.

Remuneration Policy

The AIFM has a remuneration policy that is designed to:

- contribute to the achievement of short-term and long-term strategic and operational objectives and at the same time avoid excessive risk-taking inconsistent with the risk management strategy
- provide a balanced total remuneration package made from a mix of fixed and variable components including base salary, cash incentives and long-term, equity-based or fund-tracking incentives that vest over time
- promote proper governance and regulatory compliance

Key elements of the policy are intended to:

- tie remuneration of employees to long-term performance and align it with Shareholders' interests
- encourage a shared success culture amongst employees
- attract and retain talented individuals
- integrate risk management and remuneration
- have no remuneration perquisites or non-performance-based remuneration
- maintain strong governance around remuneration practices
- avoid conflicts of interest

The policy applies to all employees, including employees whose professional activities materially impact the risk profile of the AIFM or the Fund, and includes a description of how remuneration and benefits are calculated, and sets out the responsibilities for awarding remuneration and benefits, including the composition of the committee that oversees and controls the policy. A copy of the policy is available at am.jpmorgan.com/lu/en/asset-management/adv/funds/policies/ or can be obtained free of charge from the AIFM.

Valuation

The AIFM will remain responsible for the valuation of the Fund's and the Sub-Fund's assets in compliance with the AIFMD. The AIFM will provide certain valuation services in relation to the assets of the Fund/Sub-Funds and will be responsible for establishing, maintaining, implementing and reviewing related valuation policies and procedures.

The AIFM team responsible for the valuation of the assets of the

Fund/Sub-Funds is acting independently from the AIFM team in charge of the portfolio management of the Fund/Sub-Funds and the risk management.

Neither the Depositary nor the Administrator will appraise investments for valuation. However, the Administrator will provide certain NAV calculation services as agreed between the AIFM and the Administrator under the Administration Agreement.

Professional liability

In accordance with the requirements of Article 9.7 of the 2013 Law, in order to cover its professional liability risk resulting from the activities it may carry out, the AIFM holds a professional indemnity insurance in accordance with the AIFMD, which is appropriate to the risks covered.

ADMINISTRATOR AND DOMICILIATION AGENT

State Street Bank International GmbH, Luxembourg Branch, having its registered office at 17, Boulevard de Kockelscheuer, L-1821 Luxembourg, Grand Duchy of Luxembourg, the Luxembourg branch of State Street Bank International GmbH, a limited liability company incorporated and existing under the laws of Germany (Gesellschaft mit beschränkter Haftung), having its registered office at Brienner Str. 59, D-80333 Munich and registered in the commercial register of the local court of Munich under registration number HRB 42872.

As the Administrator and Domiciliation Agent, State Street is responsible for the administrative work required by law and the Articles, including performing certain NAV calculations and accounting services for the Fund and for keeping the books and records of the Sub-Funds and the Fund. It is subject to the 2010 Law.

The Fund has entered into, or will enter into, the Administration Agreement with the Administrator. The Administrator will perform certain administrative and accounting services for the Fund, subject to the overall supervision of the Fund's AIFM.

Pursuant to the Administration Agreement, the Administrator is responsible, under the overall supervision of the Fund's AIFM, for matters pertaining to the day-to-day administration of the Fund, namely NAV calculation and accounting services, including keeping the Fund's accounts, determination of the Net Asset Value of Shares in each Class of each Sub-Fund at each Valuation Day, dispatching dividend payments to registered Shareholders as well as provision of other administrative services.

The Administrator may utilise the services of its affiliates in connection with the services provided by the Administrator to the Fund (each such affiliate, as the case may be, a "Sub-Administrator"). All fees and expenses of any Sub-Administrators will be paid by the Administrator out of its fee.

The AIFM is solely responsible for the valuation of the Fund's portfolio securities and other assets. For the purposes of performing its services, the Administrator shall, and shall be entitled to, accept, use and rely, without enquiry on the valuations provided by the AIFM and/or other authorised agents of the Fund and shall not be liable to the Fund in doing so. The Administrator assumes no liability or responsibility for ensuring that the values of Funds' investments, as provided to it by the AIFM and/or other authorised agents of the Fund have been determined in accordance with the valuation policies and procedures adopted by the Fund.

The Administration Agreement is for an indefinite term; provided, however, that the Administration Agreement is subject to termination by the Administrator or by the Fund upon three months' written notice, or immediately in certain other circumstances

specified therein.

Under the Administration Agreement, the Fund has agreed that in the absence of negligence, fraud or wilful misconduct in the performance of its duties under the Administration Agreement, the Administrator shall not be liable for any liability, loss, damage, cost, charge or expense, including reasonable legal and other professional fees and disbursements which may be suffered or incurred by any Fund or the AIFM pursuant to the Administration Agreement. Furthermore, the Fund will indemnify the Administrator and any affiliate involved in the provision of services against any liability, actions, proceedings, claims, demands, costs or expenses in connection therewith which may be incurred by or claimed against the Administrator or any such affiliate, except that the Administrator or such affiliate will not be indemnified against any liability to which they would be subject by reason of their negligence, fraud or wilful misconduct.

THE ADMINISTRATOR WILL NOT PROVIDE ANY INVESTMENT ADVISORY OR MANAGEMENT SERVICE TO THE FUND AND THEREFORE WILL NOT BE IN ANY WAY RESPONSIBLE FOR THE FUND'S PERFORMANCE. THE ADMINISTRATION AGREEMENT DOES NOT CREATE ANY CONTRACTUAL RIGHTS AGAINST OR RELIANCE ON THE ADMINISTRATOR BY ANY PERSON NOT A PARTY THERETO INCLUDING, WITHOUT LIMITATION, ANY INVESTOR OR COUNTERPARTY APPOINTED BY THE FUND. THE ADMINISTRATOR WILL NOT BE RESPONSIBLE FOR MONITORING ANY INVESTMENT RESTRICTIONS OR COMPLIANCE WITH THE INVESTMENT RESTRICTIONS AND THEREFORE WILL NOT BE LIABLE FOR ANY BREACH THEREOF.

DEPOSITARY

State Street Bank International GmbH, Luxembourg Branch, having its registered office at 17, Boulevard de Kockelscheuer, L-1821 Luxembourg, Grand Duchy of Luxembourg, registered with the R.C.S. Luxembourg under no. B 148186, the Luxembourg branch of State Street Bank International GmbH, a limited liability company incorporated and existing under the laws of Germany (Gesellschaft mit beschränkter Haftung), having its registered office at Brienner Str. 59, D-80333 Munich and registered in the commercial register of the local court of Munich under registration number HRB 42872.

The Board has appointed the Depositary to act as a depositary of the Fund's assets in accordance with the 2013 Law and Part II of the 2010 Law, pursuant to the Depositary Agreement.

The Depositary shall:

- ensure the sale, issue, re-purchase, redemption and cancellation of Shares are carried out in accordance with Luxembourg law and the Articles;
- ensure the value of the Share is calculated in accordance with Luxembourg law, the Articles and the procedures laid down in Article 19 (9) of the 2013 Law;
- carry out the instructions of the AIFM, unless they conflict with applicable Luxembourg law or the Articles;
- ensure that, in transactions involving the Fund's assets, any consideration is remitted to the Fund within the usual time limits;
- ensure the Fund's incomes are applied in accordance with Luxembourg law and the Articles;
- monitoring of the Fund's cash and cash flows; and
- safe-keeping of financial instruments to be held in custody and ownership verification and record keeping in relation to other assets.

In carrying out its duties the Depositary shall act honestly, fairly, professionally, independently and in the interests of the Fund and its Shareholders.

Depositary's liability

In the event of a loss of a financial instrument held in custody, determined in accordance with applicable Luxembourg law and the Directive on Alternative Investment Fund Managers (the "AIFM Directive"), the Depositary shall return financial instruments of identical type or the corresponding amount to the Fund without undue delay.

The Depositary shall not be liable if it can prove that the loss of a financial instrument held in custody has arisen as a result of an external event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary pursuant to the AIFM Directive.

In case of a loss of financial instruments held in custody, the Shareholders may invoke the liability of the Depositary directly or indirectly through the Fund provided that this does not lead to a duplication of redress or to unequal treatment of the Shareholders.

The Depositary is indemnified by the Fund against all liabilities suffered or incurred by the Depositary by reason of the proper performance of the Depositary's duties under the terms of the Depositary Agreement save where any such liabilities arise as a result of the Depositary's negligence, fraud, bad faith, wilful default or recklessness of the Depositary or the loss of financial instruments held in custody.

The Depositary will be liable to the Fund for all other losses suffered by the Fund as a result of the Depositary's negligent or intentional failure to properly fulfil its obligations pursuant to the AIFM Directive.

The Depositary shall not be liable for consequential or indirect or special damages or losses, arising out of or in connection with the performance or non-performance by the Depositary of its duties and obligations.

Delegation

The Depositary has full power to delegate the whole or any part of its safe-keeping functions but its liability will not be affected by the fact that it has entrusted to a third party some or all of the assets in its safekeeping. The Depositary's liability shall not be affected by any delegation of its safe-keeping functions under the Depositary Agreement.

Information about the safe-keeping functions which have been delegated and the identification of the relevant delegates and sub-delegates are available at the registered office of the AIFM or at the following internet site:

<https://www.statestreet.com/disclosures-and-disclaimers/lu/subcustodians>

Conflicts of Interest between the Depositary and the Fund

The Depositary is part of an international group of companies and businesses ("State Street") that, in the ordinary course of their business, act simultaneously for a large number of clients, as well as for their own account, which may result in actual or potential conflicts. Conflicts of interest arise where the Depositary or its affiliates engage in activities under the depositary agreement or under separate contractual or other arrangements. Such activities may include:

- (i) providing nominee, administration, registrar and transfer agency, research, agent securities lending, investment management, financial advice and/or other advisory services to the Fund;
- (ii) engaging in banking, sales and trading transactions including foreign exchange, derivative, principal lending, broking, market making or other financial transactions with the Fund either as principal and in the interests of itself, or for other clients.

The Depositary or its affiliates:

(i) will seek to profit from such activities and are entitled to receive and retain any profits or compensation in any form and, except as required by law, the Depositary is not bound to disclose to the Fund any such profits or compensation in any form earned by affiliates of the Depositary or the Depositary when acting in any other capacity;

(ii) may buy, sell, issue, deal with or hold, securities or other financial products or instruments as principal acting in its own interests, the interests of its affiliates or for its other clients;

(iii) may trade in the same or opposite direction to the transactions undertaken, including based upon information in its possession that is not available to the Fund;

(iv) may provide the same or similar services to other clients including competitors of the Fund and the fee arrangements it has in place will vary;

(v) may be granted creditors' and other rights by the Fund, e.g. indemnification which it may exercise in its own interest. In exercising such rights the Depositary or its affiliates may have the advantage of an increased knowledge about the affairs of the Fund relative to third party creditors thus improving its ability to enforce and may exercise such rights in a way that may conflict with the Fund's strategy.

The Fund may use an affiliate of the Depositary to execute foreign exchange, spot or swap transactions for the account of the Fund. In such instances the affiliate shall be acting in a principal capacity and not as a broker, agent or fiduciary of the Fund. The affiliate will seek to profit from these transactions and is entitled to retain any profit. The affiliate shall enter into such transactions on the terms and conditions agreed with the Fund. The Depositary will not, except as required by law, disclose any profit made by such affiliates.

Where cash belonging to the Fund is deposited with an affiliate being a bank, cash is not segregated from its own assets and a conflict arises in relation to the interest (if any) which the affiliate may pay or charge to such account and the fees or other benefits which it may derive from holding such cash as banker.

The AIFM may also be a Client or counterparty of the Depositary or its affiliates and a conflict may arise where the Depositary refuses to act if the AIFM directs or otherwise instructs the Depositary to take certain actions that might be in direct conflict with the interests of the investors in the Fund.

The types and levels of risk that the Depositary is willing to accept may conflict with the Fund's preferred investment policy and strategy.

Conflicts that may arise in the Depositary's use of sub-custodians include the following broad categories:

- (1) the global custodian and sub-custodians seek to make a profit as part of or in addition to their custody services. Examples include profit through the fees and other charges for the services, profit from deposit taking activities, revenue from sweeps and repo arrangements, foreign exchange transactions, contractual settlement, error correction (where consistent with applicable law) and commissions for sale of fractional shares;
- (2) The Depositary will typically only provide depositary services where global custody is delegated to an affiliate of the Depositary. The global custodian in turn appoints a network of affiliated and non-affiliated sub-custodians. Multiple factors influence the determination of our global custodian to engage a particular sub-custodian or allocate assets to them, including their expertise and capabilities, financial condition, service platforms and commitment to the custody business as well as the negotiated fee structure (which may include terms that result in fee reductions or rebates to the global custodian), significant business relationships and competitive considerations;

(3) sub-custodians, both affiliated and non-affiliated, act for other clients and in their own proprietary interest, which might conflict with clients' interests and the fee arrangements they have in place will vary;

(4) sub-custodians, both affiliated and non-affiliated, have only indirect relationships with clients and look to the Depositary as its counterparty, which might create incentive for the Depositary to act in its self-interest, or other clients' interests to the detriment of clients; and

(5) sub-custodians may have creditors' rights against client assets and other rights that they have an interest in enforcing.

The Depositary has functionally and hierarchically separated the performance of its depositary tasks from its other potentially conflicting tasks. The system of internal controls, the different reporting lines, the allocation of tasks and the management reporting allow potential conflicts of interest to be properly identified, managed and monitored. Additionally, in the context of the Depositary's use of sub-custodians, the Depositary imposes contractual restrictions to address some of the potential conflicts and maintains due diligence and oversight of sub-custodians. The Depositary makes available frequent reporting on clients' activity and holdings, with the underlying sub-custodians subject to internal and external control audits. Finally, the Depositary segregates the Fund's assets from the Depositary's proprietary assets and follows a Standard of Conduct that requires employees to act ethically, fairly and transparently with clients.

Global conflicts of interest policy

State Street has implemented a global policy laying down the standards required for identifying, assessing, recording and managing all conflicts of interest which may arise in the course of business. Each State Street business unit, including the Depositary, is responsible for establishing and maintaining a conflicts of interest program for the purpose of identifying and managing organizational conflicts of interest that may arise within the business unit in connection with providing services to its clients or in delivering its functional responsibilities.

Up-to-date information on the Depositary, its duties, any conflicts that may arise, the safe-keeping functions delegated by the Depositary, the list of delegates and sub-delegates and any conflicts of interest that may arise from such a delegation will be made available to Shareholders on request.

Service Providers Engaged by the Shareholders of the Fund

AUDITOR

PricewaterhouseCoopers Assurance, société cooperative

2, rue Gerhard Mercator, B.P. 1443

L-2182 Luxembourg, Grand Duchy of Luxembourg

The auditor provides independent review of the financial statements of the Fund and all Sub-Funds once a year. The auditor is appointed annually at the annual general meeting of shareholders.

Service Providers Engaged by the AIFM

INVESTMENT MANAGERS

The AIFM has delegated the investment management of each Sub-Fund to the Investment Manager listed below. The AIFM can appoint any other entity of JPMorgan Chase & Co. to be an Investment Manager, in which case this Prospectus will be updated.

J.P. Morgan Investment Management Inc.

383 Madison Avenue New
York, NY 10179-0001 USA

The Investment Manager is responsible for the day-to-day management of the relevant Sub-Fund's portfolios in accordance with the investment objectives and policies stated in the Sub-Fund Descriptions. The Investment Manager may from time to time sub-delegate part or all of the investment management functions to one or more Affiliates of JPMorgan Chase & Co. The delegation of the portfolio management functions or the sub-delegation of certain components of the portfolio management functions, if any, for the Sub-Funds or any change thereto remain subject to the prior consent of the CSSF. For more information on the Investment Manager responsible for each Sub-Fund, refer to am.jpmorgan.com/lu/en/asset-management/adv/funds/administrative-information/.

The AIFM can appoint any other entity of JPMorgan Chase & Co. to be an Investment Manager, in which case this Prospectus will be updated. In addition, the Investment Manager may also be authorised to delegate investment management and advisory duties for a Sub-Fund to one or more Sub-Investment Managers that are affiliated with JPMorgan Chase & Co.

Commission Sharing Arrangements An Investment Manager may enter into commission sharing arrangements, but only where all of the following are true:

- there is a direct and identifiable benefit to the clients of the Investment Manager including the Fund
- the Investment Manager is satisfied that the transactions generating the shared commissions are made in good faith, in strict compliance with applicable regulatory requirements and in the best interests of the Fund and its Shareholders
- the terms of the arrangements are commensurate with best market practice

Depending on local regulation, an Investment Manager can pay for research or execution services using soft commissions or other similar arrangements. Only certain Sub-Funds, as disclosed on am.jpmorgan.com/lu/en/asset-management/adv, may use commission sharing/soft commissions to pay for external research.

LEGAL ADVISER

Linklaters LLP Luxembourg

35 Avenue John F. Kennedy L-
1855 Luxembourg
Grand Duchy of Luxembourg

The legal adviser provides independent legal advice on business, regulatory, tax, and other matters, as requested to the Fund and JPMorgan Chase & Co. and not investors.

SALES AGENTS AND DISTRIBUTORS

The AIFM, as the global distributor of the Fund, appoints sales agents and Distributors (entities or individuals who arrange or carry out the marketing, sales or distribution of Sub-Fund Shares), who may be Affiliates of JPMorgan Chase & Co. or third parties. In some countries, the use of an agent is mandatory.

Glossary

The following terms have these specific meanings within this document. All references to laws and documents apply to those laws and documents as amended from time to time.

1915 Law The Luxembourg law dated 10 August 1915 on commercial companies.

2010 Law The Luxembourg law of 17 December 2010 on undertakings for collective investment. Words and expressions that are not defined in the Prospectus but are defined in the 2010 Law have the same meaning as in the 2010 Law.

2013 Law The Luxembourg law of 12 July 2013 on alternative investment fund managers on alternative investment fund managers transposing the AIFMD into Luxembourg law.

Additional Investors Entities that are eligible for I, I2, S2 and X Shares in the EU in addition to Eligible Counterparties (as defined below). These entities are the following:

- charitable institutions registered in their jurisdictions
- companies traded or listed on a regulated market and Large Companies (as defined below)
- corporate entities or holding companies, including personal investment companies, where the purpose is to hold substantial financial interests/investments
- local authorities and municipalities
- non-UCITS collective investment schemes and their management companies
- reinsurance companies
- social security institutions

Administration Agreement The administration agreement entered into between the Fund, the AIFM and the Administrator in relation to the Fund.

Advisers Act The Investment Advisers Act of 1940.

Affiliate(s) With respect to a specified person, (i) any person that directly or indirectly, through one or more intermediaries, controls, is controlled by or is under common control with the specified person or (ii) any member of the immediate family of such specified person.

AIF An alternative investment fund as defined in the AIFMD.

AIFM JPMorgan Asset Management (Europe) S.à r.l.

AIFM Agreement The alternative investment fund manager agreement between the Fund and the AIFM in respect of the Fund.

AIFMD The Directive 2011/61/EU of the European Parliament and the Council of 8 June 2011 on alternative investment fund managers.

AIFM Regulation Commission Delegated Regulation (EU) No 231/2013 of 19 December 2012 supplementing Directive 2011/61/EU of the European Parliament and of the Council with regard to exemptions, general operating conditions, depositaries, leverage, transparency and supervision.

Application Form The agreement between the Fund and each Investor with respect to a particular Sub-Fund(s) setting forth, without limitation, (i) the Share Class(es) to be subscribed by such Investor, (ii) the number of Shares to be subscribed by such Investor and/or the amount of its Capital Commitment, (iii) the rights and obligations of such Investor in relation to its Subscription for Shares; and (iv) representations and warranties given by such Investor in favour of the Fund.

Articles The Articles of Incorporation of the Fund.

Base Currency The currency in which a Sub-Fund maintains its financial statements and calculates its total net assets.

Benchmarks Regulation Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds (and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014).

Board The Board of Directors of the Fund or, where applicable, any person to whom such powers have been delegated by the board of directors of the Fund.

Borrowing Limits Has the meaning ascribed to it in sub-section Borrowing And Leverage of section Investment Restrictions, Powers and Leverage.

Brussels Convention The Convention of 27 September 1968 on the jurisdiction and enforcement of judgments in civil and commercial matters

Brussels Regulation The Council Regulation (EU) No 1215/2012 of 12 December 2012 on jurisdiction and the enforcement of judgments in civil and commercial matters

Business Day A day on which the banks in Luxembourg are normally open for business

Caisse de Consignation The Luxembourg government agency responsible for safekeeping unclaimed assets.

Calculation Period Has the meaning ascribed to it in section Share Classes and Costs.
