

OFFERING CIRCULAR DATED 7 SEPTEMBER 2026

"THE ETHNIKI" HELLENIC GENERAL INSURANCE COMPANY S.A.

(a société anonyme incorporated and existing under the laws of the Hellenic Republic)

€100,000,000 6.875 per cent. Reset Subordinated Restricted Tier 1 Perpetual Temporary Write-Down Notes

Issue Price: 100.000 per cent.

The €100,000,000 6.875 per cent. Reset Subordinated Restricted Tier 1 Perpetual Temporary Write-Down Notes (the "**Notes**") are issued by "The Ethniki" Hellenic General Insurance Company S.A. (the "**Issuer**" or "**Ethniki**").

References herein to the "**Conditions**" shall be construed as references to the Terms and Conditions of the Notes and references to a numbered "**Condition**" shall be construed accordingly.

The Notes bear interest on their Prevailing Principal Amount (as defined in the Conditions) (i) from (and including) the Issue Date to (but excluding) 9 March 2032 (the "**First Reset Date**") at the rate of 6.875 per cent. per annum and (ii) in respect of each Reset Period (as defined in the Conditions) thereafter at the applicable Reset Rate of Interest (as defined in the Conditions), which will be determined by the Agent (as defined in the Conditions) on the relevant Reset Determination Date (as defined in the Conditions) as the sum of the relevant Reset Reference Rate (as defined in the Conditions) and the Margin (as defined in the Conditions), payable in each case (subject to the following proviso) semi-annually in arrear on 9 March and 9 September in each year commencing on 9 March 2027; provided that the Issuer may at its discretion at any time elect to cancel any payment of interest on the Notes, in whole or in part, and must cancel a payment of interest (i) in the circumstances described in Conditions 5(b) and 5(c) and (ii) if and to the extent that such payment could not be made in compliance with the Solvency Condition (as defined in the Conditions). Any interest payment (or, as the case may be, part thereof) which is so cancelled will not accumulate or be payable at any time thereafter, no amount will become due from the Issuer in respect thereof and cancellation thereof shall not constitute a default for any purpose on the part of the Issuer. Payments on the Notes will be made without deduction for or on account of taxes of any Taxing Jurisdiction (as defined in the Conditions) to the extent described in Condition 9.

Upon the occurrence of a Trigger Event, the Prevailing Principal Amount of each Note will be immediately and mandatorily Written Down by the relevant Write Down Amount and any interest accrued to the relevant Write Down Date (each term as defined in the Conditions) and unpaid shall be cancelled in accordance with the Conditions. Noteholders may lose some or all of their investment as a result of such a Write Down. Following such a Write Down, the Issuer may, in certain circumstances and at its sole and full discretion, Write Up (as defined in the Conditions) the Prevailing Principal Amount of each Note, in accordance with the Conditions.

The Notes are perpetual securities with no fixed redemption date. Subject to the Issuer having complied with any applicable Regulatory Conditions (as defined in the Conditions), to no Regulatory Deficiency Redemption Deferral Event (as defined in the Conditions) having occurred and continuing and to the requirements set out in Condition 7(b), the Issuer will have the right to redeem all the Notes (but not some only) (i) (A) in the period from (and including) 9 September 2031 to (and including) the First Reset Date or (B) on any Interest Payment Date thereafter, (ii) upon the occurrence of a Deductibility Event (as defined in the Conditions), a Gross-up Event (as defined in the Conditions) or a Capital

Disqualification Event (as defined in the Conditions) or (iii) if 75 per cent. or more of the aggregate principal amount (determined, solely for these purposes, as though all outstanding Notes remain at their Initial Principal Amount (as defined in the Conditions)) of the Notes originally issued (and, for these purposes, any Further Notes (as defined in the Conditions) issued pursuant to Condition 17 will be deemed to have been originally issued) have been purchased by the Issuer or any of its Subsidiaries and, in each case, cancelled pursuant to the Conditions (as further described in Condition 7(f)), in each case at their Prevailing Principal Amount, together with (to the extent not previously cancelled in accordance with the Conditions) any unpaid interest accrued to (but excluding) the date fixed for redemption. The Issuer will, upon the occurrence of a Deductibility Event, a Gross-up Event or a Capital Disqualification Event, or in order to ensure the effectiveness and enforceability of Condition 20(d), also have the right to substitute the Notes for, or vary the terms of the Notes so that they remain or become (as applicable) Qualifying Tier 1 Notes (as defined in the Conditions), all as described in Condition 7.

The Notes are direct, unsecured and subordinated obligations of the Issuer, ranking *pari passu* and without preference amongst themselves. See Condition 3.

Application has been made to the Luxembourg Stock Exchange for the Notes to be admitted to trading on the Euro MTF market of the Luxembourg Stock Exchange and to be listed on the Official List of the Luxembourg Stock Exchange. This Offering Circular constitutes a prospectus for the purpose of Part IV of the Luxembourg law on prospectuses for securities dated 16 July 2019. References in this Offering Circular to the Notes being "listed" (and all related references) shall mean that the Notes have been admitted to trading on the Luxembourg Stock Exchange's Euro MTF market and have been admitted to the Official List of the Luxembourg Stock Exchange. The Luxembourg Stock Exchange's Euro MTF market is neither a regulated market for the purposes of Directive 2014/65/EU (as amended, "**MiFID II**") nor a UK regulated market for the purposes of Regulation (EU) No 600/2014 on markets in financial instruments as it forms part of United Kingdom ("**UK**") domestic law by virtue of the European Union (Withdrawal) Act 2018 ("**UK MiFIR**").

The Notes will initially be represented by a global certificate in registered form (the "**Global Certificate**") which will be registered on 9 September 2026 (the "**Issue Date**") in the name of a nominee of a common depositary for Euroclear Bank SA/NV ("**Euroclear**") and Clearstream Banking S.A. ("**Clearstream, Luxembourg**"). Interests in the Global Certificate will be exchangeable for definitive Notes ("**Certificates**") only in certain limited circumstances, all as further described in "*Form of the Notes and Summary of Provisions Relating to the Notes While in Global Form*" below.

An investment in the Notes involves risks. For a discussion of certain of these risks see "*Risk Factors*".

The Notes have not received a rating from any credit rating agency as at the date of this Offering Circular.

UBS Investment Bank

The date of this Offering Circular is 7 September 2026.

IMPORTANT INFORMATION

The Issuer accepts responsibility for the information contained in this Offering Circular. To the best of the knowledge and belief of the Issuer (having taken all reasonable care to ensure that such is the case) the information contained in this Offering Circular is in accordance with the facts and does not omit anything which in the context of the issuance and offering of the Notes would be misleading and affect the import of such information.

This Offering Circular is to be read in conjunction with all documents which are deemed to be incorporated herein by reference (see "*Documents Incorporated by Reference*" below). This Offering Circular shall be read and construed on the basis that such documents are incorporated into and form part of this Offering Circular.

Other than in relation to the documents which are deemed to be incorporated by reference (see "*Documents Incorporated by Reference*" below), the information on the websites to which this Offering Circular refers does not form part of this Offering Circular.

None of the Joint Lead Managers (as defined in "*Subscription and Sale*" below) has independently verified the information contained herein. Accordingly, no representation, warranty or undertaking, express or implied, is made and no responsibility or liability is accepted by any of the Joint Lead Managers as to the accuracy or completeness of the information contained in this Offering Circular or any other information provided by the Issuer in connection with the Notes or their distribution.

Goldman Sachs Bank Europe SE, UBS Europe SE (the "**Relevant Joint Lead Managers**") and their respective affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may provide services to, the Issuer and its affiliates in the ordinary course of business. In addition, in the ordinary course of their business activities, the Relevant Joint Lead Managers and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuer or the Issuer's affiliates. The Relevant Joint Lead Managers and their respective affiliates may have a lending relationship with the Issuer and may routinely hedge their credit exposure to the Issuer consistent with their customary risk management policies. Typically, the Relevant Joint Lead Managers and their respective affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in securities, including potentially the Notes. Any such short positions could adversely affect future trading prices of the Notes. The Relevant Joint Lead Managers and their respective affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments. For the avoidance of doubt, the term "affiliates" also includes parent companies. Piraeus Bank S.A. is the ultimate parent company of the Issuer.

No person is or has been authorised by the Issuer to give any information or to make any representation not contained in or not consistent with this Offering Circular or any other information provided in connection with the Notes and, if given or made, such information or representation must not be relied upon as having been authorised by the Issuer or the Joint Lead Managers.

Neither this Offering Circular nor any other information supplied in connection with the Notes (i) is intended to provide the basis of any credit or other evaluation or (ii) should be considered as a recommendation or as constituting an invitation or offer by the Issuer or the Joint Lead Managers that any recipient of this Offering Circular or any other information supplied in connection with the Notes should purchase the Notes. Each investor contemplating purchasing the Notes should make its own independent investigation of the financial condition and affairs, and its own appraisal of the

creditworthiness, of the Issuer. Neither this Offering Circular nor any other information supplied in connection with the Notes constitutes an offer or invitation by or on behalf of the Issuer or the Joint Lead Managers to any person to subscribe for or to purchase the Notes.

Neither the delivery of this Offering Circular nor the offering, sale or delivery of the Notes shall in any circumstances imply that the information contained in this Offering Circular concerning the Issuer is correct at any time subsequent to its date or that any other information supplied in connection with the Notes is correct as of any time subsequent to the date indicated in the document containing the same. The Joint Lead Managers expressly do not undertake to review the financial condition or affairs of the Issuer or to advise any investor in the Notes of any information coming to their attention.

RESTRICTIONS ON MARKETING AND SALES TO RETAIL INVESTORS – The Notes are complex financial instruments with high risk and are not a suitable or appropriate investment for all investors, especially retail investors. In some jurisdictions, regulatory authorities have adopted or published laws, regulations or guidance with respect to the offer or sale of certain securities with characteristics similar to the Notes. Potential investors in the Notes should inform themselves of, and comply with, any applicable laws, regulations or regulatory guidance with respect to any resale of the Notes (or any beneficial interests therein).

In the UK, the FCA Conduct of Business Sourcebook ("**COBS**") requires, in summary, that certain securities with characteristics similar to the Notes should not be offered or sold to retail clients (as defined in COBS 3.4 and each a "**retail client**") in the UK.

Potential investors should inform themselves of, and comply with, any applicable laws, regulations or regulatory guidance with respect to any resale of the Notes (or any beneficial interests therein), including COBS.

Some or all of the Issuer and the Joint Lead Managers are required to comply with some or all of COBS. By purchasing, or making or accepting an offer to purchase, any Notes (or any beneficial interests therein) from the Issuer and/or the Joint Lead Managers, each prospective investor represents, warrants, agrees with and undertakes to the Issuer and the Joint Lead Managers that:

- (a) it is not a retail client in the UK; and
- (b) whether or not it is subject to COBS, it will not:
 - (i) sell or offer the Notes (or any beneficial interests therein) to retail clients in the UK; or
 - (ii) communicate (including the distribution of this Offering Circular) or approve an invitation or inducement to participate in, acquire or underwrite the Notes (or any beneficial interests therein) where that communication, invitation or inducement is addressed to or disseminated in such a way that it is likely to be received by a retail client in the UK,

and in selling or offering the Notes or making or approving communications relating to the Notes, it may not rely on the limited exemptions set out in COBS.

The obligations above are in addition to the need to comply at all times with all applicable laws, regulations and regulatory guidance (whether inside or outside the European Economic Area (the "EEA") or the UK) relating to the promotion, offering, distribution and/or sale of the Notes (or any beneficial interests therein), whether or not specifically mentioned in this Offering Circular, including (without limitation) any requirements under MiFID II, the UK FCA Handbook and any other applicable laws, regulations and regulatory guidance relating to determining the appropriateness and/or suitability

of an investment in the Notes (or any beneficial interests therein) by investors in any relevant jurisdiction.

Where acting as agent on behalf of a disclosed or undisclosed client when purchasing, or making or accepting an offer to purchase, the Notes (or any beneficial interests therein) from the Issuer and/or the Joint Lead Managers, the foregoing representations, warranties, agreements and undertakings will be given by and be binding upon both the agent and its underlying client.

IMPORTANT – EEA RETAIL INVESTORS – The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to, any retail investor in the EEA. For these purposes, a retail investor means a person who is one (or both) of (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; or (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended, the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II. Consequently no key information document required by Regulation (EU) No 1286/2014 (as amended, the "**PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

IMPORTANT – UK RETAIL INVESTORS – The Notes are not intended to be offered, sold, distributed or otherwise made available to and should not be offered, sold, distributed or otherwise made available to any retail investor in the UK. For these purposes, a retail investor means a person who is not a professional client, as defined in point (8) of Article 2(1) of UK MiFIR. Consequently no disclosure document required by the FCA Product Disclosure Sourcebook ("**DISC**") for offering, selling or distributing the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering, selling or distributing the Notes or otherwise making them available to any retail investor in the UK may be unlawful under DISC and the Consumer Composite Investments (Designated Activities) Regulations 2024, as applicable.

MiFID II product governance / Professional investors and ECPs only target market – Solely for the purposes of each manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties and professional clients only, each as defined in MiFID II; and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the manufacturers' target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturers' target market assessment) and determining appropriate distribution channels.

UK MiFIR product governance / Professional investors and ECPs only target market – Solely for the purposes of the manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is only eligible counterparties, as defined in the FCA Handbook Conduct of Business Sourcebook, and professional clients, as defined in UK MiFIR; and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any distributor should take into consideration the manufacturer's target market assessment; however, a distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels.

SALES TO CANADA

The Notes may be sold only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 *Prospectus Exemptions* or subsection 73.3(1) of the *Securities Act* (Ontario), and are permitted clients, as defined in National Instrument 31-103 *Registration Requirements, Exemptions and Ongoing Registrant Obligations*. Any resale of the Notes must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this Offering Circular (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province or territory for particulars of these rights or consult with a legal advisor.

THE NOTES ARE COMPLEX FINANCIAL INSTRUMENTS

The Notes are high risk and complex financial instruments and such instruments may be purchased by investors as a way to reduce risk or enhance yield with an understood, measured, appropriate addition of risk to their overall portfolios. Each potential investor in the Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor may wish to consider, either on its own or with the help of its financial and other professional advisers, whether it:

- has sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained or incorporated by reference in this Offering Circular or any applicable supplement;
- has access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Notes and the impact the Notes will have on its overall investment portfolio;
- has sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes, including where the currency for principal or interest payments (being euro) is different from the potential investor's currency and the possibility that the entire principal amount of the Notes could be lost, including as a result of a Write Down of the Prevailing Principal Amount or following the exercise of any statutory loss absorption power by the Relevant Resolution Authority (as defined in the Conditions);
- understands thoroughly the terms of the Notes, such as their perpetual nature, the possibility of the Prevailing Principal Amount being subject to a Write Down, the provisions governing cancellation of interest payments on the Notes or deferral of redemption of the Notes, and is familiar with the behaviour of any relevant indices and financial markets; and
- is able to evaluate (either alone or with the help of financial, legal or tax advisors) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Legal investment considerations may restrict certain investments. The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent (1) the Notes are legal investments for it, (2) the Notes can be used as collateral for various types of borrowing and (3) other restrictions apply to its purchase or pledge of the Notes. Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of the Notes under any applicable risk-based capital or similar rules.

The Notes may have no established trading market when issued, and one may never develop.

STABILISATION

In connection with the issue of the Notes, Goldman Sachs Bank Europe SE (the "Stabilisation Manager") (or persons acting on behalf of the Stabilisation Manager) may over-allot Notes or effect transactions with a view to supporting the market price of the Notes at a level higher than that which might otherwise prevail. However, stabilisation may not necessarily occur. Any stabilisation action may begin on or after the date on which adequate public disclosure of the terms of the offer of the Notes is made and, if begun, may cease at any time, but it must end no later than the earlier of 30 days after the Issue Date and 60 days after the date of the allotment of the Notes. Any stabilisation action or over-allotment must be conducted by the Stabilisation Manager (or persons acting on behalf of the Stabilisation Manager) in accordance with all applicable laws and rules.

IMPORTANT INFORMATION RELATING TO THE USE OF THIS OFFERING CIRCULAR AND THE OFFER OF THE NOTES

This Offering Circular does not constitute an offer to sell or the solicitation of an offer to buy the Notes in any jurisdiction to any person to whom it is unlawful to make the offer or solicitation in such jurisdiction. The distribution of this Offering Circular and the offer or sale of the Notes may be restricted by law in certain jurisdictions. Neither the Issuer nor any of the Joint Lead Managers represents that this Offering Circular may be lawfully distributed, or that the Notes may be lawfully offered, in compliance with any applicable registration or other requirements in any such jurisdiction, or pursuant to an exemption available thereunder, or assumes any responsibility for facilitating any such distribution or offering. In particular, no action has been taken by the Issuer or the Joint Lead Managers which is intended to permit a public offering of the Notes or distribution of this Offering Circular in any jurisdiction. Accordingly, the Notes may not be offered or sold, directly or indirectly, and neither this Offering Circular nor any advertisement or other offering material may be distributed or published, in any jurisdiction except under circumstances that will result in compliance with any applicable laws and regulations. Persons into whose possession this Offering Circular or the Notes may come must inform themselves about, and observe, any such restrictions on the distribution of this Offering Circular and the offering and sale of the Notes. For details of certain restrictions on the distribution of this Offering Circular and the offer or sale of the Notes in the United States, the UK and the EEA (including Greece), see "*Subscription and Sale*" below.

The Notes have not been and will not be registered under the United States Securities Act of 1933, as amended (the "**Securities Act**") and may not be offered, sold or delivered within the United States or to, or for the account or benefit of, U.S. persons (see "*Subscription and Sale*").

This Offering Circular shall only be used for the purposes for which it has been published.

FORWARD-LOOKING STATEMENTS

This Offering Circular includes forward-looking statements. These include statements relating to, among other things, the future financial performance of the Issuer and the Group (as defined below), plans, objectives, goals, strategies and expectations regarding developments in the business, growth and profitability of the Group and general industry and business conditions applicable to the Group and the assumptions underlying these forward-looking statements. The Issuer has based these forward-looking statements on its current expectations, assumptions, estimates and projections about future events. Although the Issuer believes that the expectations, assumptions, estimates and projections reflected in its forward-looking statements are reasonable at the date of this Offering Circular, these forward-looking statements are subject to a number of risks, uncertainties and assumptions that may cause the actual results, performance or achievements of the Group or those of its industry to be materially different from or worse than these forward-looking statements. Any forward-looking statements contained in this Offering Circular speak only as at the date of this Offering Circular. The Issuer does not assume any obligation to update such forward-looking statements and to adapt them to future events or developments except to the extent required by law.

The Issuer does not undertake any obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. In light of these risks, uncertainties and assumptions, the forward-looking events discussed in this Offering Circular might not occur. Any statements regarding past trends or activities should not be taken as a representation that such trends or activities will continue in the future. Investors are cautioned not to place undue reliance on such forward-looking statements, which are based on facts known to the Issuer only as at the date of this Offering Circular. The Issuer has not made any profit forecasts for the current financial year or for the future. It may, however, inform the investment community from time to time of its financial performance or any other material event through regular or ad hoc press releases.

DEFINITIONS AND INTERPRETATION

In this Offering Circular, references to the "**Group**" are to Ethniki Holdings S.à r.l. and its subsidiaries; references to "**Greece**" are to the country, the official name of which is the Hellenic Republic; and references to "**€**" and "**euro**" are to the single currency introduced at the start of the third stage of European economic and monetary union pursuant to the Treaty on the Functioning of the European Union, as amended.

The language of this Offering Circular is English.

References to websites or uniform resource locators ("**URLs**") are inactive textual references and are included for information purposes only. Unless otherwise specified herein, the contents of any such website or URL shall not form part of, and shall not be deemed to be incorporated into, this Offering Circular.

In this Offering Circular, unless the contrary intention appears, a reference to a law or provision of a law is a reference to that law or provision as extended, amended or re-enacted.

PRESENTATION OF FINANCIAL AND OTHER INFORMATION

The 2024 Annual Financial Report, the 2025 Annual Financial Report and the 2026 Six-month Financial Report (each as defined herein) were prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the EU and the financial statements included therein were:

- (i) in respect of the financial statements included in the 2024 Annual Financial Report: audited by PricewaterhouseCoopers S.A., the Issuer's statutory auditors in respect of the year ended 31 December 2024;
- (ii) in respect of the financial statements included in the 2025 Annual Financial Report: audited by Deloitte Certified Public Accountants S.A., the Issuer's statutory auditors in respect of the year ended 31 December 2025; and
- (iii) in respect of the financial statements included in the 2026 Six-month Financial Report: reviewed by Deloitte Certified Public Accountants S.A., the Issuer's current statutory auditors.

The 2024 Annual Financial Report presents both consolidated and unconsolidated financial information of the Issuer, while the 2025 Annual Financial Report and the 2026 Six-month Financial Report present only unconsolidated financial information of the Issuer and, accordingly, the comparative financial information in the 2025 Annual Financial Report and the 2026 Six-month Financial Report relates to unconsolidated financial information only.

During 2025, a number of significant transactions occurred which altered the structure of the Group. In particular, the Issuer completed the sale of its former subsidiaries, Ethniki Insurance (Cyprus) Limited and Garanta Asigurari S.A. The impact of these disposals on the Issuer's separate financial statements is described, as applicable, in notes 10, 13, 16 and 23 to the financial statements of the Issuer for the year ended 31 December 2025, as included in the 2025 Annual Financial Report.

In September 2025, the Issuer entered into an agreement with the Syngelidis Group for the acquisition of a 55 per cent. majority interest in ELYZE ANONYMI ETAIREIA ASFALISTIKON PRAKTORON KAI SYNTONISTON ASFALISTIKON PRAKTORON S.A. ("**Elysee Insurance Agent & Coordinator S.A.**") and ELYZE MESITES ASFALISEON S.A. ("**Elysee Insurance Brokers S.A.**"). On 26 November 2025, Piraeus Financial Holdings S.A. (absorbed by Piraeus Bank S.A. ("**Piraeus**") in December 2025) completed the acquisition from CVC Capital Partners Fund VII and National Bank of Greece of 100 per cent. of the shares of the Issuer's parent company, Ethniki Holdings S.à r.l. ("**Ethniki Holdings**"). In accordance with IFRS 10 Consolidated Financial Statements, a parent that is itself a subsidiary (for example, the Issuer, being a parent company as well as a subsidiary of Piraeus) is not required to prepare consolidated financial statements and, accordingly, the Issuer was not required to prepare consolidated financial statements for the year ended 31 December 2025.

It should be noted that the subsidiaries that remain under the control of the Issuer at the date of this Offering Circular (but which are not fully included in the unconsolidated accounts of the Issuer) had total assets of €3.6 million (2024: nil), net assets of €2.6 million (2024: nil) and revenue of €0.3 million (2024: nil) as at and for the year ended 31 December 2025. As at and for the six-month period ended 30 June 2026, such subsidiaries had total assets of €4.1 million, net assets of €3.0 million and revenue of €1.2 million. Such subsidiaries appear in the unconsolidated financial statements of the Issuer as investments held at cost less any impairment loss; see further notes 2.4 (*Exemption from Presenting Consolidated Financial Statements*) and 16 (*Investment In Subsidiaries*) to the financial statements of the Issuer for the year ended 31 December 2025, as included in the 2025 Annual Financial Report.

Certain financial and other information presented in this Offering Circular has been prepared on the basis of the Issuer's own internal accounts, statistics and estimates, and has not been subject to any audit or review by the Issuer's statutory auditors.

The Issuer's financial year ends on 31 December of each year. References to any financial year refer to the year ended 31 December of the calendar year specified.

Certain monetary amounts and other figures included in this Offering Circular have been subject to rounding adjustments. Accordingly, any discrepancies in any tables between the totals and the sums of the amounts listed are due to rounding.

RISK FACTORS

The Issuer believes that the following factors may affect its ability to fulfil its obligations under the Notes. Most of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring.

In addition, factors which are material for the purpose of assessing the market risks associated with the Notes are also described below.

The Issuer believes that the factors described below represent the principal risks inherent in investing in the Notes but the inability of the Issuer to pay interest, principal or other amounts on or in connection with the Notes may occur for other unforeseen reasons. Prospective investors should also read the detailed information set out elsewhere in this Offering Circular and reach their own views prior to making any investment decision.

THE PURCHASE OF THE NOTES MAY INVOLVE SUBSTANTIAL RISKS AND MAY BE SUITABLE ONLY FOR INVESTORS WHO HAVE THE KNOWLEDGE AND EXPERIENCE IN FINANCIAL AND BUSINESS MATTERS NECESSARY TO ENABLE THEM TO EVALUATE THE RISKS AND THE MERITS OF AN INVESTMENT IN THE NOTES. PRIOR TO MAKING AN INVESTMENT DECISION, PROSPECTIVE INVESTORS SHOULD CONSIDER CAREFULLY, IN LIGHT OF THEIR OWN FINANCIAL CIRCUMSTANCES AND INVESTMENT OBJECTIVES, ALL THE INFORMATION SET FORTH IN THIS OFFERING CIRCULAR AND, IN PARTICULAR, THE CONSIDERATIONS SET FORTH BELOW. PROSPECTIVE INVESTORS SHOULD MAKE SUCH ENQUIRIES AS THEY DEEM NECESSARY WITHOUT RELYING ON THE ISSUER OR THE JOINT LEAD MANAGERS.

INVESTING IN THE NOTES INVOLVES A HIGH DEGREE OF RISK AND POTENTIAL INVESTORS SHOULD BE PREPARED TO SUSTAIN A LOSS OF ALL OR PART OF THEIR INVESTMENT IN THE NOTES.

Prospective investors should read the entire Offering Circular. Words and expressions defined in the "Terms and Conditions of the Notes" below or elsewhere in this Offering Circular have the same meanings in this section. Investing in the Notes involves certain risks. Prospective investors should consider, among other things, the following:

FACTORS THAT MAY AFFECT THE ISSUER'S ABILITY TO FULFIL ITS OBLIGATIONS UNDER THE NOTES

The risk factors described in this section are presented in the context of the Issuer and its business. Under the Conditions, certain of the circumstances in which the Issuer will be required to cancel payments of interest or defer payments of principal in respect of the Notes and/or to Write Down the Notes relate to matters concerning the Group. Accordingly, the value of the Notes may also be affected if any of the risks below materialise in respect of other members of the Group from time to time. As at the date of this Offering Circular, the Issuer is the primary insurance undertaking within the Group. For the purposes of this "Risk Factors" section only, references to the Issuer and its business include references to the Group where the context so admits.

Financial and economic risks

The level of, and volatility in, interest rates may adversely affect the Issuer's businesses.

To be able to meet their future liabilities, insurers (including the Issuer) invest in a variety of assets that typically include a large portfolio of fixed income securities. Interest rate volatility can adversely affect

insurance businesses by reducing the returns earned on, and by reducing the market value of, such portfolios. Interest rates are sensitive to many factors, including governmental, monetary and tax policies, domestic and international economic and political considerations, inflation, governmental debt, the regulatory environment and other factors that are beyond the Issuer's control.

In particular, the Issuer, as with the wider insurance sector, can be adversely impacted by sustained low interest rates. In times of low interest rates – as experienced between 2008 and 2022 – investment yields typically decrease. Consequently, when securities in the insurer's existing portfolio mature, the sums realised are reinvested in securities with lower yields, which in turn decreases the investment income of the insurer. A protracted period of low interest rates has a negative impact, especially on life insurers with substantial interest rate guarantees on a traditional book of business where the portfolio yield approximates the guaranteed interest rate on the policies written. Persistently low interest rates not only render delivering the necessary return for clients or offering competitive profit sharing more difficult but also hamper efforts to maintain profitability. Low interest rates also make it difficult to continue to offer clients attractive life insurance and pension products, which may lead to a reduction in new business and hence have a negative impact on the Issuer's results of operations. Additionally, if interest rates decrease, life insurance reserve liabilities (particularly long-tail liabilities) may experience significant fair value increases, potentially leading to negative solvency impacts (i.e. in case of a positive interest rate gap).

Conversely, in an environment of rising interest rates, the value of fixed income investments held by the Issuer may decline, leading to lower unrealised gains or higher unrealised losses. This scenario could put pressure on the Issuer's investment results, affecting its ability to generate adequate returns on its investment portfolio.

Moreover, in periods of rising interest rates, there is a heightened risk of policy lapses within the Issuer's insurance policies. Policyholders may be inclined to seek higher returns available in the market, leading to increased surrender rates. This trend could result in liquidity challenges for the Issuer, as it would need to fulfil cash payment obligations to policyholders seeking to withdraw funds. To meet these obligations, the Issuer may be compelled to sell its investment assets at discounted prices, thereby incurring investment losses.

The environment of increasing interest rates and increased volatility in interest rates seen in recent years underscores the relevance of this risk. There is also uncertainty regarding the future direction of rates, as central banks may adjust monetary policy in response to inflation, economic growth, uncertainty and conflict in the Middle East or other factors.

Both upward and downward movements in interest rates could have material adverse effects on the Issuer's premiums, investment income, and overall financial outlook. To reduce the interest rate sensitivity of its business, the Issuer attempts to match its liabilities with assets whose sensitivity to interest rates is similar to that of the liabilities, thereby compensating the interest rate risk. However, to the extent that such asset liability matching is not practicable or fully achieved, fluctuations in the value of assets and liabilities as interest rates change may have a negative effect on the Issuer's financial condition and results of operations.

The Issuer is vulnerable to credit spread risk with respect to its fixed income portfolio.

Like most insurance companies, the Issuer has a significant fixed income portfolio in which assets are typically matched against its insurance liabilities. Its exposure to credit spreads primarily relates to market price and cash flow variability associated with changes in credit spreads. A spread widening will reduce the value of fixed income securities held and, conversely, spread tightening will generally increase the value of fixed income securities in the portfolio. A number of factors can cause an individual asset or a whole class of assets to decrease in market value, including a perception or fear in the market that there is an increase in the likelihood of defaults.

Although the Issuer has developed tools designed to enable it to closely monitor and manage its credit spread risk, there can be no assurance that these will be fully effective in all circumstances and spread widening could have a material adverse effect on its results of operations and financial condition.

The Issuer is exposed to counterparty default risk, which could have a material adverse effect on its results of operations and financial condition.

The Issuer is exposed to default risk, which is the risk that third parties owing money, securities or other assets to the Issuer do not pay or fulfil their obligations when due. These parties may include trading counterparties, counterparties under credit and derivative contracts, clearing agents, exchanges, clearing houses, reinsurers, bond issuers, banks, insurance clients, ceding companies and financial intermediaries. Third parties may default on their obligations to the Issuer due to bankruptcy, lack of liquidity, a downturn in the economy or real estate values, operational failure, fraud or other reasons.

Although the Issuer has developed tools designed to enable it to closely monitor default risk, there can be no assurance that these will be fully effective in all circumstances and any such third-party defaults could negatively impact the Issuer's results of operations and financial condition.

The Issuer is subject to the risk of potential sovereign debt credit deterioration because of its substantial exposure to sovereign debt obligations in its investment portfolio.

The Issuer holds a large proportion of sovereign bonds in its investment portfolio. As at 31 December 2025, the Issuer's investments in bonds, excluding placements in unit-linked portfolios, amounted to €2,265 million, of which approximately 78.5 per cent. were government bonds and government guaranteed (explicit guarantee) bonds. As at 30 June 2026, the Issuer's investment in bonds, excluding placements in unit-linked portfolios, amounted to €2,307 million, of which approximately 79.9 per cent. were government bonds and government guaranteed (explicit guarantee) bonds. The allocation between 'core' and 'periphery' countries' sovereign bonds is approximately 72 per cent. in core countries (Germany, France, The Netherlands, Belgium, Finland, Austria, the USA and supranational organisations) and 28 per cent. in periphery countries (Greece, Italy, Spain, Portugal, Cyprus, Ireland and Romania) (see section "*Description of the Issuer – Total investment portfolio*" for further information). Consequently, the Issuer is subject to the risk of potential sovereign debt credit deterioration and default. Investing in such instruments creates exposure to the direct or indirect consequences of political, social or economic changes (including changes in governments) and to the creditworthiness of the sovereign. The risk exists that the debt issuer may be unable or unwilling to repay principal or pay interest when due in accordance with the terms of such debt and the Issuer may have limited recourse to enforce payment in the event of a default. A sovereign debtor's willingness or ability to repay principal and to pay interest in a timely manner may be affected by different factors (such as the relative size of the debt service burden to the economy as a whole) that are beyond the Issuer's control. Periods of economic and geopolitical uncertainty may affect the volatility of market prices of sovereign debt to a greater extent than the volatility inherent in debt obligations of other types of issues. If a sovereign were to default on its obligations, this could have a material adverse impact on the Issuer's financial condition and results of operations.

Uncertainty over the fiscal policies of some European governments (especially following the military conflict between the Russian Federation and Ukraine and ongoing uncertainty and conflict in the Middle East, which have provoked volatility in financial markets globally), their consequences, and the response of the EU, may trigger a re-emergence of a sovereign debt crisis in highly-indebted EU member states (as was experienced by several Eurozone members, including Greece, following the 2008 financial crisis). A default or debt restructuring by a sovereign issuer, with possible 'knock-on' effects on other sovereign issuers and on the financial markets in general, could still have a potentially material adverse effect on the Issuer's results of operations or financial condition.

The Issuer's largest government bond positions (including government guaranteed (explicit guarantee) bonds) are in German government bonds (amounting to €467.2 million, representing 20.6 per cent. of the Issuer's total investment in bonds, as at 31 December 2025, including bonds guaranteed by the German government), French government bonds (amounting to €207.7 million, representing 9.2 per cent. of the Issuer's total investment in bonds as at 31 December 2025) and Netherlands government bonds (amounting to €170.3 million, representing 7.5 per cent. of the Issuer's total investment in bonds, as at 31 December 2025). Accordingly, the Issuer is exposed to the risks associated with the political and economic situation in the Eurozone, which could have a significant impact on the value of the Issuer's investment portfolio. A sovereign debt default or restructuring by a government (or government-backed) issuer in the Eurozone or elsewhere could have potentially significant negative consequences both for the holders of such debt and for the stability of the broader financial markets and the insurance sector. Although the Issuer monitors its sovereign debt exposure closely, any of these events, depending on their specific nature and magnitude, could have a material adverse effect on the results of operations and financial condition of the Issuer.

Stock market volatility or downturns can adversely affect the activities of the Issuer.

Stock market volatility and overall declines in stock market indices can negatively affect the Issuer's activities and solvency position. Volatility can also negatively affect the demand for certain insurance products, such as unit-linked products. Stock market downturns and high volatility can occur not only as a result of the economic cycle, but also as a result of war, acts of terrorism, natural disasters, pandemics, geopolitical events, changes in international trade policies or other events outside the Issuer's control.

As at 31 December 2025, the Issuer's investments in equities (excluding unit-linked portfolios and participations) amounted to €77.7 million (2024: €72.9 million) with approximately 52 per cent. in listed equities (2024: 47 per cent.) and 48 per cent. (2024: 53 per cent.) in unlisted equities, which are presented as private investment funds in the Issuer's financial statements. While the Issuer has implemented tools and risk management strategies designed to enable it to closely monitor and manage its equity portfolio, a significant decline in the market values of its equity portfolio could have a material adverse effect on the Issuer's results of operations and financial condition.

Fluctuations in currency exchange rates may affect the Issuer's results of operations and solvency.

The Issuer is exposed to foreign currency fluctuations through its investments. While the Issuer aims to manage almost all of its exposure to foreign currency fluctuations through hedging instruments, fluctuations in exchange rates may still have a significant impact on the Issuer's results of operations and cash flows. While the Issuer uses a standard range of instruments and strategies to hedge against currency risk, where it arises, these instruments and strategies may prove ineffective or only partially effective and as a result the Issuer may suffer losses.

The Issuer's exposure to fluctuations in the property markets could adversely affect its returns on invested assets, the value of its investment portfolio or its solvency position.

The Issuer has significant real estate investments and hence it is exposed to property risk. As at 31 December 2025, the total fair value of the Issuer's properties (including own-use, investment property and held-for-sale) amounted to €176.1 million (2024: €195.3 million), with the majority located in the Attica region (89 per cent.) and primarily intended for own and commercial use. As at 30 June 2026, the total fair value of the Issuer's properties (including own-use, investment property and held-for-sale) amounted to €144.6 million. The decrease, compared to the position as at 31 December 2025, was driven by sales of properties in the first six months of 2026.

The value of the property portfolio of the Issuer is subject to risks related to, amongst others, rent levels, property prices, occupancy levels, consumer spending, interest rates and the volatility of lease laws.

Since the majority of the Issuer's real estate investments are located in the Attica region, any adverse changes to the property market in the Attica region may have a significant impact on the Issuer's property portfolio.

Although the Issuer has implemented tools designed to enable it to closely monitor the real estate risk to which it is exposed, a significant decline in the market values of its property investments could have a material adverse effect on its business, revenues, results of operations and financial condition.

Asset illiquidity can adversely affect the Issuer and the Issuer's businesses.

Market liquidity risk in the Issuer's business stems from the liquidity characteristics of assets purchased and liabilities sold. Some liabilities arising from life insurance products can be surrendered while others, such as liabilities arising from pension insurance, term insurance and annuities, are highly illiquid. The illiquidity of some life insurance products is heightened by Greek tax regulation and built-in penalties in case of surrender.

Assets are characterised by a different degree of liquidity, going from highly liquid (cash) to less liquid (for example real estate, real estate funds and other direct lending credit funds). Additionally, protracted market declines can reduce the liquidity of markets that are typically liquid.

Funding liquidity risk is the inability to meet expected and unexpected cash demands of policyholders or other contract holders without suffering unacceptable losses.

While the Issuer has implemented tools and risk management strategies designed to enable it to closely monitor and manage its liquidity risk, if it were to become unable to fund its liabilities this could have a material adverse effect on the Issuer's results of operations and financial condition, as well as its reputation.

A sustained increase in inflation rates may negatively affect the Issuer's business, solvency position and results of operations.

Inflation, as measured by consumer price indices or other means, is a continuing risk. The military conflict between Russia and Ukraine that started in 2022 led to severe economic impacts for the global economy. Russia and Ukraine are important suppliers of raw materials such as energy, metals, and agricultural products. Consequently, the war generated a shortage of these resources and accelerated price increases. The ongoing uncertainty and conflict in the Middle East has already had and may continue to have significant economic impacts, including increased volatility in oil and gas prices worldwide, particularly if ships are unable to transit the Strait of Hormuz safely. There are concerns that volatility in the price of these input factors could translate into higher operating and manufacturing costs, which in turn could translate into higher prices and permanently higher inflation expectations. A sustained increase in the inflation rate in Greece would have multiple impacts on the Issuer and may negatively affect its business, solvency position and results of operations. For example, a further sustained increase in the inflation rate may result in an increase in market interest rates which may in turn (i) decrease the estimated fair value of certain fixed income securities the Issuer holds in its investment portfolio, resulting in a higher level of unrealised losses or reduced levels of unrealised gains available to the Issuer and which could negatively impact its solvency position and net income, and (ii) result in increased surrenders of certain life and pension products, particularly those with fixed rates below market rates. This may also require the Issuer to pay higher interest rates on debt securities that it might issue in the financial markets from time to time.

Whilst the inflationary environment has shown signs of moderation in some markets, inflation rates nonetheless generally remain above pre-2022 levels, including across Europe. This environment has continued to have a negative impact on markets generally, an impact exacerbated by the ongoing uncertainty and conflict in the Middle East, the long-term inflationary effects of which remain to be

seen. A sustained decline in markets may (i) result in impairment charges to securities that the Issuer may hold in its investment portfolio and increase levels of unrealised losses or reduce levels of unrealised gains available to the Issuer, which would in turn reduce net income and negatively impact the Issuer's solvency position and (ii) negatively impact performance, future sales and surrenders of unit-linked products and traditional life insurance policies with guarantees where the underlying investments are often allocated to equity funds, both of which may have a negative impact on the Issuer's results of operations.

A sustained deflationary environment may affect the Issuer's business in different ways.

In a deflationary period, consumption delays (resulting from consumption postponement due to expected price decreases) may cause a drop in the level of aggregate demand which may lead to a drop in the level of inflows and higher profits pressure if pricing falls below costs. The life insurance industry may be negatively affected by sustained deflationary pressures. Since many products provide for a minimum rate of return guarantee, any scenario that leads to deflation or sustained periods of very low inflation, may make it difficult for the Issuer to earn at least the promised rate guarantees, especially in respect of long-tail life insurance products.

The Issuer's performance is dependent on macroeconomic conditions in the countries where it operates, particularly in Greece.

Since the Issuer currently conducts the overwhelming majority of its business in Greece, macroeconomic developments and political conditions in Greece affect the Group's business directly and significantly. Thus, a decline in Greek economic activity may have a material effect on the Issuer's financial condition and results of operations. A deterioration in Greece's economic performance and/or uncertainty regarding the implementation of political measures may also have a material effect on the Issuer's financial condition and results of operations.

Between 2010 and 2018, the Hellenic Republic experienced substantial strain on its public finances, prompting it to receive financial assistance through three consecutive support programmes backed by the European Commission, the European Central Bank ("ECB"), the European Stability Mechanism ("ESM"), and the International Monetary Fund ("IMF"). This period was marked by serious fiscal challenges and underlying structural weaknesses in the Greek economy. Greece concluded its final three-year ESM financial assistance programme – known as the "Third Economic Adjustment Programme" ("EAP") – in August 2018, after which it transitioned into an enhanced surveillance regime. This framework remained in place until its expiration on 20 August 2022. According to the European Commission, Greece successfully fulfilled the majority of the policy commitments it had made to the Eurogroup at the time of its exit from the EAP in June 2018. Since then, oversight of Greece's economic, fiscal, and financial position has continued through post-programme surveillance mechanisms and the European Semester process, both integral components of the EU's broader economic governance framework.

The macroeconomic landscape for Greece remains sensitive to external shocks, particularly geopolitical tensions and energy price fluctuations affecting travel demand and broader economic conditions. The Greek economy continued to grow in 2025, outperforming the euro area average for a fifth year in a row. Real GDP increased by 2.1 per cent. in 2025 year on year (unchanged from 2024). Inflation in the Greek economy was more or less unchanged in 2025 year on year, with a significant slowdown in the disinflation seen during the 2023-24 period, mostly on account of persistent services inflation. The Harmonised Index of Consumer Prices ("HICP") headline inflation rate fell marginally to 2.9 per cent. (from 3 per cent. in 2024) and remained almost 1 per cent. higher than the respective euro area average (2.1 per cent.) (Source: *Governor's Annual Report, Bank of Greece*).

The below table shows Greece's key macroeconomic indicators for the years 2021 to 2025 (Source: *Bank of Greece*):

Greece Key Macroeconomic Indicators	2021	2022	2023	2024	2025
Real GDP Growth (%)	6.19	3.51	2.04	2.25	2.10
Unemployment Rate (%)	13.50	12.20	10.40	9.75	9.25
General government gross debt (% of GDP)	206.3	171.8	159.6	152	149

Economic growth in Greece is projected to moderate in 2026, mainly due to slower consumption growth and a negative contribution from the external sector, in an environment of heightened geopolitical tensions. According to the projections of the Bank of Greece ("**BoG**"), growth is expected to slow to 1.9 per cent. (from 2.1 per cent. in 2025), though remaining faster than the euro area average, with investment being the key driver of growth for yet another year. Disinflation is projected to halt in 2026, due to a resurgence of external cost pressures from international energy markets, with headline inflation rising and remaining above the euro area average. Headline HICP inflation is estimated to rise to 3.1 per cent. (up from 2.9 per cent. in 2025), mainly reflecting renewed and stronger pressures on energy and food prices.

According to the ECB, the Eurozone faces significant macroeconomic headwinds with economic growth projected at just 0.8 per cent. in 2026, reflecting downward revisions driven by the pronounced impact of the war in the Middle East on commodity markets, consumer confidence, and real incomes, which have constrained both consumer spending and business investment. Inflation pressures persist with headline inflation at 3.0 per cent. in 2026, well above the ECB's 2 per cent. target, primarily due to energy price spikes and broader cost pressures relating to Middle East geopolitical conflict, while the labour market remains resilient with unemployment at 6.3 per cent. in April 2026 (close to historical lows) although labour demand has cooled and wage growth is easing. The Eurozone outlook presents a bifurcated scenario with substantial uncertainty: the baseline projection assumes continued modest growth of 1.2 per cent. in 2027 and 1.5 per cent. in 2028 as energy prices moderate and consumer confidence recovers, versus downside risks of prolonged weakness if energy prices remain elevated and geopolitical tensions escalate, with the ECB maintaining data-dependent policy flexibility through a meeting-by-meeting approach, having raised the three key ECB interest rates by 25 basis points on 11 June 2026 to support growth while combating inflation (Source: *Economic Bulletin Issue 4, 2026, ECB*).

A weaker international economic outlook, together with high geopolitical uncertainty and trade tensions, the premature withdrawal of economic stimuli (both on the monetary and fiscal field) and/or the de-anchoring of long-term inflation expectations pose additional challenges to the stability of the global financial system and to the Greek economy.

Factors such as interest rates, security prices, credit spreads, liquidity spreads, exchange rates, consumer spending, changes in client behaviour, business investment, real estate values and private equity valuations, government spending, inflation or deflation, the volatility and strength of the capital markets, political events and trends, war, terrorism, pandemics and epidemics or other widespread health emergencies all impact the economy and financial markets, whether directly or indirectly, including by increasing the sovereign debt of certain countries, intensifying volatility and widening credit spreads. Such impact could, in turn, have a material adverse effect on the Issuer's business, financial condition, results of operations and prospects, as well as on its ability to access capital and liquidity on acceptable financial terms. An adverse economic environment may also affect the behaviour and financial position of the Issuer's clients, and consequently, the supply and demand of the products and services that the Issuer offers.

These factors, among other things, may restrict the Greek and European economic recovery and the global economy, with a corresponding effect on the Issuer's business, results of operations and financial condition and a negative development of any of the above factors may adversely affect the business and performance of the Issuer.

The structural reform programmes introduced or implemented in Greece, including the Recovery and Resilience Facility, may not achieve their goals or produce the desired effect.

The Greek government implemented significant tax reforms and fiscal measures between 2019 and 2023, including the restructuring of the personal income tax schedule, reductions in tax rates and social security contributions. These reforms have contributed to maintaining revenues broadly stable as a share of GDP while enhancing the progressivity and redistributive capacity of the tax system. Greece is also a beneficiary of the EU's Recovery and Resilience Facility (the "**RRF**"), which provides financial support for structural reforms intended to enhance the Greek economy and guarantee a more resilient future. The structural changes implemented in Greece and the benefits derived from the RRF may not be sufficient and the reforms currently being implemented or contemplated (or any other reform programmes) may not be sustained or, if sustained, may not result in the desired impact on the Greek economy. Any failure to implement or complete recovery reform programmes may have a material adverse effect on the Greek economy and, as a consequence, the Issuer's business, financial condition and results of operations.

The Issuer's business is vulnerable to Greek sovereign exposure.

All of the Issuer's insurance activities and the overwhelming majority of its business are carried out in Greece. The Issuer is thus directly exposed to risks specific to Greece. Specific conditions, including in relation to regulation, political stability, an act of God or any other negative event that could affect Greece, may therefore have a direct and materially adverse impact on the Issuer's activities and profitability.

Political and macroeconomic environment in the EU can adversely affect the Issuer's operations, business and financial conditions.

Sustainable economic growth in the Eurozone continues to be a challenge in certain countries of the Eurozone, including Greece. Slow economic growth or recession in major EU economies, the restructuring or default by an EU Member State on its sovereign debt obligations or withdrawal from the Eurozone, could significantly increase volatility and uncertainty on financial and currency markets. Rising populism and anti-integration movements in Europe, increasing levels of government debt issued to stimulate the European economy during and post-pandemic, external geopolitical tensions such as the possibility of a global or regional trade war, and further deterioration of the economic conditions in Europe and/or financial market volatility could be reflected in a deterioration of market sentiment towards EU member states such as Greece.

The conflict between Ukraine and the Russian Federation continues to have significant economic policy consequences for EU member states, arising from the initial adverse supply shock triggered by the rise in oil and gas prices, energy independence measures, the inflow of refugees and boosted defence spending. Similarly, ongoing uncertainty and conflict in the Middle East is causing significant volatility in energy markets and, in particular, oil and gas prices, which has a knock-on impact on other financial markets. Although the full effect of the conflict is still to be felt, there are concerns that it could trigger a renewed period of increased inflation in the EU that would have a severe effect on the economic conditions of EU member states and, in turn, the Issuer.

Each of these conflicts has increased concerns of a sharp global slowdown, surging inflation and debt, and a possible spike in poverty levels. The negative economic impact may be felt through multiple channels, including commodity and financial markets, international trade, and a corresponding adverse impact on overall market confidence.

In the United States ("US"), President Trump's second presidency has generally been associated with heightened macroeconomic uncertainty stemming from potential shifts in US trade policies, tariffs, and geopolitical strategy. The administration's historically protectionist stance could lead to new trade barriers, disrupting global supply chains and adversely affecting EU exports, production costs, and economic growth. Additionally, policy changes influencing inflation, consumption patterns, or fiscal stimulus measures in the US may have a ripple effect on EU markets, creating volatility and a less predictable economic environment. This uncertainty is exacerbated by broader geopolitical risks, ongoing global elections, advances in artificial intelligence impacting labour markets, and evolving economic dependencies.

Should any or all these risks materialise, the consequences for the underlying economic and financial environment could be adverse and have a material adverse effect on the Issuer's business, financial condition and results of operations.

Impact of US tariff positioning on EU economies.

The Issuer is subject to risks arising from the imposition of tariffs and ongoing volatility in tariff policies, particularly those implemented by the US in relation to the EU. Changes in US tariff positioning, including the introduction of new tariffs or the escalation of existing ones, may have a significant indirect impact on the economic environment in which the Issuer and its policyholders operate.

Ongoing uncertainty regarding the future direction of US trade policy, especially in relation to the EU, creates a volatile operating environment and can contribute to broader economic volatility, including fluctuations in interest rates, exchange rates, and investment market performance. Such volatility may adversely affect the value of the Issuer's investment portfolio, which is a key component of its ability to meet long-term policyholder obligations. In particular, declines in equity markets, increases in credit spreads, or reductions in the value of fixed income securities could negatively impact the Issuer's financial position and results of operations.

The Issuer may also face challenges in accurately assessing and pricing risks in a volatile economic environment. Uncertainty regarding the duration and severity of tariff disputes, as well as their potential knock-on effects on economic growth and demographic trends, may complicate the Issuer's ability to forecast claims experience and set appropriate premium rates. Prolonged or intensified tariff-related volatility could therefore have a material adverse effect on the Issuer's business, financial condition, and results of operations.

Greece may be subject to rating downgrades.

As at the date of this Offering Circular, Greece has received the following long-term credit ratings: Moody's: Baa3 (stable); S&P Global: BBB (stable); Fitch: BBB (stable); DBRS Morningstar: BBB (stable); and Scope Ratings: BBB (positive).

Whilst the current ratings reflect confidence in the Greek economy, all of the ratings assigned to Greece by such rating agencies were below investment grade as recently as 2023.

A credit rating downgrade may occur in the future due to a number of factors, such as lower than expected tax revenue arising from weaker than expected economic growth, increased public debt as a percentage of GDP, slowdown in corporate sector deleveraging, failure to reduce general public debt, failure to increase GDP ratios, limited access to international financial markets or the failure of structural reforms. Any downgrade in the ratings of Greece's sovereign debt or other negative statements regarding its credit ratings could negatively impact financial institutions in Greece and in particular funding conditions for the Issuer. Furthermore, it could also impact sovereign debt portfolios held by

the Issuer. As a result, an actual or anticipated credit downgrade could materially adversely affect the Issuer's business, financial condition and results of operations.

Insurance liability risks.

The Issuer offers a wide range of products, including in both its Life and Non-Life insurance segments. As at 31 December 2025, the Issuer's total gross written premiums were €834.6 million, comprising €582.0 million on the Life side of the business (including unit-linked products and health insurance) and €252.6 million in Non-Life insurance (including motor, property and other non-life segments). As at 30 June 2026, the Issuer's total gross written premiums were €424 million, comprising €309 million on the Life side of the business (including unit-linked products and health insurance) and €115 million in Non-Life insurance (including motor, property and other non-life segments). This product diversity exposes the Issuer to a broader range of insurance liability risks across multiple lines of business than other insurers in Greece (which are generally limited to offering either life or non-life product lines only).

Experience in the Issuer's Life and Health businesses could be inconsistent with the assumptions the Issuer uses to price its products, which could adversely affect its results of operations.

The results of the Issuer's Life and Health businesses depend significantly upon the extent to which its actual claims experience remains consistent with the assumptions used in the pricing of its products. Life and Health insurance premiums and long-term liabilities are calculated using assumptions as to mortality, disability, interest rates, and expenses used to project future liabilities. Although experience (i.e. the claims and expenses as actually incurred) is closely monitored, there is no guarantee that actual experience will match the assumptions that were used in initially establishing future policyholder benefits and related premium levels.

The actuarial assumptions underlying technical provisions, including mortality, morbidity, lapse and surrender behaviour, expenses, claims frequency, severity and inflation are inherently volatile, as they reflect future events that can only be projected based on historical experience and forward-looking judgement. Their values are sensitive to demographic shifts, medical and technological developments, policyholder behaviour and trends, market conditions, regulatory changes and macroeconomic factors such as interest rates and market performance, all of which can move materially over relatively short horizons. Therefore, even small movements in key assumptions can produce significant changes in the financial statements of an insurance entity. Recognising this volatility, the actuarial function performs regular experience analyses, sensitivity and stress tests, and assumption reviews, ensuring that technical provisions remain a faithful and prudent reflection of the ultimate cost of the Issuer's obligations to policyholders. However, there is no guarantee that these adjustments will be wholly successful or sufficient in mitigating against these movements in key assumptions and the consequent impact on the results of operations of the Issuer's Life and Health businesses. Regulatory constraints may also affect the ability of the Issuer adequately to adjust the price of relevant insurance products, particularly as regards long-term health insurance contracts.

Furthermore, among the Life products marketed or historically sold by the Issuer, a subset of these products is related to contracts with guaranteed investment returns. Interest rates in Europe have experienced notable changes, with recent movements reflecting a shift from the previously sustained lower levels. Since interest rates remain volatile or could increase further, and despite discontinuation of underwriting of certain products with high guaranteed rates, the Issuer could potentially be required to provide additional funds to its Life business to support its obligations in respect of products with higher guaranteed returns, which could in turn have a material adverse effect on the Issuer's financial condition and results of operations.

The Issuer is subject to risks concerning the adequacy of its technical provisions.

The technical provisions of the Issuer are designed to cover the present value of its net future obligations towards policyholders, together with a risk margin (in accordance with Solvency II) and, where applicable, a contractual service margin ("CSM") and risk adjustment (under IFRS 17). They are calculated in respect of the Issuer's Life and Health businesses and include, *inter alia*, mathematical provisions, provisions for reported and unreported claims and unearned premium provisions under the statutory/Solvency II framework, as well as the liability for incurred claims (reported and unreported) and the liability for remaining coverage under IFRS 17. These technical provisions, together with the assets backing them, represent a major part of the Issuer's balance sheet. Their adequacy depends on actual future outcomes, in particular the level, timing, and cost of claims, and should those outcomes deviate adversely from the assumptions underlying the calculation of the related provisions, such provisions, as currently recognised, may prove to be insufficient.

The Issuer's results of operations depend significantly on the extent to which its actual claims experience is consistent with the assumptions used in pricing its products and in establishing its technical provisions and claims liabilities. Reserve estimates are reviewed and adjusted periodically based on the most current information available to management, with any resulting changes recognised either in the current period results of operations or, under IFRS 17, through an adjustment to the CSM for changes relating to future service. Where, for a group of insurance contracts, unfavourable changes in the fulfilment cash flows relating to future service exceed the carrying amount of the CSM, IFRS 17 requires the recognition of a loss component, with the excess charged immediately to the Issuer's profit and loss account.

Although the Issuer maintains actuarial methodologies, experience monitoring processes and a reserving governance framework designed to identify and manage reserve risk on a timely basis, there can be no assurance that its technical provisions will prove sufficient to cover its ultimate insurance losses, expenses, or future policyholder benefits. Should they prove inadequate, the Issuer would be required to strengthen its technical provisions, resulting in a charge to earnings and a reduction in own funds, which could adversely affect its results of operations, solvency position, and financial condition.

The Issuer's Non-Life business is subject to insurance underwriting risks.

Underwriting risk can be generally defined as a change in the value of insurance liabilities which is caused by the final costs for full contractual obligations varying from those assumed when these obligations were estimated. Non-Life insurance underwriting risks are divided into premium risk, catastrophe risk and reserve risk.

Premium risk relates to future claims resulting from expected insured events which have not occurred by the balance sheet date. The frequency, severity and timing of insured events, and hence future claims, may differ from those expected. As a result, the claims cost for future claims exceeds the expected level resulting in a loss or adverse changes in the value of insurance liabilities.

Catastrophe risk can be seen as an extreme case of premium risk. It is the risk of extreme or exceptional events, such as natural disasters (for example, windstorms, floods, cloudbursts, snowstorms, fires and hail) or man-made catastrophes such as acts of terrorism, where the pricing and setting of provisioning assumptions include significant uncertainty. These events may lead to significant deviations between actual claims and the total expected claims, resulting in a loss or adverse changes in the value of insurance liabilities.

Reserve risk relates to incurred claims resulting from insured events which have occurred at or prior to the balance sheet date. The final amount, frequency and timing of claims payments may differ from those originally expected. In particular, cost inflation assumptions are important in the underwriting process. The extent of cost inflation risk is largely dependent on the type of product and business. For

example, the Health business is exposed to medical and healthcare costs as well as legislative changes in respect of injury compensation. Other reserve risks also stem from uncertainty in the claim amounts caused by higher-than-expected claims inflation, increased retirement age and increased life expectancy. Should the Issuer's estimation of cost inflation be inadequate, the premium indexation may be too low. As a result, technical provisions will not be sufficient to cover the cost for already incurred claims and there will be a loss or adverse change in the value of insurance liabilities.

Realisation of risks that are larger than anticipated at the time of pricing is possible and may have a material adverse effect on the Issuer's business, operations and financial condition.

Financial results may be affected by insurance claims.

Insurance claims are the Issuer's principal expense, and it could take several years before all claims that have occurred during any given accounting period are reported and settled. Accordingly, the frequency and severity of incurred and reported insurance claims are an important part of the Issuer's overall profitability, and fluctuations in insurance claims can have a material effect on its results of operations. Furthermore, the diversity of the Issuer's insurance risks makes it more difficult to identify individual judgments and assumptions that are more likely than others to have a material impact on the future development of its insurance liabilities. For example, the estimation of provisions for the ultimate costs of liability-, personal accident- and illness-related claims is subject to a range of uncertainties that are generally greater than those encountered for other classes of business (such as motor or property), due to the slow emergence and longer settlement period for these claims. In addition, any unexpected adverse changes in the rate of claims inflation, cost inflation or in the cost and availability of reinsurance protection may have a material adverse effect on the Issuer's financial position, solvency, results of operations and cash flows. Changes in these factors can be very difficult to predict, and recent years have been characterised by dramatic weather conditions leading to a significant number of insurance claims.

The Issuer is exposed to longevity risk in its annuity portfolio.

Uncertainty in the future development of longevity is inherent to a long-term life insurance business and cannot be fully eliminated. A strengthening of the longevity assumption (that is, an assumption that policyholders, on average, live longer than previously expected) may be required to reflect either changes in the life expectancy of the general population (for example, as a result of healthier lifestyles, or the increased availability and effectiveness of medical treatments) or changes specific to the experience of the Issuer's own portfolio used to value its long-term business liabilities. Any such strengthening would lead to an increase in technical provisions and, under IFRS 17, to a corresponding reduction in the CSM.

Reinsurance may not be adequate to protect the Issuer against losses, and it may also incur losses due to the inability of its reinsurers to meet their obligations.

In the normal course of its business, the Issuer has transferred exposure to certain risks in its Life and Non-Life insurance businesses to others through reinsurance arrangements. Under these arrangements, reinsurers assume a portion of the Issuer's losses and expenses associated with reported and unreported losses in exchange for a portion of the premiums.

Any decrease in the amount of the Issuer's reinsurance cover relative to its primary insurance liability could increase its risk of loss. Reinsurance arrangements do not eliminate the Issuer's obligation to pay claims and introduce credit risk with respect to the Issuer's ability to recover amounts due from the reinsurers. While the Issuer monitors the solvency of its reinsurers through a periodic review of their financial statements and reputation and by requiring letters of credit, deposits or other financial measures, as appropriate, the risk of default by a reinsurer cannot be excluded. Any inability of its

reinsurers to meet their financial obligations to the Issuer could materially adversely affect the Issuer's results of operations and financial condition.

The Issuer is subject to emerging insurance risks.

The insurance business and market is subject to emerging risks. By their very nature these risks are evolving, uncertain and difficult to quantify. In non-life insurance, potential emerging insurance risks include, for example, the impact of potential climate change. Emerging insurance risks are managed by monitoring the developments of these risks on the basis of industry research, assessments and scenario analyses and by incorporating these risks into the provisioning and pricing processes to the extent possible. Climate-related risks can be categorised into physical and transition risks. Transition risks refer to risks arising from the shift into a low carbon economy, such as changes in technology, regulation and consumer sentiment. Physical risks can be further classified into long-term weather changes (chronic risks) and extreme weather events such as storms, floods or unforeseen climate events. Although an increased likelihood of extreme weather conditions and natural disasters is included in Issuer's internal risk models and managed with reinsurance programmes and price assessments, there can be no assurance that the Issuer will be able accurately to predict these risks (or the likelihood and magnitude of them) or that the Issuer will be able adequately to reinsure them (where relevant).

Due to the difficulty of predicting these risks, potential emerging insurance risks could have a material adverse effect on the Issuer's business, results of operations and financial condition.

The impacts of transition risks associated with climate change could adversely affect the Issuer's results of operations and its long-term strategy.

The Issuer faces potentially significant risks related to the transition to a lower-carbon economy as climate change continues to move up the agenda of many regulators, governments, non-governmental organisations and investors.

Governmental and corporate efforts to transition to a low carbon economy in the coming decades could have an adverse impact on global investment assets. In particular, there is a risk that this transition, including the related changes to technology, law and policies and the speed of their implementation, could result in some sectors (such as, but not limited to, the fossil fuel industry) facing significantly higher costs and a disorderly adjustment to their asset values.

There is also the potential that certain climate change risk factors have not yet been fully priced in by financial markets, with the risk that sudden late government policy action in response to a failure to achieve emission goals could lead to unanticipated and potentially large shifts in asset valuations for industries required to move rapidly to a net zero emissions position.

If climate considerations are not effectively integrated into the Issuer's investment decisions and fiduciary and stewardship duties this could adversely impact the value and the future performance of its investment assets. The Issuer's business could be adversely affected by this, because where the Issuer's investment horizons are long-term, the relevant assets are potentially more exposed to the long-term impact of climate change and any future changes in policy.

Risks related to deferred tax assets.

The Issuer's deferred tax assets for statutory accounting purposes as at 31 December 2025 amounted to €203.3 million (2024: €184.3 million). As at 30 June 2026, the Issuer's deferred tax assets for statutory accounting purposes amounted to €185.8 million. The recognition of deferred tax assets is determined by reference to the likelihood of recognising sufficient profits in the future to offset losses. This, in turn, depends on the performance of the Issuer as well as applicable tax laws, regulatory requirements and accounting methods. The occurrence of certain events, such as operational earnings being lower than

those currently projected or losses continuing over a longer period than originally planned, or changes in tax legislation, regulatory requirements, or accounting methods could lead to the derecognition of part of the Issuer's deferred tax assets for statutory accounting and/or prudential regulatory purposes.

Additionally, other events such as realising potential gains (i.e. converting unrealised (untaxed) gains into taxable gains), or a drop in prices which reduces unrealised gains or increases unrealised losses may cause an increase in deferred tax assets or a decrease in deferred tax liabilities.

Given that an amount equal to the Issuer's net deferred tax assets (if positive) is deducted from Tier 1 Capital and classified as Tier 3 capital (pursuant to Solvency II), any evolution of deferred taxes in the manner described above may cause a deterioration in the Issuer's overall capital quality, which would cause a reduction in the minimum capital requirement ("MCR") coverage ratio since Tier 3 capital is not taken into account for the purpose of this ratio. In more severe circumstances, it may also cause a reduction in the solvency capital requirement ("SCR") coverage ratio given that Tier 3 capital eligible to cover the SCR is limited to 15 per cent. of the SCR. As at 31 December 2025, only €19.9 million of the Issuer's deferred tax assets were eligible to meet the SCR under such quantitative limits.

A reduction in the Issuer's MCR or SCR coverage ratio could reduce the Issuer's capital headroom and financial flexibility, require it to take remedial management actions or raise additional capital, and adversely affect investor, policyholder, or regulatory perceptions of the Issuer's capital strength. This may, for example, increase the Issuer's funding costs or adversely affect its reputation and could have a material adverse effect on the Issuer's business, financial condition, results of operations and prospects.

Operational risks

Operational risks are an inherent part of the Issuer's business.

The Issuer's business is dependent on the processing of a large number of complex transactions across numerous and diverse products, and is subject to a complex and changing legal and regulatory regime. Additionally, because of the long-term nature of much of the business, accurate records have to be maintained for significant periods. This inherently generates operational risks which relate to the possibility of inadequate or failed internal or external processes or systems, human error, regulatory breaches, employee misconduct or external events such as fraud and cybercrime. These events can potentially result in the irrecoverable loss of essential data, financial loss and harm to the Issuer's reputation.

While the Issuer attempts to keep operational risks at appropriate levels by maintaining a sound and well-controlled environment having regard to the nature of its business, the markets and the regulatory environment in which it operates, these control measures may not mitigate operational risks sufficiently and cannot eliminate them.

Insurance fraud may adversely affect the Issuer's financial results.

Fraudulent insurance claims may be made from time to time which the Issuer is unable to detect, despite having fraud prevention systems and processes in place.

The Issuer is at risk from customers who misrepresent or fail to provide full disclosure in relation to the risk against which they are seeking cover before such cover is purchased and from policyholders who fabricate claims and/or inflate the value of their claims. The Issuer is also at risk from members of its staff who undertake, or fail to follow procedures to prevent, fraudulent activities.

In order to mitigate the risk of fraudulent practice, the Issuer continues to make material investments in staff and systems to work on the identification and prevention of claims fraud and these measures are

regularly reviewed. However, there can be no assurance that the Issuer will be able to adequately identify and address all fraudulent claims.

The risk management framework in place may leave the Issuer exposed to unidentified, unanticipated or incorrectly quantified risks, which could lead to material losses or material increases in liabilities.

The Issuer devotes significant resources to the development and implementation of an effective risk management framework consisting of policies, procedures and assessment methods appropriate to its risk profile and risk appetite. To this effect, the governance structure of the Issuer includes several independent control functions such as the Risk Committee of the Board of Directors (the "**Board**"), the Risk Management Division and the Asset-Liability Committee. The Issuer's risk management system has several elements, including a risk management strategy that outlines the Issuer's risk appetite and risk management policies, and reporting processes implemented in line with the Issuer's overall risk strategy. Nonetheless, these risk management techniques and strategies may not be fully effective in mitigating the Issuer's risk exposure in all economic market environments or against all types of risk, including the risks that the risk management fails to identify or anticipate. The Issuer applies statistical and other tools to arrive at quantifications of risk exposures, such as an own risk and solvency assessment ("**ORSA**") process to evaluate the Issuer's solvency on an ongoing basis. These tools and metrics may fail to quantify current and future risk exposures adequately. In addition, quantified modelling does not take all risks into account and, although it is complemented by a more qualitative approach that takes into account a broader set of risks, this could prove to be insufficient. Unanticipated or incorrectly assessed risk exposures could result in material losses in the Issuer's business.

The Issuer may be unable to attract or retain key qualified personnel.

The Issuer depends on the availability of highly qualified staff in order to be able to carry out its activities appropriately and duly implement its business strategy. In some cases, as a result of the intense competition for certain professional profiles (e.g. actuaries), there may be a risk of not being able to attract or retain key professional profiles, which could have a material adverse effect on the Issuer's business, results of operations and financial position, as well as its reputation.

The Issuer depends on advanced information technology systems.

The integrity, reliability and operational performance of the Issuer's information technology ("**IT**") systems are critical to its operations. The Issuer relies on IT systems, in particular for the purposes of servicing customers, handling claims, control and quality assurance of its distribution network, recording new business, sales volumes and distribution, monitoring the Issuer's investment activities, maintaining its accounting systems and for risk management purposes.

As an insurance undertaking, the Issuer collects and processes significant amounts of sensitive and special categories of personal data (including, but not limited to, name, address, age, medical details and other personal data) from its customers through its distribution partners, business contacts and employees. Despite the controls put in place, there remains a risk that this data could be stolen, lost, corrupted and/or misused as a result of an intentional or unintentional act by parties internal or external to the Issuer, including through the hacking of its IT systems. This could result in fines, the need to compensate customers, the cost of remediation and a negative impact on the Issuer's reputation, with the consequential impact on sales volumes and hence adversely impact its results of operations. The Issuer is required to comply with data protection and privacy laws and industry standards in Greece and the countries of residence of the Issuer's customers. This includes compliance with EU legal frameworks such as the General Data Protection Regulation (EU) 2016/679 ("**GDPR**"). There is a risk that data collected by the Issuer and its third-party service providers is not processed in accordance with notifications made to, or obligations imposed by, data subjects, regulators, or other counterparties or applicable law. Failure to operate effective data collection controls could potentially lead to regulatory censure, fines, reputational and financial costs as well as result in potential inaccurate rating

of risks or overpayment of claims. See also "*Risk Factors – Factors that may affect the Issuer's ability to fulfil its obligations under the Notes – Data protection and GDPR framework/regulations*" below.

Businesses are increasingly becoming targets for cyber-crime, particularly if those organisations retain significant amounts of personal information and migrate some of their operations on to digital platforms. The Issuer is exposed to the risk that the personal data it controls could be wrongfully accessed and/or used, whether by employees or other third parties, or otherwise lost or disclosed or processed in breach of data protection regulations. If the Issuer or any of the third-party service providers on which it relies fails to process, store or protect such personal data in a secure manner or if any such theft or loss of personal data were otherwise to occur, the Issuer could face significant penalties and other liabilities under data protection laws.

Failure of the Issuer's IT systems, including the unsuccessful implementation of standardised processes, inadequate data protection, loss of data and hard or software malfunction, could also lead to difficulties in efficient customer service and claims processing, less effective controlling of distribution partners, and accounting or risk management failures. Such failures may also result in a personal data breach, being a breach of security leading to the accidental or unlawful destruction, loss, alteration, unauthorised disclosure of, or access to, personal data transmitted, stored or otherwise processed by the Issuer, which could expose the Issuer to regulatory sanctions, financial losses and reputational damage.

There can be no assurance that the Issuer's business continuity procedures, disaster recovery systems and security measures in the event of network or IT failure or disruption, protective measures to detect intrusion or other security breaches (such as sabotage, hackers, viruses, cyber-crime and fraudulent activities on the Issuer's systems) will operate as planned, and if its IT systems fail or are compromised the Issuer could face significant disruption in its business.

Any failure of the Issuer's IT infrastructure, systems or protections may require the Issuer to divert substantial systems, financial and marketing resources from other areas to rectify such problems. Deficiencies in the Issuer's IT systems may further cause direct or indirect damages or losses and may lead to significant costs and disruptions that may harm the quality of the Issuer's products and services and its brand and reputation. All of these factors may have a material adverse effect on its business, financial condition and results of operations.

The Issuer continuously monitors and assesses the investment requirements in the renewal or update of its IT infrastructure and systems. In order to maintain the proper operation of its business and in response to changing customer and market expectations, the Issuer is periodically faced with the transition to the next generation of IT systems. The Issuer may be required to incur significant costs to implement the necessary changes to its IT systems. If the Issuer fails to adapt its IT infrastructure and systems to respond to the rapidly changing industry needs in due time, this could have a material adverse effect on its business, financial condition and results of operations.

Strategic risks

The Issuer may be unable to maintain a competitive distribution network which could adversely impact its future business and results.

Although the Issuer makes some limited direct sales via its branch offices, the Issuer relies, and expects to continue to rely, on third party distribution channels for the marketing and offering of its products and services in Greece and elsewhere. Intermediaries, namely insurance agents (whether acting on an exclusive basis or not (including banks)) and insurance brokers, represent important distribution channels for the distribution of the Issuer's products on either an exclusive or a non-exclusive basis.

Although the Issuer's strategic objectives include the diversification of its distribution channels and partners, part of the Issuer's product distribution in Greece is currently carried out through a long-term distribution agreement (the "**NBG Distribution Agreement**") with National Bank of Greece S.A. ("**NBG**"), which (as at the date of this Offering Circular) is expected to be terminated or mature during 2027. Following termination of the NBG Distribution Agreement, cooperation between the Issuer and NBG will continue solely with respect to the administration and servicing of existing long-term policies for their full contractual duration, and for certain categories of yearly renewable policies during an agreed back-end servicing and renewal period. For the financial year ended 31 December 2025, the Issuer generated €143 million (2024: €207 million) of gross written premiums under the NBG Distribution Agreement.

The Issuer is a wholly owned indirect subsidiary of Piraeus, one of the leading banks in Greece, and aspires to expand its distribution network to include customers of the Piraeus group following the termination or maturity of the NBG Distribution Agreement, subject to business, financial, market and other considerations, which is intended to unlock significant bancassurance synergies.

However, as at the date of this Offering Circular, no bancassurance distribution agreement has been signed with Piraeus and no formal decision has been made about any future distribution agreement between the Issuer and Piraeus.

Any failure or significant delay in realising the Issuer's aspiration to put in place bancassurance arrangements with Piraeus would materially affect the way in which the Issuer conducts its business and offers products to its customers and, as a result, materially adversely affect its financial condition and results of operations.

The Issuer faces material risks relating to integration into the Piraeus group.

On 26 November 2025, Piraeus Financial Holdings S.A. completed the acquisition of 100 per cent. of the shares of the Issuer's parent company (Ethniki Holdings) from CVC Capital Partners Fund VII and NBG, following approval by the competent authorities. Following this acquisition, Piraeus has become the sole indirect shareholder of the Issuer. Due to this ownership change, the Issuer may face material risks arising from its integration into the Piraeus group, which could adversely affect its operations, distribution model and financial performance.

The transition from the NBG Distribution Agreement to any potential bancassurance arrangement with Piraeus in the future is not guaranteed and may involve operational, commercial, technological and governance complexities. These may include delays in finalising or implementing such new arrangements, or delays in product onboarding, systems integration, training and certification of the banking network, alignment of sales processes, customer data flows, servicing arrangements, incentive structures and internal controls. If a bancassurance arrangement with Piraeus is made, any failure to implement the transition effectively, or any slower-than-expected ramp-up of sales through the Piraeus network could adversely affect the Issuer's ability to generate new business, retain customers, achieve its strategic growth objectives and realise the expected benefits of its bancassurance strategy. Any failure to agree a formal bancassurance arrangement with Piraeus would have a material adverse effect on the Issuer (see "*Risk Factors – Factors that may affect the Issuer's ability to fulfil its obligations under the Notes – The Issuer may be unable to maintain a competitive distribution network which could adversely impact its future business and results*").

The Issuer may also be exposed to conduct, suitability and customer protection risks arising from the distribution of insurance products through banking channels. If products are not appropriately designed, explained, sold or serviced, or if the banking network does not apply the Issuer's policies and controls effectively, the Issuer may face increased complaints, remediation costs, regulatory scrutiny and reputational damage. The Issuer's growth plan includes a successful migration and scaling of its bancassurance model with Piraeus, while sustaining productivity and loyalty across its agency and

broker channels. Failure to execute this multi-channel distribution model could materially affect new business, retention, profitability and strategic delivery.

More generally, the integration of the Issuer into Piraeus requires the alignment of systems, processes and governance frameworks, which may result in operational challenges. Differences in legacy IT infrastructure and data architecture may lead to data inconsistencies and migration errors, potentially disrupting core insurance operations. In addition, the harmonisation of processes, as well as the transition to Group-wide governance and control frameworks, may increase operational complexity, execution risk and the overall compliance burden, particularly during the transition period. These factors may give rise to service disruptions, control gaps or increased costs, and may delay the anticipated synergies of the integration.

There can be no assurance that the anticipated synergies from the integration will be realised within the expected timeframe, or at all, and any failure to manage the integration process effectively and/or ensure that the Issuer's distribution arrangements transfer to a new arrangement with Piraeus may have a material adverse effect on the Issuer's business, financial condition and results of operations.

Effects of acquisitions and strategic alliances.

The Issuer monitors and assesses organic and inorganic growth opportunities on an ongoing basis, and regularly engages with potential partners to explore opportunities for expansion of the Issuer's product offering and distribution channels. For example, in September 2025, the Issuer entered into an agreement with the Syngelidis Group for the acquisition of a majority stake (55 per cent.) in the insurance broker companies Elysee Insurance Agent & Coordinator S.A. and Elysee Insurance Brokers S.A., which operate across all insurance lines in Greece.

In relation to any inorganic growth opportunities, the Issuer uses caution and professional criteria during the process of selection and analysis of potential targets. Initially, the Issuer assesses the strategic fit of any potential target and, at a more advanced stage, if the target is suitable following the preliminary assessment, the Issuer appoints advisors to support the Issuer across the acquisition stage. However, notwithstanding the Issuer's prudent approach, such opportunities present a number of risks, including (but not limited to) the following: the Issuer may incur significant costs in pursuing opportunities, whether or not such opportunities come to fruition; the costs of integration following a successful acquisition may be higher than budgeted for; pursuing and implementing strategic partnerships and acquisitions may divert significant amounts of management time and attention away from the Issuer's other operations; and the Issuer's due diligence may fail adequately to identify or quantify latent legal, regulatory, conduct, tax or other liabilities within the acquired business, and/or the contractual protections the Issuer seeks to put in place in connection with any such transaction may be insufficient to adequately protect it against such liabilities. The materialisation of any of these risks could have a material adverse impact on the Issuer's business, financial condition and results of operations.

In addition, the practical requirements of integrating newly acquired businesses into the Issuer's operating model may introduce significant operational risk as well as additional costs. Such operations require significant senior management time, and costs may exceed those originally anticipated and budgeted for at the time of the original acquisition, in particular if any unforeseen issues arise, which may diminish the overall value of the acquisition for the Issuer. Should these operations, or similar strategic, technological or administrative integrations of future acquisitions, not go to plan, the Issuer's ability to support its existing customers or issue new business could be materially affected, adversely impacting its reputation and potentially triggering surrenders. All these factors could have a material adverse effect on the Issuer's financial condition and results of operations.

The insurance sector is being challenged by disruptive technologies, 'insurtech' companies and new market trends.

The Issuer is committed to driving innovation within the insurance sector, focusing on delivering attractive health protection and savings products to customers and supporting distribution partners with high service standards. The Issuer's business is tailored to the Greek market. As at the date of this Offering Circular, the Issuer's products are primarily distributed through insurance agents and brokers.

In general, technology and innovation play a crucial role in promoting operational efficiency and risk mitigation. In 2025, there was notable progress in the development of various artificial intelligence ("AI") tools, which present both significant benefits and material risks, requiring a coordinated approach among policymakers, companies, and society at large.

These tools offer significant opportunities to boost efficiency and productivity by exploring new models of defence and security, innovation in healthcare, and combating climate change through resource optimisation, while supporting individuals in a manner that safeguards fundamental rights, ensures appropriate human oversight and promotes transparency and accountability in AI-driven outcomes. However, they also bring intrinsic risks related to ethics, data protection, AI hallucinations and other errors, and cybersecurity, with a considerable risk of exacerbating social and economic disparities, especially where access to technology is unequal.

Should the Issuer adopt and integrate AI tools to automate aspects of how it grants and prices policies, the Issuer would be particularly exposed to the risks of AI highlighted above.

If the Issuer fails to adequately adapt its business strategy to the changing environment, this may have a material adverse effect on its prospects, business, financial condition and results of operations.

The Issuer operates certain functions through arrangements with third parties, and this may expose it to additional risks.

The Issuer's product distribution in Greece is currently being carried out through its network of agents (including exclusive and non-exclusive insurance agents) and brokers, including NBG which will continue servicing the existing portfolio as described above (see also "*Risk Factors – Factors that may affect the Issuer's ability to fulfil its obligations under the Notes – The Issuer may be unable to maintain a competitive distribution network which could adversely impact its future business and results*" above).

The Issuer also outsources certain claims handling services, technology, asset management and other activities to third parties and may choose to do so increasingly in the future.

If the Issuer does not effectively develop, implement and maintain its outsourcing strategy, third-party providers do not perform as anticipated or the Issuer experiences technological or other problems with a transition to or between such providers, the Issuer may not realise the full extent of productivity improvements or administration and cost efficiencies and, as a result, may experience operational difficulties, increased costs and a loss of business. In particular, failings by the Issuer to engage partners to perform outsourced functions, or to perform them to the required standards, may adversely affect the Issuer's reputation and lead to loss of customers, reduced operating profit and regulatory fines.

The failure or inability to diversify sources for key services or the failure of any key partners to fulfil their obligations could lead to operational issues for the Issuer that could have a negative impact on the quality of service provided to its clients, negatively impact on operations and result in financial losses.

Business risks

The Issuer's performance is subject to substantial competitive pressure that could adversely affect its results.

There is substantial competition in the insurance market in Greece, the market in which the Issuer offers both life and health and non-life insurance products.

In Greece, the financial crisis of 2008 and the introduction of new solvency capital requirements in 2016 following the adoption of Solvency II in the EU, have strongly impacted the financial landscape, as they put life insurers under pressure to generate profitability in a mature environment. To manage capital requirements imposed by Solvency II rules, insurers have invested more in safe-haven investments and tried to shift product offerings from high capital consuming savings products to unit-linked and risk offerings. This challenge has led to guaranteed interest rate decreases in life insurance products.

In addition to consolidations and partnerships, insurers in Greece are also exploring different approaches to distribution as an alternative response to challenges they have encountered or expect to encounter in the future. Online aggregators have also introduced new platforms for consumers allowing them more easily to compare insurance premiums.

Consumer demand and awareness also affect competition, in particular as a result of technological advances and the impact of media, in particular social media. Consumers have become more knowledgeable, price conscious and risk averse, demanding more convenience and transparency.

The Issuer competes with some of the largest insurance groups, banks, brokers, asset management and financial service companies, some of which have significant financial, technical and operational resources and are therefore able to offer alternative products to those of the Issuer or do so at more competitive prices.

The Issuer operates in a significantly concentrated and highly competitive market that constantly seeks to develop new products and distribution channels. If the Issuer is unable to offer competitive and attractive products profitably, it may lose market share and/or incur losses on some of its activities and/or in some of the markets where it operates. Competitive pressure could further result in increased pricing pressure, particularly as competitors seek to win market share, which may impair the ability of the Issuer to maintain or increase profitability.

Difficult market conditions and business cycles may adversely affect the Issuer's business and profitability.

The Issuer's business is affected by changing general market conditions, which can cause its results to fluctuate from year to year, as well as on a more long-term basis. These conditions include economic cycles such as insurance industry cycles and financial market cycles, including volatile movements in market prices for securities. Fluctuations in interest rates, credit spreads, consumer and business spending, demographics and other factors also influence the performance of the Issuer's business.

Market conditions continue to be volatile and there can be no assurance as to the effect of this volatility, particularly if it is prolonged, on the results of the Issuer's operations. The Issuer may experience the negative effects of changing market conditions on its results of operations and financial condition.

Legal and regulatory risks

There are continuing changes to the implementing measures under the Solvency II regime and the Insurance Recovery and Resolution Directive that could have adverse effects on the insurance sector as a whole and on the Issuer in particular.

The EU has developed a solvency framework for insurance and reinsurance companies operating in the EU, referred to as "Solvency II". The adoption of the Solvency II Directive, which has been transposed into Greek law by Law 4364/2016, marked an important step in this major reform. The Solvency II Directive entered into force on 1 January 2016. While a number of changes have since been implemented, further changes remain to be implemented.

The Solvency II approach to solvency is based on the concept of three pillars:

- Pillar 1 – eligible funds and capital requirements;
- Pillar 2 – supervisory review of the company's assessment of risk; and
- Pillar 3 – enhanced disclosure requirements.

A key aspect of Solvency II is that capital requirements are assessed on a risk-based approach.

On 10 October 2014, the European Commission adopted the Solvency II Regulation supplementing Directive 2009/138/EC on valuation and risk-based capital requirements (pillar I), enhanced governance (pillar II) and increased transparency (pillar III).

Since the implementation of the Solvency II regime, further changes to the rules have been introduced, and additionally the European Insurance and Occupational Pensions Authority ("EIOPA") has already issued two sets of advice to the European Commission on specific items in the Solvency II Regulation.

On 28 January 2025, the IRRD entered into force. EU member states are required to implement the IRRD into their national laws by 29 January 2027. Greece has not implemented the IRRD as at the date of this Offering Circular.

The IRRD provides for (i) a variety of preventive measures to reduce the likelihood of insurance undertakings requiring public financial support, and (ii) the commencement of resolution procedures when insurance or reinsurance undertakings are failing or likely to fail, where there is no prospect that private sector alternatives or supervisory measures would prevent such failure. In the event of resolution, the IRRD grants resolution authorities the power to apply a range of resolution tools, including the write-down and conversion tool, which allow resolution authorities to write down, or convert to equity, capital instruments, debt instruments and other eligible liabilities of insurance undertakings, generally corresponding to their ranking in liquidation, such that share capital would be expected to suffer the first losses (via its cancellation or transfer to creditors whose claims have been converted), then other tier 1 instruments (such as the Notes), then tier 2 instruments and then other instruments with a higher ranking in liquidation. Upon the adoption of the resolution tools, including the write-down and conversion tool, holders of Notes could be exposed to significant risks, potentially losing all or part (which could be substantially all) of their investment in the Notes if the Issuer was to experience financial difficulties and be deemed to be failing or likely to fail. In addition, if the Issuer's and/or the Group's financial condition deteriorates, or is perceived to deteriorate, the existence of these powers could cause the market value and/or the liquidity of the Notes to decline more rapidly and/or to become more volatile than would otherwise be the case in the absence of such powers. See also "*Risk Factors – Risks relating to the Notes – The Issuer, any member of an applicable Solvency II Group and/or the Notes could become subject to the application of the resolution powers, including the write-down and conversion tool, under the IRRD*".

Changes to the relevant rules may impact adversely the solvency ratios of the Issuer and/or any applicable Solvency II Group, which could potentially entail an increase in the capital that the Issuer and/or any applicable Solvency II Group is required to hold to support its business or some of its business lines.

Moreover, the Issuer currently applies transitional measures, pursuant to article 275 of Greek Law 4364/2016 and in accordance with the decision No. 269/5/09.05.2018 of the Committee of Credit and Insurance Affairs of the BoG, when calculating its solvency ratios. Any changes in or discontinuation of these transitional measures may also negatively impact the Issuer and/or any applicable Solvency II Group's solvency ratios.

In the event that regulatory capital requirements are, or may be, breached, the BoG, as the competent supervisory authority, in the interests of policyholder security, may require the Issuer to take remedial action, which could possibly include measures to restore the Issuer and/or any applicable Solvency II Group's capital and solvency positions to acceptable levels, for the purposes of ensuring that the financial resources necessary to meet obligations to policyholders are maintained.

Furthermore, changes in the relevant rules could result in a Capital Disqualification Event occurring in respect of the Notes, enabling the Issuer to redeem, substitute or vary the Notes in accordance with the Conditions (see "*Risk Factors – Risks relating to the Notes – The Issuer may redeem the Notes before the Maturity Date at the Issuer's option in certain circumstances, and an investor may not be able to reinvest the redemption proceeds at as effective a rate of return as that in respect of the Notes*" and "*Risk Factors – Risks relating to the Notes – Substitution or variation of the terms of the Notes upon the occurrence of a Deductibility Event, a Gross-up Event or a Capital Disqualification Event*" below for further information).

The business of the Issuer is subject to extensive laws and regulations and changes in the legal and/or regulatory environment may have an adverse effect on its business, financial condition, reputation or image in the market.

The Issuer conducts its business subject to ongoing regulation and associated regulation risks, including the effects of changes in the laws, regulations, policies and interpretation thereof in Greece. The timing and form of future changes in regulation are unpredictable and beyond the Issuer's control. Changes made could materially and adversely affect the Issuer's business products, services offering, the value of its assets or the extent of its liabilities.

The Issuer is subject to extensive laws and regulations relating to anti-money laundering and counter-terrorist financing ("AML/CFT"), international economic and trade sanctions, anti-bribery and corruption, and the prevention of financial crime. Such requirements are complex and subject to frequent changes and increasing regulatory scrutiny. Failure to comply with applicable AML/CFT or sanctions requirements, whether as a result of inadequate policies, procedures, systems or controls, human error, third-party misconduct, deficiencies in customer due diligence processes, screening failures or other factors, could expose the Issuer to regulatory investigations, administrative sanctions, substantial monetary penalties, litigation, restrictions on business activities, increased supervisory oversight and reputational damage. Although the Issuer maintains compliance frameworks, policies, procedures and controls designed to identify, assess, monitor and mitigate AML/CFT and sanctions risks, including customer due diligence measures, transaction monitoring, sanctions screening, employee training and independent control functions, there can be no assurance that such measures will be effective in all circumstances. Any material failure in the Issuer's compliance systems and controls, or any actual or alleged breach of applicable AML/CFT rules or sanctions could have considerable reputational, financial and regulatory repercussions for the Issuer.

On 9 December 2014, the PRIIPs Regulation was published in the Official Journal of the EU and came into force on 31 December 2016. On 20 January 2016, the Insurance Distribution Directive was

published in the Official Journal of the EU and came into force on 22 February 2016. The Insurance Distribution Directive has been transposed into Greek law by Greek Law 4583/2018, which also sets out certain additional national requirements (such as a prohibition to the effect that Greek insurance agents cannot also act as insurance brokers). The Insurance Distribution Directive and the PRIIPs Regulation are closely linked, and introduce rules aimed at levelling the playing field for the sale and disclosure of insurance and retail investment products to strengthen consumer protection. The Insurance Distribution Directive addresses sales and disclosure rules for insurance products, including additional sales rules for insurance investment products. The PRIIPs Regulation addresses disclosure rules for retail investment products and introduces a new standard for product information called a 'Key Information Document' or "**KID**". The main issues for the Issuer are transparency of remuneration in life insurance, a ban on commissions on life insurance investment products sold on the basis of independent advice, the introduction of investment profiles and suitability/appropriateness tests in life investment products and the implementation of the KID.

The European Market Infrastructure Regulation ("**EMIR**") package including the original Regulation (EU) 648/2012 of the European Parliament and of the Council, of 4 July 2012, and the so-called EMIR Refit approved under Regulation (EU) 2019/834 of the European Parliament and of the Council, of 20 May 2019, addresses the risks involved in over-the-counter ("**OTC**") trading by imposing new requirements on counterparties entering into OTC derivative contracts. In particular, it imposes (i) central clearing obligations (standardised derivative contracts entered into by financial counterparties such as insurance companies should be cleared through central counterparties in order to reduce the risk in the financial system), (ii) risk management obligations (counterparties entering into non-centrally cleared OTC derivative contracts must apply appropriate risk measures, including – as far as financial counterparties are concerned – the exchange of collateral), and (iii) reporting obligations (all OTC derivative contracts should be reported to trade repositories). Following the adoption of regulatory technical standards relating to EMIR, central counterparties, trade repositories and all EU derivatives market participants are required to report data relating to OTC derivatives and their counterparties to a trade repository. The introduction of EMIR has given rise to new challenges for the Issuer such as, amongst other things, an adaptation of its collateral management infrastructure and organisation, the determination of OTC derivatives valuation methodologies and their documentation, and an update of existing processes and IT applications in order correctly to identify and provide required information and build a daily reporting file. The Issuer applies the prudent person principle, under which derivative instruments may be used only where they help reduce risk or support efficient portfolio management, and investments in assets not traded on a regulated financial market must be maintained at prudent levels.

The EU introduced new obligations within its sustainable finance regulatory framework, such as the Sustainable Finance Disclosure Regulation (Regulation (EU) 2019/2088, the "**SFDR**"), which introduced disclosure obligations relating to sustainability information with respect to investment services and financial products offered to clients. Additionally, Regulation (EU) 2020/852 (the "**Taxonomy Regulation**") introduced a common classification system for environmentally sustainable economic activities and imposes taxonomy-related disclosure obligations, which are now integrated with the corporate sustainability reporting framework under Directive (EU) 2022/2464 (the "**CSRD**"). On 21 April 2021, the European Commission adopted a package of measures and initiatives related to the EU Sustainable Finance Agenda with the aim of laying the ground for an EU framework prioritising sustainability in the financial system and alignment with the European Green Deal objectives.

As part of this initiative, the European Commission also adopted Commission Delegated Regulation (EU) 2021/1256 amending the Solvency II Regulation in order to integrate sustainability risks in the governance of insurance and reinsurance undertakings. The amendments result in the system of governance of (re)insurance undertakings and the assessment of their overall solvency having to reflect the impacts of sustainability risks on the values of the investments or on the values of the (re)insurance liabilities. As an example, this measure has implications for the calculation of technical provisions and

on the Issuer's investment strategy. The Insurance Distribution Directive Delegated Regulations (EU) 2017/2358 and (EU) 2017/2359 (the "**Insurance Distribution Directive Delegated Regulations**") were amended by the Commission Delegated Regulation (EU) 2021/1257 with the intention of integrating customer preferences in terms of sustainability as a complement to the suitability assessment in particular with reference to insurance-based investment products as well as sustainability factors into insurance product oversight and governance requirements and conflict of interest rules. On 25 July 2022, Commission Delegated Regulation (EU) 2022/1288 which supplements the SFDR and the Taxonomy Regulation was published and became applicable from 1 January 2023. In it, the content, methodologies and presentation of information relating to sustainability indicators and adverse sustainability impacts are detailed as well as the principle of "do no significant harm", and the promotion of environmental or social characteristics and sustainable investment objectives in pre-contractual documents, on websites and in periodic reports.

The SFDR and Commission Delegated Regulation (EU) 2022/1288 are under constant review by the EU authorities and may be subject to significant changes in the future. Financial market turmoil is likely to prompt significant regulatory reforms impacting financial institutions, including insurance and reinsurance undertakings. These reforms aim to address systemic risks and perceived gaps in existing frameworks, which were linked to prior financial crises. Such initiatives may increase operational costs, restrict permissible activities, or recalibrate competition within the industry.

One major legislative initiative by the European Commission is Regulation (EU) 2022/2554 on digital operational resilience for the financial sector ("**DORA**"), which has applied since 17 January 2025. DORA seeks to bolster financial and insurance entities' digital resilience by requiring robust policies and procedures for IT risk assessment, third-party risk mitigation, and IT incident management. By mandating enhanced internal controls, DORA addresses vulnerabilities and strengthens the sector's ability to operate in a digitally driven risk environment. Any non-compliance with DORA on the part of the Issuer may lead to regulatory penalties, reputational damage, and heightened scrutiny by supervisory authorities. Furthermore, non-compliant entities risk a competitive disadvantage, as they may lag behind peers better equipped to manage IT risks, maintain client trust, and meet regulatory demands. Compliance, however, may lead to higher operational costs due to necessary investments in IT infrastructure, cyber-risk management, and third-party oversight.

Another initiative was brought by Regulation (EU) 2023/2854 on harmonised rules on fair access to and use of data (the "**Data Act**"), effective as of 11 January 2024, which introduced harmonised rules governing access to and use of data within the European data economy. It requires connected products to be designed and manufactured in such a way that users – whether businesses or consumers – can securely access, use, and share the data generated by these products. Users must be granted the right to freely access data generated from internet of things (IoT) devices or related services that they own, lease, or rent and can authorise third parties to use this data. For insurance undertakings, the Data Act is particularly significant as it sets the groundwork for future sectoral legislation on data-sharing, including data generated by motor vehicles, insurance black boxes, and wearable health devices. By driving competitiveness and fostering innovation, the Data Act reshapes how insurers use data to enhance their products and customer experiences.

Another key proposal from the European Commission aiming to enhance transparency, tackle conflicts of interest, and ensure improved value for money for investment products, including insurance investment products is the so-called Retail Investment Strategy ("**RIS**"), a legislative package amending the Insurance Distribution Directive, PRIIPs Regulation and MiFID II (Directive (EU) 2014/65). Among the measures proposed are a partial ban on inducement payments for non-advised sales and the introduction of benchmarks developed by the European Securities and Market Authority and EIOPA to assess the costs and performance of investment products. These provisions aim to curb the distribution of products offering low value for money. The RIS is currently under review by the European Parliament and Council.

A significant reform also aiming to transform the competitive landscape is the regulation on Financial Data Access ("**FIDA**"). FIDA builds on the data-sharing concept introduced by the Directive (EU) 2015/2366 (known as 'PSD2'), extending its scope beyond payments to include other financial services. Once enacted, financial entities, including insurance undertakings, will be required to provide third parties, including other banks and insurers, access to clients' financial data upon their consent. By increasing transparency and competition, FIDA could facilitate product comparisons and customer switching between providers. At present, this regulation awaits approval by the European Parliament and Council.

The regulation on artificial intelligence (Regulation (EU) 2024/1689 of the European Parliament and of the Council (the "**AI Act**")) entered into force on 1 August 2024, with requirements starting to apply gradually from February 2025. The AI Act introduces regulations on the use of artificial intelligence systems classified as "high risk", which includes those employed for risk assessment and pricing in life and health insurance. Insurers that develop and market high-risk AI systems will face stringent requirements, such as *ex ante* conformity assessments, while companies deploying existing systems will be subject to lighter compliance obligations. The AI Act is expected to significantly impact the insurance sector's adoption and use of advanced artificial intelligence technologies once it comes into full force. In particular, the use of AI systems in insurance may expose the Issuer to risks relating to data quality, potential bias or discrimination in automated decision-making, lack of explainability, fairness and transparency, and inaccuracies in outputs, which could lead to regulatory scrutiny, litigation, financial losses and reputational damage.

If the Issuer fails, or appears to fail, to address regulatory changes, including (without limitation) those described above (or any successor or replacement regulations), the Issuer's reputation could be harmed and the Issuer could be subject to additional legal risk, including regulatory enforcement actions, fines and penalties. Despite its best efforts to comply with applicable regulations, there are a number of risks in areas where applicable regulations may be unclear or where regulators revise their previous guidance or courts overturn previous rulings. As detailed above, the Issuer also faces increasing compliance costs in view of the continuously changing regulatory landscape in which it operates, which could impact its results of operations and financial condition.

Regulatory supervision risk.

Insurance activities in Greece and in the EU are subject to extensive and detailed regulation and supervision by supervisory authorities, which have broad administrative power over many aspects of the insurance services business, which include liquidity, capital adequacy and permitted investments, ethical issues, money laundering, privacy, securities (including debt instruments) issuance and offering/placement, financial intermediation issues, record-keeping, marketing and selling practices, among others, as well as those directly relating to insurance services, which include insurance, reinsurance, pension funds and their management companies and insurance mediation. The resources dedicated to ensure compliance with these various regulations can significantly increase the costs of the Issuer's structure and limit its possibilities for increasing its income.

The laws governing insurance activity may change at any time in ways which may have an adverse effect on the business of the Issuer. Furthermore, the Issuer cannot predict the timing or form of any future regulatory initiatives. Changes in existing laws may materially affect the way in which the Issuer conducts its business, the products and services it can offer and the value of its assets.

The prudential control of Greek insurance companies is the responsibility of the BoG through its Occupational and Private Insurance Supervision Directorate. As an insurance company, the Issuer is supervised by the BoG in relation to (amongst other things) its capital, liquidity and solvency requirements, internal governance and organisation and fit and proper assessment of management and shareholders. The BoG has the power to suspend or prohibit the exercise of all or part of the activities

or to wholly or partially suspend the performance of ongoing agreements of the companies and groups under its supervision.

This supervisory regime, its implementation and further interpretation by the regulatory bodies and the courts may have an adverse impact on the Issuer's functioning and operations and hence could adversely impact the Issuer's results of operations and financial position.

Additionally, non-compliance with rules and regulations applicable to the Issuer may result in the BoG imposing severe penalties and other sanctions such as bans, restrictions of activities and suspensions, which would directly impact the Issuer's ability to perform its activities as well as its reputation.

The Issuer is subject to scrutiny by consumer protection authorities in relation to its commercial practices, including pricing, indexation mechanisms and the transparency, clarity and fairness of contractual terms, particularly in long-term health insurance products. Any regulatory review or finding of non-compliance with applicable consumer protection and disclosure requirements may result in administrative measures, fines and potential reputational impact.

The Issuer operates across life and non-life insurance markets and is subject to national and EU competition laws. Its commercial practices, including pricing strategies, arrangements with distribution partners and cooperation with a broad range of service providers and market participants, may be subject to regulatory scrutiny. Any finding of non-compliance could result in administrative fines, remedial measures and reputational impact, while increased regulatory focus may lead to enhanced oversight of pricing and cooperation practices.

The Issuer could be adversely affected by changes to tax legislation.

The Issuer may be adversely affected by changes in the tax legislation applicable in Greece or the EU, or any other country in which it may operate in the future, as well as by changes in the interpretation by the competent tax authorities of legislation and regulation. Further changes or difficulties in the interpretation of or compliance with new tax laws and regulations might negatively affect the Issuer's business, financial condition and results of operations.

Data protection and GDPR framework/regulations.

The Issuer is subject to the GDPR, which has been directly effective in all EU member states without the need for the implementation of additional national legislation, since 25 May 2018. Under the GDPR, personal data must be processed lawfully and in a transparent manner in relation to the data subject.

The regulatory risk arising from non-compliance with the personal data protection legislation increased significantly after 25 May 2018. The GDPR imposes stricter requirements for the processing of personal data (for example: companies will have to provide exhaustive information to data subjects; and obtaining valid consent for the processing for personal data from data subjects will be more demanding). Furthermore, the GDPR establishes harsher sanctions in the case of infringement – companies may be sentenced to fines up to the greater of €20,000,000 or 4 per cent. of the company's global annual turnover.

The Issuer has implemented policies and measures designed to ensure compliance with the GDPR and applicable local legislation on data protection; however, there can be no assurance that such policies and measures will be wholly effective to mitigate the risks to the Issuer arising from non-compliance with the GDPR and any failure to comply could expose the Issuer to regulatory sanctions, financial loss and reputational damage.

Changes to IFRS which affect insurance companies may adversely affect the Issuer's financial results.

The Issuer's financial results may be adversely affected by changes to IFRS.

These standards are subject to interpretation and evolution on a continuing basis. The Issuer cannot predict with any certainty at this time the potential impact of any potential future modifications to the IFRS; however, any significant modifications to the IFRS may adversely impact its financial position and results of operations.

For example, IFRS 17 became effective from 1 January 2023. The new standard required a fundamental change to accounting, presentation and disclosures for insurance contracts as well as the application of significant judgement and new estimation techniques. These changes mean that investors, rating agencies and other stakeholders may take time to gain familiarity with the new standard and to interpret the Issuer's business performance and dynamics. In addition, comparison with previous financial reporting periods (prior to 2022) will be more challenging in the short term. New systems, processes and controls have been developed to align with the new IFRS 17 basis and are expected to mature over time. In the short term there may be increased operational risk associated with these new systems and processes. Apart from IFRS 17, any other changes or modification of IFRS accounting policies may also require a change in the way in which future results will be determined and/or a retrospective adjustment of reported results to ensure consistency.

The Issuer may also have to devote significant resources to adapt its organisation, processes and systems to reflect these changes. Any changes may also need to be considered alongside other regulatory changes which may come into effect, and in particular Solvency II.

The Issuer could be indirectly affected by the resolution framework applicable to its parent group

In addition to the regulatory changes to Solvency II described above, the Issuer could also be indirectly affected by the resolution framework applicable to its parent group. Following the acquisition of the Issuer by Piraeus, a potential distress or resolution scenario affecting Piraeus could affect the Issuer. In particular, under Directive 2014/59/EU (the "**Bank Recovery and Resolution Directive**" or "**BRRD**"), as transposed into Greek law by Greek Law 4335/2015, resolution authorities have extensive powers over failing banks, including the power to transfer shares, assets, rights and liabilities to third parties or bridge institutions, to write down or convert liabilities, and to restructure or sell subsidiaries. While the Issuer itself, as an insurance undertaking, would be subject to the insurance resolution regime under Greek Law 4364/2016 and, following its transposition, the IRRD, rather than the BRRD, the Issuer's shares are held by Ethniki Holdings, which is in turn wholly owned by Piraeus. Accordingly, in a resolution scenario affecting Piraeus, the resolution authority could exercise powers that result in a change of control of the Issuer, a forced sale or transfer of the Issuer's assets or its shares, or other measures affecting the Issuer's ownership structure, business continuity or strategic direction. Such actions could have a material adverse effect on the Issuer's operations, financial condition and prospects.

Legal and reputational risks

Litigation and other proceedings or actions may adversely affect the Issuer's business, financial condition and results of operations.

The Issuer's business is subject to the risk of litigation by customers, employees or others through private actions, collective or representative actions (where applicable), administrative proceedings, regulatory actions or investigations, or other litigation. The outcome of litigation or similar proceedings or actions is difficult to assess or quantify. Claimants in these types of actions may seek recovery of large or indeterminate amounts or other remedies that may affect the Issuer's ability to conduct business, and the magnitude of the potential loss relating to such actions may remain unknown for substantial periods of time. The cost to defend future actions may be significant, whether or not the Issuer is

successful in defending such actions. Although the Issuer assesses the relevant matters and establishes provisions where required in accordance with the applicable accounting framework, the ultimate outcome of such proceedings is inherently uncertain and may differ from management's estimates. There may also be adverse publicity associated with litigation that could decrease customer acceptance of the Issuer's services, regardless of whether the allegations are valid or whether the Issuer ultimately is found liable. As a result, litigation may adversely affect the Issuer's business, financial condition and results.

RISKS RELATING TO THE NOTES

The Notes are unsecured and subordinated obligations of the Issuer. On a Winding-Up or liquidation of the Issuer, or in case of exercise of Statutory Loss Absorption Powers by the Relevant Resolution Authority, if the Issuer's assets are insufficient to meet all its obligations to senior-ranking and pari passu creditors, investors in the Notes will lose all or some of their investment in the Notes.

The Issuer's payment obligations under the Notes will be unsecured and will be subordinated to the claims of all Senior Creditors of the Issuer on a Winding-Up or liquidation of the Issuer (other than in the limited circumstances described below) and shall (subject to mandatory provisions of Greek law, including Greek Law 4364/2016) rank junior to the claims of all policyholders and the privileged creditors set out in Article 240 of Greek Law 4364/2016 (i.e. costs of the insurance liquidation itself, employment-related claims, tax claims, claims of social security funds and claims secured by rights *in rem*), as well as to the claims of other unsubordinated creditors of the Issuer and to claims in respect of any subordinated indebtedness of the Issuer other than indebtedness which ranks, or is expressed by its terms to rank, *pari passu* with or junior to the Notes. Accordingly, the assets of the Issuer would be applied first in satisfying all senior-ranking claims in full, and payments would be made to holders of the Notes, *pro rata* and proportionately with payments made to holders of any other *pari passu* instruments (including, for so long as the same remains outstanding, the Issuer's €125 million subordinated bond loan from NBG)¹ only if and to the extent that there are any assets remaining after satisfaction in full of all such senior-ranking claims. If the Issuer's assets are insufficient to meet all its obligations to senior-ranking and *pari passu* creditors, the holders of the Notes will lose all or some of their investment in the Notes.

While the transposition of the IRRD in Greece is not expected to require Greek insurers to issue additional loss absorbing debt instruments in excess of the subordinated instruments issued to meet their solvency capital requirements, there is no contractual or statutory restriction on the quantum of debt securities which the Issuer may issue or the quantum of loans that the Issuer may borrow which rank senior to, or *pari passu* with, the Notes and, accordingly, the Issuer may at any time incur further debt obligations (including by the issue of further debt securities or the receipt of loans) which rank senior to, or *pari passu* with, the Notes. Consequently, there can be no assurance that the current level of senior or *pari passu* debt of the Issuer will not increase. The issue of any such debt securities may reduce the amount (if any) recoverable by Noteholders on a Winding-Up or liquidation of the Issuer and/or may increase the likelihood of a deferral of interest payments under the Notes.

In addition, Article 38(1) of the IRRD requires that all claims resulting from own funds items have, in national laws governing normal insolvency proceedings, a lower priority ranking than any claim that does not result from an own funds item. Accordingly, once the IRRD has been implemented in Greece, claims in respect of any own funds items of the Issuer that have ceased to count as own funds items may rank senior to the Notes (assuming that the Notes qualify as own funds items at the relevant time). This could also have the effect of increasing the quantum of debt securities which rank senior to, or *pari passu* with, the Notes.

¹ The Issuer has formally applied to the BoG for permission to redeem the €125 million subordinated bond loan from NBG. Subject to receiving such permission, the Issuer intends to redeem such bond loan.

If the Issuer's financial condition deteriorates such that there is perceived to be an increased risk that the Issuer may be wound-up or liquidated or that the Relevant Resolution Authority may exercise its Statutory Loss Absorption Powers with respect to the Issuer or that a Trigger Event may occur, such circumstances can be expected to have a material adverse effect on the market price of the Notes. Investors in the Notes may find it difficult to sell their Notes in such circumstances, or may only be able to sell their Notes at a price which may be significantly lower than the price at which they purchased their Notes. In such a sale, investors may lose some or substantially all of their investment in the Notes, irrespective of whether the Issuer is wound-up or liquidated or the Relevant Resolution Authority actually exercises its Statutory Loss Absorption Powers or, as the case may be, a Trigger Event occurs.

In addition, investors should be aware that, upon a Trigger Event occurring, following a Write Down of the Notes which is not followed by a Write Up, Noteholders will have a significantly reduced claim (which may effectively amount to zero) in the Winding-Up or liquidation of the Issuer. This may be the case even if other existing subordinated indebtedness or share capital remains outstanding and provable in full in the Winding-Up or liquidation, with the effect that the sums recovered in respect of the Notes (if any) may be substantially lower than the relative recovery made by holders of instruments which rank *pari passu* with the Notes. There is a risk that Noteholders will lose substantially the entire amount of their investment, regardless of whether the Issuer has sufficient assets available to settle what would have been the claims of Noteholders or of securities subordinated to the same or greater extent as the Notes, in a Winding-Up or liquidation or otherwise.

Although the Notes may pay a higher rate of interest than comparable notes which are not subordinated, or which are less subordinated, an investor in the Notes will lose all or some of its investment should the Issuer become insolvent and its assets are insufficient to meet all its obligations to senior ranking and *pari passu* creditors.

The Issuer, any member of an applicable Solvency II Group and/or the Notes could become subject to the application of the resolution powers, including the write-down and conversion tool under the IRRD.

On 28 January 2025, the IRRD entered into force. EU Member States are required to adopt implementing legislation by 29 January 2027. As at the date of this Offering Circular, implementation of the IRRD in Greece is still pending. However, certain resolution powers already apply to insurance undertakings in Greece under Greek Law 4364/2016, including: (i) the suspension of the payment of any amounts due under certain liabilities (including the Notes) as well as the suspension of any related enforcement measures; and (ii) a reduction in the ability of the Issuer to pay in a timely manner (or at all) any amounts due under certain liabilities (including the Notes) as a consequence of a mandatory transfer of a portfolio of insurance policies to another insurance undertaking or due to preparatory measures for an anticipated winding-up adopted by an insurance administrator.

The IRRD requires EU Member States to implement preventative measures to reduce the likelihood of insurance undertakings requiring public financial support and to equip resolution authorities with resolution tools to be used when in-scope undertakings are failing or are likely to fail, with no reasonable prospect of other actions preventing such failure within a reasonable time. A key resolution tool within the IRRD is the power to write down or convert capital instruments and eligible liabilities, on which basis the competent resolution authority may write down or (with the exception of shares) convert capital instruments, debt instruments and other eligible liabilities of insurance undertakings into shares, generally in inverse order of their ranking in liquidation, in accordance with the applicable creditor hierarchy. The tool would apply first to share capital (via its cancellation or transfer to creditors whose claims have been converted), then to tier 1 instruments (such as the Notes) other than shares, then to tier 2 instruments, then to tier 3 instruments and then to other instruments with a higher ranking in liquidation, if the undertaking is failing or likely to fail and certain other conditions are met or if the conditions for group resolution are met. Save for some limited exceptions, all insurance and other liabilities will be eligible for write-down.

Unlike the pre-resolution 'write-down and conversion power' applicable to EU credit institutions and investment firms, the 'write-down and conversion tool' under IRRD is expected to apply in resolution rather than prior to it. It is therefore more similar to the bail-in tool applicable to such credit institutions and investment firms. However, Noteholders could lose all or part of their investment in the Notes if the Issuer and/or any applicable Solvency II Group were to experience financial difficulty and be failing or likely to fail and whether or not the Issuer enters resolution. In addition, if the Issuer and/or any applicable Solvency II Group's financial condition deteriorates, or is perceived to deteriorate, the existence of these powers could cause the market value and/or the liquidity of the Notes to decline more rapidly than would be the case in the absence of such powers.

Normal insolvency proceedings will remain the alternative path for the whole or parts of an insurance undertaking that cannot be resolved and the IRRD provides for a 'no creditor worse off' principle. Despite the 'no creditor worse off' principle, the IRRD could significantly affect the rights of the Noteholders and may result in the loss of all or part of their investment in the Notes in the event of the resolution of the Issuer. Any perception in the market that the Issuer and/or any applicable Solvency II Group is facing financial difficulties may reduce the market value of the Notes even before the Issuer has actually reached the point of non-viability or resolution.

The full impact of the IRRD will become clearer once the relevant regulatory technical standards and implementing technical standards have been adopted and once the IRRD has been transposed into national law. In this respect, please also refer to the risk factor entitled "*Risk Factors – Factors that may affect the Issuer's ability to fulfil its obligations under the Notes – There are continuing changes to the implementing measures under the Solvency II regime and the Insurance Recovery and Resolution Directive that could have adverse effects on the insurance sector as a whole and on the Issuer in particular*".

The Prevailing Principal Amount of the Notes may be Written Down.

If a Trigger Event occurs (subject as provided in Condition 6(a)), (i) the Prevailing Principal Amount of the Notes will be Written Down by the Write Down Amount determined pursuant to Condition 6(b) and (ii) all accrued but unpaid interest up to (and including) the Write Down Date shall be cancelled, as further described in the Conditions.

Whilst the Write Down Amount will be determined in accordance with paragraphs (i), (ii)(a), (ii)(b) or (iii) of Condition 6(b) (as applicable), it is expected that the circumstances in which the Write Down Amount would be determined pursuant to paragraph (ii)(a) of Condition 6(b) would only apply where the Issuer and/or any applicable Solvency II Group (as applicable) had exceeded the regulatory limits for eligible own funds for both restricted Tier 1 Capital and Tier 2 Capital immediately prior to the Write Down Date such that a Write Down would not only improve the quality but also the quantum of own funds which are eligible to cover the relevant Solvency Capital Requirement and/or Minimum Capital Requirement.

Furthermore, paragraph (ii)(a) of Condition 6(b) will only apply where the Issuer is capable of determining the relevant amount prior to the relevant Write Down Date. In addition, the Relevant Supervisor may not have any appropriate reason, discretion or sufficient information available to it prior to the Write Down Date to enable it to approve a different Write Down Amount under paragraph (iii) of Condition 6(b) than that provided for in paragraphs (i) and (ii) of Condition 6(b). Therefore, upon the occurrence of a Trigger Event, there is a material risk that the Notes will be written down to one cent per Note, in accordance with paragraph (i) of Condition 6(b), even where holders of the Issuer's share capital continue to receive dividends.

Although the Conditions grant the Issuer full discretion to reinstate Written Down principal amounts provided certain conditions are met, the Issuer is under no obligation to do so. Moreover, the Issuer's ability to Write Up the principal amount of the Notes depends on there being sufficient profits of the

Issuer which contribute to its Available Distributable Items and which are made subsequent to the restoration of compliance with the Solvency Capital Requirement of both the Issuer and each applicable Solvency II Group and must not be made in a manner which undermines the loss absorbency of the Notes. It is possible that changes to the Relevant Rules may impose other limits on the Issuer's ability to Write Up the principal amount of the Notes from time to time. No assurance can be given that these conditions will ever be met. Furthermore, any Write Up is likely to occur only on a *pro rata* basis with any other Tier 1 instruments providing for a reinstatement of principal amount in similar circumstances.

Interest (if paid) will accrue only on the Prevailing Principal Amount of the Notes outstanding from time to time. Accordingly, any Write Down will (unless and until the amounts of principal Written Down have been subsequently Written Up) reduce the maximum amount of interest which may (subject to cancellation) be payable on the Notes. Furthermore, all redemption rights of the Issuer pursuant to the Conditions are exercisable at the Prevailing Principal Amount of the Notes at the time of redemption (together with accrued and unpaid interest to the redemption date, to the extent not otherwise cancelled) and, accordingly, if the Issuer were to redeem the Notes at a time when the Prevailing Principal Amount is less than the Initial Principal Amount, Noteholders will not be entitled at any time to repayment of the difference in such principal amounts, even if the Issuer subsequently writes up principal on other instruments which (until redemption of the Notes) ranked *pari passu* with, or junior to, the Notes.

If a Winding-Up or liquidation occurs prior to the Notes being Written Up in full, Noteholders' claims for principal will be based on the reduced Prevailing Principal Amount of the Notes. As a result, if a Trigger Event occurs, Noteholders may lose some or substantially all of their investment in the Notes. Any actual or anticipated indication that a Trigger Event is likely to occur may therefore have an adverse effect on the market price and liquidity of the Notes.

Payments of interest under the Notes may and, in certain circumstances must, be cancelled by the Issuer.

Interest on the Notes will be due and payable only at the sole and absolute discretion of the Issuer and is subject to mandatory cancellation in the circumstances described below.

The Issuer may at any time elect to cancel any payment of interest, in whole or in part, which is otherwise due or scheduled to be paid on any scheduled payment date and if it elects to do so such payment of interest (or part thereof) will be cancelled permanently.

As further described below, payments of interest may only be made out of the Issuer's Available Distributable Items. The Conditions do not contain any restriction on the ability of the Issuer to pay dividends or other distributions on its share capital or other subordinated bonds. This could decrease the Issuer's Available Distributable Items and therefore increase the likelihood of a cancellation of payments of interest on the Notes.

Furthermore, the Issuer is not prohibited by the Conditions from making payments on other securities ranking senior, equally with or more junior to the Notes in any circumstances. Please also refer to the risk factor entitled "*Risk Factors – Risks relating to the Notes – The interests of the Issuer and any applicable Solvency II Group may not be aligned with those of Noteholders*" below.

As at the date of this Offering Circular, it is the intention of the directors of the Issuer to take into account the relative ranking in the Issuer's capital structure of its share capital and its outstanding restricted Tier 1 securities (including, but not limited to, the Notes) whenever exercising its discretion to declare dividends or other distributions or to effect share buybacks in relation to the former or to cancel interest on the latter. However, the directors of the Issuer may depart from this policy at any time in their sole discretion.

In addition to the Issuer's right to cancel payments of interest in whole or in part at any time, the Conditions require that payments of interest are cancelled under certain circumstances. The Issuer must cancel any payment of interest on the Notes in the event that, *inter alia*, the Issuer cannot make the payment in compliance with any applicable Solvency Capital Requirement or any applicable Minimum Capital Requirement, or where the Interest Payment would, together with any Additional Amounts payable with respect thereto, exceed the amount of the Issuer's Available Distributable Items as at the time for payment or where required to cancel or defer such payment by the Relevant Supervisor in view of the financial and/or solvency condition of the Issuer and/or any applicable Solvency II Group.

All payments of interest are also subject to the Solvency Condition.

The circumstances in which the Issuer is required to cancel payments of interest on the Notes may depend on factors which are outside the Issuer's control. Please also refer to the risk factor entitled "*Risk Factors – Risks relating to the Notes – The occurrence of a Trigger Event may depend on factors outside of the Issuer's control*" below.

Any payment of interest (or relevant part thereof) which is cancelled shall not accumulate and shall not become due and payable at any time thereafter. In the event of such cancellation, Noteholders will have no rights in respect of the payment of interest (or relevant part thereof) which is cancelled. In addition, cancellation or non-payment of interest will not constitute an event of default on the part of the Issuer for any purpose.

The cancellation of any payment of interest (or a market perception that such cancellation is becoming increasingly likely) may significantly adversely affect the market value of an investment in the Notes. Please also refer to the risk factor entitled "*Risk Factors – Risks relating to the Notes – The level of the Issuer's Available Distributable Items is affected by a number of factors, and insufficient Available Distributable Items will restrict the Issuer's ability to make payments of interest on the Notes*" below.

In addition, as a result of the interest cancellation provisions of the Notes (including the Solvency Condition), the market price of the Notes may be more volatile than the market prices of other debt securities on which interest accrues that are not subject to such cancellation and may be more sensitive generally to adverse changes in the financial condition of the Issuer. Noteholders should be aware that any announcement relating to the future cancellation of payments of interest or any actual cancellation of payments of interest (or cancellation or anticipated cancellation of interest on other securities issued by the Issuer) may have an adverse effect on the market price of the Notes. Noteholders may find it difficult to sell their Notes in such circumstances, or may only be able to sell their Notes at a price which may be significantly lower than the price at which they purchased their Notes. In such event, investors may lose some or substantially all of their investment in the Notes.

The level of the Issuer's Available Distributable Items is affected by a number of factors, and insufficient Available Distributable Items will restrict the Issuer's ability to make payments of interest on the Notes.

As at 31 December 2025, the Issuer's Available Distributable Items amounted to €28.4 million (calculated in accordance with applicable Greek law). Following the Issuer's annual general meeting on 15 May 2026, the Issuer approved a dividend in the amount of €24.5 million to Ethniki Holdings. The level of the Issuer's Available Distributable Items is affected by a number of factors – principally its ability to make a profit on its activities in a manner which creates Available Distributable Items. The Issuer expects to calculate the level of its Available Distributable Items on an annual basis and, accordingly, as at the date of this Offering Circular, the Issuer has not calculated its Available Distributable Items as at any date subsequent to 31 December 2025.

Consequently, the Issuer's future Available Distributable Items and, therefore, the Issuer's ability to make payments of interest on the Notes are a function of the Issuer's existing Available Distributable

Items, future profitability and performance and the ability to distribute dividends from the Issuer's Subsidiaries to the Issuer. In addition, the Issuer's Available Distributable Items may also be reduced by the servicing of other debt and equity instruments.

The ability of the Issuer's Subsidiaries to pay dividends and the Issuer's ability to receive distributions and other payments from the Issuer's investments in other entities is subject to applicable local laws accounting practices (including under applicable Greek law) and other restrictions, including their respective regulatory, capital and leverage requirements, statutory reserves, financial and operating performance and applicable tax laws, and any changes thereto. These laws and restrictions could limit the payment of dividends, distributions and other payments to the Issuer by the Issuer's Subsidiaries, which could in time restrict the Issuer's ability to fund other operations or to maintain or increase its Available Distributable Items.

The occurrence of a Trigger Event may depend on factors outside of the Issuer's control.

The occurrence of a Trigger Event is inherently unpredictable and depends on a number of factors, some of which may be outside of the Issuer's control, including actions that the Issuer is required to take at the direction of the Relevant Supervisor and regulatory changes. The Relevant Supervisor could require the coverage level for any applicable Solvency Capital Requirement or Minimum Capital Requirement to be calculated on or as at any date, and so a Trigger Event could occur at any time on or following the Issue Date.

The ability to meet each applicable Solvency Capital Requirement and Minimum Capital Requirement could be affected by a wide range of factors, including, among other things, factors affecting the level of the Issuer's earnings or dividend payments, the mix of its businesses, its ability to effectively manage its assets and liabilities in both its ongoing businesses and those it may seek to exit, losses in its various businesses, or any of the factors described in the risk factors under "*Risk Factors – Factors that may affect the Issuer's ability to fulfil its obligations under the Notes*" above. Prudential calculations may also be affected by changes in applicable accounting rules and the manner in which accounting policies are applied, including the manner in which permitted discretion under the applicable accounting rules is exercised.

As at the date of this Offering Circular, the Issuer reports its Solvency Capital Requirement and Minimum Capital Requirement (and the requirements of any applicable Solvency II Group) publicly on an annual basis. Thus, investors may receive only limited, if any, warning of any deterioration in the solvency ratios which are relevant to the occurrence of a Trigger Event. In addition, the Issuer's regulator may instruct the Issuer to calculate its solvency ratios or those of any applicable Solvency II Group as at any date or may itself determine that a Trigger Event has occurred. Moreover, any indication that the Issuer's solvency position or that of any applicable Solvency II Group is moving towards the level of a Trigger Event may have an adverse effect on the market price of the Notes. A decline or perceived decline in the Issuer's solvency position or that of any applicable Solvency II Group may significantly affect the trading price of the Notes.

Due to the uncertainty regarding whether a Trigger Event will occur, it will be difficult to predict when, if at all, the Prevailing Principal Amount of the Notes may be Written Down and the extent of any Write Down. Similarly, for the reasons given above, there is also uncertainty as to the likelihood that the Issuer will be required to cancel payments of interest on the Notes. Please also refer to the risk factor entitled "*Risk Factors – Risks relating to the Notes – Interest payments under the Notes may and, in certain circumstances, must be cancelled by the Issuer*" below.

Accordingly, the trading behaviour of the Notes may not necessarily follow the trading behaviour of other types of subordinated securities, including the Issuer's other subordinated debt securities. Any indication that the Issuer and/or any applicable Solvency II Group may be at risk of failing to meet any applicable Solvency Capital Requirement and/or Minimum Capital Requirement and so approaching a

level that would or could in time result in a Trigger Event may have an adverse effect on the market price and liquidity of the Notes. Therefore, investors may not be able to sell their Notes easily or at prices that will provide them with a yield comparable to other types of subordinated securities, including the Issuer's other subordinated debt securities.

The interests of the Issuer and/or any applicable Solvency II Group may not be aligned with those of Noteholders.

The availability of Available Distributable Items as well as there being no occurrence of a Trigger Event, a Regulatory Deficiency Interest Cancellation Event and/or a Regulatory Deficiency Redemption Deferral Event will depend in part on decisions made by the Issuer and other entities in each applicable Solvency II Group relating to their businesses and operations, as well as the management of their respective capital positions.

The Issuer considers the interests of all its stakeholders in connection with its strategic decisions, including in respect of capital management, but the interests of the Noteholders may be outweighed by those of other stakeholders in certain circumstances (and this would also be expected to be the case for any strategic decisions made by any member of any applicable Solvency II Group).

The Issuer and/or the relevant member of an applicable Solvency II Group may decide not to raise capital at a time when it is feasible to do so, even if that would result in the occurrence of a Trigger Event, a Regulatory Deficiency Interest Cancellation Event or a Regulatory Deficiency Redemption Deferral Event.

The Issuer may decide not to propose to its shareholders to reallocate share premium to a distributable reserve account or to take other actions necessary in order for share premium or other reserves or earnings to be included in its Available Distributable Items. Conversely, it may decide from time to time to take actions (for example share buybacks), which may themselves negatively impact its Available Distributable Items and/or the solvency margin of the Issuer and/or any applicable Solvency II Group.

Moreover, in order to avoid the use of public resources, the Relevant Supervisor may decide that the Issuer should allow a Trigger Event, a Regulatory Deficiency Interest Cancellation Event or a Regulatory Deficiency Redemption Deferral Event to occur when it is feasible to avoid this. Noteholders will not have any claim against the Issuer or any member of an applicable Solvency II Group relating to decisions that affect the capital position of the Issuer and/or any applicable Solvency II Group, regardless of whether they result in the occurrence of a Trigger Event, a Regulatory Deficiency Interest Cancellation Event, a Regulatory Deficiency Redemption Deferral Event or a lack of Available Distributable Items. Such decisions could cause Noteholders to lose the amount of their investment in the Notes (or, in the case of a Regulatory Deficiency Redemption Deferral Event, defer repayment indefinitely).

Please also refer to the risk factor entitled "*Risk Factors – Risks relating to the Notes – Interest payments under the Notes may and, in certain circumstances, must be cancelled by the Issuer*" below.

Changes to Solvency II may increase the risk of the occurrence of a Trigger Event, a Regulatory Deficiency Interest Cancellation Event, a Regulatory Deficiency Redemption Deferral Event or a Capital Disqualification Event.

Solvency II requirements adopted in Greece may change in the future, whether as a result of further changes to Solvency II or changes to the way in which the requirements are interpreted and apply to the Greek insurance industry. Any such changes, either individually and/or in the aggregate, may lead to further unexpected requirements in relation to the calculation of each applicable Solvency Capital

Requirement and/or each applicable Minimum Capital Requirement, and such changes may make the Issuer and/or any applicable Solvency II Group's regulatory capital requirements more onerous.

Such changes may negatively affect the calculation of the Solvency Capital Requirement and/or the Minimum Capital Requirement of the Issuer and/or any applicable Solvency II Group and thus increase the risk of (i) the occurrence of a Regulatory Deficiency Interest Cancellation Event (and subsequent cancellation of a payment of interest on the Notes) or a Regulatory Deficiency Redemption Deferral Event (and subsequent deferral of redemption of the Notes by the Issuer), (ii) a Trigger Event occurring, resulting in a Write Down and/or (iii) a Capital Disqualification Event occurring, potentially enabling the Issuer to redeem the Notes at their Prevailing Principal Amount. A Noteholder could lose all or part of the value of its investment in the Notes as a result of any of the foregoing.

In addition, given that the Notes will, as at the Issue Date, comprise a proportion of the Issuer's regulatory capital, the occurrence of a Capital Disqualification Event in relation to the Notes (or any other capital instrument issued by the Issuer or any member of any applicable Solvency II Group) may cause a Trigger Event to occur and the Notes would then be Written Down (even in circumstances where the Notes no longer counted as Tier 1 Capital of the Issuer and/or any applicable Solvency II Group). In addition, the occurrence of a Capital Disqualification Event would permit the Issuer to redeem the Notes at their Prevailing Principal Amount at that time.

Please also refer to the risk factor entitled "*Risk Factors – Risks relating to the Notes – The Issuer may redeem the Notes at the Issuer's option in certain circumstances, and an investor may not be able to reinvest the redemption proceeds at as effective a rate of return as that in respect of the Notes*" below.

Waiver of set-off.

Noteholders waive any right of set-off, compensation, counterclaim or retention in relation to the Notes insofar as permitted by applicable law.

In certain circumstances, redemption of the Notes must be deferred by the Issuer.

The payment obligations by the Issuer in connection with any redemption of the Notes are conditional upon (i) there being no Regulatory Deficiency Redemption Deferral Event at the time of such payment and no such event occurring as a result of such payment, (ii) compliance by the Issuer with any applicable Regulatory Conditions, and such redemption being permitted under the Relevant Rules and (iii) satisfaction of the Solvency Condition. Any amounts of principal in respect of the Notes which cannot be paid on the scheduled payment date by virtue of such provisions must be deferred by the Issuer, and non-payment of the amounts so deferred shall not constitute a default under the Notes for any purpose, including enforcement action against the Issuer.

If redemption of the Notes is deferred, the Notes will only become due for redemption in the circumstances described in Condition 7(a)(iv) (and subject to satisfaction of the Solvency Condition).

In addition, if the Issuer has elected to redeem the Notes and, prior to the redemption, a Trigger Event occurs, the relevant redemption notice shall be automatically rescinded and shall be of no force and effect.

The circumstances in which a Regulatory Deficiency Redemption Deferral Event may occur are dependent upon the solvency position of the Issuer and/or any applicable Solvency II Group under the Relevant Rules and the requirements of the Relevant Rules. Events which constitute a Regulatory Deficiency Redemption Deferral Event could include, without limitation, any event which causes any Solvency Capital Requirement or Minimum Capital Requirement applicable to the Issuer or all or part of any Solvency II Group (which part includes the Issuer) to be breached and/or the occurrence and continuation of an Insolvent Insurer Winding-up, in each case, where such event is an event which

under the Relevant Rules means that the Issuer must defer or suspend the redemption or purchase of the Notes and where the Relevant Supervisor has not waived the requirement to defer redemption or purchase of the Notes in accordance with any pre-conditions to such waiver being capable of being granted as prescribed by the Relevant Rules, in each case on the basis that the Notes are intended to qualify as Tier 1 Capital under the Relevant Rules.

Any actual or anticipated deferral of redemption can be expected to have a material adverse effect on the market price of the Notes. Investors in the Notes may find it difficult to sell their Notes in such circumstances, or may only be able to sell their Notes at a price which may be significantly lower than the price at which they purchased their Notes. In such a sale, investors may lose some or substantially all of their investment in the Notes. In addition, as a result of the principal deferral provisions of the Notes, the market price of the Notes may be more volatile than the market prices of other securities or instruments that do not require deferral of principal, and may be more sensitive generally to adverse changes in the Issuer's financial condition.

The Notes are perpetual securities and have no scheduled maturity date, and Noteholders only have a limited ability to exit their investment in the Notes.

The Notes are perpetual securities and have no fixed or scheduled maturity date. Although the Issuer may, under certain circumstances described in the Conditions, redeem the Notes, the Issuer is under no obligation to do so, and Noteholders have no right to require the Issuer to exercise any right it may have to redeem the Notes.

Prospective investors should be aware that they may be required to bear the financial risks associated with an investment in long term securities which may never be redeemed. Noteholders have no ability to exit their investment, except (i) in the event of the Issuer exercising its right to redeem the Notes in accordance with the Conditions, (ii) by selling their Notes (including, following the occurrence of a Trigger Event, their future rights to principal following any future Write Up) or (iii) upon a Winding-Up or liquidation of the Issuer, in which limited circumstances the Noteholders may receive some of any resulting liquidation proceeds following payment being made in full to all senior and more senior subordinated creditors. The proceeds, if any, realised by any of the actions described in (ii) and (iii) above or where the Issuer is able to redeem the Notes as a result of a Deductibility Event, a Gross-up Event or a Capital Disqualification Event or pursuant to Condition 7(f) may be substantially less than the Initial Principal Amount of the Notes or the amount of the investor's investment in the Notes.

The Issuer may redeem the Notes at the Issuer's option in certain circumstances, and an investor may not be able to reinvest the redemption proceeds at as effective a rate of return as that in respect of the Notes.

The Notes may, subject as provided in the Conditions, be redeemed (i) on any date in the period from (and including) 9 September 2031 to (and including) the First Reset Date and on any Interest Payment Date thereafter, (ii) at any time following a Deductibility Event or a Gross-up Event, (iii) at any time following a Capital Disqualification Event or (iv) at any time, after 75 per cent. or more of the aggregate principal amount (determined, solely for these purposes, as though all outstanding Notes remain at their Initial Principal Amount) of the Notes originally issued (and, for these purposes, any Further Notes will be deemed to have been originally issued) have been purchased by the Issuer or any of its Subsidiaries and cancelled, in each case at their Prevailing Principal Amount together with (to the extent not previously cancelled in accordance with the Conditions) any interest accrued but unpaid to (but excluding) the date specified for redemption in accordance with the Conditions.

During any period when the Issuer may elect, or is perceived to be able to elect, to redeem the Notes, the market value of the Notes generally will not rise substantially above the price at which they can be redeemed.

The cash paid to Noteholders upon such a redemption may be less than the then current market value of the Notes or the price at which such Noteholders purchased the Notes. Subject to the contractual and regulatory restrictions on doing so set out in the Conditions, the Issuer might redeem the Notes when its cost of borrowing for an instrument with a comparable regulatory capital treatment at the time is lower than the interest payable on the Notes. At those times, an investor generally may not be able to reinvest the redemption proceeds at an effective interest rate which is as high as the interest rate on the Notes being redeemed and may only be able to do so at a significantly lower rate. Potential investors should consider reinvestment risk in light of other investments available at that time.

Please also refer to the risk factor entitled "*Risk Factors – Risks relating to the Notes – In certain circumstances, redemption of the Notes must be deferred by the Issuer*" above.

Other regulatory capital instruments may not be subject to a write-down.

The terms and conditions of other regulatory capital instruments already in issue or to be issued after the date of this Offering Circular by the Issuer or any other member of an applicable Solvency II Group may vary and, accordingly, such instruments may not convert into equity or be written down at the same time, or to the same extent, as the Notes, or at all.

Further, regulatory capital instruments issued by the Issuer or a member of an applicable Solvency II Group with terms that require such instruments to be converted into equity and/or written down when a solvency or capital measure falls below a certain threshold, may not be converted or written down in case of the occurrence of a Trigger Event if the relevant capital or solvency measure for triggering a conversion or write down, as the case may be, under those instruments is calculated differently from the capital or solvency measures set out in the definition of Trigger Event in the Conditions. Also, regulatory capital instruments issued by any parent company or Subsidiary of the Issuer that are required pursuant to their terms to be converted into equity and/or fully or partially written down when the relevant capital or solvency measure falls below a certain threshold may not be converted or written down in case of the occurrence of a Trigger Event if the events triggering a conversion or write down, as the case may be, under the terms of those instruments are determined on a different basis.

Accordingly, the Notes may be subject to a greater degree of loss absorption than would otherwise have been the case had such other instruments been written down or converted at the same time as or prior to the Notes.

Restricted remedy for non-payment when due.

In accordance with the current requirements for eligible Tier 1 Capital and Greek Law 4364/2016, the sole remedy against the Issuer available to any Noteholder for recovery of amounts which have become due in respect of the Notes will be the proving in any Winding-Up or liquidation proceedings of the Issuer. In particular, neither cancellation of payments of interest nor deferral of a redemption of the Notes as described above shall constitute a default under the Notes for any purpose, including enforcement action against the Issuer.

The Noteholders shall have no right to institute proceedings for the Winding-Up or liquidation of the Issuer. As a matter of Greek insurance law, insurance undertakings are exempt from general insolvency proceedings and are instead subject to the special insurance liquidation regime under Greek Law 4364/2016. General insolvency proceedings may be commenced only after revocation of the insurer's licence and completion of the special liquidation process. Under this framework, only the BoG, as the competent supervisory authority, has the power to revoke an insurer's licence and trigger insurance liquidation proceedings. Creditors (including Noteholders) cannot petition for or institute such proceedings.

These features, taken together, mean that there is a significant risk that an investor may not be able to recover its investment in the Notes.

Substitution or variation of the terms of the Notes upon the occurrence of a Deductibility Event, a Gross-up Event or a Capital Disqualification Event.

Subject to Condition 7(b), if a Deductibility Event, a Gross-up Event or a Capital Disqualification Event has occurred and is continuing, or in order to ensure the effectiveness and enforceability of Condition 20(d), the Issuer may (without the consent of the Noteholders) at any time either substitute all (but not some only) of the Notes for, or vary the Conditions (including, without limitation, changing the governing law of Condition 20(d)) so that the Notes remain or become Qualifying Tier 1 Notes. The Notes may only be so substituted and the Conditions may only be so varied if the proposed variation would not of itself give rise to a Deductibility Event, a Gross-up Event or a Capital Disqualification Event.

Whilst such substitution of the Notes or variation of the Conditions must not result in the substituted Notes or varied Conditions being materially less favourable to an investor in the Notes (as reasonably determined by the Issuer in consultation with an independent investment bank or independent financial adviser of international standing), there can be no assurance that, due to the particular circumstances of each Noteholder, such substituted Notes or varied Notes, as the case may be, will be as favourable to each Noteholder in all respects.

The terms of the Notes may be modified with the consent of specified majorities of the Noteholders at a duly convened meeting, and the Agent may consent to certain modifications to the Notes without the consent of the Noteholders.

The Agency Agreement contains provisions for calling meetings of Noteholders to consider matters affecting their interests generally. These provisions permit defined majorities to bind all Noteholders, including Noteholders who did not attend and vote at the relevant meeting and Noteholders who voted in a manner contrary to the majority. In addition, subject to the Regulatory Conditions, the Agent may, without the consent of Noteholders, agree to certain modifications of any of the provisions of the Notes in the circumstances described in Condition 13(b).

The Conditions also provide that the Issuer may, under certain circumstances, substitute the Notes or vary the Conditions in accordance with Condition 7(h). In this respect, please also refer to the risk factor entitled "*Risk Factors – Risks relating to the Notes – Substitution or variation of the terms of the Notes upon the occurrence of a Deductibility Event, a Gross-up Event or a Capital Disqualification Event*" above and the risk factor entitled "*Risk Factors – Risks relating to the Notes – Regulation and reform of 'benchmarks' may adversely affect the value of the Notes*" below.

Accordingly, there is a risk that the terms of the Notes may be modified, waived or varied in circumstances where an investor in the Notes does not agree to such modification, waiver or variation, which may adversely impact the rights of such investor.

The Conditions contain provisions which permit the substitution of the Issuer and certain changes to the Conditions in the circumstances set out therein.

The Conditions of the Notes provide that the Issuer may, without the consent of Noteholders, substitute (A) any Relevant Subsidiary or (B) the Successor in Business of the Issuer, as the debtor in respect of the Notes in its place (and reverse any such substitution), in the circumstances and subject to the conditions described in Condition 14. Where any substitution to a Successor in Business is reversed there is no requirement that the resulting principal debtor be a Successor in Business. No assurance can be given as to the impact of any substitution of the Issuer (or the reversal of any such substitution) as described above or that the Notes will, after any such substitution, due the particular circumstances of

each Noteholder, be as favourable to such Noteholder as the Notes were prior to such substitution and any such substitution (or reversal thereof) could materially adversely impact the value of the Notes.

Any changes effected pursuant to Condition 14 may potentially have a material adverse effect on the market price of the Notes.

In connection with any such substitution, the Issuer may agree with the Substituted Debtor such amendments to the Conditions that the Issuer and the Substituted Debtor may determine are necessary solely for the purposes of ensuring that the Notes are or will be eligible to count as Tier 1 Capital of the Issuer and/or each applicable Solvency II Group in accordance with the Relevant Rules applicable as at the date of substitution of the Issuer pursuant to Condition 14, provided that any such amendments are not (in the opinion of the Issuer) materially prejudicial to the interests of the Noteholders.

Regulation and reform of "benchmarks" may adversely affect the value of the Notes.

Following the First Reset Date, interest amounts payable under the Notes are calculated from time to time by reference to the annual mid-swap rate for swap transactions denominated in euro with a term of five years, which appears on the Bloomberg Screen Page ICAE1.

This swap-rate, the Euro Interbank Offered Rate ("**EURIBOR**") underlying the floating leg of this swap rate and other interest rates or other types of rates and indices which are deemed "benchmarks" (each a "**Benchmark**") have, in recent years, been the subject of political and regulatory scrutiny as to how they are created and operated. This has resulted in regulatory reform and changes to existing Benchmarks, including, in June 2016, pursuant to the entry into force of Regulation (EU) 2016/1011 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds. These reforms may cause a Benchmark to perform differently than in the past, or to disappear entirely, or to have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on the Notes.

Under the Conditions, certain benchmark replacement provisions will apply if a Benchmark (or any component part thereof) used as a reference for the calculation of interest amounts payable under the Notes were to be discontinued or otherwise became unavailable.

If a Benchmark Event occurs, the Issuer shall use its reasonable endeavours to appoint an Independent Adviser, which must be an independent financial institution of international repute or other independent adviser experienced in the international debt capital markets. Such Independent Adviser will be tasked with determining whether an officially recognised Successor Reference Rate to the discontinued Benchmark exists. If that is not the case, the Independent Adviser will attempt to find an Alternative Reference Rate. If the Independent Adviser determines a Successor Reference Rate or Alternative Reference Rate, such Successor Reference Rate or Alternative Reference Rate will replace the previous Benchmark for purposes of determining the relevant Interest Rate and the Independent Adviser shall apply an Adjustment Spread to such Successor Reference Rate or Alternative Reference Rate. Such determination will (in the absence of manifest error) be binding for the Issuer, the Agent, Paying Agent and the Noteholders. In addition, if amendments to the Conditions are required to ensure the proper operation of the Successor Reference Rate, the Alternative Reference Rate or the Adjustment Spread, the Issuer shall vary the Conditions accordingly, without any requirement for the consent or approval of the Noteholders.

If the Issuer is unable to appoint an Independent Adviser, or the Independent Adviser appointed by the Issuer fails to determine a Successor Reference Rate or an Alternative Reference Rate (as applicable) prior to the relevant IA Determination Cut-off Date, the Issuer (acting in good faith and in a commercially reasonable manner) may still determine: (a) a Successor Reference Rate; or (b) if the Issuer fails to determine a Successor Reference Rate, an Alternative Reference Rate and, in each case,

an Adjustment Spread (if any) as well as amendments to the Conditions without consulting with an Independent Adviser.

If a Successor Reference Rate or an Alternative Reference Rate and/or, in either case, an Adjustment Spread is not determined pursuant to the operation of Condition 4(i) or is not notified to the Agent prior to the relevant Issuer Determination Cut-off Date, then the relevant Reset Rate of Interest shall be determined by reference to the fallback provisions contained in the definition of "Reset Reference Rate", which may mean that the relevant Reset Rate of Interest applicable to each Interest Period falling within the relevant Reset Period will be determined on the basis that the relevant Reset Reference Rate is derived from the applicable annual mid-swap rate for swap transactions in euro (with a maturity equal to five years) that most recently appeared on the Screen Page.

Furthermore, it is possible that the Reset Reference Rate will continue to be published on the Screen Page but the Screen Page provider opts to replace the EURIBOR component of such rate with a successor or alternative reference rate, with the effect that (assuming no Benchmark Event has occurred in respect of EURIBOR) no Benchmark Event will occur but the basis of determination of the relevant Reset Reference Rate may not be directly comparable to the rates displayed on the Screen Page on or around the Issue Date.

No Successor Reference Rate or Alternative Reference Rate (as applicable) will be adopted, and no other amendments to the terms of the Notes will be made pursuant to Condition 4(i), if and to the extent that, in the determination of the Issuer, the same could reasonably be expected to: (A) prejudice the qualification of the Notes as Tier 1 Capital of the Issuer and/or any applicable Solvency II Group for the purposes of, and in accordance with, the Relevant Rules as they apply to the Issuer and/or any applicable Solvency II Group; and/or (B) result in the Relevant Supervisor treating the next Interest Payment Date or the next Reset Date, as the case may be, as the effective maturity of the Notes.

Any such consequences could have a material adverse effect on the trading market for, liquidity of, value of and return on the Notes. Moreover, any of the above matters or any other significant change to the setting or existence of any relevant reference rate could affect the ability of the Issuer to meet its obligations under the Notes or could have a material adverse effect on the value or liquidity of, and the amount payable under, the Notes. Investors should consider these matters when making their investment decision with respect to the Notes.

Limitation on gross-up obligation under the Notes.

The Issuer's obligation, if any, to pay additional amounts in respect of any withholding or deduction in respect of taxes imposed in a Taxing Jurisdiction under the terms of the Notes applies only to payments of interest and not to payments of principal.

As such, the Issuer would not be required to pay any Additional Amounts under the terms of the Notes to the extent any withholding or deduction applied to payments of principal. Accordingly, if any such withholding or deduction were to apply to any payments of principal under the Notes, Noteholders will receive less than the full amount which would otherwise be due to them under the Notes, and the market value of the Notes may be adversely affected.

General taxation risks.

Potential purchasers and sellers of the Notes should be aware that they may be required to pay taxes or other documentary charges or duties in accordance with the laws and practices of the country where the Notes are issued, transferred, where the investors are resident for tax purposes and/or other jurisdictions. Potential investors should ask for their own tax adviser's advice on their individual taxation with respect to the acquisition, ownership, sale and redemption of the Notes, including in respect of U.S. Foreign Account Tax Compliance Withholding rules, Common Reporting Standard rules or financial

transactions taxes. Only these advisers are in a position to duly consider the specific situation of the potential investor.

Change of tax law and practice.

The statements in relation to taxation set out in this Offering Circular are based on current law and the practice of the relevant authorities in force or applied at the date of this Offering Circular. Potential investors should be aware that any relevant tax law or practice applicable as at the date of this Offering Circular and/or the date of purchase of the Notes may change at any time. Any such change may have an adverse effect on a Noteholder, including that the liquidity of the Notes may decrease and/or the amounts payable to or receivable by an affected Noteholder may be less than otherwise expected by such Noteholder.

Potential investors who are in any doubt as to their tax position should consult their own independent tax advisers.

Change of law.

The Conditions are based on English law or, in the case of Conditions 3, 19 and 20(d), Greek law in effect as at the date of issue of the Notes. In order to ensure the effectiveness and enforceability of Condition 20(d), the Issuer may (without the consent of the Noteholders) at any time either substitute all (but not some only) of the Notes for, or vary the terms and conditions of the Notes (including, without limitation, changing the governing law of Condition 20(d)) so that they remain or, as the case may be, become Qualifying Tier 1 Notes. No assurance can be given as to the impact of any possible judicial decision or change to English or Greek law or administrative practice after the date of issue of the Notes.

Future regulatory proposals may also impose further restrictions on the Issuer's ability to make payments on the Notes. These issues, and other possible issues of interpretation, make it difficult to determine whether a Capital Disqualification Event will occur, whether a Regulatory Deficiency Interest Cancellation Event or a Regulatory Deficiency Redemption Deferral Event will occur and whether a Trigger Event will occur. This uncertainty and the resulting complexity may adversely impact the trading price and the liquidity of the Notes. In particular, potential investors should note that any such change in applicable law or administrative practice may have an adverse impact on the secondary market value of the Notes.

RISKS RELATING TO THE MARKET GENERALLY

The secondary market generally.

The Notes will have no established trading market when issued, and one may never develop including (without limitation) as a result of the Notes being purchased initially by a single investor or a limited number of initial investors. If a market for the Notes does develop it may not be liquid. Investors may not be able to sell their Notes easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market and/or which are rated. This will particularly be the case if the Notes are issued to a single investor or a limited number of initial investors. Illiquidity may have a severely adverse effect on the market value of the Notes.

If the Issuer's financial condition deteriorates such that there is an increased risk that the Issuer may be wound-up or liquidated, or if at any time there is any actual or anticipated cancellation of interest or deferral of redemption and/or any risk of early redemption in accordance with the Conditions, such circumstances can be expected to have a material adverse effect on the market price of the Notes. Investors in the Notes may find it difficult to sell their Notes in such circumstances, or may only be able to sell their Notes at a price which may be significantly lower than the price at which they purchased their Notes. In such a sale, investors may lose some or substantially all of their investment in the Notes.

Exchange rate risks and exchange controls.

The Issuer will pay principal and interest on Notes in euro. This presents certain risks relating to currency conversions if an investor's financial activities are denominated principally in a currency or currency unit (the "**Investor's Currency**") other than euro. These include the risk that exchange rates may significantly change (including changes due to devaluation of euro or revaluation of the Investor's Currency) and the risk that authorities with jurisdiction over the Investor's Currency may impose or modify exchange controls. An appreciation in the value of the Investor's Currency relative to euro would decrease (1) the Investor's Currency-equivalent yield on the Notes, (2) the Investor's Currency-equivalent value of the principal payable on the Notes and (3) the Investor's Currency-equivalent market value of the Notes.

Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate. As a result, investors may receive less interest or principal than expected, or no interest or principal.

Interest rate risks.

Investment in the Notes, which bear a fixed rate of interest which is reset on each Reset Date, involves the risk that subsequent increases in market interest rates may adversely affect the market value of the Notes.

Since the Notes are held by or on behalf of Euroclear and Clearstream, Luxembourg, investors will have to rely on the clearing system procedures for transfer, payment and communication with the Issuer.

The Notes will, upon issue, be represented by a Global Certificate that will be deposited with, and registered in the name of a nominee for, a common depositary for Euroclear and Clearstream, Luxembourg. Euroclear and Clearstream, Luxembourg will maintain records of the beneficial interests in the Global Certificate. While the Notes are in global form, investors will be able to trade their beneficial interests only through Euroclear or Clearstream, Luxembourg, as the case may be.

While the Notes are in global form, the payment obligations of the Issuer under the Notes will be discharged upon such payments being made by or on behalf of the Issuer to or to the order of the nominee for the common depositary. A holder of a beneficial interest in a Note must rely on the procedures of Euroclear and/or Clearstream, Luxembourg, as the case may be, to receive payments under the Notes. The Issuer does not have any responsibility or liability for the records relating to, or payments made in respect of, beneficial interests in the Global Certificate.

Integral multiples of less than €200,000.

The denomination of the Notes will be €200,000 and integral multiples of €1,000 in excess thereof. Accordingly, it is possible that the Notes may be traded in the clearing systems in amounts in excess of €200,000 that are not integral multiples of €200,000. Should Certificates be required to be issued, they will be issued in principal amounts of €200,000 and higher integral multiples of €1,000 but will in no circumstances be issued to Noteholders who hold Notes in the relevant clearing system in amounts that are less than €200,000. Accordingly, any Noteholder who holds an amount which is less than €200,000 in principal amount of the Notes in its account with the relevant clearing system at the relevant time may not receive a Certificate (should Certificates be printed) in respect of such holding. Such a Noteholder would need to purchase a principal amount of Notes such that its holding amounts to €200,000 in order to receive a Certificate.

If Certificates are issued, Noteholders should be aware that definitive Notes which have a denomination that is not an integral multiple of €200,000 may be illiquid and difficult to trade.

GENERAL DESCRIPTION OF THE NOTES

The following general description of the Notes does not purport to be complete and is taken from, and is qualified in its entirety by, the remainder of this Offering Circular.

Issuer	"The Ethniki" Hellenic General Insurance Company S.A. (Legal Entity Identifier: 549300KEWDFHSXE9Z74)
Issue	€100,000,000 6.875 per cent. Reset Subordinated Restricted Tier 1 Perpetual Temporary Write-Down Notes
Issue Date	9 September 2026
Issue Price	100.000 per cent.
Status of the Notes	The Notes constitute direct, unsecured and subordinated obligations of the Issuer and rank <i>pari passu</i> and without any preference among themselves.
Subordination of the Notes	In the event of the Winding-Up or liquidation of the Issuer (except, in any such case, a solvent Winding-Up or voluntary liquidation solely for the purposes of a reconstruction or amalgamation, the terms of which reconstruction or amalgamation (i) have previously been approved by an Extraordinary Resolution and the Relevant Supervisor and (ii) do not provide that the Notes shall thereby become payable), the rights and claims of the Noteholders against the Issuer in respect of the payment obligations of the Issuer under or arising from the Notes, including any damages awarded for breach of any obligations in respect of the Notes, shall be subordinated in the manner provided in Condition 3(a) to the claims of all Senior Creditors of the Issuer, but shall (subject to mandatory provisions of Greek law, including Greek Law 4364/2016) rank (a) at least <i>pari passu</i> with the claims of holders of all other subordinated obligations of the Issuer which constitute, or would but for any applicable limitation on the amount of such capital constitute, Tier 1 Capital and all obligations which rank, or are expressed by their terms to rank, <i>pari passu</i> therewith; and (b) in priority to the claims of holders of all classes of share capital of the Issuer.
Waiver of set-off	Subject to applicable law (including the mandatory provisions of Greek Law 4364/2016 governing inter alia the Winding-Up), no Noteholder may exercise, claim or plead any right of set-off, compensation, counterclaim, netting or retention in respect of any amount owed to it by the Issuer in respect of, or arising under or in connection with the Notes, and each Noteholder irrevocably and unconditionally and by virtue of its holding of any Note (or any beneficial interest therein) waives all such rights of set-off, compensation, counterclaim, netting or retention.
Interest	The Notes bear interest on their Prevailing Principal Amount from (and including) the Issue Date to (but excluding) the First Reset

Date at the rate of 6.875 per cent. per annum (the "**Initial Fixed Interest Rate**").

From the First Reset Date onwards, the Notes bear interest on their Prevailing Principal Amount from time to time at the applicable Reset Rate of Interest, which will be determined by the Agent on each Reset Determination Date as the sum of the relevant Reset Reference Rate and the Margin, unless a Benchmark Event has occurred, in which case the Reset Rate of Interest shall be determined pursuant to and in accordance with Condition 4(i).

Interest is payable (subject to cancellation in accordance with the Conditions) semi-annually in arrear on each Interest Payment Date.

Interest Payment Dates 9 March and 9 September in each year, from (and including) 9 March 2027.

Solvency Condition Except in the event of the Winding-Up or liquidation of the Issuer, all payments in respect of, or arising under or in connection with, the Notes (including any damages awarded for breach of any obligation in respect thereof) are, in addition to the right or obligation of the Issuer to cancel payments under Condition 5 and/or Condition 6, conditional upon the Issuer being solvent at the time of payment by the Issuer and no payments shall be due and payable in respect of, or arising under, the Notes except to the extent that the Issuer could make such payment and still be solvent immediately thereafter.

Optional cancellation of interest payments The Issuer may at its discretion (but subject to the requirement for mandatory cancellation of interest pursuant to Conditions 3(b), 5(b), 5(c) and 6) at any time elect to cancel any payment of interest on the Notes, in whole or in part, which is otherwise due or scheduled to be paid on any scheduled payment date.

Mandatory cancellation of interest payments – insufficient Available Distributable Items To the extent required by the Relevant Rules, an interest payment otherwise due on any scheduled payment date shall not be due (in whole or, as the case may be, in part) and the relevant interest payment will be cancelled mandatorily and not made on such scheduled payment date if, and to the extent that the amount of such interest payment (including, without limitation, any Additional Amounts in respect thereof) otherwise due would, when aggregated together with any interest payments or distributions which have been paid or made or which are scheduled simultaneously to be paid or made on all other Tier 1 Capital of the Issuer (excluding for these purposes any such payments or distributions which do not reduce the Issuer's Available Distributable Items and any payments, scheduled payments or accruals already accounted for by way of deduction in determining the Issuer's Available Distributable Items) since the end of the latest financial year of the Issuer and prior to, or on, such scheduled payment date, exceed the amount of Available Distributable Items of the Issuer as at such scheduled payment date.

"Available Distributable Items" means the non-consolidated profits and distributable reserves (if any) of the Issuer as calculated pursuant to the principles applicable to the Issuer's non-consolidated financial statements which are available, in accordance with applicable Greek law and regulation at the relevant time, for the payment of dividends on the share capital of the Issuer and the availability of which permits payment of interest on the Notes in accordance with the Relevant Rules at such time.

**Mandatory cancellation of
interest payments –
Regulatory Deficiency
Interest Cancellation Event**

To the extent required by the Relevant Rules, an interest payment otherwise due on any scheduled payment date will not be due (in whole or, as the case may be, in part), and the relevant payment will be cancelled mandatorily and not made on such scheduled payment date (i) if a Regulatory Deficiency Interest Cancellation Event has occurred and is continuing or (ii) if, and to the extent that, the interest payment otherwise due would cause a Regulatory Deficiency Interest Cancellation Event to occur.

Notwithstanding the previous paragraph, the relevant interest payment will not be cancelled if and to the extent:

- (ii) the Relevant Supervisor has, in the circumstances permitted in the Relevant Rules, exceptionally waived the cancellation of the relevant payment of interest (in whole or in part) and has provided the Issuer with written confirmation of the same;
- (iii) the relevant payment of interest would not further weaken the solvency position of the Issuer and/or any applicable Solvency II Group; and
- (iv) the Minimum Capital Requirement applicable to the Issuer and/or the Minimum Capital Requirement applicable to any applicable Solvency II Group will be complied with after the relevant payment is made.

"Regulatory Deficiency Interest Cancellation Event" means any event (including, without limitation, any event which causes any Solvency Capital Requirement or Minimum Capital Requirement applicable to the Issuer or all or part of any applicable Solvency II Group (which part includes the Issuer) to be breached and such breach is an event) which under the Relevant Rules requires the Issuer to cancel payment of interest in respect of the Notes (on the basis that the Notes are intended to qualify as Tier 1 Capital under the Relevant Rules) and where the Relevant Supervisor has not waived the requirement to cancel payment of interest under the Notes in accordance with any pre-conditions to such cancellation being capable of being granted as prescribed by the Relevant Rules (on the basis that the Notes are intended to qualify as Tier 1 Capital under the Relevant Rules).

Write Down

Write Down

If a Trigger Event has occurred, the Issuer shall:

- (i) (unless the Relevant Supervisor itself made the relevant determination) immediately inform the Relevant Supervisor of the occurrence of the Trigger Event;
- (ii) without delay, give the relevant Trigger Event Notice (which notice shall be irrevocable);
- (iii) immediately and irrevocably cancel any interest which has accrued up to (and including) the relevant Write Down Date and which is unpaid; and
- (iv) following the final determination of the Write Down Amount in accordance with Condition 6(b), reduce the then Prevailing Principal Amount of each Note by the relevant Write Down Amount (such reduction being referred to herein as a "Write Down", and "Written Down" shall be construed accordingly) as provided further in Condition 6(a).

Write Down Amount

The aggregate reduction of the Prevailing Principal Amounts of the Notes outstanding on the Write Down Date will, subject as provided below, be equal to:

- (i) in the case of a Write Down due to the occurrence of a Trigger Event referred to in any of paragraphs (i), (ii), (v) or (vi) of the definition of "Trigger Event" in Condition 18, the amount that would result in the entire Prevailing Principal Amount of a Note with an Initial Principal Amount of €1,000 being reduced to one cent per Note;
- (ii) in the case of a Write Down due to the occurrence of a Trigger Event referred to in paragraphs (iii) or (iv) of the definition of "Trigger Event" in Condition 18:
 - (a) if a consequence of the relevant Write Down (taking into account the write down or conversion of any other Loss Absorbing Instruments on or around the Write Down Date) would be that the aggregate quantum of own funds items which are eligible to cover the Solvency Capital Requirement and/or the Minimum Capital Requirement of the Issuer and/or each applicable Solvency II Group (as applicable) would increase such that no Trigger Event would be continuing and the SCR Ratio of the Issuer and each applicable Solvency II Group would be 100 per cent. or more immediately following such Write Down, such amount as

would be sufficient such that no Trigger Event would be continuing and the lower of the SCR Ratio of the Issuer and the then lowest SCR Ratio of each applicable Solvency II Group would be equal to 100 per cent. immediately following such Write Down (provided that this paragraph (ii)(a) shall only apply if the Issuer is capable of determining such amount prior to the Write Down Date); or

- (b) if paragraph (ii)(a) above does not apply, an amount calculated by the Issuer on a linear basis to reflect the prevailing Relevant SCR Ratio on the last day of the relevant 90-day period referred to in paragraphs (iii) or (iv) of the definition of "Trigger Event" in Condition 18, or on such other date as may be required by the Relevant Supervisor or by the Relevant Rules, where the resulting Prevailing Principal Amount of each Note would be (x) equal to the Initial Principal Amount if the prevailing Relevant SCR Ratio was 100 per cent. (or above) and (y) written down to one cent per Note if the prevailing Relevant SCR Ratio was at or below 75 per cent.; or
- (iii) in any case, such other amount as may be approved by the Relevant Supervisor prior to the Write Down Date in accordance with the Relevant Rules in force as at that time and in its sole and absolute discretion (which amount, if lower, may be equal to zero in the circumstances set out in Condition 6(b)).

Please see Condition 6(b) for further information.

A "**Trigger Event**" shall be deemed to occur if the Issuer or the Relevant Supervisor determines that at least one of the following events has occurred:

- (i) the amount of eligible own funds items of the Issuer is equal to or less than 75 per cent. of the Solvency Capital Requirement of the Issuer;
- (ii) the amount of eligible own funds items of any applicable Solvency II Group is equal to or less than 75 per cent. of the Solvency Capital Requirement of such Solvency II Group;
- (iii) the amount of eligible own funds items of the Issuer has been less than the Solvency Capital Requirement of the Issuer for a period of at least three months;
- (iv) the amount of eligible own funds items of any applicable Solvency II Group has been less than the Solvency Capital

Requirement of such Solvency II Group for a period of at least three months;

- (v) the amount of eligible own funds items of the Issuer is equal to or less than the Minimum Capital Requirement of the Issuer; and/or
- (vi) the amount of eligible own funds items of any applicable Solvency II Group is equal to or less than the Minimum Capital Requirement of such Solvency II Group.

Following any reduction of the Prevailing Principal Amount of the Notes to a Prevailing Principal Amount which remains greater than one cent as described in accordance with Condition 6(a), interest will accrue on the Prevailing Principal Amount of each Note with effect from (but excluding) the Write Down Date, and will be subject to Conditions 3(b), 5(a), 5(b), 5(c) and 6(a). For so long as the Prevailing Principal Amount is reduced to one cent, and without prejudice to the continued application of the remainder of these Conditions, no interest shall accrue on the Notes.

Write Up

The Issuer shall, save as provided in Condition 6(d) in relation to the pre-conditions to any Write Up, have full discretion to reinstate, to the extent permitted in compliance with the Relevant Rules, any portion of the principal amount of the Notes which has been Written Down and which has not previously been Written Up. The reinstatement of the Prevailing Principal Amount (such reinstatement being referred to herein as a "**Write Up**", and "**Written Up**" shall be construed accordingly) may occur on more than one occasion (and each Note may be Written Up on more than one occasion) provided that the principal amount of each Note shall never be Written Up to an amount greater than its Initial Principal Amount.

To the extent that the Prevailing Principal Amount of the Notes has been Written Up as described above, interest shall begin to accrue from (and including) the date of the relevant Write Up on the increased Prevailing Principal Amount of the Notes.

Please see Condition 6(d) for further information.

No fixed maturity

The Notes are perpetual securities with no fixed redemption date.

Deferral of redemption

The Issuer will be required to defer any scheduled redemption of the Notes pursuant to Condition 7 if (i) a Regulatory Deficiency Redemption Deferral Event has occurred and is continuing or would occur if the Notes were redeemed on such date and the Relevant Supervisor has not exceptionally waived the relevant deferral of redemption as contemplated in Condition 7(a)(ii); or (ii) the Relevant Supervisor does not consent to, or give its permission for, (or has, prior to the time of redemption, withdrawn its consent to or permission for) the redemption (to the extent that consent or permission is then required by the Relevant Supervisor or the Relevant Rules) or the Relevant Supervisor objects to the

redemption or such redemption otherwise cannot be effected in compliance with the Relevant Rules on such date.

In the event of any deferral of redemption of the Notes, the Notes will become due for redemption only in the circumstances described in Condition 7(a)(iv).

"Regulatory Deficiency Redemption Deferral Event" means any event (including, without limitation, where an Insolvent Insurer Winding-up has occurred and is continuing and any event which causes any Solvency Capital Requirement or Minimum Capital Requirement applicable to the Issuer or all or part of any applicable Solvency II Group (which part includes the Issuer) to be breached and the continuation of such Insolvent Insurer Winding-up is, or as the case may be, such breach is, an event) which under the Relevant Rules requires the Issuer to defer or suspend repayment, redemption or purchase of the Notes (on the basis that the Notes are intended to qualify as Tier 1 Capital under the Relevant Rules) and where the Relevant Supervisor has not waived the requirement to defer or suspend repayment, redemption or purchase of the Notes in accordance with any pre-conditions to such waiver being capable of being granted as prescribed by the Relevant Rules (on the basis that the Notes are intended to qualify as Tier 1 Capital under the Relevant Rules).

Redemption at the option of the Issuer

The Issuer may, subject to the satisfaction of certain conditions to redemption and upon notice to Noteholders, elect to redeem all, but not some only, of the Notes on (i) any date in the period from (and including) 9 September 2031 to (and including) the First Reset Date or (ii) on any Interest Payment Date thereafter at their Prevailing Principal Amount, together with (to the extent not previously cancelled in accordance with the Conditions) any unpaid interest accrued to (but excluding) the date fixed for redemption.

The Issuer may, subject to the satisfaction of certain conditions to redemption and upon notice to Noteholders, at any time elect to redeem all, but not some only, of the Notes, at their Prevailing Principal Amount together with (to the extent not previously cancelled in accordance with the Conditions) any unpaid interest accrued to (but excluding) the date fixed for redemption, if a Deductibility Event, a Gross-up Event or a Capital Disqualification Event has occurred and is continuing, or if 75 per cent. or more of the aggregate principal amount (determined, solely for these purposes, as though all outstanding Notes remain at their Initial Principal Amount) of the Notes originally issued (and, for these purposes, any Further Notes issued pursuant to Condition 17 will be deemed to have been originally issued) have been purchased by the Issuer or any of its Subsidiaries and cancelled.

A **"Deductibility Event"** means that at any time, as a result of a Tax Law Change, in respect of the Issuer's obligation (assuming, solely for this purpose, that Condition 3(b), 5 and 6 do not affect such obligation) to make any payment of interest on the next following Interest Payment Date the Issuer would not be entitled to

claim a deduction in respect of computing its taxation liabilities in the Taxing Jurisdiction, or such entitlement is reduced and the Issuer cannot avoid the foregoing in connection with the Notes by taking measures reasonably available to it.

A "**Gross-up Event**" means that at any time, by reason of a Tax Law Change, in making any payments on the Notes, the Issuer has paid or will or would on the next payment date be required (assuming, solely for this purpose, that Condition 3(b), 5 and 6 do not affect such requirement) to pay Additional Amounts on the Notes and the Issuer cannot avoid the foregoing in connection with the Notes by taking measures reasonably available to it.

A "**Capital Disqualification Event**" is deemed to have occurred if, as a result of any replacement of or change to (or change to the official interpretation by the Relevant Supervisor or any court or authority entitled to do so of) the Relevant Rules, the Prevailing Principal Amount of the Notes then outstanding is excluded (in whole or in part) from counting as Tier 1 Capital for the purposes of the Issuer or any applicable Solvency II Group, except (in any case) where such non-qualification is only as a result of any applicable limitation on the amount of such capital.

Substitution or variation

The Issuer may (without any requirement for the consent or approval of the Noteholders), subject to the satisfaction of certain conditions and upon notice to Noteholders, at any time either substitute all (but not some only) of the Notes for, or vary the terms and conditions of the Notes (including, without limitation, changing the governing law of Condition 20(d)) so that they remain or become (as applicable), Qualifying Tier 1 Notes if a Deductibility Event, a Gross-up Event or a Capital Disqualification Event has occurred and is continuing, or in order to ensure the effectiveness and enforceability of Condition 20(d).

Conditions to redemption, substitution, variation or purchases

Any redemption, substitution, variation or purchase of the Notes is subject, as applicable, to:

- (A) the Issuer having complied with all applicable Regulatory Conditions;
- (B) in the case of any redemption or purchase prior to the fifth anniversary of the Specified Date (to the extent then required by the Relevant Supervisor or the Relevant Rules), either:
 - (I) to such redemption or purchase being funded out of the proceeds of a new issuance of, or the Notes being exchanged into, own funds of the same or higher quality than the Notes and being otherwise permitted under the Relevant Rules; or
 - (II) in the case of such a redemption pursuant to Condition 7(d) or Condition 7(e), to the Issuer having demonstrated to the satisfaction of the

Relevant Supervisor that the Solvency Capital Requirement of the Issuer and the Solvency Capital Requirement of each applicable Solvency II Group will each be exceeded by an appropriate margin immediately after the relevant redemption, taking into account the solvency position of the Issuer and each applicable Solvency II Group (including, without limitation, the medium-term capital management plan of the Issuer and each applicable Solvency II Group) and, as applicable, either:

- (1) in the case of such a redemption pursuant to Condition 7(d), the Issuer having demonstrated to the satisfaction of the Relevant Supervisor that the applicable change in tax treatment is material and was not reasonably foreseeable as at the Specified Date; and
 - (2) in the case of such a redemption pursuant to Condition 7(e), the Issuer having demonstrated to the satisfaction of the Relevant Supervisor that the relevant change in the regulatory classification of the Notes was not reasonably foreseeable as at the Specified Date;
- (C) in the case of any redemption or purchase of the Notes on or following the fifth anniversary of the Specified Date but prior to the tenth anniversary of the Specified Date (to the extent then required by the Relevant Supervisor or the Relevant Rules)), either:
 - (I) to such redemption or purchase being funded out of the proceeds of a new issuance of, or the Notes being exchanged into, own funds of the same or higher quality than the Notes and being otherwise permitted under the Relevant Rules; or
 - (II) to the Issuer having demonstrated to the satisfaction of the Relevant Supervisor that the Solvency Capital Requirement of the Issuer and the Solvency Capital Requirement of each applicable Solvency II Group will each be exceeded by an appropriate margin immediately after the relevant redemption or purchase, taking into account the solvency position of the Issuer and each applicable Solvency II Group (including, without limitation, the medium-term capital management plan of the Issuer and each applicable Solvency II Group); and

- (D) the Solvency Condition being met immediately prior to the redemption or purchase of the Notes and the redemption or purchase not causing the Solvency Condition to be breached.

Notwithstanding the above conditions, if, at the time of any redemption, substitution, variation or purchase, the prevailing Relevant Rules permit the repayment, substitution, variation or purchase of Tier 1 Capital only after compliance with one or more alternative or additional pre-conditions to those set out in Condition 7(b), the Issuer shall comply with such other and/or, as appropriate, additional pre-condition(s).

The Issuer may also waive or suspend, at any time and in its sole discretion, its right to redeem, or to substitute or vary the Conditions of, the Notes for a (definite or indefinite) period of time to be determined by the Issuer.

Enforcement event

If default is made for a period of 14 days or more in the payment of any principal when due in respect of the Notes or any of them, each Noteholder may prove in the Winding-Up or liquidation proceedings of the Issuer for such payment, but may take no further or other action to enforce, prove or claim for any such payment. No payment in respect of the Notes may be made by the Issuer pursuant to Condition 12(a) otherwise than during or after a Winding-Up or liquidation of the Issuer, unless any applicable Regulatory Conditions are satisfied, which the Issuer shall confirm in writing to the Agent.

The Noteholders shall have no right to institute proceedings for the Winding-Up or liquidation of the Issuer.

Substitution of the Issuer

Condition 14 provides that the Issuer may, without the consent of the Noteholders, substitute (A) a Relevant Subsidiary or (B) the Successor in Business, as the debtor under the Notes (and reverse any such substitution) in its place in the circumstances and subject to the conditions (which permit certain amendments to be made) described in Condition 14.

Additional Amounts

All payments of principal, interest and any other amounts by or on behalf of the Issuer in respect of the Notes shall be made free and clear of, and without withholding or deduction for, or on account of, any present or future Taxes imposed, levied, collected, withheld or assessed by or on behalf of any Taxing Jurisdiction, unless such withholding or deduction is required by law. In that event, the Issuer shall (subject to any cancellation of interest in accordance with the Conditions) pay such additional amounts in relation to interest payments (but not in respect of payments of principal or any other amount) ("**Additional Amounts**") as shall result in receipt by the Noteholders of such amounts as would have been received by them in respect of interest payments had no such withholding or deduction been required by law to be made, subject to some exceptions, as described in Condition 9.

Statutory Loss Absorption Powers

Notwithstanding and to the exclusion of any other term of the Notes or any other agreements, arrangements or understanding between the Issuer and any Noteholder (which, for the purposes of Condition 20(d), includes each holder of a beneficial interest in the Notes), each Noteholder by its acquisition of the Notes (or any interest therein) acknowledges and accepts that the Amounts Due arising under the Notes may be subject to the exercise of Statutory Loss Absorption Powers by the Relevant Resolution Authority and acknowledges, accepts, consents to and agrees to be bound by (i) the effect of the exercise of any such Statutory Loss Absorption Powers, including the reduction of the Amounts Due, the conversion of all or a portion of the Amounts Due, the cancellation of the Notes or the Amounts Due or the amendment or alteration of the perpetual nature of the Notes, the interest or the interest payment dates including by suspending payment for a temporary period, and (ii) the variation of the terms of the Notes, as deemed necessary by the Relevant Resolution Authority to give effect to the exercise of any Statutory Loss Absorption Powers by the Relevant Resolution Authority.

No repayment or payment of Amounts Due in respect of the Notes will become due and payable or be paid after the exercise of any Statutory Loss Absorption Powers by the Relevant Resolution Authority if and to the extent such amounts have been reduced, converted, cancelled, amended or altered as a result of such exercise nor will such exercise constitute a default for any purpose.

The Issuer shall notify the Noteholders of the exercise of any Statutory Loss Absorption Powers.

Form

The Notes will be issued in registered form. The Notes will initially be represented by a Global Certificate and will be registered in the name of a nominee of a common depository for Euroclear and Clearstream, Luxembourg.

Listing and admission to trading

Application has been made for the Notes to be listed on the Official List of the Luxembourg Stock Exchange and admitted to trading on the Luxembourg Stock Exchange's Euro MTF market.

Denominations

The Notes are issued in denominations of €200,000 and integral multiples of €1,000 in excess thereof.

Governing law

The Notes are governed by, and shall be construed in accordance with, English law, save that Conditions 3, 19, and 20(d) are governed by, and shall, in each case, be construed in accordance with, Greek law.

No rating

The Notes are not expected to be rated by any credit rating agency.

Selling restrictions

The United States, the UK and the EEA (including Greece). See "*Subscription and Sale*".

Regulation S, Category 2; TEFRA not applicable.

Target market	The target market for the Notes (for the purposes of the MiFID II and UK MiFIR product governance rules) is eligible counterparties and professional clients only (all distribution channels).
Risk Factors	Prospective investors should carefully consider the information set out in " <i>Risk Factors</i> " in conjunction with the other information contained in this Offering Circular.

5. the 2025 Solvency & Financial Condition Report for the Issuer (available at: <https://assets.ctfassets.net/q8hnmvb13i8z/a3sQ5jyDnGGeAQvRGOWdg/0e9ad5b2fc541c184d70e57d7005b3a4/ethniki-sfcr-eng-2025.pdf>).

Any non-incorporated parts of a document referred to herein are either deemed not relevant for an investor or are otherwise covered elsewhere in this Offering Circular.

Any documents themselves incorporated by reference in the documents incorporated by reference in this Offering Circular shall not form part of this Offering Circular.

All documents incorporated by reference will be made available on the Issuer's website: <https://www.ethnikiasfalistiki.gr/en/about>.

TERMS AND CONDITIONS OF THE NOTES

The following is the text of the Terms and Conditions of the Notes which (subject to modification and except for the paragraphs in italics) will be endorsed on the Certificates issued in respect of the Notes:

The €100,000,000 6.875 per cent. Reset Subordinated Restricted Tier 1 Perpetual Temporary Write-Down Notes (the "**Notes**" which expression shall in these Conditions, unless the context otherwise requires, include any Further Notes (as defined below) issued pursuant to Condition 17) of "The Ethniki" Hellenic General Insurance Company S.A. (the "**Issuer**") were authorised by resolutions of the Board of Directors of the Issuer dated 30 July 2026 and 31 August 2026.

The Notes are issued in accordance with an Agency Agreement (such Agency Agreement as amended and/or supplemented and/or restated from time to time, the "**Agency Agreement**") dated 9 September 2026 and made and agreed between the Issuer, Deutsche Bank AG, London Branch as agent and paying agent (the "**Agent**", which expression shall include any successor agent and paying agent) and any other paying agents named therein (together with the Agent, the "**Paying Agents**", which expression shall include any additional or successor paying agents), Deutsche Bank Luxembourg S.A. as registrar (the "**Registrar**", which expression shall include any successor registrar) and the initial transfer agents named in the Agency Agreement (the "**Transfer Agents**", which expression shall include any additional or successor transfer agents).

The statements in these terms and conditions (the "**Conditions**" and references to a numbered "**Condition**" shall be construed accordingly) include summaries of, and are subject to, the detailed provisions of and definitions in the Agency Agreement. A copy of the Agency Agreement is available for inspection and collection during normal business hours by Noteholders (as defined below) at the Specified Office (as defined below) of each Paying Agent, the Registrar and each Transfer Agent or the Specified Office of the Noteholders Agent (as defined below) or may be provided by email to a Noteholder following their prior written request to a Paying Agent, the Registrar or a Transfer Agent (as the case may be) and provision of proof of holding and identity (in a form satisfactory to the relevant Paying Agent, the Registrar or the relevant Transfer Agent (as the case may be)). The Noteholders are entitled to the benefit of, are bound by, and are deemed to have notice of, all the provisions of the Agency Agreement applicable to them.

The Notes are being issued under the provisions of articles 59-74 (inclusive) of Greek Law 4548/2018 and article 14 of Greek Law 3156/2003. Further, for the purposes of Article 60 of Greek Law 4548/2018 these Conditions constitute the programme of the Notes. If the holders of the Notes must be organised in a group pursuant to article 63 of Greek Law 4548/2018, to the extent applicable, the Issuer shall appoint an agent of the holders of the Notes (the "**Noteholders Agent**") in accordance with Condition 19. If no such Noteholders Agent is appointed, any references to a Noteholders Agent or a Noteholders Agency Agreement in these Conditions shall not be relevant.

Words and expressions defined in the Agency Agreement shall have the same meanings where used in these Conditions unless the context otherwise requires or unless otherwise stated.

All references in these Conditions to "€" or "**euro**" are to the single currency introduced at the start of the third stage of European economic and monetary union pursuant to the Treaty on the Functioning of the European Union, as amended.

1. Form, denomination and title

(a) Form and denomination

The Notes are issued in registered form in denominations of €200,000 and integral multiples of €1,000 in excess thereof.

The Prevailing Principal Amount (as defined below) of the Notes may be adjusted as provided in Condition 6. Any such adjustment to the Prevailing Principal Amount of the Notes will not have any effect on the denomination of the Notes.

(b) Register

The Registrar will maintain outside the United Kingdom and the Hellenic Republic a register (the "**Register**") in respect of the Notes in accordance with the provisions of the Agency Agreement. In these Conditions, the holder of a Note means the person in whose name such Note is for the time being registered in the Register (or, in the case of a joint holding, the first named thereof) and "**Noteholder**" and "**holder**" shall be construed accordingly. A certificate (each, a "**Certificate**") will be issued to each Noteholder in respect of its registered holding. Each Certificate will be numbered serially with an identifying number which will be recorded in the Register. The Register will record the Initial Principal Amount (as defined below) and the Prevailing Principal Amount from time to time of the Notes held by a Noteholder, and each Certificate will identify the Initial Principal Amount of the Notes represented thereby and the Prevailing Principal Amount of such Notes at the time of issue of the Certificate (but the Prevailing Principal Amount identified on such Certificate shall not be treated as evidencing the Prevailing Principal Amount of the Notes represented by such Certificate at any other time).

(c) Title

A Noteholder shall (except as otherwise required by law) be treated as the absolute owner of such Note for all purposes (whether or not it is overdue and regardless of any notice of ownership, trust or any other interest therein, any writing on the Certificate relating thereto (other than the endorsed form of transfer) or any notice of any previous loss or theft of such Certificate) and no person shall be liable for so treating such Noteholder.

2. Transfers of Notes

(a) Transfers

Subject as provided under Conditions 2(d) and 2(e) below, a Note may be transferred upon surrender of the relevant Certificate, with the endorsed form of transfer duly completed (including any certificates as to compliance with restrictions on transfer included therein), at the specified office of the Registrar or any Transfer Agent, together with such evidence as the Registrar or (as the case may be) such Transfer Agent may reasonably require to prove the title of the transferor and the authority of the individuals who have executed the form of transfer. Where not all the Notes represented by the surrendered Certificate are the subject of the transfer, a new Certificate in respect of the balance of the Notes will be issued to the transferor.

(b) Registration and delivery of Certificates

Within five Business Days of the surrender of a Certificate, the Registrar will register the transfer in question and deliver at its specified office new Certificate(s) of a like principal amount to the Notes transferred to each relevant Noteholder or (as the case may be) the specified office of any Transfer Agent or (at the request and risk of any such relevant Noteholder) by uninsured first-class mail (airmail if overseas) to the address specified for the purpose by such relevant Noteholder.

(c) Transfer free of charge

The transfer of any Notes will be effected without charge by or on behalf of the Issuer, the Registrar or any Transfer Agent but upon payment by the Noteholder of any tax or other governmental charges that may be imposed in relation to it (or the giving of such indemnity as the Registrar or the relevant Transfer Agent may require).

(d) Closed periods

No Noteholder may require the transfer of a Note to be registered (i) during the period of 15 days prior to (and including) any date on which Notes may be called for redemption by the Issuer at its option pursuant to Condition 7(c), (ii) after the Notes have been called for redemption pursuant to Condition 7, or (iii) during the period of seven days ending on (and including) any Record Date.

(e) Regulations concerning transfers and registration

All transfers of Notes and entries on the Register are subject to the detailed regulations concerning the transfer of Notes scheduled to the Agency Agreement. The regulations may be changed by the Issuer with the prior written approval of the Registrar.

3. Status and Winding-Up

(a) General

The Notes constitute direct, unsecured and subordinated obligations of the Issuer and rank *pari passu* and without any preference among themselves. In the event of the Winding-Up or liquidation of the Issuer (except, in any such case, a solvent Winding-Up or voluntary liquidation solely for the purposes of a reconstruction or amalgamation, the terms of which reconstruction or amalgamation (i) have previously been approved by an Extraordinary Resolution and the Relevant Supervisor and (ii) do not provide that the Notes shall thereby become payable), the rights and claims of the Noteholders against the Issuer in respect of the payment obligations of the Issuer under or arising from the Notes, including any damages awarded for breach of any obligations in respect of the Notes, shall be subordinated in the manner provided in this Condition 3(a) to the claims of all Senior Creditors of the Issuer, but shall (subject to mandatory provisions of Greek law, including Greek Law 4364/2016) rank (a) at least *pari passu* with the claims of holders of all other subordinated obligations of the Issuer which constitute, or would but for any applicable limitation on the amount of such capital constitute, Tier 1 Capital and all obligations which rank, or are expressed by their terms to rank, *pari passu* therewith; and (b) in priority to the claims of holders of all classes of share capital of the Issuer.

(b) Solvency Condition

Except in the event of the Winding-Up or liquidation of the Issuer, all payments in respect of, or arising under or in connection with, the Notes (including any damages awarded for breach of any obligation in respect thereof) are, in addition to the right or obligation of the Issuer to cancel payments under Condition 5 and/or Condition 6, conditional upon the Issuer being solvent at the time of payment by the Issuer and no payments shall be due and payable in respect of, or arising under, the Notes except to the extent that the Issuer could make such payment and still be solvent immediately thereafter (the "**Solvency Condition**").

In these Conditions, the Issuer shall be considered to be solvent at a particular time if, at such time, (x) the Issuer is able to pay its debts to its Senior Creditors as they fall due and (y) the Issuer's Assets (as defined below) exceed its Liabilities (as defined below).

(c) Waiver of Set-off, etc.

Subject to applicable law (including the mandatory provisions of Greek Law 4364/2016 governing inter alia the Winding-Up), no Noteholder (which term, for the purposes of this Condition 3(c), includes a holder of a beneficial interest in the Notes) may exercise, claim or plead any right of set-off, compensation, counterclaim, netting or retention in respect of any amount owed to it by the Issuer in respect of, or arising under or in connection with the Notes, and each Noteholder hereby irrevocably and unconditionally and by virtue of its holding of any Note (or any beneficial interest therein) waives all such rights of set-off, compensation, counterclaim, netting or retention. If, notwithstanding the preceding sentence, any of the amounts owing to any Noteholder by the Issuer in respect of, or arising under or in connection with, the Notes has been subject to set-off, compensation, counterclaim, netting or retention by way of another agreement or otherwise, such Noteholder shall, subject to applicable law (including Greek Law 4364/2016), immediately return any such amount to the Issuer (or, in the event of its Winding-Up, the insurance liquidator of the Issuer) and, until such time as payment is made, shall hold an amount equal to such amount on a fiduciary basis, on behalf and for the benefit of the Issuer (or the insurance liquidator of the Issuer), and accordingly no discharge shall have taken place.

4. Interest

(a) Interest Rate and Interest Payment Dates

Subject to Conditions 3(b), 5 and 6, each Note bears interest on its Prevailing Principal Amount from time to time at the applicable Interest Rate payable semi-annually in arrear on each Interest Payment Date.

(b) Interest accrual

Subject to Conditions 3(b), 5 and 6, each Note will cease to bear interest from and including its due date for redemption (if any) unless payment of the principal in respect of the Note is improperly withheld or refused or unless default is otherwise made in respect of payment. In such event, interest will, subject to Conditions 3(b), 5 and 6, continue to accrue until whichever is the earlier of:

- (i) the date on which all amounts due in respect of such Note have been paid; and
- (ii) five days after the date on which the full amount of the moneys payable in respect of such Notes has been received by the Agent and notice to that effect has been given to the Noteholders in accordance with Condition 15.

(c) Calculation of interest

Interest shall, subject as provided below, be calculated per €1,000 in principal amount of the Notes (the "**Calculation Amount**") by the Agent by applying the applicable Interest Rate to such Calculation Amount, multiplying the resulting figure by the applicable day count fraction as described below in this Condition 4(c) and rounding the resultant figure to the nearest cent (with half a cent being rounded upwards).

Where interest is to be calculated in respect of any period, the applicable day count fraction will be (a) the actual number of days in the period from and including the date from which interest begins to accrue (the "**Accrual Date**") to but excluding the date on which it falls due divided by (b) two times the actual number of days from and including the Accrual Date to but excluding the next scheduled Interest Payment Date.

If the Prevailing Principal Amount of the Notes is Written Down (as defined below) or Written Up (as defined below) during an Interest Period (as defined below) pursuant to Condition 6 (and/or is otherwise adjusted pursuant to applicable law and regulation), the Calculation Amount will be adjusted to reflect such Prevailing Principal Amount from time to time so that the relevant amount of interest is determined by the Agent by reference to such Calculation Amount as adjusted from time to time and as if such Interest Period were comprised of two or (as applicable) more consecutive interest periods, with interest calculations based on the number of days for which each Prevailing Principal Amount and Calculation Amount was applicable.

(d) Initial Fixed Interest Rate

For the Initial Fixed Rate Interest Period, the Notes bear interest, subject to Conditions 3(b), 5 and 6, at the rate of 6.875 per cent. per annum (the "**Initial Fixed Interest Rate**").

(e) Reset Rate of Interest

The Interest Rate will be reset (each a "**Reset Rate of Interest**") in accordance with this Condition 4(e) on each Reset Date. The Reset Rate of Interest in respect of each Reset Period will be determined by the Agent on the relevant Reset Determination Date as the sum of the relevant Reset Reference Rate and the Margin (with such sum converted (if necessary) from an annual basis to a semi-annual basis (such calculation to be made by the Agent)), unless a Benchmark Event has occurred, in which case the relevant Reset Rate of Interest shall be determined pursuant to and in accordance with Condition 4(i).

(f) Determination of Reset Rate of Interest

The Agent will, as soon as practicable after 11.00 a.m. (Central European Time) on each Reset Determination Date, determine the Reset Rate of Interest in respect of the relevant Reset Period. The determination of a Reset Rate of Interest by the Agent shall (in the absence of manifest error) be final and binding upon all parties.

(g) Publication of Reset Rate of Interest

The Issuer shall cause notice of the Reset Rate of Interest determined in accordance with this Condition 4 in respect of each Reset Period to be given by the Agent to each other Paying Agent and any stock exchange on which the Notes are for the time being listed or admitted to trading and, in accordance with Condition 15, the Noteholders, in each case as soon as practicable after its determination but in any event not later than the relevant Reset Date. Any Reset Rate of Interest so notified may subsequently be amended (or appropriate alternative arrangements made by way of adjustment) in the event of manifest error.

If the Notes become due and payable pursuant to Condition 12(a) and for so long as the Notes remain outstanding thereafter, the accrued interest per Calculation Amount and the Reset Rate of Interest payable in respect of the Notes shall nevertheless, and without

prejudice to Conditions 3(b), 5 and 6, continue to be calculated as previously by the Agent in accordance with this Condition 4 but no publication of the relevant Reset Rate of Interest need be made.

(h) Determinations binding

All notifications, opinions, determinations, certifications, calculations, quotations and decisions given, expressed, made or obtained for the purposes of this Condition 4 by the Agent (or an agent on its behalf) or the Reset Reference Banks (or any of them), shall (in the absence of manifest error) be binding on the Issuer, the Paying Agents and all Noteholders and (in the absence of wilful default, bad faith or manifest error) no liability to the Noteholders or the Issuer shall attach to the Agent or a Reset Reference Bank in connection with the exercise or non-exercise by it of any of its powers, duties and discretions under this Condition 4.

(i) Benchmark discontinuation

Notwithstanding the other provisions of Condition 4 above, if the Issuer determines that a Benchmark Event has occurred in relation to the Original Reference Rate when any Reset Rate of Interest (or any component part thereof) remains to be determined by reference to the Original Reference Rate, then the following provisions of this Condition 4(i) shall apply.

- (i) The Issuer shall use reasonable endeavours, as soon as reasonably practicable, to appoint an Independent Adviser to determine: (a) a Successor Reference Rate; or (b) if such Independent Adviser fails so to determine a Successor Reference Rate, an Alternative Reference Rate and, in each case, an Adjustment Spread (in any such case, acting in good faith and in a commercially reasonable manner) by no later than the relevant IA Determination Cut-off Date for the purposes of determining the Reset Rate of Interest (or the relevant component part thereof) for all relevant future payments of interest on the Notes (in respect of periods beginning after the end of the then current Reset Period or, if the Issuer determined on or prior to the first Reset Determination Date that a Benchmark Event has occurred, in respect of periods beginning from the First Reset Date (as defined below) onwards) for which the Reset Rate of Interest (or the relevant component part thereof) was otherwise to be determined by reference to the Original Reference Rate (subject to the subsequent operation of, and adjustment as provided in, this Condition 4(i)).

If the Issuer is unable to appoint an Independent Adviser, or the Independent Adviser appointed by the Issuer fails to determine a Successor Reference Rate or an Alternative Reference Rate (as applicable) prior to the relevant IA Determination Cut-off Date, the Issuer (acting in good faith and in a commercially reasonable manner) may determine: (a) a Successor Reference Rate; or (b) if the Issuer fails so to determine a Successor Reference Rate, an Alternative Reference Rate and, in each case, an Adjustment Spread no later than the relevant Issuer Determination Cut-off Date for the purposes of determining the Reset Rate of Interest (or the relevant component part thereof) for all relevant future payments of interest on the Notes (in respect of periods as described above) for which the Reset Rate of Interest (or the relevant component part thereof) was otherwise to be determined by reference to the Original Reference Rate (subject to the subsequent operation of, and adjustment as provided in, this Condition 4(i)). Without prejudice to the

definitions thereof, for the purposes of determining any Alternative Reference Rate and the relevant Adjustment Spread, the Issuer will take into account any relevant and applicable market precedents as well as any published guidance from relevant associations involved in the establishment of market standards and/or protocols in the international debt capital markets.

(ii) If a Successor Reference Rate or, failing which, an Alternative Reference Rate (as applicable) and, in either case, an Adjustment Spread is determined by the relevant Independent Adviser or the Issuer (as applicable) in accordance with this Condition 4(i):

- (A) such Successor Reference Rate or Alternative Reference Rate (as applicable) shall subsequently be used in place of the Original Reference Rate to determine the Reset Rate of Interest (or the relevant component part thereof) for all relevant future payments of interest on the Notes (in respect of periods described above) for which the Reset Rate of Interest (or the relevant component part thereof) was otherwise to be determined by reference to the Original Reference Rate (subject to the subsequent operation of, and adjustment as provided in, this Condition 4(i)); or
- (B) such Adjustment Spread shall be applied to such Successor Reference Rate or Alternative Reference Rate (as the case may be) for all such relevant future payments of interest on the Notes (in respect of periods as described above) (subject to the subsequent operation of, and adjustment as provided in, this Condition 4(i));
- (C) the relevant Independent Adviser or the Issuer (as applicable) (acting in good faith and in a commercially reasonable manner) may in its discretion specify:
 - (1) changes to these Conditions in order to follow market practice in relation to such Successor Reference Rate or Alternative Reference Rate (as applicable); and
 - (2) any other changes which the relevant Independent Adviser or the Issuer (as applicable) determines are reasonably necessary to ensure the proper operation and comparability to the relevant Original Reference Rate of such Successor Reference Rate or Alternative Reference Rate (as applicable),

which changes shall apply to the Notes for all relevant future payments of interest on the Notes (in respect of periods as described above) for which the Reset Rate of Interest (or the relevant component part thereof) was otherwise to be determined by reference to the Original Reference Rate (subject to the subsequent operation of, and adjustment as provided in, this Condition 4(i)); and

- (D) promptly following the determination of any Successor Reference Rate or Alternative Reference Rate (as applicable) and the relevant Adjustment Spread, the Issuer shall give notice thereof and of any changes to these Conditions (and the effective date thereof) pursuant to Condition 4(i)(ii)(C) to the Relevant Supervisor, the Agent and the Noteholders in accordance with Condition 15.

- (iii) The Agent and any other agents party to the Agency Agreement shall, at the direction and expense of the Issuer, effect such consequential amendments (collectively, "**Benchmark Amendments**") to the Agency Agreement and these Conditions as may be required in order to give effect to the application of this Condition 4(i). No consent of the Noteholders shall be required in connection with effecting the relevant Successor Reference Rate or Alternative Reference Rate (as applicable) and, in either case, the relevant Adjustment Spread as described in this Condition 4(i) or such other relevant changes pursuant to Condition 4(i)(ii)(C), including for the execution of any documents or the taking of other steps by the Issuer or any of the parties to the Agency Agreement.

If a Successor Reference Rate or an Alternative Reference Rate and/or, in either case, an Adjustment Spread is not determined pursuant to the operation of this Condition 4(i) or is not notified to the Agent prior to the relevant Issuer Determination Cut-off Date, then the Reset Rate of Interest for the relevant Reset Period shall be determined by reference to the fallback provisions contained in the definition of "Reset Reference Rate" and the Issuer shall give notice thereof to the Agent and the Noteholders in accordance with Condition 15 by no later than such Issuer Determination Cut-off Date. For the avoidance of doubt, this paragraph shall apply to the relevant next succeeding Reset Period only and any subsequent Reset Periods are subject to the subsequent operation of, and to adjustment as provided in, this Condition 4(i).

Notwithstanding any other provision of this Condition 4(i), none of the Agent or any other Paying Agent shall be obliged to concur with the Issuer or the Independent Adviser in respect of Benchmark Amendments required to be made to the Agency Agreement or these Conditions as contemplated under this Condition 4(i) which, in the sole opinion of the Agent or a Paying Agent (as the case may be) would have the effect of increasing the obligations, responsibilities, liabilities or duties, or reducing the rights or protections, of such party in the Agency Agreement and/or these Conditions.

Notwithstanding any other provision of this Condition 4(i), if in the Agent's opinion there is any uncertainty in making any determination or calculation under this Condition 4(i), the Agent shall promptly notify the Issuer and/or the Independent Adviser thereof and the Issuer shall direct the Agent in writing as to which course of action to adopt. If the Agent is not promptly provided with such direction, or is otherwise unable to make such calculation or determination for any reason, it shall notify the Issuer and/or the Independent Adviser (as the case may be) thereof and the Agent shall be under no obligation to make such calculation or determination and shall not incur any liability for not doing so.

For the avoidance of doubt, no Agent shall be obliged to monitor or enquire as to whether a Benchmark Event has occurred or have any liability in respect thereof. The Agent shall be entitled to rely conclusively on any determinations made by the Issuer or the Independent Adviser (as the case may be) and shall have no liability for any action it takes at the direction of the Issuer or the Independent Adviser (as the case may be).

Notwithstanding any other provision of this Condition 4(i) no Successor Reference Rate or Alternative Reference Rate (as applicable) will be adopted, and no other amendments to the terms of the Notes will be made pursuant to

this Condition 4(i), if and to the extent that, in the determination of the Issuer, the same could reasonably be expected to:

- (A) prejudice the qualification of the Notes as Tier 1 Capital of the Issuer and/or any applicable Solvency II Group for the purposes of, and in accordance with, the Relevant Rules as they apply to the Issuer and/or any applicable Solvency II Group; and/or
 - (B) result in the Relevant Supervisor treating the next scheduled Interest Payment Date or the next Reset Date, as the case may be, as the effective maturity of the Notes.
- (iv) If the Issuer anticipates that a Benchmark Event will or may occur, nothing in these Conditions shall prevent the Issuer (in its sole discretion) from taking, prior to the occurrence of such Benchmark Event, such actions which it considers expedient in order to prepare for applying the provisions of this Condition 4(i) (including, without limitation, appointing and consulting with an Independent Adviser to identify any Successor Reference Rate, Alternative Reference Rate, Adjustment Spread and/or Benchmark Amendments), provided that no Successor Reference Rate, Alternative Reference Rate, Adjustment Spread and/or Benchmark Amendments will take effect until the relevant Benchmark Event has occurred.

5. Cancellation of interest

(a) Optional cancellation of interest payments

The Issuer may at its discretion (but subject to the requirement for mandatory cancellation of interest pursuant to Conditions 3(b), 5(b), 5(c) and 6) at any time elect to cancel any payment of interest on the Notes, in whole or in part, which is otherwise due or scheduled to be paid on any scheduled payment date.

(b) Mandatory cancellation of interest payments: Insufficient Available Distributable Items

To the extent required by the Relevant Rules, an interest payment otherwise due on any scheduled payment date shall not be due (in whole or, as the case may be, in part) and the relevant interest payment will be cancelled mandatorily and not made on such scheduled payment date if and to the extent that the amount of such interest payment (including, without limitation, any Additional Amounts in respect thereof) otherwise due would, when aggregated together with any interest payments or distributions which have been paid or made or which are scheduled simultaneously to be paid or made on all other Tier 1 Capital of the Issuer (excluding for these purposes any such payments or distributions which do not reduce the Issuer's Available Distributable Items and any payments, scheduled payments or accruals already accounted for by way of deduction in determining the Issuer's Available Distributable Items) since the end of the latest financial year of the Issuer and prior to, or on, such scheduled payment date, exceed the amount of Available Distributable Items of the Issuer as at such scheduled payment date.

(c) Mandatory cancellation of interest payments: Regulatory Deficiency Interest Cancellation Event

To the extent required by the Relevant Rules, an interest payment otherwise due on any scheduled payment date will not be due (in whole or, as the case may be, in part), and the relevant payment will be cancelled mandatorily and not made on such scheduled payment date (i) if a Regulatory Deficiency Interest Cancellation Event has occurred and is continuing or (ii) if, and to the extent that, the interest payment otherwise due would cause a Regulatory Deficiency Interest Cancellation Event to occur.

Notwithstanding the previous paragraph, the relevant interest payment will not be cancelled if and to the extent:

- (i) the Relevant Supervisor has, in the circumstances permitted in the Relevant Rules, exceptionally waived the cancellation of the relevant payment of interest (in whole or in part) and has provided the Issuer with written confirmation of the same;
- (ii) the relevant payment of interest would not further weaken the solvency position of the Issuer and/or any applicable Solvency II Group; and
- (iii) the Minimum Capital Requirement applicable to the Issuer and/or the Minimum Capital Requirement applicable to any applicable Solvency II Group will be complied with after the relevant payment is made.

(d) Notice of cancellation of interest payment

Upon the Issuer electing to cancel any interest payment (or part thereof) pursuant to Condition 5(a), or being prohibited from making any interest payment (or part thereof) pursuant to any of Conditions 3(b), 5(b), 5(c) and 6, the Issuer shall, as soon as reasonably practicable on or prior to the relevant Interest Payment Date, give notice of such non-payment and the reason therefor to the Noteholders in accordance with Condition 15 and to the Agent and the Noteholders Agent, provided that any failure to give such notice shall not affect the cancellation of any interest payment (in whole or, as the case may be, in part) and shall not constitute a default under the Notes for any purpose. Such notice shall specify the amount of the relevant cancellation and, accordingly, the amount (if any) of the relevant interest payment that will be or has been paid on the relevant scheduled payment date.

(e) Interest non-cumulative; no default

Any interest payment (or, as the case may be, part thereof) not paid on any scheduled payment date by reason of Condition 3(b), 5(a), 5(b), 5(c) or 6, shall be cancelled and shall not accumulate or be payable at any time thereafter.

If the Issuer does not pay any interest payment (in whole or, as the case may be, in part) on the relevant scheduled payment date, such non-payment (whether the notice referred to in Condition 5(d) has been given or not) shall evidence the cancellation of such interest payment (in whole or, as the case may be, in part) by reason of the cancellation of such interest payment (in whole or, as the case may be, in part) in accordance with Conditions 3(b), 5(b), 5(c) or 6 or, as appropriate, the Issuer's exercise of its discretion to cancel such interest payment (in whole or, as the case may be, in part) in accordance with Condition 5(a). Accordingly, non-payment of any interest payment (in whole or, as the case may be, in part) in accordance with any of Condition 3(b), 5(a), 5(b), 5(c)

or 6, will not constitute a default by the Issuer for any purpose and the Noteholders shall have no right thereto whether in a Winding-Up or liquidation of the Issuer or otherwise.

6. Write Down and Write Up

(a) Write Down

If a Trigger Event has occurred, the Issuer shall:

- (i) (unless the Relevant Supervisor itself made the relevant determination) immediately inform the Relevant Supervisor of the occurrence of the Trigger Event;
- (ii) without delay, give the relevant Trigger Event Notice (which notice shall be irrevocable);
- (iii) immediately and irrevocably cancel any interest which has accrued up to (and including) the relevant Write Down Date and which is unpaid; and
- (iv) following the final determination of the Write Down Amount in accordance with Condition 6(b), reduce the then Prevailing Principal Amount of each Note by the relevant Write Down Amount (such reduction being referred to herein as a "**Write Down**", and "**Written Down**" shall be construed accordingly) as provided below.

Such cancellation and reduction shall take place without the need for the consent of Noteholders and without delay on such date as is selected by the Issuer (the "Write Down Date") but which shall be no later than one month following the occurrence of the relevant Trigger Event and in accordance with the requirements set out in the Relevant Rules. The Relevant Supervisor may require that the period of one month referred to above is reduced in cases where the Relevant Supervisor assesses that sufficient certainty on the required Write Down Amount is established or in cases where it assesses that an immediate Write Down is needed.

For the purposes of determining whether a Trigger Event has occurred, the Solvency Capital Requirement and the Minimum Capital Requirement of the Issuer and/or any applicable Solvency II Group may be calculated at any time based on information (whether or not published) available to management of the Issuer and the Relevant Supervisor, including information internally reported within the Issuer and/or any applicable Solvency II Group pursuant to their respective procedures for monitoring their capital requirements.

A Trigger Event may occur on more than one occasion (and each Note may be Written Down on more than one occasion). If a Trigger Event occurs pursuant to paragraph (iii) or (iv) of the definition of "Trigger Event" in Condition 18 which does not result in the entire Prevailing Principal Amount of the Notes being written down (subject to the one cent floor referred to below), a further Trigger Event may occur:

- (i) pursuant to any of paragraphs (i), (ii), (v) or (vi) of the definition of "Trigger Event" in Condition 18 at any time; or
- (ii) pursuant to paragraph (iii) or (iv) of the definition of "Trigger Event" in Condition 18 at any time on or after the date falling three months after the last

day of the relevant three-month period referred to in paragraph (iii) or (iv) of such definition or, if earlier, on such date as may be determined by the Relevant Supervisor or required by the Relevant Rules.

If a Trigger Event has occurred, if permitted by the Relevant Rules at the time the Trigger Event occurs, the Issuer may decide not to effect a Write Down if:

- (i) the relevant Trigger Event has occurred pursuant to paragraph (iii) or (iv) of the definition of "Trigger Event" in Condition 18;
- (ii) no Trigger Event has occurred at any time pursuant to any of paragraphs (i), (ii), (v) or (vi) of the definition of "Trigger Event" in Condition 18; and
- (iii) the Relevant Supervisor has agreed exceptionally to waive a Write Down on the basis that it has received: (i) projections provided by the Issuer and/or each applicable Solvency II Group at the time of submission of the recovery plan required by Article 138(2) of the Solvency II Directive, as transposed by Article 109(2) of Greek Law 4364/2016, that demonstrate that triggering a Write Down in that case would be very likely to give rise to a tax liability that would have a significant adverse effect on the Issuer and/or any applicable Solvency II Group's solvency position; and (ii) a certificate issued by the Issuer and/or the Ultimate Solvency II Regulated Entity's statutory auditors certifying that all of the assumptions used in the projections referred to in (i) are realistic.

The Relevant Supervisor shall be under no obligation to provide any approval pursuant to paragraph (iii) above. If, as permitted by the paragraph above, the Issuer decides not to effect a Write Down, the Issuer shall give notice to that effect to the Noteholders in accordance with Condition 15 and to the Agent and the Noteholders Agent.

Any failure by the Issuer to give a Trigger Event Notice or for it to be communicated properly to the Noteholders in accordance with Condition 15 and/or the Agent and/or the Noteholders Agent and/or the Relevant Supervisor will not affect the effectiveness of, or otherwise invalidate, any Write Down or give Noteholders any rights as a result of such failure.

Any reduction of the Prevailing Principal Amount of a Note pursuant to this Condition 6(a) shall not constitute a default by the Issuer for any purpose, and the Noteholders shall have no right to claim for amounts Written Down, whether in a Winding-Up or liquidation or otherwise, save to the extent (if any) (and for so long as) such amounts are subsequently Written Up in accordance with Condition 6(d).

(b) Write Down Amount

The aggregate reduction of the Prevailing Principal Amounts of the Notes outstanding on the Write Down Date will, subject as provided below, be equal to:

- (i) in the case of a Write Down due to the occurrence of a Trigger Event referred to in any of paragraphs (i), (ii), (v) or (vi) of the definition of "Trigger Event" in Condition 18, the amount that would result in the entire Prevailing Principal Amount of a Note with an Initial Principal Amount of €1,000 being reduced to one cent per Note;

- (ii) in the case of a Write Down due to the occurrence of a Trigger Event referred to in paragraphs (iii) or (iv) of the definition of "Trigger Event" in Condition 18:
 - (a) if a consequence of the relevant Write Down (taking into account the write down or conversion of any other Loss Absorbing Instruments on or around the Write Down Date) would be that the aggregate quantum of own funds items which are eligible to cover the Solvency Capital Requirement and/or the Minimum Capital Requirement of the Issuer and/or each applicable Solvency II Group (as applicable) would increase such that no Trigger Event would be continuing and the SCR Ratio of the Issuer and each applicable Solvency II Group would be 100 per cent. or more immediately following such Write Down, such amount as would be sufficient such that no Trigger Event would be continuing and the lower of the SCR Ratio of the Issuer and the then lowest SCR Ratio of each applicable Solvency II Group would be equal to 100 per cent. immediately following such Write Down (provided that this paragraph (ii)(a) shall only apply if the Issuer is capable of determining such amount prior to the Write Down Date); or
 - (b) if paragraph (ii)(a) above does not apply, an amount calculated by the Issuer on a linear basis to reflect the prevailing Relevant SCR Ratio on the last day of the relevant 90-day period referred to in paragraphs (iii) or (iv) of the definition of "Trigger Event" in Condition 18, or on such other date as may be required by the Relevant Supervisor or by the Relevant Rules, where the resulting Prevailing Principal Amount of each Note would be (x) equal to the Initial Principal Amount if the prevailing Relevant SCR Ratio was 100 per cent. (or above) and (y) written down to one cent per Note if the prevailing Relevant SCR Ratio was at or below 75 per cent.; or
- (iii) in any case, such other amount as may be approved by the Relevant Supervisor prior to the Write Down Date in accordance with the Relevant Rules in force as at that time and in its sole and absolute discretion (which amount, if lower, may be equal to zero in the circumstances set out in the following sentence).

Notwithstanding the previous paragraphs, if the Relevant Rules for the time being require that the entire Prevailing Principal Amount of each Note be Written Down following the occurrence of a Trigger Event (on the basis that the Notes are intended to qualify as Tier 1 Capital of the Issuer and/or any applicable Solvency II Group under the Relevant Rules from time to time), the Write Down Amount of each Note shall be its entire Prevailing Principal Amount (subject, in each case, to the one cent floor referred to above).

Further, the Relevant Supervisor shall be under no obligation to provide any approval pursuant to paragraph (iii) above of a Write Down Amount other than that which would otherwise apply and so in circumstances where it has not granted such an approval prior to the Write Down Date, the Write Down Amount of each Note shall be the amount set out in paragraph (i) or (ii) above (as applicable) or the amount determined pursuant to the previous paragraph.

The aggregate reduction of the Prevailing Principal Amounts determined in accordance with this Condition 6(b) shall be applied to all of the Notes pro rata on the basis of their Prevailing Principal Amount immediately prior to the Write Down and references

herein to "Write Down Amount" shall mean, in respect of each Note, the amount by which the Prevailing Principal Amount of such Note is to be Written Down accordingly.

Any Write Down pursuant to this Condition 6 shall occur in accordance with the Relevant Rules and in conjunction with other Loss Absorbing Instruments being written down or converted on or around the Write Down Date in accordance with their respective terms and which are, or will become, Written Down Tier 1 Instruments as a result of such write down or conversion.

For the avoidance of doubt, if, in connection with the Write Down or the calculation of the Write Down Amount, there are outstanding any Loss Absorbing Instruments the terms of which provide that they shall be written down and/or converted in full and not in part only ("**Full Loss Absorbing Instruments**") then (in circumstances where the Write Down Amount would otherwise be less than the entire Prevailing Principal Amount of each Note (subject to the one cent floor referred to above)) the provision that a Write Down of the Notes should be effected in conjunction with the write down and/or conversion, as the case may be, of any Loss Absorbing Instruments shall not be construed as requiring the Notes to be Written Down in full (or in full subject to a one cent floor) solely by virtue of the fact that such Full Loss Absorbing Instruments are required to be written down and/or converted in full (or in full subject to the one cent floor referred to above).

To the extent the write down and/or conversion of any Loss Absorbing Instruments for the purpose of this Condition 6(b) is not possible for any reason, or is otherwise not to be effected for any reason, this shall not in any way prevent any Write Down of the Notes. Instead, in such circumstances, the Notes will be Written Down and the Write Down Amount determined as provided above but (to the extent relevant to the determination of the Prevailing Principal Amount of the Notes to be Written Down in order to meet the requirements of the Relevant Supervisor and the Relevant Rules as to loss absorption) without including for the purpose of this Condition 6(b) any write down or conversion of such Loss Absorbing Instruments, to the extent it is not possible for them to be written down and/or converted or to the extent that such write-down and/or conversion is not otherwise effected.

The Issuer shall set out the Write Down Amount per Calculation Amount in the relevant Trigger Event Notice together with the then Prevailing Principal Amount per Calculation Amount following the relevant Write Down. However, if the Write Down Amount has not been finally determined when the Trigger Event Notice is given, the Issuer shall, as soon as reasonably practicable following such determination, notify the Write Down Amount to the Noteholders in accordance with Condition 15 and to the Agent and the Noteholders Agent. Any final determination of the relevant Write Down Amount by the Relevant Supervisor shall be conclusive and binding on the Noteholders, the Issuer, the Agent, the Noteholders Agent and all other interested parties.

(c) Consequences of a Write Down

Following any reduction of the Prevailing Principal Amount of the Notes to a Prevailing Principal Amount which remains greater than one cent as described in accordance with Condition 6(a), interest will accrue on the Prevailing Principal Amount of each Note with effect from (but excluding) the Write Down Date, and will be subject to Conditions 3(b), 5(a), 5(b), 5(c) and 6(a). For so long as the Prevailing

Principal Amount is reduced to one cent, and without prejudice to the continued application of the remainder of these Conditions, no interest shall accrue on the Notes.

Following any Write Down of the Notes, references herein to "Prevailing Principal Amount" shall be construed accordingly. Once the Prevailing Principal Amount of a Note has been Written Down, the relevant Write Down Amount(s) may only be restored, at the discretion of the Issuer, in accordance with Condition 6(d).

If a Trigger Event Notice is given which specifies a Write Down of the Notes, the Issuer shall procure that (i) a similar notice is given in respect of Loss Absorbing Instruments in accordance with their terms and (ii) the then prevailing principal amount of each series of Loss Absorbing Instruments outstanding (if any) is written down and/or converted in accordance with their terms following the giving of such Trigger Event Notice; provided, however, that any failure by the Issuer either to give such a notice or to procure such a write down and/or conversion will not affect the effectiveness of, or otherwise invalidate, any Write Down of the Notes pursuant to Condition 6(a) or give the Noteholders any rights as a result of either such failure (and, for the avoidance of doubt, the Write Down Amount may increase as a result thereof if required in accordance with the determination by the Relevant Supervisor of the Write Down Amount).

(d) Write Up

The Issuer shall, save as provided below in relation to the pre-conditions to any Write Up, have full discretion to reinstate, to the extent permitted in compliance with the Relevant Rules, any portion of the principal amount of the Notes which has been Written Down and which has not previously been Written Up (such portion, the "**Write Up Amount**"). The reinstatement of the Prevailing Principal Amount (such reinstatement being referred to herein as a "**Write Up**", and "**Written Up**" shall be construed accordingly) may occur on more than one occasion (and each Note may be Written Up on more than one occasion) provided that the principal amount of each Note shall never be Written Up to an amount greater than its Initial Principal Amount.

To the extent that the Prevailing Principal Amount of the Notes has been Written Up as described above, interest shall begin to accrue from (and including) the date of the relevant Write Up on the increased Prevailing Principal Amount of the Notes.

Any such Write Up of the Notes shall be made on a pro rata basis and without any preference among such Notes. The Issuer further undertakes to Noteholders that it will not write up the principal amount of any Written Down Tier 1 Instruments (if any) which are outstanding at such time unless it does so on at least a pro rata basis with the write up of the Notes.

Notwithstanding the previous paragraph, any failure by the Issuer to Write Up the Notes on at least a pro rata basis with the write up of such Written Down Tier 1 Instruments (if any) will not affect the effectiveness, or otherwise invalidate, any Write Up of the Notes or give the Noteholders any right to accelerate the Notes such that amounts of principal or interest would become due and payable on the Notes earlier than otherwise scheduled pursuant to these Conditions.

Any Write Up of the Notes will occur on the basis of profits of the Issuer which contribute to its Available Distributable Items and which are made subsequent to the restoration of compliance with the Solvency Capital Requirement of both the Issuer and each applicable Solvency II Group and consequently such Write Up shall not be

caused by, or made by reference to, own funds items issued by the Issuer or any applicable Solvency II Group in order to restore compliance with the Solvency Capital Requirement of the Issuer and/or the relevant Solvency II Group. In addition, any Write Up shall not be made in a manner which undermines the loss absorbency of the Notes (as determined by the Relevant Supervisor).

Any Write Up will also be subject to:

- (i) the circumstances which gave rise to the Trigger Event having ceased;
- (ii) it not causing a Trigger Event to occur or the Solvency Condition to be breached;
- (iii) the Issuer having taken a formal decision confirming the relevant profits available to be utilised in effecting the Write Up;
- (iv) the Issuer and/or each applicable Solvency II Group having sufficient eligible own funds items (as determined by reference to the Relevant Rules at such time) available to cover the Solvency Capital Requirement and Minimum Capital Requirement of the Issuer and/or each applicable Solvency II Group both before and after the relevant Write Up (taking into account the application of any regulatory limits on the inclusion in Tier 1 Capital of the Prevailing Principal Amount of the Notes and the prevailing principal amount of any Written Down Tier 1 Instruments);
- (v) the Issuer satisfying the Regulatory Conditions; and
- (vi) any such Write Up being made in compliance with the Relevant Rules.

If the Issuer elects to Write Up the Notes pursuant to this Condition 6(d), notice (a "**Write Up Notice**") of such Write Up shall be given to Noteholders in accordance with Condition 15, the Agent, the Noteholders Agent and the Relevant Supervisor specifying the amount of any Write Up and the date on which such Write Up shall take effect (the "**Write Up Date**"). Such Write Up Notice shall be given at least ten Business Days prior to the date on which the relevant Write Up is to become effective.

(e) Currency

Unless otherwise determined by the Relevant Supervisor in the case of a determination of a Write Down Amount, for the purpose of any calculation in connection with a Write Down or Write Up of the Notes which necessarily requires the determination of a figure in euro (or in an otherwise consistent manner across obligations denominated in different currencies) any relevant obligations which are not denominated in euro shall (for the purposes of such calculation only) be deemed notionally to be converted into euro at the foreign exchange rates determined, in the sole and full discretion of the Issuer (in consultation with the Relevant Supervisor), to be applicable based on its regulatory reporting requirements under the Relevant Rules.

7. Redemption, substitution, variation, purchase and options

(a) No fixed maturity; deferral of redemption date

- (i) The Notes are perpetual securities in respect of which there is no fixed redemption date, and the Issuer shall only have the right to redeem or purchase them in accordance with the following provisions of this Condition 7.
- (ii) Subject as provided below, no Notes shall be redeemed pursuant to Conditions 7(c), 7(d), 7(e) or 7(f) or purchased pursuant to Condition 7(g) if a Regulatory Deficiency Redemption Deferral Event has occurred and is continuing or would occur if redemption or purchase were made on any date specified for redemption in accordance with such Conditions or, if Condition 7(g) applies, the relevant purchase date. However, notwithstanding the actual or (if the relevant redemption or purchase were to be effected) potential existence of any such Regulatory Deficiency Redemption Deferral Event, but subject, save as provided below, to the applicable provisions of Condition 7(b), the Issuer (or, in the case of a purchase, the Issuer or any of its Subsidiaries, if applicable) shall be entitled to redeem the Notes (to the extent permitted by the Relevant Rules) pursuant to Conditions 7(c), 7(d), 7(e) or 7(f) or to purchase the Notes pursuant to Condition 7(g) if:
 - (A) the Relevant Supervisor has exceptionally waived the deferral of the redemption or purchase (to the extent the Relevant Supervisor can give such waiver in accordance with the Relevant Rules);
 - (B) the Notes are to be exchanged for or converted into another own funds item of at least the same quality as the Notes (which, for the avoidance of doubt, will include (without limitation) a redemption or purchase funded out of the proceeds of a new issue of one or more Tier 1 Capital own funds items of at least the same quality as the Notes); and
 - (C) the Minimum Capital Requirement applicable to the Issuer and the Minimum Capital Requirement applicable to each applicable Solvency II Group will be complied with at the time of and immediately after the redemption or purchase.
- (iii) If the Notes are not to be redeemed on any date specified for redemption pursuant to Condition 7(c), 7(d), 7(e) or 7(f) (as applicable) as a result of circumstances where:
 - (A) a Regulatory Deficiency Redemption Deferral Event has occurred and is continuing or would occur if the Notes were redeemed on such date and the Relevant Supervisor has not exceptionally waived the relevant deferral of redemption as contemplated in Condition 7(a)(ii); or
 - (B) the Relevant Supervisor does not consent to, or give its permission for, (or has, prior to the time of redemption, withdrawn its consent to or permission for) the redemption (to the extent that consent or permission is then required by the Relevant Supervisor or the Relevant Rules) or the Relevant Supervisor objects to the redemption or such redemption otherwise cannot be effected in compliance with the Relevant Rules on such date,

the Issuer shall notify the Agent and the Noteholders Agent in writing and notify the Noteholders in accordance with Condition 15 no later than five Business Days prior to the date specified for redemption in accordance with Condition 7(c), 7(d), 7(e) or 7(f) (or as soon as reasonably practicable if the relevant circumstance requiring redemption to be deferred arises, or is determined, less than five Business Days prior to the relevant redemption date). Failure to make, or any delay in making, any such notification shall not cause the Notes to become due and payable on such date and the Issuer shall not have any obligation to redeem the Notes on that date, and such failure or delay shall not constitute a default by the Issuer under the Notes or for any other purpose and will not give Noteholders any right to accelerate any payment in respect of the Notes or to take any other enforcement action against the Issuer.

- (iv) If redemption of the Notes does not occur on the date specified for redemption in accordance with Condition 7(c), 7(d), 7(e) or 7(f) as a result of the circumstances described in Condition 7(a)(iii)(A) or 7(a)(iii)(B) above, then subject (in the case of (A) and (B) below only) to compliance with any applicable Regulatory Conditions, such Notes shall be redeemed at their Prevailing Principal Amount together with (to the extent not previously cancelled in accordance with these Conditions) any interest accrued to (but excluding) the date specified for redemption, upon the earliest of:
 - (A) in the case of a failure to redeem due to the operation of Condition 7(a)(ii) only, the date falling 10 Business Days after the date the Regulatory Deficiency Redemption Deferral Event has ceased (unless, on such tenth Business Day, a further Regulatory Deficiency Redemption Deferral Event has occurred and is continuing or redemption of the Notes on such date would result in a Regulatory Deficiency Redemption Deferral Event occurring, in which case the provisions of Condition 7(a)(ii), Condition 7(a)(iii) and this Condition 7(a)(iv) shall apply mutatis mutandis to determine the due date for redemption); or
 - (B) the date falling 10 Business Days after the Relevant Supervisor has agreed to (including, without limitation, by giving such waiver in the circumstances contemplated in the proviso in Condition 7(a)(ii) for the repayment or redemption of the Notes; or
 - (C) the date on which an order is made or a resolution is passed for the Winding-Up or liquidation of the Issuer (other than a solvent Winding-Up or voluntary liquidation solely for the purposes of a reconstruction or amalgamation, the terms of which reconstruction or amalgamation (x) have previously been approved by an Extraordinary Resolution and the Relevant Supervisor and (y) do not provide that the Notes shall thereby become payable).
- (v) If the Notes are not purchased pursuant to Condition 7(g) on any scheduled purchase date due to the operation of this Condition 7(a), the relevant purchase agreement between the Issuer (or any of its Subsidiaries, if applicable) and the relevant Noteholder shall (unless and to the extent otherwise agreed between the relevant Noteholder and the Issuer (or, as the case may be, any of its Subsidiaries)) be void and of no effect and such purchase shall be cancelled, and the relevant Noteholder, by virtue of its holding of the relevant Note(s),

shall be deemed to have acknowledged and agreed that any such purchase agreement shall be subject to the operation of this Condition 7(a)(v).

- (vi) A certificate signed by two Authorised Signatories confirming that (A) a Regulatory Deficiency Redemption Deferral Event has occurred and is continuing, or would occur if redemption or purchase of the Notes were to be made or (B) a Regulatory Deficiency Redemption Deferral Event has ceased to occur and/or redemption or purchase of the Notes would not result in a Regulatory Deficiency Redemption Deferral Event occurring or (C) that any circumstance described in Condition 7(a)(ii) or in Condition 7(a)(iii)(A) or 7(a)(iii)(B) applies, shall be treated and accepted by the Agent, the Noteholders Agent, the Noteholders and all other interested parties as correct and sufficient evidence thereof.
- (vii) Notwithstanding any other provision in these Conditions, the deferral of redemption or cancellation of any purchase of the Notes in accordance with this Condition 7(a) will not constitute a default by the Issuer under the Notes or for any other purpose and will not give Noteholders any right to accelerate repayment of the Notes or take any other action under the Notes.

(b) Conditions to redemption, substitution, variation or purchase

Any redemption, substitution, variation or purchase of the Notes is subject, as applicable, to:

- (i) the Issuer having complied with all applicable Regulatory Conditions;
- (ii) in the case of any redemption or purchase of the Notes prior to the fifth anniversary of the Specified Date (to the extent then required by the Relevant Supervisor or the Relevant Rules), either:
 - (A) to such redemption or purchase being funded out of the proceeds of a new issuance of, or the Notes being exchanged into, own funds of the same or higher quality than the Notes and being otherwise permitted under the Relevant Rules; or
 - (B) in the case of such a redemption pursuant to Condition 7(d) or Condition 7(e), to the Issuer having demonstrated to the satisfaction of the Relevant Supervisor that the Solvency Capital Requirement of the Issuer and the Solvency Capital Requirement of each applicable Solvency II Group will each be exceeded by an appropriate margin immediately after the relevant redemption, taking into account the solvency position of the Issuer and each applicable Solvency II Group (including, without limitation, the medium-term capital management plan of the Issuer and each applicable Solvency II Group) and, as applicable, either:
 - (1) in the case of such a redemption pursuant to Condition 7(d), the Issuer having demonstrated to the satisfaction of the Relevant Supervisor that the applicable change in tax treatment is material and was not reasonably foreseeable as at the Specified Date; and

- (2) in the case of such a redemption pursuant to Condition 7(e), the Issuer having demonstrated to the satisfaction of the Relevant Supervisor that the relevant change in the regulatory classification of the Notes was not reasonably foreseeable as at the Specified Date;
- (iii) in the case of any redemption or purchase of the Notes on or following the fifth anniversary of the Specified Date but prior to the tenth anniversary of the Specified Date (to the extent then required by the Relevant Supervisor or the Relevant Rules)), either:
 - (A) to such redemption or purchase being funded out of the proceeds of a new issuance of, or the Notes being exchanged into, own funds of the same or higher quality than the Notes and being otherwise permitted under the Relevant Rules; or
 - (B) to the Issuer having demonstrated to the satisfaction of the Relevant Supervisor that the Solvency Capital Requirement of the Issuer and the Solvency Capital Requirement of each applicable Solvency II Group will each be exceeded by an appropriate margin immediately after the relevant redemption or purchase, taking into account the solvency position of the Issuer and each applicable Solvency II Group (including, without limitation, the medium-term capital management plan of the Issuer and each applicable Solvency II Group); and
- (iv) the Solvency Condition being met immediately prior to the redemption or purchase of the Notes and the redemption or purchase not causing the Solvency Condition to be breached.

Notwithstanding the above conditions, if, at the time of any redemption, substitution, variation or purchase, the prevailing Relevant Rules and the Relevant Supervisor permit the repayment, substitution, variation or purchase of Tier 1 Capital only after compliance with one or more alternative or additional pre-conditions to those set out above in this Condition 7(b), the Issuer shall comply with such other and/or, as appropriate, additional pre-condition(s).

(c) Issuer's Call Option

Subject to Condition 7(a)(ii) and Condition 7(b), the Issuer may, by giving not less than 15 nor more than 60 days' notice to the Agent, the Noteholders Agent and, in accordance with Condition 15, the Noteholders (which notice shall, save as provided in Conditions 7(a) and 7(b), be irrevocable), elect to redeem all, but not some only, of the Notes on (i) any date in the period from (and including) 9 September 2031 to (and including) the First Reset Date or (ii) on any Interest Payment Date thereafter at their Prevailing Principal Amount, together with (to the extent not previously cancelled in accordance with these Conditions) any unpaid interest accrued to (but excluding) the date fixed for redemption. Upon expiry of such notice the Issuer shall (subject to Condition 7(b) and to Conditions 7(a)(ii), 7(a)(iii), 7(a)(iv) and 7(a)(vi)) redeem the Notes pursuant to this Condition 7(c).

(d) Redemption at the option of the Issuer due to Taxation

Subject to Condition 7(a)(ii) and Condition 7(b), if a Deductibility Event or a Gross-up Event occurs and is continuing as at the date on which notice is given to Noteholders

pursuant to this Condition 7(d), then the Issuer may, by giving not less than 15 nor more than 60 days' notice to the Noteholders in accordance with Condition 15 and to the Agent and the Noteholders Agent (which notice shall, save as provided in Conditions 7(a) and 7(b), be irrevocable), redeem in accordance with these Conditions at any time all, but not some only, of the Notes at their Prevailing Principal Amount, together with (to the extent not previously cancelled in accordance with these Conditions) any unpaid interest accrued to (but excluding) the date fixed for redemption.

Prior to the publication of any notice of redemption pursuant to this Condition 7(d), the Issuer shall deliver to the Agent and the Noteholders Agent (i) an opinion of independent legal advisers or other tax advisers of recognised standing that a Deductibility Event or a Gross-up Event (as the case may be) has occurred and is continuing (but, for the avoidance of doubt, such opinion shall not be required to comment on the ability of the Issuer to avoid such circumstance by taking measures reasonably available to it at the time) and (ii) a certificate signed by two Authorised Signatories stating that a Deductibility Event or Gross-up Event (as the case may be) has occurred and that the circumstances giving rise thereto cannot be avoided by the Issuer taking measures reasonably available to it at the time. Such opinion and certificate shall constitute sufficient evidence of the Deductibility Event or Gross-up Event having occurred and being continuing (without liability to any person) and shall be conclusive and binding on the Agent, the Noteholders Agent and the Noteholders.

Upon expiry of such notice the Issuer shall (subject to Condition 7(b) and to Conditions 7(a)(ii), 7(a)(iii), 7(a)(iv) and 7(a)(vi)) redeem the Notes pursuant to this Condition 7(d).

(e) Redemption at the option of the Issuer due to Capital Disqualification Event

Subject to Condition 7(a)(ii) and Condition 7(b), if a Capital Disqualification Event occurs and is continuing as at the date on which notice is given to Noteholders pursuant to this Condition 7(e), then the Issuer may, by giving not less than 15 nor more than 60 days' notice to the Noteholders in accordance with Condition 15 and to the Agent and the Noteholders Agent (which notice shall, save as provided in Conditions 7(a) and 7(b), be irrevocable), redeem in accordance with these Conditions at any time all, but not some only, of the Notes at their Prevailing Principal Amount, together with (to the extent not previously cancelled in accordance with these Conditions) any unpaid interest accrued to (but excluding) the date fixed for redemption. Upon expiry of such notice the Issuer shall (subject to Condition 7(b) and to Conditions 7(a)(ii), 7(a)(iii), 7(a)(iv) and 7(a)(vi)) redeem the Notes pursuant to the relevant terms of this Condition 7(e).

(f) Redemption pursuant to Clean-up Call Option

Subject to Condition 7(a)(ii) and Condition 7(b), if at any time prior to the date on which notice is given to Noteholders pursuant to this Condition 7(f), 75 per cent. or more of the aggregate principal amount (determined, solely for these purposes, as though all outstanding Notes remain at their Initial Principal Amount) of the Notes originally issued (and, for these purposes, any Further Notes issued pursuant to Condition 17 will be deemed to have been originally issued) have been purchased by the Issuer or any of its Subsidiaries and, in each case, cancelled pursuant to these Conditions, then the Issuer may, by giving not less than 15 nor more than 60 days' notice to the Noteholders in accordance with Condition 15 and to the Agent and the Noteholders Agent (which notice shall, save as provided in Conditions 7(a) and 7(b),

be irrevocable), redeem in accordance with these Conditions at any time all, but not some only, of the Notes at their Prevailing Principal Amount, together with (to the extent not previously cancelled in accordance with these Conditions) any unpaid interest accrued to (but excluding) the date fixed for redemption. Upon the expiry of such notice, the Issuer shall (subject to Condition 7(b) and to Conditions 7(a)(ii), 7(a)(iii), 7(a)(iv) and 7(a)(vi)) redeem the Notes pursuant to the relevant terms of this Condition 7(f).

(g) Purchases

Subject to Condition 7(b), the Issuer and any of its Subsidiaries for the time being may at any time purchase Notes in the open market or otherwise and at any price.

(h) Substitution or Variation

Subject to Condition 7(b), and having given not less than 15 nor more than 60 days' notice to the Agent and the Noteholders Agent and, in accordance with Condition 15, the Noteholders (which notice shall, save as provided in Condition 7(b), be irrevocable, shall specify the relevant details of the manner in which such substitution or, as the case may be, variation shall take effect and where the Noteholders can inspect or obtain copies of the new terms and conditions of the Notes and shall specify the date fixed for substitution or, as the case may be, variation of the Notes), if a Deductibility Event, a Gross-up Event or a Capital Disqualification Event has occurred and is continuing, or in order to ensure the effectiveness and enforceability of Condition 20(d), the Issuer may (without any requirement for the consent or approval of the Noteholders) at any time either substitute all (but not some only) of the Notes for, or vary the terms and conditions of the Notes (including, without limitation, changing the governing law of Condition 20(d)) so that the Notes remain or become Qualifying Tier 1 Notes. The Notes may only be so substituted and the Conditions may only be so varied if the proposed substitution or variation would not of itself give rise to a Deductibility Event, a Gross-up Event or a Capital Disqualification Event. Upon expiry of such notice the Issuer shall (subject to Condition 7(b) and as provided below) either vary or substitute the Notes, as the case may be, pursuant to this Condition 7(h).

The Agent shall, at the request and expense of the Issuer, use reasonable endeavours to assist the Issuer in the substitution of the Notes or in the variation of the terms of the Notes pursuant to this Condition 7(h), provided that the Agent shall not be obliged to participate in, or assist with, any such substitution or variation if the participation in or assistance with such substitution or variation would impose, in the Agent's opinion, more onerous obligations upon it or expose it to liabilities or reduce its protections. If the Agent does not participate or assist as provided above, the Issuer may redeem the Notes as otherwise provided in Condition 7.

In connection with any substitution or variation in accordance with this Condition 7(h), the Issuer shall comply with the rules of any stock exchange (if any) on which the Notes are for the time being listed or admitted to trading. The Issuer shall give notice of any such substitution or variation to the Noteholders in accordance with Condition 15 and to the Agent and the Noteholders Agent as soon as reasonably practicable after such substitution or variation.

(i) Cancellation

All Notes redeemed by the Issuer pursuant to this Condition 7, and all Notes purchased by or on behalf of the Issuer or any of its Subsidiaries and surrendered to the Registrar

for cancellation, shall be cancelled forthwith and may not be reissued or resold and the obligations of the Issuer in respect of any such Notes shall be permanently and irrevocably discharged.

(j) Agent not obliged to monitor

The Agent shall be under no duty to monitor whether any event or circumstance has happened or exists within these Conditions and will not be responsible to Noteholders for any loss arising from any failure or delay by the Agent to do so. Unless and until the Agent has received from the Issuer, a written notice of the occurrence of any event or circumstance within these Conditions, the Agent shall be entitled to assume that, and continue to perform its duties as if, no such event or circumstance exists.

(k) Inapplicability Period

The Issuer may waive or suspend, at any time and in its sole discretion, its right to redeem, or to substitute or vary the Conditions of, the Notes under any of Conditions 7(d), 7(e), 7(f) or 7(h) for a (definite or indefinite) period of time to be determined by the Issuer (the "**Inapplicability Period**") by notice to the Agent, the Noteholders Agent and to the Noteholders in accordance with Condition 15. Any notice so given shall specify the Inapplicability Period(s) during which the Issuer shall cease to have the right to redeem, or to substitute or vary the Conditions of, the Notes under any of Conditions 7(d), 7(e), 7(f) or 7(h). Any ongoing Inapplicability Period may be terminated by the Issuer at any time and in its sole discretion by notice to Agent and the Noteholders Agent and to the Noteholders in accordance with Condition 15.

8. Payments

(a) Method of payment

Payments shall be made by credit or transfer to an account in euro maintained by the payee with a bank which accepts payments in euro. Payments of principal and interest payable on redemption shall be made upon surrender (or, in the case of part payment only, endorsement) of the relevant Certificate(s) at the specified office of any Transfer Agent or the Registrar.

(b) Record Date

Each payment in respect of a Note will be made to the person shown as the holder in the Register at the opening of business (in the place of the Registrar's specified office) on the fifteenth day before the due date for such payment (the "**Record Date**").

(c) Payments subject to fiscal laws

All payments in respect of the Notes are subject in all cases to (i) any applicable fiscal or other laws and regulations in any jurisdiction, but without prejudice to the provisions of Condition 9 and (ii) any withholding or deduction required pursuant to an agreement described in Section 1471(b) of the U.S. Internal Revenue Code of 1986 (the "**Code**") or otherwise imposed pursuant to Sections 1471 through 1474 of the Code, any regulations or agreements thereunder, any official interpretations thereof, or any law implementing an intergovernmental approach thereto.

(d) Appointment of Agents

The names and initial Specified Offices of the initial Agent, Paying Agents, Registrar and Transfer Agents are listed in the Agency Agreement. The Issuer reserves the right at any time to vary or terminate the appointment of any of such parties and to appoint additional or other agents provided that it will:

- (i) at all times maintain an Agent and a Registrar;
- (ii) at all times maintain a Paying Agent in a jurisdiction within Europe, other than the jurisdiction in which the Issuer is incorporated; and
- (iii) so long as any of the Notes are listed on any stock exchange or admitted to listing by any other relevant authority, there will at all times be a Paying Agent with a Specified Office in such place as may be required by the rules and regulations of the relevant stock exchange or other relevant authority.

Notice of any change in the identities or Specified Offices of any Paying Agents shall promptly be given by the Issuer to the Noteholders in accordance with Condition 15.

(e) No commissions

No commissions or expenses shall be charged to the Noteholders in respect of any payments made in accordance with this Condition 8.

(f) Payment on Business Days

Payment instructions (for value the due date or, if that is not a Business Day, for value the first following day which is a Business Day) will be initiated on the Business Day preceding the due date for payment or, in the case of a payment of principal or a payment of interest due otherwise than on an Interest Payment Date, if later, on the Business Day on which the relevant Certificate is surrendered at the specified office of the Registrar or any Transfer Agent.

Noteholders will not be entitled to any interest or other payment for any delay after the due date in receiving the amount due if the due date is not a Business Day or if the Noteholder is late in surrendering its Certificate (if required to do so).

(g) Partial payments

If the amount of principal which is due on the Notes is not paid in full, the Registrar will annotate the Register with a record of the amount of principal in fact paid.

9. Taxation

All payments of principal, interest and any other amounts by or on behalf of the Issuer in respect of the Notes shall be made free and clear of, and without withholding or deduction for, or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature ("**Taxes**") imposed, levied, collected, withheld or assessed by or on behalf of the Hellenic Republic or any political subdivision thereof or any authority or agency therein or thereof having power to tax (a "**Taxing Jurisdiction**"), unless such withholding or deduction of such Taxes is required by law. In that event, the Issuer shall pay such additional amounts in relation to interest payments (but not in respect of payments of principal or any other amount) ("**Additional Amounts**") as may be necessary in order that the net amounts of interest received

by the holders of the Notes after such withholding or deduction shall equal the respective amount of interest which would otherwise have been receivable in respect of the Notes in the absence of such withholding or deduction, except that no such Additional Amounts shall be payable in respect of any Note:

- (a) where the Certificate representing such Note is surrendered for payment in the Hellenic Republic; or
- (b) held by or on behalf of a Noteholder who is liable to such Taxes by reason of such Noteholder having some connection with the Taxing Jurisdiction other than the mere holding of such Note; or
- (c) where the Certificate representing such Notes is surrendered for payment more than 30 days after the Relevant Date (as defined below), except to the extent that the relevant Noteholder would have been entitled to such Additional Amounts on presenting the same for payment on the expiry of such period of 30 days; or
- (d) held by or on behalf of a Noteholder who would not be liable or subject to such withholding or deduction if it were to comply with a statutory requirement or to make a declaration of non-residence or other similar claim for exemption and fails to do so.

References in these Conditions to interest shall be deemed to include any Additional Amounts that may be payable under this Condition 9.

As used in these Conditions, "**Relevant Date**" means, in respect of any payment, the date on which such payment first becomes due and payable, but if the full amount of the moneys payable has not been received by the Agent on or prior to such due date, it means the first date on which, the full amount of such moneys having been so received, notice to that effect is duly given to the Noteholders in accordance with Condition 15.

If the Issuer becomes subject at any time to any taxing jurisdiction other than or in addition to the Hellenic Republic, by reason of the Issuer having its tax residence or similar connection with such other jurisdiction, references in these Conditions to the Hellenic Republic shall be construed as references to the Hellenic Republic and/or such other jurisdiction.

10. Prescription

Claims against the Issuer for payment in respect of the Notes shall be prescribed and become void unless made within ten years (in the case of principal) or five years (in the case of interest) from the appropriate Relevant Date in respect of them.

11. Replacement of Certificates

If any Certificate is lost, stolen, mutilated, defaced or destroyed, it may be replaced, subject to applicable laws and regulations, at the specified office of the Registrar or such other Transfer Agent as may from time to time be designated by the Issuer for that purpose and notice of whose designation is given to Noteholders, in each case on payment by the claimant of the fees and costs incurred in connection therewith and on such terms as to evidence, security, indemnity and otherwise as the Issuer may require (provided that the requirement is reasonable in light of prevailing market practice). Mutilated or defaced Certificates must be surrendered before replacements will be issued.

12. Events of default and enforcement

(a) Rights to prove in a Winding-Up or liquidation

The Noteholders shall have no right to institute proceedings for the Winding-Up or liquidation of the Issuer.

Notwithstanding any of the provisions below in this Condition 12, and subject to the Relevant Rules, the right to prove in the Winding-Up or liquidation of the Issuer is limited to circumstances where payment of principal has become due and is not duly paid. In the case of payment of principal, such principal will be Written Down following the occurrence of a Trigger Event (and may otherwise be written down pursuant to applicable law and regulation) and may be deferred in accordance with the Solvency Condition or Condition 7.

If default is made for a period of 14 days or more in the payment of any principal when due in respect of the Notes or any of them, each Noteholder may prove in the Winding-Up or liquidation proceedings of the Issuer for such payment, but may take no further or other action to enforce, prove or claim for any such payment. No payment in respect of the Notes may be made by the Issuer pursuant to this Condition 12(a) otherwise than during or after a Winding-Up or liquidation of the Issuer, unless any applicable Regulatory Conditions are satisfied, which the Issuer shall confirm in writing to the Agent.

(b) Amount payable on Winding-Up or liquidation

If an order or decision is made by the Relevant Supervisor for the Winding-Up or liquidation of the Issuer (except, in any such case, a solvent Winding-Up or voluntary liquidation, solely for the purpose of a reconstruction or amalgamation of the Issuer, the terms of which reconstruction or amalgamation (i) have previously been approved by an Extraordinary Resolution and the Relevant Supervisor and (ii) do not provide that the Notes shall thereby become payable), each Noteholder may (A) give notice to the Issuer (or, as applicable, the insurance liquidator) that, subject to the Relevant Rules, the Notes held by such Noteholder are, and they shall accordingly become, immediately due and repayable at their Prevailing Principal Amount together with (to the extent not previously cancelled in accordance with these Conditions) any accrued and unpaid interest and any damages awarded for breach by the Issuer of any obligations in respect of the Notes, and (B) claim or prove for such amounts in the Winding-Up of the Issuer, such claim being subordinated as provided in Condition 3(a).

(c) Enforcement

Without prejudice to Condition 12(a) or (b), each Noteholder may at its discretion and without further notice institute such proceedings against the Issuer as it may think fit to enforce any obligation, condition or provision binding on the Issuer under the Notes (other than any payment obligation of the Issuer under or arising from the Notes including, without limitation, payment of any principal in respect of the Notes and any damages awarded for breach of any obligations) and in no event shall the Issuer, by virtue of the institution of any such proceedings, be obliged to pay any sum or sums (in cash or otherwise) sooner than the same would otherwise have been payable by it. Nothing in this Condition 12(c) shall, subject to Condition 12(a), prevent any Noteholder from proving in any Winding-Up or liquidation of the Issuer and/or claiming in any Winding-Up or liquidation of the Issuer in respect of any payment obligations of the Issuer arising from the Notes (including without limitation, payment

of any principal in respect of the Notes and any damages awarded for any breach of any obligations).

(d) Extent of Noteholders' remedy

No remedy against the Issuer, other than as referred to in this Condition 12, shall be available to the Noteholders, whether for the recovery of amounts owing in respect of the Notes or in respect of any breach by the Issuer of any of its other obligations under or in respect of the Notes.

13. Meetings of Noteholders and modification

(a) Meetings of Noteholders

The Agency Agreement contains provisions (which shall have effect as if incorporated herein) for convening meetings of the Noteholders to consider any matter affecting their interests, including (without limitation) the modification by Extraordinary Resolution (as defined in the Agency Agreement) of these Conditions. An Extraordinary Resolution passed at any meeting of the Noteholders will be binding on all Noteholders whether or not they are present at the meeting.

The agreement or approval of the Noteholders shall not be required in the case of any variation of these Conditions required to be made in the circumstances described in Conditions 4(i) and 7(h) in connection with the variation of the terms of the Notes in accordance with such Conditions.

Any amendment to these Conditions pursuant to this Condition 13 or Condition 14 is subject to the Regulatory Conditions.

If, pursuant to Condition 19 below, a Noteholders Agent has been appointed and such appointment is continuing then, notwithstanding the above and the provisions of the Agency Agreement, the Noteholders Agency Agreement and all mandatory provisions of Greek Law 4548/2018 shall apply to the convening and conduct of meetings of Noteholders and the Noteholders Agent shall observe and comply with the same.

(b) Modification

Subject to the Regulatory Conditions, the Issuer and the Agent may agree, without the consent of the Noteholders, to: (i) any modification (except such modifications in respect of which an increased quorum is required, as described in the Agency Agreement) of the Notes or the Agency Agreement which is not, in the opinion of the Issuer, materially prejudicial to the interests of the Noteholders; or (ii) any modification of the Notes or the Agency Agreement which is of a formal, minor or technical nature or is made to correct a manifest error or to comply with mandatory provisions of law. Any such modification shall be binding on the Noteholders and any such modification shall be notified to the Noteholders by the Issuer in accordance with Condition 15 as soon as practicable thereafter.

Notwithstanding any other provision of these Conditions, the Agent shall not be obliged to concur with the Issuer in respect of any modification which, in the sole opinion of the Agent, would have the effect of increasing the obligations or duties, or decreasing the rights or protections, of the Agent in these Conditions and/or the Agency Agreement.

14. Substitution of the Issuer

(a) Substitution

The Issuer may, without the consent of any Noteholder, substitute for itself (A) any directly or indirectly wholly-owned Subsidiary of the Issuer (a "**Relevant Subsidiary**") or (B) any other body corporate incorporated in any country in the world which is the Successor in Business of the Issuer, as the debtor in respect of the Notes, the Noteholders Agency Agreement and the Agency Agreement (the "**Substituted Debtor**") upon notice by the Issuer and the Substituted Debtor to be given in accordance with Condition 15, provided that:

- (i) the Issuer is not in default in respect of any amount payable under the Notes;
- (ii) the Issuer and the Substituted Debtor have entered into such documents (the "**Documents**") as are necessary to give effect to the substitution and (A) in which the Substituted Debtor has undertaken in favour of each Noteholder to be bound by these Conditions and the provisions of the Agency Agreement as the debtor in respect of the Notes in place of the Issuer (or of any previous substitute under this Condition 14) and (B) if the Substituted Debtor is a Relevant Subsidiary (and not a Successor in Business), pursuant to which the Issuer shall (subject to the Solvency Condition) unconditionally and irrevocably guarantee (the "**Guarantee**"), on a subordinated basis corresponding mutatis mutandis to Condition 3, in favour of each Noteholder the payment of all sums payable in respect of the Notes;
- (iii) if the Substituted Debtor is resident for tax purposes in a territory (the "**New Residence**") other than that in which the Issuer prior to such substitution was resident for tax purposes (the "**Former Residence**"), the Documents (including the Guarantee, if applicable) contain an undertaking and/or such other provisions as may be necessary to ensure that, following substitution, each Noteholder would have the benefit of an undertaking in terms corresponding to the provisions of Condition 9, with (a) the substitution of references to the Issuer with references to the Substituted Debtor (to the extent that this is not achieved by Condition 14(a)(ii)) and (b) the substitution of references to the Former Residence with references to both the New Residence and the Former Residence;
- (iv) the Substituted Debtor and the Issuer have obtained all necessary governmental, regulatory and other approvals and consents for such substitution and for the performance by the Substituted Debtor of its obligations under the Documents (including the Guarantee, if applicable);
- (v) each stock exchange (including organised or regulated markets and multilateral trading facilities) on which the Notes are listed shall have confirmed that, following the proposed substitution of the Substituted Debtor, the Notes will continue to be listed on such stock exchange;
- (vi) if applicable, the Substituted Debtor has appointed a process agent as its agent in England to receive service of process on its behalf in relation to any legal proceedings arising out of or in connection with the Notes;
- (vii) the Documents may (at the option of the Issuer and the Substituted Debtor) contain such amendments to these Conditions that the Issuer and the

Substituted Debtor may determine are necessary solely for the purposes of ensuring that the Notes are or will be eligible to count as Tier 1 Capital of the Issuer and/or each applicable Solvency II Group in accordance with the Relevant Rules applicable as at the date of substitution of the Issuer pursuant to this Condition 14, provided that any such amendments are not (in the opinion of the Issuer) materially prejudicial to the interests of the Noteholders; and

- (viii) such substitution shall not result in any event or circumstance which at or around that time gives the Issuer a redemption right in respect of the Notes.

(b) Conditions to Substitution

Any substitution pursuant to Condition 14(a) will be subject to the requirements of Condition 7(b).

(c) Effect of Substitution

Upon such substitution the Substituted Debtor shall succeed to, and be substituted for, and may exercise every right and power of the Issuer under the Notes and the Agency Agreement with the same effect as if the Substituted Debtor had been named as the Issuer herein, and the Issuer shall be released from its obligations under the Notes and under the Agency Agreement.

(d) Further Substitutions and Reversal of Substitution

After a substitution pursuant to Condition 14(a) the Substituted Debtor may, without the consent of any Noteholder, effect a further substitution. All the provisions specified in Conditions 14(a), 14(b) and 14(c) shall apply mutatis mutandis, and references in these Conditions to the Issuer shall, where the context so requires, be deemed to be or include references to any such further Substituted Debtor.

After a substitution pursuant to Condition 14(a) and this Condition 14(d) any Substituted Debtor may, without the consent of any Noteholder, reverse the substitution, mutatis mutandis.

(e) Documents

Copies of the Documents (including the Guarantee, if applicable) shall be delivered by the Issuer to, and kept by, the Agent. Copies of such Documents will be available for inspection or collection free of charge during normal business hours at the Specified Office of each Paying Agent, the Registrar and each Transfer Agent or the Specified Office of the Noteholders Agent upon reasonable request or may be provided by email to a Noteholder following their prior written request to a Paying Agent, the Registrar or a Transfer Agent (as the case may be) and provision of proof of holding and identity (in a form satisfactory to the relevant Paying Agent, the Registrar or the relevant Transfer Agent (as the case may be)).

(f) Definitions

For the purpose of this Condition 14, references to:

- (i) the "**Agency Agreement**" shall, where the Substituted Debtor is incorporated in the Hellenic Republic, be deemed to include the Noteholders Agency Agreement to the extent applicable and where the context so admits; and

- (ii) a "**Successor in Business**" shall mean any company (the "**successor entity**") which: (a) owns beneficially the whole or substantially the whole of the property and assets owned by the Issuer immediately prior thereto; and (b) carries on, as successor to the Issuer, the whole or substantially the whole of the business carried on by the Issuer immediately prior thereto, provided that (in either case) in assessing the "whole or substantially the whole" of the property, assets and business of the Issuer no account shall be taken of any shares in the successor entity held by the Issuer.

15. Notices

All notices to Noteholders regarding the Notes shall be valid if sent by post to Noteholders at their respective addresses in the Register.

Notices to be given by any Noteholder shall be in writing and given by lodging the same, together with the relative Note or Notes, with the Agent.

The Issuer shall also ensure that notices are duly published in a manner which complies with the rules of any stock exchange or other relevant authority on which the Notes are for the time being listed or by which they have been admitted to trading including publication on the website of the relevant stock exchange or relevant authority if required by those rules. For so long as the Notes are admitted to trading on the Luxembourg Stock Exchange, the Issuer shall ensure that notices are published on the website of the Luxembourg Stock Exchange, www.luxse.com.

Any such notices will, if published more than once, be deemed to have been given on the date of the first publication, as provided above.

Any notice concerning the Notes shall also be given to the Noteholders Agent. Any such notice shall be deemed, for the purpose of the Noteholders Agency Agreement, to have been given to the Noteholders on the day on which the said notice was given to the Noteholders Agent.

16. Contracts (Rights of Third Parties) Act 1999

No rights are conferred on any person under the Contracts (Rights of Third Parties) Act 1999 to enforce any term of this Note, but this does not affect any right or remedy of any person which exists or is available apart from that Act.

17. Further Issues

The Issuer may from time to time, without the consent of the Noteholders but subject to any Regulatory Conditions if such Notes are to be included in the Issuer and/or any applicable Solvency II Group's Tier 1 Capital, create and issue further Notes ("**Further Notes**") having the same terms and conditions as the Notes in all respects (or in all respects except for the first payment of interest on them, the date from which interest starts to accrue and/or the issue price thereof) so as to form a single series with the Notes.

18. Definitions

As used herein:

"**Additional Amounts**" has the meaning given to it in Condition 9;

"**Adjustment Spread**" means either (a) a spread (which may be positive, negative or zero) or (b) a formula or methodology for calculating a spread, in either case which is to be applied to

the relevant Successor Reference Rate or Alternative Reference Rate (as applicable) and is the spread, formula or methodology which:

- (i) in the case of a Successor Reference Rate, is formally recommended in relation to the replacement of the Original Reference Rate with the relevant Successor Reference Rate by any Relevant Nominating Body; or
- (ii) in the case of an Alternative Reference Rate or (where (i) above does not apply) in the case of a Successor Reference Rate, the relevant Independent Adviser or the Issuer (as applicable) determines is recognised or acknowledged as being in customary market usage in international debt capital markets transactions which reference the Original Reference Rate, where such rate has been replaced by such Successor Reference Rate or such Alternative Reference Rate (as applicable); or
- (iii) in the case of an Alternative Reference Rate (where (ii) above does not apply) or in the case of a Successor Reference Rate (where neither (i) nor (ii) above applies), the relevant Independent Adviser or the Issuer (as applicable) determines is recognised or acknowledged as being the industry standard for over-the-counter derivative transactions which reference the Original Reference Rate, where such rate has been replaced by such Alternative Reference Rate or such Successor Reference Rate (as applicable).

If the relevant Independent Adviser or the Issuer (as applicable) determines that none of (i), (ii) and (iii) above applies, the Adjustment Spread shall be deemed to be zero;

"Agency Agreement" has the meaning provided in the preamble to these Conditions;

"Agent" has the meaning provided in the preamble to these Conditions;

"Alternative Reference Rate" means the rate that the relevant Independent Adviser or the Issuer (as applicable) determines has replaced the Original Reference Rate in customary market usage in the international debt capital markets for the purposes of determining rates of interest (or the relevant component part thereof) in respect of debt securities denominated in euro and of a comparable duration to the relevant Reset Period, or in any case, if such Independent Adviser or the Issuer (as applicable) determines that there is no such rate, such other rate as such Independent Adviser or the Issuer (as applicable) determines in its discretion is most comparable to the Original Reference Rate;

"Amounts Due" means the Prevailing Principal Amount, together with (to the extent not previously cancelled in accordance with these Conditions) any accrued but unpaid interest, and any Additional Amounts referred to in Condition 9, if any, due on the Notes. References to such amounts will include amounts that have become due and payable, but which have not been paid, prior to the exercise of any Statutory Loss Absorption Power by the Relevant Resolution Authority;

"Assets" means the unconsolidated gross assets of the Issuer, as shown in its latest published audited balance sheet, but adjusted for subsequent events in such manner as the Board of Directors of the Issuer may determine;

"Authorised Signatory" means a director or any other authorised signatory of the Issuer;

"Available Distributable Items" means the non-consolidated profits and distributable reserves (if any) of the Issuer as calculated pursuant to the principles applicable to the Issuer's non-consolidated financial statements which are available, in accordance with applicable Greek law

and regulation at the relevant time, for the payment of dividends on the share capital of the Issuer and the availability of which permits payment of interest on the Notes in accordance with the Relevant Rules at such time;

"Benchmark Amendments" has the meaning provided in Condition 4(i);

"Benchmark Event" means, with respect to the Original Reference Rate:

- (i) such Original Reference Rate ceasing to be published for at least five Business Days or ceasing to exist or be administered;
- (ii) the later of (1) the making of a public statement by the administrator of such Original Reference Rate that it will, on or before a specified date, cease publishing such Original Reference Rate permanently or indefinitely (in circumstances where no successor administrator has been appointed that will continue publication of such Original Reference Rate) and (2) the date falling six months prior to the specified date referred to in (ii)(1);
- (iii) the making of a public statement by the supervisor of the administrator of such Original Reference Rate that such Original Reference Rate has been permanently or indefinitely discontinued;
- (iv) the later of (1) the making of a public statement by the supervisor of the administrator of such Original Reference Rate that such Original Reference Rate will, on or before a specified date, be permanently or indefinitely discontinued and (2) the date falling six months prior to the specified date referred to in (iv)(1);
- (v) the later of (1) the making of a public statement by the supervisor of the administrator of such Original Reference Rate that means such Original Reference Rate will be prohibited from being used on or before a specified date and (2) the date falling six months prior to the specified date referred to in (v)(1);
- (vi) it has or will become unlawful for the Issuer, the Agent or any other party responsible for calculating the Interest Rate to calculate any payments due to be made to any Noteholders using such Original Reference Rate; or
- (vii) the later of (1) the making of a public statement by the supervisor of the administrator of such Original Reference Rate that such Original Reference Rate will, on or before a specified date, no longer be representative or may, on or before a specified date, no longer be used and (2) the date falling six months prior to the specified date referred to in (vii)(1);

"Business Day" means (i) a day on which commercial banks and foreign exchange markets settle payments and are open for general business (including dealing in foreign exchange and foreign currency deposits) in Athens and London and (ii) (if a payment is to be made on that day) a T2 Business Day;

"Calculation Amount" has the meaning provided in Condition 4(c);

A **"Capital Disqualification Event"** is deemed to have occurred if, as a result of any replacement of or change to (or change to the official interpretation by the Relevant Supervisor or any court or authority entitled to do so of) the Relevant Rules, the Prevailing Principal Amount of the Notes then outstanding is excluded (in whole or in part) from counting as Tier 1 Capital for the purposes of the Issuer or any applicable Solvency II Group, except (in any

case) where such non-qualification is only as a result of any applicable limitation on the amount of such capital;

"Code" has the meaning given to it in Condition 8(c);

"Conditions" has the meaning provided in the preamble to these Conditions;

"Deductibility Event" means that at any time, as a result of a Tax Law Change, in respect of the Issuer's obligation (assuming, solely for this purpose, that Conditions 3(b), 5 and 6 do not affect such obligation) to make any payment of interest on the next following Interest Payment Date the Issuer would not be entitled to claim a deduction in respect of computing its taxation liabilities in the Taxing Jurisdiction, or such entitlement is reduced and the Issuer cannot avoid the foregoing in connection with the Notes by taking measures reasonably available to it;

"Extraordinary Resolution" has the meaning provided in the Agency Agreement;

"First Reset Date" means 9 March 2032;

"Full Loss Absorbing Instruments" has the meaning provided in Condition 6(b);

"Further Notes" has the meaning provided in Condition 17;

"Gross-up Event" means that at any time, by reason of a Tax Law Change, in making any payments on the Notes, the Issuer has paid or will or would on the next payment date be required (assuming, solely for this purpose, that Conditions 3(b), 5 and 6 do not affect such requirement) to pay Additional Amounts on the Notes and the Issuer cannot avoid the foregoing in connection with the Notes by taking measures reasonably available to it;

"Group Insurance Undertaking" means an insurance undertaking within the meaning of the Relevant Rules whose data is included for the purposes of the calculation of the Solvency Capital Requirement of any applicable Solvency II Group pursuant to the Relevant Rules;

"IA Determination Cut-off Date" means the date that falls on the fifth Business Day prior to the Reset Determination Date relating to the next succeeding Reset Period;

"IFRS" means International Financial Reporting Standards;

"Independent Adviser" means an independent financial institution of international repute or other independent adviser experienced in the international debt capital markets, in each case appointed by the Issuer at its own expense;

"Initial Fixed Interest Rate" has the meaning provided in Condition 4(d);

"Initial Fixed Rate Interest Period" means the period from (and including) the Issue Date to (but excluding) the First Reset Date;

"Initial Principal Amount" means, in relation to each Note, the principal amount of that Note on the Issue Date;

"Insolvent Insurer Winding-up" means the winding-up or liquidation of any Group Insurance Undertaking where the Issuer has determined, acting reasonably, that the assets of that Group Insurance Undertaking may or will be insufficient to meet all the claims of the policyholders and/or beneficiaries pursuant to contracts of insurance written by that Group Insurance Undertaking which is in winding-up or liquidation (and for these purposes, the claims of such

policyholders or such beneficiaries pursuant to a contract of insurance shall include all amounts to which such policyholders or such beneficiaries are entitled under applicable legislation or rules relating to the winding-up or liquidation of insurance companies in the jurisdiction of their incorporation);

"Interest Payment Date" means 9 March and 9 September in each year, commencing on 9 March 2027;

"Interest Period" means the period beginning on (and including) the Issue Date and ending on (but excluding) the first Interest Payment Date and each successive period beginning on (and including) an Interest Payment Date and ending on (but excluding) the next succeeding Interest Payment Date;

"Interest Rate" means the Initial Fixed Interest Rate and/or the applicable Reset Rate of Interest, as the case may be;

"IRRD" means Directive (EU) 2025/1 of the European Parliament and of the Council of 27 November 2024 establishing a framework for the recovery and resolution of insurance and reinsurance undertakings and amending Directives 2002/47/EC, 2004/25/EC, 2007/36/EC, 2014/59/EU and (EU) 2017/1132 and Regulations (EU) No 1094/2010, (EU) No 648/2012, (EU) No 806/2014 and (EU) 2017/1129, as amended from time to time;

"Issue Date" means 9 September 2026, being the date of the initial issue of the Notes;

"Issuer Determination Cut-off Date" means the date that falls on the third Business Day prior to the Reset Determination Date relating to the next succeeding Reset Period;

"Liabilities" means the unconsolidated gross liabilities of the Issuer, as shown in its latest published audited balance sheet, but adjusted for contingent liabilities and for subsequent events in such manner as the Board of Directors of the Issuer may determine;

"Loss Absorbing Instruments" means capital instruments or other obligations issued directly or indirectly by the Issuer and/or, as applicable, any member of an applicable Solvency II Group (other than the Notes or any share capital of the Issuer or any member of any applicable Solvency II Group) which constitute Tier 1 Capital of the Issuer and/or any applicable Solvency II Group and which include a write-down or conversion principal loss absorption mechanism that is activated by a trigger event set by reference to the Solvency Capital Requirement and/or the Minimum Capital Requirement of the Issuer and/or any applicable Solvency II Group;

"Margin" means 3.709 per cent. per annum;

"Minimum Capital Requirement" means (as applicable):

- (i) the minimum capital requirement of the Issuer;
- (ii) the minimum consolidated group Solvency Capital Requirement of any applicable Solvency II Group; and/or
- (iii) any other minimum capital requirements (as applicable on a solo, sub-consolidated or consolidated basis) from time to time,

in each case referred to in, or described in, the Relevant Rules applicable to the Issuer and/or any applicable Solvency II Group (as the case may be);

"Original Reference Rate" means the rate described in paragraph (i) of the definition of "Reset Reference Rate" in this Condition 18 or (if applicable) any other successor or alternative reference rate (or, in each case, any component part thereof) determined to be applicable to the Notes pursuant to the earlier operation of Condition 4(i);

"Prevailing Principal Amount" means, in relation to each Note at any time, the principal amount of such Note at that time, being its Initial Principal Amount, as adjusted from time to time for any Write Down and/or Write Up, in accordance with Condition 6 and/or as otherwise required by then current legislation and/or regulations applicable to the Issuer;

"Qualifying Tier 1 Notes" means securities issued (including by way of exchange, conversion or otherwise) directly by the Issuer or indirectly and guaranteed by the Issuer (such guarantee to rank on a subordinated basis equivalent to that referred to in Condition 3) that:

- (i) other than in respect of any substitution or variation in order to ensure the effectiveness and enforceability of Condition 20(d) (including, without limitation, changing its governing law), have terms not materially less favourable to an investor than the terms of the Notes, as reasonably determined by the Issuer in consultation with an independent investment bank or independent financial adviser of international standing, provided that they shall (1) if, immediately prior to such substitution or variation, the Notes qualify as Tier 1 Capital of the Issuer and/or any applicable Solvency II Group (as applicable), contain terms which comply with the Relevant Rules in relation to Tier 1 Capital, (2) carry the same rate of interest and interest payment dates from time to time as that applying to the Notes, (3) rank senior to, or pari passu with, the ranking of the Notes, (4) (save where such interest has been paid or is optionally or mandatorily cancelled by the Issuer pursuant to Conditions 3(b), 5 or 6) preserve any existing rights under these Conditions to any accrued interest which has not been paid (but without prejudice to the Issuer's right or obligation subsequently to cancel any such amounts in accordance with the terms of the Qualifying Tier 1 Notes), (5) preserve the obligations (including the obligations arising from the exercise of any right) of the Issuer as to redemption of the Notes, including (without limitation) as to timing of, and amounts payable upon, such redemption and (6) contain terms providing for mandatory and/or optional cancellation or suspension of payments of interest and/or principal only if such terms are not materially less favourable to an investor than the mandatory and optional cancellation provisions, respectively, contained in the terms of the Notes; and
- (ii) if the Notes were listed or admitted to trading immediately prior to the relevant substitution or variation, are listed or admitted to trading on a stock exchange commonly used in debt capital markets transactions in the international capital markets;

"Recovery and Resolution Regime" means any applicable laws, regulations, rules or requirements in effect in Greece or any other relevant jurisdiction and relating to (i) the transposition of Chapter II, Title IV of Solvency II (entitled "Reorganisation measures") and the IRRD, and any other law or regulation applicable in Greece relating to the adoption of mandatory reorganisation measures and/or the recovery or resolution of insurance or reinsurance undertakings, in each case as amended or replaced from time to time and (ii) the instruments, rules and standards created thereunder, pursuant to which any obligation of the Issuer or, as the case may be, any Group Insurance Undertaking (or any of their respective affiliates) can be reduced, cancelled, modified, or converted into shares, other securities or other obligations of the Issuer or any other person (or suspended for a temporary period), including reorganisation measures adopted in accordance with Greek Law 4364/2016 (upon appointment of an insurance administrator or adoption of one or more other measures) or otherwise;

"Regulatory Conditions" means, in respect of any proposed act on the part of the Issuer, the Relevant Supervisor having approved, granted permission for, consented to, or having been given due notification of and having not within any applicable time-frame objected to, or withdrawn its approval, permission or consent to, such act (in any case only if and to the extent such approval, permission, consent or non-objection is required by the Relevant Supervisor, the Relevant Rules or any other applicable rules of the Relevant Supervisor at the relevant time);

"Regulatory Deficiency Interest Cancellation Event" means any event (including, without limitation, any event which causes any Solvency Capital Requirement or Minimum Capital Requirement applicable to the Issuer or all or part of any applicable Solvency II Group (which part includes the Issuer) to be breached and such breach is an event) which under the Relevant Rules requires the Issuer to cancel payment of interest in respect of the Notes (on the basis that the Notes are intended to qualify as Tier 1 Capital under the Relevant Rules) and where the Relevant Supervisor has not waived the requirement to cancel payment of interest under the Notes in accordance with any pre-conditions to such cancellation being capable of being granted as prescribed by the Relevant Rules (on the basis that the Notes are intended to qualify as Tier 1 Capital under the Relevant Rules);

"Regulatory Deficiency Redemption Deferral Event" means any event (including, without limitation, where an Insolvent Insurer Winding-up has occurred and is continuing and any event which causes any Solvency Capital Requirement or Minimum Capital Requirement applicable to the Issuer or all or part of any applicable Solvency II Group (which part includes the Issuer) to be breached and the continuation of such Insolvent Insurer Winding-up is, or as the case may be, such breach is, an event) which under the Relevant Rules requires the Issuer to defer or suspend repayment, redemption or purchase of the Notes (on the basis that the Notes are intended to qualify as Tier 1 Capital under the Relevant Rules) and where the Relevant Supervisor has not waived the requirement to defer or suspend repayment, redemption or purchase of the Notes in accordance with any pre-conditions to such waiver being capable of being granted as prescribed by the Relevant Rules (on the basis that the Notes are intended to qualify as Tier 1 Capital under the Relevant Rules);

"Relevant Date" has the meaning provided in Condition 9;

"Relevant Nominating Body" means, in respect of the Original Reference Rate:

- (i) the central bank for the currency to which such Original Reference Rate relates, or any central bank or other supervisory authority which is responsible for supervising the administrator of such Original Reference Rate; or
- (ii) any working group or committee sponsored by, chaired or co-chaired by or constituted at the request of (1) the central bank for the currency to which such Original Reference Rate relates, (2) any central bank or other supervisory authority which is responsible for supervising the administrator of such Original Reference Rate, (3) a group of the aforementioned central banks or other supervisory authorities, or (4) the Financial Stability Board or any part thereof;

"Relevant Resolution Authority" means the resolution authority with the ability to exercise any Statutory Loss Absorption Powers in relation to the Issuer and/or the Notes;

"Relevant Rules" means, at any time, any legislation, rules, guidelines, regulations or published requirements or expectations of the Relevant Supervisor (whether having the force of law or otherwise) then applying to the Issuer or any applicable Solvency II Group relating, but not limited, to own funds, capital resources, capital requirements, financial adequacy requirements, recovery and resolution or other prudential matters (including, but not limited to,

the characteristics, features or criteria of any of the foregoing) and without limitation to the foregoing, includes (to the extent then applying as aforesaid) Solvency II and any legislation (including Greek Law 4364/2016 and any implementing measures, regulatory acts or circulars issued by the Bank of Greece thereunder), rules, guidelines or regulations of the Relevant Supervisor relating to such matters and references in these Conditions to any matter, action or condition being required or permitted by, or in accordance with, the Relevant Rules shall be construed in the context of the Relevant Rules as they apply to Tier 1 Capital and on the basis that the Notes are intended to continue to have the characteristics of Tier 1 Capital under the Relevant Rules notwithstanding the occurrence of a Capital Disqualification Event;

"Relevant SCR Ratio" means, at any time, the lowest applicable SCR Ratio at the relevant time (being an SCR Ratio applicable to either the Issuer or to a Solvency II Group pursuant to the Relevant Rules);

"Relevant Supervisor" means the Bank of Greece in its capacity as the competent authority for the prudential supervision of insurance undertakings in Greece pursuant to Greek Law 4364/2016, or such successor or other authority having primary supervisory authority with respect to prudential matters in relation to the Issuer and/or any applicable Solvency II Group;

"Reset Date" means the First Reset Date and each fifth anniversary of the First Reset Date thereafter;

"Reset Determination Date" means, in respect of a Reset Period, the day falling two T2 Business Days prior to the first day of such Reset Period;

"Reset Period" means the period from and including the First Reset Date to but excluding the next Reset Date, and each successive period from and including a Reset Date to but excluding the next succeeding Reset Date;

"Reset Rate of Interest" has the meaning provided in Condition 4(e);

"Reset Reference Banks" means five leading swap dealers in the principal interbank market relating to euro selected by the Issuer (excluding the Agent or any of its affiliates) in its discretion;

"Reset Reference Rate" means, in respect of a Reset Period, subject to Condition 4(i), (i) the applicable annual mid-swap rate for swap transactions in euro (with a maturity equal to five years) as displayed on the Screen Page at 11.00 a.m. (Central European Time) on the relevant Reset Determination Date or (ii) if such rate is not displayed on the Screen Page at such time and date, the Reset Reference Bank Rate on the relevant Reset Determination Date, where:

"Mid-Swap Quotations" means the arithmetic mean of the bid and offered rates for the annual fixed leg (calculated on a 30/360 day count basis) of a fixed for floating interest rate swap transaction in euro which (i) has a term commencing on the relevant Reset Date which is equal to five years; (ii) is in an amount that is representative of a single transaction in the relevant market at the relevant time with an acknowledged dealer of good credit in the relevant swap market; and (iii) has a floating leg based on the 6-month EURIBOR rate (calculated on an Actual/360 day count basis);

"Reset Reference Bank Rate" means the percentage rate determined by the Agent on the basis of the Mid-Swap Quotations requested by the Issuer and provided by the Reset Reference Banks to the Issuer (and the Issuer shall provide such quotations to the Agent promptly thereafter) at or around 11.00 a.m. (Central European Time) on the relevant Reset Determination Date and rounded, if necessary, to the nearest 0.001 per cent. (0.0005 per cent. being rounded upwards).

If at least four quotations are provided, the Reset Reference Bank Rate will be the rounded arithmetic mean of the quotations provided, eliminating the highest quotation (or, in the event of equality, one of the highest) and the lowest quotation (or, in the event of equality, one of the lowest). If only two or three quotations are provided, the Reset Reference Bank Rate will be the rounded arithmetic mean of the quotations provided. If only one quotation is provided, the Reset Reference Bank Rate will be the rounded quotation provided. If no quotations are provided, the Reset Reference Bank Rate will be the applicable annual mid-swap rate for swap transactions in euro (with a maturity equal to five years) that most recently appeared on the Screen Page; and

"Screen Page" means Bloomberg screen page "ICAE1", or such other screen page as may replace it on Bloomberg or, as the case may be, on such other page provided by such information service that may replace Bloomberg, in each case, as may be nominated by the person providing or sponsoring the information appearing there for the purpose of displaying comparable rates, all as determined by the Agent;

"SCR Ratio" means:

- (i) in respect of the Issuer, the sum of all eligible own funds items of the Issuer (as determined by reference to the Relevant Rules at such time) divided by the Solvency Capital Requirement of the Issuer at the relevant time; or
- (ii) in respect of any Solvency II Group, the sum of all eligible own funds items of such Solvency II Group which are available to cover the Solvency Capital Requirement of such Solvency II Group (as determined by reference to the Relevant Rules at such time) divided by the Solvency Capital Requirement of such Solvency II Group at the relevant time;

"Senior Creditors" means (a) creditors of the Issuer who are unsubordinated creditors of the Issuer including all (i) policyholders of the Issuer and all beneficiaries under contracts of insurance written by the Issuer (for the avoidance of doubt, the claims of policyholders and such beneficiaries shall include all amounts to which policyholders or such beneficiaries are entitled under applicable legislation or rules relating to the winding-up or liquidation of insurance companies to reflect any right to receive or expectation of receiving benefits which policyholders or such beneficiaries may have) and (ii) other persons whose claims take precedence or otherwise benefit from a higher priority under mandatory provisions of Greek law, including, without limitation, paragraphs 2 and 3 of Article 240 of Greek Law 4364/2016, as in force from time to time, and (b) other creditors of the Issuer (including, without limitation, those whose claims are in respect of instruments or obligations which constitute, or would but for any applicable limitation on the amount of any such capital constitute, Tier 2 Capital) whose claims are, or are expressed to be, subordinated to the claims of other creditors of the Issuer (other than those (A) whose claims are in respect of instruments or obligations which constitute, or would but for any applicable limitation on the amount of any such capital constitute, Tier 1 Capital or (B) whose claims otherwise rank, or are expressed by their terms to rank, *pari passu* with, or junior to, the claims of the Noteholders);

"Solvency II" means the Solvency II Directive and any implementing measures adopted pursuant to the Solvency II Directive including, without limitation, the Solvency II Regulation (for the avoidance of doubt, whether implemented by way of a regulation, a directive, guidelines or otherwise);

"Solvency II Directive" means Directive 2009/138/EC of the European Parliament and of the Council of the European Union of 25 November 2009 on the taking-up and pursuit of the

business of insurance and reinsurance (Solvency II) (as amended and as may be further amended or replaced from time to time);

"Solvency II Group" means (a) the Ultimate Solvency II Regulated Entity and such other group entities as may be construed as part of its regulatory group under Solvency II or the Relevant Rules or otherwise by the Relevant Supervisor, as the case may be and/or (b) if at any time the Issuer is the highest level parent company or entity regulated under Solvency II on a consolidated or sub-consolidated basis, the Issuer and such of its Subsidiaries as may be construed as part of its regulatory group under Solvency II or the Relevant Rules or otherwise by the Relevant Supervisor for the purposes of such consolidation or sub-consolidation;

As at the date of this Offering Circular, the Solvency II Group comprises Ethniki Holdings S.à r.l. and each of its Subsidiaries (including the Issuer) and there is no consolidated or sub-consolidated Solvency II Group at the level of the Issuer.

"Solvency II Regulation" means the Commission Delegated Regulation (EU) 2015/35 of 10 October 2014 supplementing Directive 2009/138/EC of the European Parliament and of the Council of the European Union on the taking-up and pursuit of the business of insurance and reinsurance (Solvency II) (as amended and as may be further amended or replaced from time to time);

"Solvency Capital Requirement" means (as applicable):

- (i) the solvency capital requirement of the Issuer;
- (ii) the consolidated group Solvency Capital Requirement of any applicable Solvency II Group; and/or
- (iii) any equivalent or successor capital requirement to (i) or (ii) other than the Minimum Capital Requirement and only if and to the extent applicable to the Issuer or any applicable Solvency II Group (on a solo, sub-consolidated or consolidated basis) from time to time,

in each case, as referred to in, or described in, the Relevant Rules applicable to the Issuer and/or any applicable Solvency II Group (as the case may be);

"Solvency Condition" has the meaning provided in Condition 3(b);

"Specified Date" means the later of (i) the Issue Date and (ii) the latest date (if any) on which any Further Notes have been issued pursuant to Condition 17;

"Specified Office" has the meaning given to such term in the Agency Agreement;

"Statutory Loss Absorption Powers" means any write-down, conversion, transfer, modification, suspension or similar or related power existing from time to time under, and exercised in compliance with, any Recovery and Resolution Regime then in effect in Greece;

"Subsidiary" means, in respect of an entity (the **"First Entity"**) at any particular time, any other entity: (a) whose affairs and policies the First Entity controls or has the power to control, whether by ownership of share capital, contract, the power to appoint or remove members of the governing body of such entity or otherwise; or (b) whose financial statements are, in accordance with applicable law and generally accepted accounting principles or standards, consolidated with those of the First Entity;

"Successor Reference Rate" means the rate that the relevant Independent Adviser or the Issuer (as applicable) determines is a successor to or replacement of the Original Reference Rate which is formally recommended by any Relevant Nominating Body;

"T2" means the real time gross settlement system operated by the Eurosystem, or any successor or replacement system;

"T2 Business Day" means a day (other than a Saturday or Sunday) on which T2 is operating for the settlement of payments in euro;

"Tax Law Change" means a change in or proposed change in, or amendment or proposed amendment to, the laws or regulations of the Taxing Jurisdiction or any political subdivision or authority therein or thereof having the power to tax, including any treaty to which the Taxing Jurisdiction is a party, or any change in the application of official or generally published interpretation of such laws, including a decision of any court or tribunal, or any interpretation or pronouncement by any relevant tax authority that provides for a position with respect to such laws or regulations that differs from the previously generally accepted position in relation to similar transactions (in respect of securities similar to the Notes and which are capable of constituting Tier 1 Capital under the Relevant Rules applicable at issuance) or which differs from any specific written confirmation given by a tax authority in respect of the Notes, which change or amendment becomes, or would become, effective on or after the Specified Date;

"Taxing Jurisdiction" has the meaning given to it in Condition 9;

"Tier 1 Capital" has the meaning given to it for the purposes of the Relevant Rules from time to time (including, without limitation, by virtue of the operation of any grandfathering provisions under any Relevant Rules);

"Tier 2 Capital" has the meaning given to it for the purposes of the Relevant Rules from time to time (including, without limitation, by virtue of the operation of any grandfathering provisions under any Relevant Rules);

a **"Trigger Event"** shall be deemed to occur if the Issuer or the Relevant Supervisor determines that at least one of the following events has occurred:

- (i) the amount of eligible own funds items of the Issuer is equal to or less than 75 per cent. of the Solvency Capital Requirement of the Issuer;
- (ii) the amount of eligible own funds items of any applicable Solvency II Group is equal to or less than 75 per cent. of the Solvency Capital Requirement of such Solvency II Group;
- (iii) the amount of eligible own funds items of the Issuer has been less than the Solvency Capital Requirement of the Issuer for a period of at least three months;
- (iv) the amount of eligible own funds items of any applicable Solvency II Group has been less than the Solvency Capital Requirement of such Solvency II Group for a period of at least three months;
- (v) the amount of eligible own funds items of the Issuer is equal to or less than the Minimum Capital Requirement of the Issuer; and/or
- (vi) the amount of eligible own funds items of any applicable Solvency II Group is equal to or less than the Minimum Capital Requirement of such Solvency II Group;

"Trigger Event Notice" means the notice referred to as such in Condition 6(a) which shall be given by the Issuer to the Noteholders in accordance with Condition 15, the Agent, the Noteholders Agent and the Relevant Supervisor, and which shall state with reasonable detail (i) the nature of the relevant Trigger Event, (ii) (if then known) any Write Down Amount and the basis of its calculation and (iii) the relevant Write Down Date;

"Ultimate Solvency II Regulated Entity" means the highest level parent company of the Issuer which is regulated under Solvency II on a consolidated basis;

As at the date of this Offering Circular, the Ultimate Solvency II Regulated Entity is Ethniki Holdings S.à r.l.

"Winding-Up" means, in relation to the Issuer, the commencement of insurance liquidation proceedings conducted by an insurance liquidator appointed by the Relevant Supervisor in accordance with Greek Law 4364/2016 (as may be amended or replaced from time to time) following an order or decision of the Relevant Supervisor to revoke the Issuer's operating licence, pursuant to Article 235 in conjunction with Article 114 of such law and/or any legislation or regulations that may in the future govern the winding-up or liquidation of insurance companies in the jurisdiction of incorporation of the Issuer;

"Write Down" and **"Written Down"** shall be construed as provided in Condition 6(a);

"Write Down Amount" has the meaning provided in Condition 6(b);

"write down and/or conversion" means, in respect of any Loss Absorbing Instruments, the reduction and/or, as the case may be, conversion into paid-in ordinary shares (or other equivalent tier 1 own funds instruments, as applicable) of the prevailing principal amount of such instruments as contemplated in Condition 6(b);

"Write Down Date" has the meaning provided in Condition 6(a);

"Write Up" and **"Written Up"** shall be construed as provided in Condition 6(d);

"Write Up Amount" has the meaning provided in Condition 6(d);

"Write Up Date" has the meaning provided in Condition 6(d);

"Write Up Notice" has the meaning provided in Condition 6(d); and

"Written Down Tier 1 Instrument" means an instrument (other than the Notes or any share capital of the Issuer or any member of any applicable Solvency II Group) issued directly or indirectly by the Issuer or, as applicable, any other member of any applicable Solvency II Group and qualifying as Tier 1 Capital of the Issuer or the relevant Solvency II Group (as the case may be) as at its date of issue in accordance with the Relevant Rules that, immediately prior to any Write Up of the Notes, has a prevailing principal amount which is less than its initial principal amount due to a write down of such instrument having occurred and that has terms permitting a principal write up to occur on a basis similar to that set out in Condition 6(d) in the circumstances existing on the relevant Write Up Date.

19. Noteholders Agent

If the holders of the Notes must be organised in a group pursuant to article 63 of Greek Law 4548/2018, to the extent applicable, the Issuer shall appoint a Noteholders Agent by way of a written agreement (the **"Noteholders Agency Agreement"**).

The Noteholders Agent shall represent the Noteholders judicially and extra-judicially in accordance with the provisions of Greek Law 4548/2018.

Notice of the identity of the Noteholders Agent shall promptly be given by the Issuer to the Noteholders in accordance with Condition 15.

Subject as provided in Condition 13, the Noteholders Agent shall have such rights against the Issuer and such duties and obligations as are prescribed for an entity acting in such capacity under the Greek Law 4548/2018 but such rights, duties and obligations shall be without prejudice to the rights of Noteholders against the Issuer set out in these Conditions.

The meetings of the Noteholders shall be entitled to vary or terminate the appointment of the Noteholders Agent in accordance with the provisions of Greek Law 4548/2018 and these Conditions.

20. Governing law, jurisdiction and Acknowledgement of Statutory Loss Absorption Powers

(a) Governing law

The Notes and the Agency Agreement and any non-contractual obligations arising out of or in connection with the Notes and the Agency Agreement are governed by, and shall be construed in accordance with, English law, save that Conditions 3, 19 and 20(d) are governed by and shall be construed in accordance with Greek law.

(b) Jurisdiction

The English courts have exclusive jurisdiction to settle any dispute arising out of or in connection with the Notes and the Agency Agreement, including any dispute as to their existence, validity, interpretation, performance, breach or termination or the consequences of their nullity and any dispute relating to any non-contractual obligations arising out of or in connection with the Notes (a "Dispute" and any suit, action or proceedings relating to a Dispute shall be referred to as "Proceedings") and each party submits to the exclusive jurisdiction of the English courts.

For the purposes of this Condition 20(b), each of the Issuer and the Noteholders waives any objection to the English courts on the grounds that they are an inconvenient or inappropriate forum to settle any Dispute.

(c) Process Agent

The Issuer irrevocably and unconditionally agrees that service in respect of any Proceedings may be effected upon Piraeus Group Finance PLC, at 4 Felstead Gardens, Ferry Street, London, E14 3BS, United Kingdom and undertakes that in the event of Piraeus Group Finance PLC ceasing so to act it will forthwith appoint a further person as its agent for that purpose and notify the name and address of such person to the Agent and agrees that, failing such appointment within fifteen days, any Noteholder shall be entitled to appoint such a person by written notice addressed to the Issuer and delivered to the Issuer (with a copy to the Agent). Nothing contained herein shall affect the right of any Noteholder to serve process in any other manner permitted by law.

(d) Acknowledgement of Statutory Loss Absorption Powers

Notwithstanding any other term of the Notes or any other agreement, arrangement or understanding between the Issuer and the Noteholders, by its subscription and/or

purchase and holding of the Notes, each Noteholder (which for the purposes of this Condition 20(d) includes each holder of a beneficial interest in the Notes) acknowledges, accepts, consents and agrees:

- (i) to be bound by the effect of the exercise of any Statutory Loss Absorption Power by the Relevant Resolution Authority, which may include (without limitation) and result in any of the following, or some combination thereof:
 - (A) the suspension of the payment of any Amounts Due;
 - (B) the reduction of all, or a portion, of the Amounts Due on a permanent basis;
 - (C) the conversion of all, or a portion, of the Amounts Due into shares, other securities or other obligations of the Issuer or another person (and the issue to or conferral on the holder of such shares, securities or obligations), including by means of an amendment, modification or variation of the terms of the Notes, in which case the Noteholder agrees to accept in lieu of its rights under the Notes any such shares, other securities or other obligations of the Issuer or another person;
 - (D) the cancellation of the Notes or Amounts Due;
 - (E) the amendment or alteration of the perpetual nature of the Notes or amendment of the amount of interest payable on the Notes, or the date on which the interest becomes payable, including by suspending payment for a temporary period; and
 - (F) a reduction in the capacity of the Issuer to pay in a timely manner (or at all) any Amounts Due, following a mandatory transfer of portfolio of insurance policies to another insurance undertaking or due to preparatory measures for an anticipated Winding-Up adopted by an insurance administrator; and
- (ii) that the terms of the Notes are subject to, and may be varied, if necessary, to give effect to, the exercise of any Statutory Loss Absorption Power by the Relevant Resolution Authority.

No repayment or payment of Amounts Due in respect of the Notes will become due and payable or be paid after the exercise of any Statutory Loss Absorption Powers by the Relevant Resolution Authority if and to the extent such amounts have been reduced, converted, cancelled, amended or altered as a result of such exercise.

Neither a reduction or cancellation, in part or in full, of the Amounts Due, the conversion thereof into another security or obligation of the Issuer or another person, as a result of the exercise of the Statutory Loss Absorption Powers by the Relevant Resolution Authority with respect to the Issuer, nor the exercise of the Statutory Loss Absorption Powers by the Relevant Resolution Authority with respect to the Notes, will constitute a default for any purpose.

Upon the exercise of the Statutory Loss Absorption Powers by the Relevant Resolution Authority with respect to the Notes, the Issuer will provide a written notice to the Noteholders in accordance with Condition 15 as soon as practicable regarding such exercise of the Statutory Loss Absorption Powers. Any delay or failure by the Issuer in

delivering any notice referred to in this Condition 20(d) shall not affect the validity and enforceability of the exercise of the Statutory Loss Absorption Powers nor constitute a default by the Issuer for any purpose.

FORM OF THE NOTES AND SUMMARY OF PROVISIONS RELATING TO THE NOTES WHILE IN GLOBAL FORM

The Global Certificate contains the following provisions which apply to the Notes in respect of which it is issued whilst they are evidenced by the Global Certificate (including definitions which are not otherwise included in these summary provisions), some of which modify the effect of the Conditions. Terms defined in the Conditions have the same meaning when used below.

Global Certificate

The Notes will, upon issue, be represented by the Global Certificate which will be registered on or about the Issue Date in the name of BT Globenet Nominees Limited (the "**Registered Holder**") as nominee of a common depositary for Euroclear and Clearstream, Luxembourg.

Accountholders

For so long as any of the Notes are evidenced by the Global Certificate, each person (other than another clearing system) who is for the time being shown in the records of Euroclear or Clearstream, Luxembourg (as the case may be) as the holder of a particular aggregate principal amount of the Notes (each an "**Accountholder**") (in which regard any certificate or other document issued by Euroclear or Clearstream, Luxembourg (as the case may be) as to the outstanding principal amount of such Notes standing to the account of any person shall, in the absence of manifest error, be conclusive and binding for all purposes) shall be treated as the holder of such aggregate principal amount of such Notes (and the expression "**Noteholders**" and references to "**holding**" Notes and to "**holder**" shall be construed accordingly) (the "**Accountholder's Holding**") for all purposes other than with respect to payments on such Notes, for which purpose the Registered Holder shall be deemed to be the holder of such aggregate principal amount of the Notes in accordance with and subject to the terms of the Global Certificate. Each Accountholder must look solely to Euroclear or Clearstream, Luxembourg, as the case may be, for its share of each payment made to the Registered Holder.

Cancellation

Cancellation of any Note following its redemption or purchase by the Issuer or any of its Subsidiaries will be effected by reduction in the aggregate principal amount of the Notes in the register of Noteholders and by the annotation of the appropriate schedule to the Global Certificate.

Payments

For so long as the Registered Holder is shown in the Register as the holder of the Notes evidenced by the Global Certificate, the Registered Holder shall (subject as set out above under '*Accountholders*') in all respects be entitled to the benefit of such Notes and shall be entitled to the benefit of the Agency Agreement. Payments of all amounts payable under the Conditions in respect of the Notes as evidenced by a Global Certificate will be made to the Registered Holder pursuant to the Conditions.

Upon any payment of any amount payable under the Conditions the amount so paid shall be entered by the Registrar on the register, which entry shall constitute *prima facie* evidence that the payment has been made.

For the purposes of Condition 8, so long as the Notes as evidenced by the Global Certificate are held on behalf of Euroclear and/or Clearstream, Luxembourg, the Record Date in respect of the Notes shall be the close of the business day (being for this purpose a day on which Euroclear and Clearstream, Luxembourg are open for business) before the relevant due date.

Interest calculation

For so long as Notes are evidenced by the Global Certificate, interest payable to the Registered Holder will be calculated by applying the applicable Interest Rate to the outstanding principal amount of the Notes evidenced by the Global Certificate, multiplying the resulting figure by the day count fraction described in Condition 4(c), and rounding the resultant figure to the nearest cent (with half a cent being rounded upwards).

Interest cancellation, Write Down and Write Up

On each occasion on which: (i) any interest payments on Notes represented by the Global Certificate are cancelled in accordance with Conditions 3(b), 5 or 6; or (ii) the Prevailing Principal Amount of the Notes represented by the Global Certificate is subject to a Write Down or Write Up under Condition 6, the Issuer shall procure that details of the cancellation of interest payment, Write Down or Write Up, including the resulting principal amount of the Global Certificate, as appropriate, shall be entered *pro rata* in the records of Euroclear and/or Clearstream, Luxembourg. Any such Write Down or Write Up shall be treated on a *pro rata* basis which, for the avoidance of doubt, shall be effected in Euroclear and/or Clearstream, Luxembourg in accordance with their operating procedures as a decrease or, as the case may be, an increase in the relevant pool factor.

Notices

So long as the Notes are evidenced by the Global Certificate and the Global Certificate is held on behalf of a clearing system, notices to Noteholders may be given by delivery of the relevant notice to that clearing system for communication by it to entitled Accountholders in substitution for notification as required by Condition 15 except that, so long as the Notes are listed on the Luxembourg Stock Exchange's Euro MTF Market, notices shall also be published in accordance with the rules of such exchange. Any such notice shall be deemed to have been given to the Noteholders on the day on which such notice is delivered to such clearing system.

Whilst any of the Notes are evidenced by the Global Certificate, notices to be given by a Noteholder may be given by such Noteholder (where applicable) through the applicable clearing system's operational procedures approved for this purpose and otherwise in such manner as the applicable clearing system may approve for this purpose.

Transfers

Transfers of book-entry interests in the Notes will be effected through the records of Euroclear and/or Clearstream, Luxembourg and their respective participants in accordance with the rules and procedures of Euroclear and/or Clearstream, Luxembourg and their respective direct and indirect participants.

Exchange and registration of title

The Global Certificate will be exchangeable (free of charge to the holder) in whole but not in part for Certificates only upon the occurrence of an Exchange Event. An "**Exchange Event**" means that:

- (a) an event as described in Condition 12(a) has occurred and is continuing;
- (b) the Issuer has been notified that both Euroclear and Clearstream, Luxembourg have been closed for business for a continuous period of 14 days (other than by reason of holiday, statutory or otherwise) or have announced an intention permanently to cease business or have in fact done so and no successor clearing system is available; or

- (c) the Issuer has or will become subject to adverse tax consequences which would not be suffered were the Notes evidenced by the Global Certificate in definitive form.

The Issuer will promptly give notice to the Noteholders in accordance with Condition 15 if an Exchange Event occurs. In the event of the occurrence of an Exchange Event, Euroclear and/or Clearstream, Luxembourg, as the case may be, acting on the instructions of any Accountholder may give notice to the Registrar requesting exchange and, in the event of the occurrence of an Exchange Event as described in (c) above, the Issuer may also give notice to the Registrar requesting exchange. Any exchange shall occur no later than ten days after the date of receipt of the first relevant notice by the Registrar.

Exchanges will be made upon presentation of the Global Certificate at the office of the Registrar by or on behalf of the Registered Holder on any day on which banks are open for general business in the jurisdiction of incorporation of the Registrar and will be effected by the Registrar (a) entering each Accountholder in the Register as the registered holder of the principal amount of Notes equal to such Accountholder's Holding and (b) completing, authenticating and dispatching to each Accountholder a Certificate evidencing such Accountholder's Holding. The aggregate principal amount of the Notes evidenced by Certificates issued upon an exchange of the Global Certificate will be equal to the aggregate outstanding principal amount of the Notes evidenced by the Global Certificate.

The Registrar will not register title to the Notes in a name other than that of a nominee for the common depositary for a period of fifteen calendar days preceding the due date for any payment of principal or interest in respect of the Notes.

Prescription

Claims against the Issuer in respect of principal and interest on the Notes represented by the Global Certificate will be prescribed after 10 years (in the case of principal) and five years (in the case of interest) from the Relevant Date (as defined in Condition 9).

Euroclear and/or Clearstream, Luxembourg

References in the Global Certificate to Euroclear and/or Clearstream, Luxembourg shall be deemed to include references to any other clearing system through which interests in the Notes are held.

Electronic Consents and Written Resolutions

While the Global Certificate is held on behalf of a clearing system, then:

- (a) approval of a resolution proposed by the Issuer with respect to the Notes given by way of electronic consents ("**Electronic Consent**") communicated through the electronic communications systems of the relevant clearing system(s) in accordance with their operating rules and procedures (and in a form satisfactory to the Issuer) by or on behalf of the holders of not less than 75 per cent. in principal amount of the Notes for the time being outstanding shall constitute an Extraordinary Resolution (as defined in the Agency Agreement) and, accordingly, shall be binding on all Noteholders whether or not they participated in such Electronic Consent; and
- (b) where an Extraordinary Resolution by way of Electronic Consent is not being sought, for the purpose of determining whether a resolution in writing has been validly passed, the Issuer shall be entitled to rely on consent or instructions given in writing directly to the Issuer by accountholders in the clearing system with entitlements to such Global Certificate, or, where the accountholders hold any such entitlement on behalf of another person, on written consent from or written instruction by the person for whom such entitlement is ultimately beneficially held, whether such beneficiary holds directly with the accountholder or via one or more

intermediaries and provided that, in each case, the Issuer has obtained commercially reasonable evidence to ascertain the validity of such holding and has taken reasonable steps to ensure that such holding does not alter following the giving of such consent or instruction and prior to the effecting of such amendment. Any resolution passed in such manner shall be binding on all Noteholders, even if the relevant consent or instruction proves to be defective. As used in this paragraph, "**commercially reasonable evidence**" includes any certificate or other document issued by Euroclear or Clearstream, Luxembourg, or issued by an accountholder or participant of them or an intermediary in a holding chain, in relation to the holding of interests in the Notes. Any such certificate or other document shall, in the absence of manifest error, be conclusive and binding for all purposes. Any such certificate or other document may comprise any form of statement or print out of electronic records provided by the relevant clearing system in accordance with its usual procedures and in which the accountholder of a particular principal amount of the Notes is clearly identified together with the amount of such holding. The Issuer shall not be liable to any person by reason of having accepted as valid or not having rejected any certificate or other document to such effect purporting to be issued by any such person and subsequently found to be forged or not authentic.

USE OF PROCEEDS

The net proceeds from the issue of the Notes will be used by the Issuer for the general corporate and financing purposes of the Group, which may include refinancing the Issuer's existing indebtedness, and to further strengthen its solvency ratios.

DESCRIPTION OF THE ISSUER

Overview

The Issuer, whose trading name is Ethniki Asfalistiki, is the first and oldest insurance company in Greece, established 135 years ago on 15 June 1891. The Issuer is headquartered at 103-105 Syngrou Avenue, GR-117 45 Athens, Greece, its telephone number is +30 210 9099000 and its website is <https://www.ethnikiasfalistiki.gr/en>.

Pursuant to its articles of association, the Issuer's purpose is to carry out insurance, reinsurance and related financial activities for insurance companies under applicable Greek and EU law, including Greek Law 4548/2018 and Greek Law 4364/2016.

History of the Issuer

The Issuer was established in 1891 and has developed a strong reputation by consistently delivering on its commitments to the environment, people and communities, while maintaining a human-centred orientation and seeking to provide relevant and high-quality services to its customers.

In the context of its 135-year history, the Issuer has served millions of customers and has continued to evolve its products, services and capabilities to meet changing customer needs and expectations. The Issuer's ambition is to continue to contribute positively to the Greek economy and society while creating enduring value for customers, partners and employees.

In November 2025, Piraeus Financial Holdings S.A. concluded the acquisition of 100 per cent. of the shares of Ethniki Holdings S.à r.l. ("**Ethniki Holdings**"), the parent company of the Issuer, from CVC Capital Partners Fund VII and National Bank of Greece, thereby becoming the sole shareholder of the Issuer through Ethniki Holdings. This transaction marked a new chapter for the Issuer and created significant opportunities for growth and value creation. In December 2025, Piraeus Bank S.A. ("**Piraeus**") concluded a reverse merger and absorption of Piraeus Financial Holdings S.A. and, accordingly, Piraeus became the ultimate parent company of the Issuer.

In 2025, the Issuer sharpened its strategic focus on the Greek market, completing the divestment of its operations in Cyprus and Romania, which has optimised capital allocation and reduced organisational complexity.

In September 2025, the Issuer completed the acquisition of a 55 per cent. majority stake in Elysee Insurance Agent & Coordinator S.A. and Elysee Insurance Brokers S.A., which are leading insurance distribution companies active across all insurance lines in Greece. The transaction was intended to expand the Issuer's product distribution channels, create new growth opportunities and diversify its sources of revenue.

The Issuer's 2025 results reflected the completion of a strategic transformation cycle and the transition to a more modern, efficient and agile operating model. The integration into the Piraeus group is intended to provide stability, growth prospects and meaningful value creation for stakeholders.

Organisational structure

The Issuer is wholly owned by Ethniki Holdings. As at 31 December 2025, the Issuer had share capital of €235,220,976 divided into 196,017,480 registered voting shares with a nominal value of €1.20 each.

The only material assets of Ethniki Holdings are its shareholdings in the Issuer and it does not carry out any trading activity on its own account.

As at the date of this Offering Circular, the Issuer is the parent undertaking of two subsidiaries, Elysee Insurance Agent & Coordinator S.A. and Elysee Insurance Brokers S.A., and a subsidiary undertaking of its ultimate parent company, Piraeus.

Mission and strategy

The Issuer's stated mission is to support people and businesses by offering simple, innovative and reliable solutions to protect what matters most to them. Its stated vision is to be the leading insurer in Greece, standing by its customers and redefining insurance with empathy and simplicity while building a sustainable future. Its values are integrity and reliability, customer centricity, simplicity and efficiency, performance and excellence, innovation, and ownership and accountability.

The Issuer's strategy focuses on accelerating growth, enhancing profitability and managing capital efficiently, with the objective of creating sustainable value for its customers, partners and shareholders. Its strategic priorities include strengthening and expanding its commercial network, further developing the health and property and casualty business lines, enhancing operational efficiency through disciplined underwriting and claims management, strengthening the balance sheet, focusing on customer experience, developing people and culture, and leveraging technology and data to support transformation.

For the 2026-2030 period, the Issuer's business strategy will focus on sustainable value creation through a balanced approach to growth, profitability and resilience. This strategy is supported by a strong capital base and high liquidity, which are key factors enabling disciplined growth and the absorption of volatility. Prudent investment and risk management support strategic flexibility and provide a foundation for sustainable profitability.

The Issuer is focused on the Greek insurance market, which continues to be characterised by significant growth potential, driven by low insurance penetration and a substantial protection gap. The Issuer's integration into the Piraeus group ecosystem creates opportunities to accelerate growth through synergies, expanded distribution channels and a stronger customer base.

The Issuer seeks to maintain a diversified model across products and distribution channels. It offers insurance products and services through a multi-channel approach comprising exclusive and non-exclusive agents, independent brokers, bancassurance and direct channels.

As part of its growth strategy, the Issuer has taken steps to diversify revenue streams and expand distribution. The acquisition of a majority stake in the Elysee insurance brokerage companies is intended to strengthen its position in the motor line of business, diversifying revenue streams and establishing foundations for a broader mobility ecosystem.

Greek market strategy

The Issuer's Greek market strategy is underpinned by its long-standing brand, large customer base of more than 1.9 million active customers, diversified portfolio and 13.6 per cent. market share².

The Issuer provides a wide range of insurance products for both individuals and businesses, with coverage options spanning protection of valuable assets to safeguarding health and well-being. Its business model is based on generating premium income from a range of retail personal and commercial products, managing claims efficiently, controlling costs, investing premiums prudently and creating sustainable value for customers, partners and its shareholder.

² The market share figure is based on the total size of the insurance market reported by the Hellenic Association of Insurance Companies, adjusted by the Issuer to include an estimated €120 million of business not covered by the Hellenic Association of Insurance Companies' report. Accordingly, the market share figure is an internal estimate only and is made as at 31 December 2025.

The Issuer's sales network comprised, as at 31 December 2025, 112 sales offices with 1,407 exclusive insurance agents, 1,065 non-exclusive insurance agents and 136 insurance brokers. This network is supported by six branches located in Athens, Corinth, Patras, Chania, Rhodes and Thessaloniki.

The Issuer's products are also currently available through the extensive network of NBG branches. The NBG Distribution Agreement is expected to be terminated or mature during 2027. The Issuer, being part of the Piraeus group ecosystem, aspires to expand the distribution channel to include that of the Piraeus group in 2027, with a view to strengthening its customer base and enhancing growth opportunities. However, as at the date of this Offering Circular, no bancassurance distribution agreement has been signed with Piraeus and no formal decision has been made about any future distribution agreement between the Issuer and Piraeus.

Distribution and digital strategy

The Issuer's strategy includes enhancing its multi-channel distribution model, leveraging bancassurance (via Piraeus) and selectively developing digital channels and strategic partnerships. The Issuer is investing in modern, platform-based architecture and in the progressive embedding of artificial intelligence into critical functions to enhance efficiency, improve customer experience and support faster, higher-quality decision-making.

Business overview

Summary financial information

Statement of financial position

The table below summarises the Issuer's key statement of financial position figures for the years ended 31 December 2024 and 31 December 2025 and the six-month period ended 30 June 2026.

<i>Amounts in € '000</i>	30 June 2026	31 December 2025	31 December 2024
Total assets	3,831,692	3,867,566	4,086,881
<i>of which investment portfolio</i>	<i>2,815,691</i>	<i>2,760,270</i>	<i>2,863,866</i>
Total liabilities	3,452,678	3,526,121	3,713,516
<i>of which insurance contract liabilities</i>	<i>2,100,585</i>	<i>2,163,377</i>	<i>2,327,291</i>
<i>of which investment contracts liabilities</i>	<i>1,002,168</i>	<i>1,008,973</i>	<i>1,030,128</i>
Shareholders' equity	379,014	341,444	373,365

Total comprehensive income

The table below summarises the Issuer's key total comprehensive income figures for the years ended 31 December 2024 and 31 December 2025 and for the six-month periods ended 30 June 2025 and 30 June 2026.

<i>Amounts in € '000</i>	30 June 2026	30 June 2025	31 December 2025	31 December 2024
Insurance revenue	351,740	317,304	656,463	572,515
Insurance service expenses	(251,302)	(225,758)	(526,006)	(654,421)
Net income/(expense) from reinsurance contracts held	(57,086)	(82,263)	(125,713)	97,112
Insurance service result	43,352	9,283	4,744	15,206
Net investment income	66,280	36,761	84,489	89,540
Profit/(loss) before tax	68,396	14,972	48,014	14,812

Alternative performance measures

The Issuer uses certain alternative performance measures ("APMs") to assess and evaluate its financial and operational performance. Certain of these APMs are summarised below.

<i>Amounts in € '000 (unless otherwise specified)</i>	For the six-month (unless otherwise specified) period ended		For the year ended	
Alternative Performance Measures	30 June 2026	30 June 2025	31 December 2025	31 December 2024
Adjusted operating profit before tax	50,155	11,599	44,668	26,214
Investment portfolio return*	2.76%	N/A	2.93%	2.70%
Return on capital employed*	15.5%	N/A	8.4%	4.6%
Return on equity*	17.5%	N/A	9.6%	2.2%
Stock of future profit	668,332	N/A	682,214	673,016
Combined ratio	92.7%	100.6%	99.3%	95.8%
Expense rate	13.1%	14.6%	13.4%	14.8%

* The information above in relation to investment portfolio return, return on capital employed and return on equity is stated for the twelve-month period ended 30 June 2026.

The APMs above (and as described in detail below) provide a basis for monitoring the Issuer's periodic financial performance and results of operations through metrics which, although they are commonly used to convey management's view to the end user, are not explicitly defined under IFRS. The Issuer considers that these APMs provide useful information for investors in order to better understand the underlying business and results of operations of the Issuer. APMs should not be considered in isolation from, or as a substitute for any analysis of, financial measures defined according to IFRS. Investors are advised to review the APMs in conjunction with the financial statements of the Issuer incorporated by reference in this Offering Circular.

APM Definitions

"Adjusted operating profit before tax": a measure of underlying operating profitability, determined as profit before tax, adjusted for the effect of non-operating / non-recurring and other notable items.

"Non-operating / non-recurring items" may include the following:

- (i) one-time effects from significant transactions with disposal character (such as the gain or loss on the disposal of a subsidiary or a real estate property);
- (ii) voluntary exit scheme related expenses;
- (iii) interest expense from external debt;
- (iv) realised and unrealised gains/losses from financial assets measured at fair value excluding unit-linked assets;
- (v) restructuring, integration and transaction related expenses, that are considered non-recurring items based on management judgement; and
- (vi) litigation and other expenses / income with a one-off character.

"Other notable items" reflect the unexpected impact of events that affect the Issuer's results, which may include the revision of non-economic assumptions and any prior-year reserves developments (positive or negative) primarily related to non-life and health businesses.

"Investment portfolio return": an investment performance metric that indicates how effectively a portfolio of assets generates income relative to its book value during the period the amount invested. It is calculated as investment income divided by the average investment portfolio.

"Investment income" is the net investment income from financial assets as derived from financial statements, excluding the investment income generated from unit-linked financial assets, loans, investment property assets and interest expense from subordinated loans and investment contracts.

"Investment portfolio" is the value of total financial assets, as derived from financial statements, including cash and cash equivalents but excluding unit-linked financial assets and loans.

"Average investment portfolio" is determined as the average between the investment portfolio at the start of the period and at the end of the period.

"Return on capital employed": a financial performance metric that measures how efficiently a company is using its capital to generate profits. It is calculated as adjusted operating profit before interest and tax divided by average capital employed.

"Adjusted operating profit before interest and tax" is adjusted operating profit before tax (as described above).

"Capital employed" is the sum of shareholders' equity plus the external debt outstanding nominal balances.

"Average capital employed" is determined as the average between the capital employed at the start of the period and at the end of the period.

"Return on equity": a financial performance metric that measures how efficiently a company is using its shareholders' equity to generate profits. It is calculated as adjusted operating profit after tax divided by average shareholders' equity.

"Adjusted operating profit after tax" is the adjusted operating profit before tax (as described above) plus interest expense from external debt and related income tax expense.

"Shareholders' equity" is the total of share capital, reserves, and retained earnings (or accumulated losses) of the company, as reflected on the statement of financial position.

"Average shareholders' equity" is determined as the average between shareholders' equity at the start of the period and at the end of the period.

"Stock of future profit": represents future profit recognised in the Issuer's statement of financial position that will be released in the income statement over time. It is calculated as the sum of the contractual service margin and risk adjustment (excluding risk adjustment of liability of incurred claims), as derived from the financial statements.

"Combined ratio": a financial measure of whether an insurer is making an underwriting profit from its core insurance activities, before considering investment income. It is mainly used for measuring underwriting profitability for short-term products (i.e. Non-Life, Health and Protection related insurance contracts). It is calculated as the sum of loss ratio and the expense ratio.

"Loss ratio" indicates the underwriting performance of an insurer, including whether premiums are appropriately priced relative to the risks insured. It is calculated as claims and benefits, net of reinsurance and less reinsurance commissions contingent on claims, divided by insurance revenue, net of reinsurance and including ordinary commissions from reinsurers.

"Expense ratio" is calculated as operating expenses plus gross commission expense, divided by insurance revenue net of reinsurance and including ordinary commissions from reinsurers.

"Expense rate": measures operating efficiency by comparing total expenses, with total gross written premiums for the period.

Adjusted operating profit before tax

Adjusted operating profit before tax increased from €26,214 thousand in 2024 to €44,668 thousand in 2025 driven by the improvement in the technical result across both the legacy and new health portfolios, the consistently positive contribution of the investment portfolio, as well as the disciplined management of operating expenses. Adjusted operating profit before tax also increased from €11,599 thousand for the first six months of 2025 to €50,155 thousand for the first six months of 2026, mainly driven by favourable claim experience variance in Health portfolios, strong top line performance and expense discipline. The table below shows the adjusted operating profit before tax for the years ended 31 December 2025 and 31 December 2024 and for the six-month periods ended 30 June 2026 and 30 June 2025.

Adjusted operating profit before tax <i>Amounts in € '000</i>	For the six-month period ended		For the year ended	
	30 June 2026	30 June 2025	31 December 2025	31 December 2024
Profit Before Tax	68,396	14,972	48,014	14,812
Adjusted for: Non-operating / non-recurring items				
<i>Realised and unrealised gains/losses from financial assets measured at fair value excluding unit-linked assets</i>	(8,806)	(13,030)	(21,213)	(22,413)
<i>Interest expense on subordinated loans</i>	6,592	6,748	13,466	14,244
<i>Other non-operating / non-recurring income/expenses (net)</i>	6,460	4,707	9,848	17,068
<i>Voluntary exit scheme related expenses</i>	-	-	-	11,258
<i>Other non-operating / non-recurring interest income</i>	(779)	(1,771)	(3,549)	-
<i>Gain on disposal of subsidiaries and investment properties*</i>	(21,709)	(27)	(27,128)	(7,055)
Total non-operating / non-recurring items	(18,241)	(3,373)	(28,576)	13,102
Adjusted for: Other notable items				
<i>Prior-year reserves developments related to non-life insurance contracts</i>	-	-	-	(1,700)
<i>Revision of non-economic assumptions related to health insurance contracts</i>	-	-	25,230	-
Total other notable items	-	-	25,230	(1,700)
Adjusted operating profit before tax	50,155	11,599	44,668	26,214

* Gain on disposal of subsidiaries and investment property includes a gain on disposal of the Issuer's subsidiary Ethniki Insurance (Cyprus) Limited of €26,327 thousand (2024: nil) and a gain on disposal of investment property of €801 thousand (2024: € 7,055 thousand). For the six-month period ended 30 June 2026, realised gain from sales of investment property amounted to €21,709 thousand.

Investment portfolio return

In 2025, the investment portfolio return improved to 2.93 per cent. from 2.70 per cent. in 2024, while for the twelve-month period ended 30 June 2026, the investment yield remained solid despite persistent uncertainty in financial markets. The table below shows the investment portfolio return for the years ended 31 December 2025 and 31 December 2024 and for the twelve-month period ended 30 June 2026.

	For the twelve-month period ended	For the year ended	
Investment portfolio return	30 June 2026	31 December 2025	31 December 2024
<i>Amounts in € '000 (unless otherwise specified)</i>			
Investment income	76,905	82,439	76,976
Investment portfolio	2,815,691	2,760,270	2,863,866
Average investment portfolio	2,787,981	2,812,068	2,846,874
Investment portfolio return	2.76%	2.93%	2.70%

Return on capital employed ("ROCE")

In 2025, the ROCE significantly improved to 8.4 per cent. from 4.6 per cent. in 2024. Similarly, the ROCE for the twelve-month period ended 30 June 2026 further improved to 15.5 per cent., supported by a strong underwriting result. The table below shows the ROCE for the years ended 31 December 2025 and 31 December 2024 and for the twelve-month period ended 30 June 2026.

	For the twelve-month period ended	For the year ended	
ROCE	30 June 2026	31 December 2025	31 December 2024
<i>Amounts in € '000 (unless otherwise specified)</i>			
Adjusted operating profit before interest and tax	83,224	44,668	26,214
Shareholders' equity	379,014	341,444	373,365
Subordinated loans (external debt) – nominal amounts	175,000	175,000	175,000
Total capital employed	554,014	516,444	548,365
Average total capital employed	535,229	532,405	571,963
ROCE	15.5%	8.4%	4.6%

Return on equity ("ROE")

In 2025, the ROE significantly improved to 9.6 per cent. from 2.2 per cent. in 2024. Similarly, the ROE saw a solid increase to 17.5 per cent. for the twelve-month period ended 30 June 2026, reflecting the increase in the Issuer's underwriting results. The table below shows the ROE for the years ended 31 December 2025 and 31 December 2024 and for the twelve-month period ended 30 June 2026.

	For the twelve-month period ended	For the year ended	
ROE	30 June 2026	31 December 2025	31 December 2024
<i>Amounts in € '000 (unless otherwise specified)</i>			
Adjusted operating profit after tax	62,946	34,367	8,652
Shareholders' equity	379,014	341,444	373,365
Average shareholders' equity	360,229	357,405	396,963
ROE	17.5%	9.6%	2.2%

Stock of future profit

Stock of future profit increased from €673.0 million in 2024 to €682.2 million in 2025. Stock of future profit remained strong for the six-month period ended 30 June 2026, providing visibility on future earnings generation. The table below shows the stock of future profit for the years ended 31 December 2025 and 31 December 2024 and for the six-month period ended 30 June 2026.

Stock of future profit <i>Amounts in € '000</i>	For the six-month period ended	For the year ended	
	30 June 2026	31 December 2025	31 December 2024
Contractual Service Margin	572,618	587,093	579,732
<i>Life Risk & Savings portfolio</i>	<i>538,443</i>	<i>556,722</i>	<i>558,729</i>
<i>Direct Participating portfolio</i>	<i>34,175</i>	<i>30,371</i>	<i>21,003</i>
Risk Adjustment, excluding risk adjustment of liability of incurred claims	95,714	95,121	93,284
<i>Life Risk & Savings portfolio</i>	<i>94,686</i>	<i>94,186</i>	<i>92,673</i>
<i>Direct Participating portfolio</i>	<i>1,028</i>	<i>935</i>	<i>611</i>
Stock of future profit	668,332	682,214	673,016

Combined ratio

The combined ratio increased from 95.8 per cent. in 2024 to 99.3 per cent. in 2025, mainly attributable to prior year favourable insurance reserves movements in the property portfolio which did not repeat in 2025. The 7.9 percentage point improvement in the six-month period ended 30 June 2026 compared with the corresponding period in 2025 was primarily driven by the strong underwriting performance of the Health portfolios, supported by higher revenue and a favourable claims experience. The table below shows the combined ratio for the years ended 31 December 2025 and 31 December 2024 and for the six-month periods ended 30 June 2026 and 30 June 2025.

Combined ratio <i>Amounts in € '000 (unless otherwise specified)</i>	For the six-month period ended		For the year ended	
	30 June 2026	30 June 2025	31 December 2025	31 December 2024
<i>Claims and benefits paid, net of reinsurance minus Commissions contingent on claims</i>	<i>99,334</i>	<i>91,780</i>	<i>184,668</i>	<i>155,245</i>
<i>Insurance revenue, net of reinsurance plus ordinary commissions from reinsurers</i>	<i>196,764</i>	<i>168,144</i>	<i>343,110</i>	<i>306,452</i>
Loss ratio	50.5%	54.6%	53.8%	50.7%

Expense rate

The expense rate decreased from 14.8 per cent. in 2024 to 13.4 per cent. in 2025. The table below shows the expense rate for the years ended 31 December 2025 and 31 December 2024 and for the six-month periods ended 30 June 2026 and 30 June 2025. In line with its results for the year ended 31 December 2025, the Issuer has continued to demonstrate disciplined cost management and operational efficiency in the six-month period ended 30 June 2026.

Expense rate <i>Amounts in € '000 (unless otherwise specified)</i>	For the six-month period ended		For the year ended	
	30 June 2026	30 June 2025	31 December 2025	31 December 2024

Gross written premiums	423,692	394,284	834,616	850,289
Expense rate (%)	13.1%	14.6%	13.4%	14.8%

Segments

The Issuer presents its operating performance across Life and Health and Non-Life activities. The Issuer's principal business segments are: Life; Health; Motor; and Property and Other Non-Life.

Life

The Issuer's Life business includes new-book and closed-book life products. In 2025, Life gross written premiums amounted to €232.0 million, compared with €297.9 million in 2024, a decrease primarily attributable to lower production of single-premium unit-linked products, which fell by €73.6 million. This change was closely related to the change in the Issuer's shareholding structure and its integration into the Piraeus group, which influenced the performance of the bancassurance channel during the transition period. Despite revenue pressure, the Life segment profit before tax increased to €29.1 million in 2025 from €22.4 million in 2024, and the adjusted operating margin improved to 8.4 per cent from 7.8 per cent. in 2024. In the first six months of 2026, Life gross written premiums amounted to €107 million and the adjusted operating margin improved to 10.9 per cent.

Health

The Issuer's Health business comprises new-book and closed-book health products. In 2025, Health gross written premiums increased by 8.5 per cent. to €350.0 million, with the new portfolio increasing

by 14.3 per cent. and the legacy portfolio increasing by 1.6 per cent. The Health segment's adjusted operating result returned to positive levels at €8.6 million, driven primarily by the performance of the closed-book portfolio and targeted loss-management initiatives. In the first six months of 2026, Health gross written premiums amounted to €202 million and the adjusted operating profit amounted to €25.5 million.

Motor

In 2025, the Motor insurance business delivered gross written premiums of €79.9 million, an increase of 15.4 per cent. compared with €69.2 million in 2024. This growth was driven by expansion of the insured fleet and the Issuer's customer-retention strategy, achieved despite a highly competitive market landscape. Profit before tax in the Motor segment increased to €12.1 million and the segment reported a loss ratio of 52.4 per cent, rising only modestly by 0.8 per cent. compared with 2024. This resilience reflects the Issuer's robust underwriting discipline, effectively absorbing claim-cost inflation. In the first six months of 2026, Motor gross written premiums amounted to €43.8 million, the profit before tax for the Motor portfolio was €6 million and the related loss ratio was 57.1 per cent.

Property and Other Non-Life

In 2025, Property gross written premiums increased by 5.2 per cent. to €120.2 million and Other Non-Life gross written premiums increased by 13.5 per cent. to €52.4 million. The Property segment recorded adjusted operating profit of €7.8 million and a very low loss ratio of 0.4 per cent. in 2025, reflecting portfolio quality and underwriting discipline. In the first six months of 2026, Property gross written premiums amounted to €44.6 million and Other Non-Life gross written premiums amounted to €26.5 million. The Property segment recorded a loss ratio of 8.2 per cent.

Total investment portfolio

The Issuer maintains a conservative, fixed income-oriented investment portfolio, the composition of which is designed to back its long-term insurance and investment contract liabilities under an asset-liability management framework. As at 31 December 2025, the Issuer's total investment portfolio (excluding investment in unit-linked products) amounted to €2,781 million (2024: €2,898 million), of which €2,265 million (2024: €2,357 million) related to debt securities. As at 30 June 2026, the Issuer's total investment portfolio (excluding investment in unit-linked products) amounted to €2,836 million, of which €2,307 million related to debt securities. The table below shows the historical composition of the Issuer's total investment portfolio.

Total investment portfolio <i>Amounts in € '000 (unless otherwise specified)</i>	As at 30 June 2026	Percentage of total investment portfolio	As at 31 December 2025	Percentage of total investment portfolio	As at 31 December 2024	Percentage of total investment portfolio
Debt securities	2,307,073	81.3%	2,265,228	81.5%	2,357,309	81.3%
Equity securities	41,450	1.5%	40,467	1.5%	34,074	1.2%
Mutual funds	283,800	10.0%	301,136	10.8%	328,134	11.3%
Private investment funds	129,543	4.6%	115,945	4.2%	103,765	3.6%
Loans and direct private credit	10,090	0.4%	20,493	0.7%	21,286	0.7%
Investment property	10,375	0.4%	10,545	0.4%	23,506	0.8%
Cash and term deposits	53,825	1.9%	27,284	1.0%	29,851	1.0%
Totals	2,836,156	100%	2,781,098	100%	2,897,925	100%

The quality of the income base is supported by the portfolio's credit profile, with €2,148 million as at 31 December 2025 (31 December 2024: €2,193 million) out of the total €2,265 million (2024: €2,357 million), a proportion of 95 per cent. (2024: 93% per cent.), of debt securities rated investment grade

(AAA–BBB). As at 30 June 2026, debt securities rated investment grade (AAA–BBB) amounted to €2,213 million out of the total of €2,307 million, a proportion of 96 per cent.

Consistent with its investment strategy, fixed income instruments (government and corporate bonds) represent the substantial majority of the portfolio amounting to 81 per cent. of the total value of the investment portfolio as at 31 December 2025 (2024: 81 per cent.). Government bonds made up €1,778 million of the debt securities in the Issuer's investment portfolio as at 31 December 2025 (2024: €1,850 million). The portfolio of government bonds is largely made up of foreign sovereign debt (€1,697 million as at 31 December 2025 (2024: €1,761 million)), with Greek government bonds accounting for €82 million as at 31 December 2025 (2024: €89 million), reflecting a diversified sovereign portfolio. As at 30 June 2026, the investment portfolio structure remained unchanged with fixed income instruments representing 81 per cent. of the total. Government bonds made up €1,843 million of the debt securities in the Issuer's investment portfolio, consisting mainly of foreign sovereign debt (€1,762 million) and Greek government bonds (€82 million).

The Issuer's government bond exposure is categorised into 'core' countries (which made up 71 per cent. of the portfolio as at 31 December 2025 (2024: 69 per cent.)) and 'periphery' countries (which made up 29 per cent. of the portfolio as at 31 December 2025 (2024: 31 per cent.)). As at 30 June 2026, 72 per cent. of the Issuer's government bond portfolio was invested in core countries, while the remaining 28 per cent. was invested in periphery countries. Core countries consist of Germany, France, the Netherlands, Belgium, Finland, Austria, the USA, and supranational organisations (such as the EU), the European Financial Stability Facility, the European Stability Mechanism and the International Bank for Reconstruction and Development). Periphery countries comprise Spain, Greece, Italy, Portugal, Cyprus, Ireland, and Romania.

Risk management

Framework and systems

Risk management is key to the Issuer's operations, to ensuring customer satisfaction and in providing a stable foundation for generating quality returns for its shareholder. Accordingly, the Issuer has a comprehensive risk management system supported by an appropriate governance framework and risk culture that aims to prevent or reduce potential losses.

The Issuer's risk management system has several elements, including a risk management strategy that outlines its risk appetite; risk management policies and reporting processes implemented in line with the overall risk strategy; and an ORSA process to evaluate and ensure its solvency on an ongoing basis.

The risk management governance framework has several key stakeholders. The Board of Directors of the Issuer (the "**Board**") defines the Issuer's risk appetite and approves the risk management strategy and policies and the Issuer's overall risk tolerance levels. The Board Risk Committee supports the Board to develop a suitable risk management system and supervises and provides guidance to ensure its effective implementation. The Risk Management Division supports the establishment and operation of an efficient risk management system. The risk management governance framework is complemented by other committees, such as the Asset - Liability Committee, which is responsible for managing individual risks.

This risk management system is ultimately supported by an appropriate risk culture, namely a strong and consistent culture of adhering to regulations, applying sound business practices, and integrating risk management across all operations and management levels.

Risk profile

The Issuer continuously evaluates the broader economic environment, ensuring that timely and appropriate measures are implemented to mitigate emerging risks effectively. The Issuer has identified a number of major risks to which it may be exposed, which are classified in the following categories:

- **Insurance risk:** the risk for profits and capital arising from losses or adverse changes in the value of insurance liabilities, due to unsuitable assumptions in pricing and reserving. Exposure to insurance risk is mitigated by implementing appropriate underwriting and reserving policies and procedures, as well as concluding reinsurance agreements with creditworthy reinsurers.
- **Market risk:** the risk for profits and capital arising from fluctuations in the level and in the volatility of market prices of assets or liabilities. The Issuer manages market risk by establishing limits to ensure a well-diversified investment portfolio, monitoring key risk metrics like 'value at risk' to enable prompt corrective actions, and employing hedging strategies when necessary.
- **Credit risk:** the risk for profits and capital arising from fluctuations in the credit standing of counterparties and debtors to whom the Issuer is exposed or the failure of counterparties and debtors to fulfil agreed terms. The Issuer manages credit risk by setting up and regularly monitoring time and money limits for the collection of premiums and other receivables and entering into transactions with counterparties who fulfil high standards of creditworthiness.
- **Liquidity risk:** the risk for profits and capital arising from the inability of the Issuer to fulfil its obligations when they become due. The Issuer manages liquidity risk by regularly monitoring its cash position and forecasted short-term liquidity needs, setting up and monitoring limits to enable prompt corrective actions and maintaining a buffer of high-quality liquid assets that can be readily converted into cash at no or very low cost.
- **Operational risk:** the risk for profits and capital arising from inadequate or inappropriate internal processes, operating systems or human resources or from external factors. The Issuer has established an effective operational risk management framework, including appropriate risk tolerance limits, to prevent operational risk, where possible, and to detect, assess and manage operational risks.
- **Asset-liability mismatch risk:** the risk for profits and capital arising from mismatches between the Issuer's assets and its liabilities, as well as off-balance sheet items. The mismatch may concern the levels and the time structure of the asset and liability cash flows. The Issuer manages asset-liability mismatch risk by establishing acceptable mismatch levels and monitoring procedures to allow appropriate rebalancing of its investment portfolio.
- **Concentration risk:** the risk for profits and capital arising from a significant concentration of assets or insurance liabilities in individual items, counterparties or sectors. The Issuer manages this risk by aiming to have a diversified insurance portfolio, implementing associated limits in its investment portfolio and limiting exposures to other individual counterparties.
- **Sustainability risk:** the risk for profits and capital arising from events or circumstances in the environmental or social field, or in the Issuer's governance which, if they materialise, could have a material adverse effect. The Issuer recognises the significance of sustainability risks and is committed to operating in a socially responsible manner, as is evidenced by its overall risk appetite statements. It recognises the impact environmental issues can have on its insurance portfolio, but also on its operations. It has consequently integrated environmental, social and governance ("ESG") aspects into its wider risk management framework, to effectively manage relevant exposures.

- **Other risks:** in particular, reputational risk and strategic risk that are managed through cautious strategic planning, embedding risk management in its daily operations, the development of a sound risk culture and continuous monitoring.

The Issuer's most material quantified risks, as reflected in the composition of its SCR as at 31 December 2025, are market risk (principally driven by movements in credit spreads and fluctuations in the equity market) and health underwriting risk. The health underwriting risk is primarily associated with a portfolio of mature hospital products that are no longer actively marketed and are subject to specific premium adjustment features. Market risk accounts for the largest share of the SCR before diversification, reflecting the composition and duration profile of the Issuer's investment portfolio.

See "*Risk Factors*" for further details.

Capital position and solvency

The terms of the Notes provide for the deferral of (a) scheduled interest payments and (b) repayment of the principal amount of the Notes including (without limitation) upon breach of the SCR and/or MCR of the Issuer and/or Ethniki Holdings. Information on the capital position and solvency position of both the Issuer and Ethniki Holdings is therefore set out below.

Solvency II Directive

The Issuer is subject to the Solvency II regulatory framework. The Issuer monitors its capital requirement under Solvency II by examining its SCR and MCR in relation to solvency boundaries set internally and externally by European and national regulatory frameworks.

Through its capital management, the Issuer aims to optimise the balance between risk and return while properly ensuring its capital adequacy. The Issuer's Capital Management Policy establishes capital adequacy limits on the Solvency II ratio, specifying actions that may be taken to restore the ratio to desired levels. As at the date of this Offering Circular, the SCR is monitored monthly using approximation methods, with a full analytical calculation performed quarterly and submitted to the BoG on a private basis.

To determine capital adequacy, the Issuer assesses the classification of own funds by examining whether they meet the supervisory framework criteria for each tier of own funds and by applying the relevant quantitative limits for eligibility. Its risk management procedures measure risks by taking into account the relevant provisions of Solvency II.

Issuer's ratio of total eligible own funds to SCR (Solvency II ratio)

As at 31 December 2025, the Issuer's total available own funds amounted to €654.6 million, of which €520.6 million were eligible to meet the SCR after the application of regulatory tiering limits. The resulting Solvency II ratio, taking into account transitional measures (see section "*Impact of transitional measures and volatility adjustment*" below), was 177 per cent., compared with 188 per cent. as at 31 December 2024.

The change in the Solvency II ratio in 2025 was driven principally by a €38.7 million reduction in eligible own funds, partially offset by a €2.8 million decrease in capital requirements:

- (a) eligible own funds decreased primarily due to factors including investment asset movements, real estate revaluation, updated actuarial assumptions, amortisation of transitional measures and regulatory eligibility considerations; and

- (b) the decrease in capital requirements reflected movements in all SCR components (market risk, underwriting risk, credit risk, diversification and operational risk) and the effect of diversification.

Minimum capital requirements

As at 31 December 2025, the Issuer's MCR was €107.3 million, a slight reduction from the MCR of €107.5 million for the year ended 31 December 2024, and represented 36 per cent. of the Issuer's SCR. As at 30 June 2026, the Issuer's MCR was €110.1 million representing 37 per cent. of the Issuer's SCR.

Summary of the Issuer's solvency ratios

In € thousands	30 June 2026	31 December 2025	31 December 2024
Total eligible own funds to meet the SCR	487,637	520,586	559,274
SCR	300,556	294,086	296,853
Ratio of total eligible own funds to SCR	162%	177%	188%
Eligible own funds to meet the MCR	359,370	395,006	432,341
MCR	110,055	107,319	107,467
Ratio of eligible own funds to MCR	327%	368%	402%

Assuming: (i) the Notes were in issue as at 30 June 2026 with an issuance size of €100,000,000; (ii) the New Tier 2 Notes (as defined below) were in issue as at 30 June 2026 with an issuance size of €100,000,000; and (iii) each of the Existing Tier 2 Instrument and the Existing RT1 Instrument (each as defined below) had been redeemed and cancelled prior to 30 June 2026 (collectively, the "**New Issuances and Redemptions**"), the Issuer's ratio of total eligible own funds to its SCR as at 30 June 2026 would have been approximately 190 per cent. The New Issuances and Redemptions, once completed, are currently expected to have a commensurately positive impact on Ethniki Holdings' ratio of eligible own funds to its SCR. For information on Ethniki Holdings' ratio of eligible own funds to its SCR as at 31 December 2025 and 31 December 2024, see "*Capital position and solvency – Ethniki Holdings*" below.

Composition of own funds to meet the SCR

The composition of eligible own funds to meet the SCR by tier is set out below:

	30 June 2026	31 December 2025	31 December 2024
In € thousands			
Tier 1 – Unrestricted	337,359	323,515	360,818
Tier 1 – Restricted*	-	50,028	50,029
Tier 2*	127,076	127,099	127,099
Tier 3	23,202	19,944	21,328
Total eligible own funds to meet SCR	487,637	520,586	559,274

* As at the date of this Offering Circular: (i) the Issuer's subordinated bond loan of infinite duration amounting to €50.0 million with NBG (the "**Existing RT1 Instrument**") has been redeemed and cancelled and, accordingly does not count towards the Issuer's eligible own funds to meet the SCR; and (ii) the Issuer has applied to the BoG for permission to redeem its 10-year subordinated bond loan amounting to €125.0 million with NBG (the "**Existing Tier 2 Instrument**").

As at 31 December 2025:

- Tier 1 unrestricted own funds were composed principally of paid-up share capital (€235.2 million), share premium (€33.5 million), the reconciliation reserve (€54.8 million) and subordinated liabilities in the form of the Existing RT1 Instrument;
- Tier 2 own funds comprised the Existing Tier 2 Instrument; and
- Tier 3 own funds reflected net deferred tax assets of €154.0 million, of which only €19.9 million are eligible to meet the SCR under Solvency II quantitative limits.

SCR composition by risk module

The Issuer calculates its SCR using the Solvency II standard formula. As at 31 December 2025, the principal risk modules contributing to the SCR, before diversification benefit, were market risk (32 per cent.), health underwriting risk (23 per cent.), non-life underwriting risk (18 per cent.) and life underwriting risk (17 per cent.). The quantitative breakdown of the SCR by risk module as at 31 December 2024 and 31 December 2025 is set out below:

In € thousands	31 December 2025	31 December 2024	Movement
Market risk	145,224	147,470	-2,246
Counterparty risk	17,335	23,602	-6,267
Life underwriting risk	75,474	67,915	+7,559
Health underwriting risk	103,342	110,693	-7,351
Non-Life underwriting risk	79,627	69,177	+10,450
Diversification benefit	(154,616)	(151,527)	-3,089
Basic SCR	266,387	267,330	-943
Operational risk	27,699	29,523	-1,824
SCR	294,086	296,853	-2,767

Reduction in capital requirements

For the 2025 financial year, the Issuer's €2.8 million reduction in capital requirements was primarily driven by the following:

	2025 movement	Description
In € million, except where indicated		
Market risk	(2.2)	Decrease primarily attributable to a decline in equity and property risk, partially offset by an increase in interest rate risk.
Non-Life underwriting risk	10.4	Increase resulting from an increase in catastrophe risk.
Life underwriting risk	7.6	Increase mainly due to a significant increase in lapse risk.
Health underwriting risk	(7.4)	Decrease as a result of higher discount rates.
Counterparty risk	(6.3)	Decrease mainly due to the reduction of receivables from reinsurers and other receivables.
Diversification	(3.1)	Decrease due to diversification effects.
Operational risk	(1.8)	Decrease due to operational risk movement.

Sensitivity of solvency ratio

The following table sets out the Issuer's estimated sensitivity of its SCR coverage ratio to certain market risk scenarios as at 31 December 2025, calculated using transitional measures:

Scenario	Impact on SCR coverage ratio – positive scenario	Impact on SCR coverage ratio – negative scenario
Interest rates: 50 bps movement	+4 percentage points (to 181%)	-7 percentage points (to 170%)
Credit spreads: 50 bps movement	+32 percentage points (to 209%)	-30 percentage points (to 147%)
Equity prices: 25 bps movement	+4 percentage points (to 181%)	-5 percentage points (to 172%)
Property values: 25 bps movement	+12 percentage points (to 189%)	-13 percentage points (to 164%)

Impact of transitional measures and volatility adjustment

The Issuer applies a transitional measure on technical provisions, in accordance with the provisions of Article 275 of Greek Law 4364/2016, relating to the closed-book health portfolio. The transitional measure was set at €205.8 million in 2016 and is being amortised linearly over a 16-year period. As at 31 December 2025, the unamortised value of the transitional measure was €90.0 million (which will amount to €77.2 million as of 31 December 2026).

Without the application of the transitional measure on technical provisions, the SCR coverage ratio would have been 146 per cent. as at 31 December 2025 (compared with 154 per cent. as at 31 December 2024). Without the application of the transitional measure on technical provisions, the SCR coverage ratio would have been 137 per cent. as at 30 June 2026.

Ethniki Holdings

Ethniki Holdings, the parent company of the Issuer, is the ultimate insurance holding company of a prudential group comprising Ethniki Holdings and the Issuer. Accordingly, Ethniki Holdings has its own consolidated solvency capital requirements.

A summary of the key solvency and capital information relating to Ethniki Holdings is set out below:

	31 December 2025	31 December 2024
In € thousands		
Total eligible own funds to meet the SCR	528,443	509,190
SCR	294,715	314,623
Ratio of total eligible own funds to SCR	179%	162%
Eligible own funds to meet the MCR	402,549	373,372
MCR	107,319	107,467
Ratio of eligible own funds to MCR	375%	347%

The composition of Ethniki Holdings' eligible own funds to meet its SCR by tier is set out below:

	31 December 2025	31 December 2024
In € thousands		
Tier 1*	381,085	351,878
Tier 2*	128,849	129,099
Tier 3	18,509	28,212
Total eligible own funds to meet SCR	528,443	509,190

* As at the date of this Offering Circular: (i) the Issuer's Existing RT1 Instrument has been redeemed and cancelled and, accordingly does not count towards Ethniki Holdings' eligible own funds to meet the SCR; and (ii) the Issuer has applied to the BoG for permission to redeem the Existing Tier 2 Instrument.

Regulation

The Issuer and its subsidiaries conduct insurance business in Greece and are subject to the Greek and EU regulatory framework applicable to insurers.

Generally, insurers in Greece are not permitted to carry on both life and non-life activities under a single licence. Nevertheless, pursuant to Article 48(5) of Greek Law 4364/2016, the Issuer, as an undertaking licensed before 1 January 1981, is permitted to carry on both life and non-life insurance business under its existing composite authorisation.

Regulatory Framework - EU and Greek regulations

Solvency II framework

The EU insurance framework establishes risk-based capital and solvency requirements principally under the Solvency II Directive. Implementing measures are set out in Commission Delegated Regulation (EU) 2015/35, as amended, which is directly applicable in each Member State. The main aim of the Solvency II framework is to ensure the financial stability of the insurance industry across the EU and to protect policyholders by establishing solvency requirements better matched to the true risks of the business. The Solvency II framework adopts a three-pillar approach: (i) quantitative requirements (Pillar 1), including requirements to hold own funds equal to or in excess of an SCR and an MCR; (ii) qualitative requirements (Pillar 2), covering effective governance systems proportionate to the business, risk management functions, internal controls, actuarial functions, compliance functions, ORSA and control over outsourcing arrangements; and (iii) supervisory reporting and public disclosure requirements (Pillar 3). Under the Solvency II framework, basic own funds are derived from the solvency balance sheet in which assets and liabilities are valued on an economic basis, and are categorised into three tiers with differing qualifications as eligible regulatory capital. Moreover, a single passport principle applies whereby a licence from a competent authority in a Member State is valid throughout the EEA.

Greek Law 4364/2016, as amended and in force, transposed Solvency II Directive into Greek law (the "**Greek Insurance Regulation Law**"). The Greek Insurance Regulation Law has been in force since 1 January 2016 and governs the taking-up and pursuit of direct insurance and reinsurance activities in Greece, the supervision of insurance and reinsurance groups, and the reorganisation and winding-up of insurance undertakings. It sets forth capital adequacy and solvency requirements, defines classes of insurance business, and establishes the framework for the corporate governance of insurance undertakings. It also establishes the framework for the special liquidation of insurers, including licence revocation, the appointment of an insurance liquidator and the ranking of claims against an insolvent insurer.

Bank of Greece prudential supervision

Under the Greek Insurance Regulation Law, the BoG is the competent supervisory authority for the insurance sector in Greece.

The BoG exercises prudential supervision of Greek insurance undertakings through its Occupational and Private Insurance Supervision Directorate. As the competent supervisory authority, the BoG is responsible for: (i) granting and revoking the authorisations of insurance and reinsurance undertakings, including the expansion into additional classes of the insurance business; (ii) ongoing prudential

supervision of insurance undertakings, including monitoring compliance with the requirements of Solvency II in respect of capital adequacy, systems of governance, risk management and regulatory reporting; (iii) monitoring compliance with applicable Greek and EU legislation, including conduct-of-business rules and obligations relating to the prevention of money laundering and the countering of the financing of terrorism; and (iv) imposing administrative measures and sanctions where infringements are identified. In addition, the BoG cooperates with EIOPA, and with the competent supervisory authorities of other EU Member States, in the context of cross-border business or the provision of services under the freedom to provide services.

The regular and effective supervision exercised by the BoG over the solvency of insurance and reinsurance undertakings is based on a comprehensive framework of reporting obligations imposed on the supervised entities. In this context, undertakings are required to submit to the BoG, *inter alia*, an annual solvency and financial condition report; a regular supervisory report; an ORSA supervisory report; and quantitative supervisory reports on their basic own funds, the SCR and the MCR on both a quarterly and annual basis with varying levels of detail, in accordance with the Solvency II reporting framework. These documents are submitted to the BoG on a private and confidential basis, other than the annual solvency and financial condition report, which is published. Furthermore, insurance and reinsurance undertakings may be subject to additional regular or ad-hoc reporting requirements depending on their business activities and the covered classes of insurance they underwrite.

The BoG has supervisory power to take preventive and corrective measures where it identifies risks to the solvency position, financial condition, governance standards or risk profile of an insurance undertaking. Such measures may include requiring the undertaking to strengthen its own funds, restricting or prohibiting certain business activities, requiring changes to the undertaking's risk profile or governance arrangements, restricting the free disposal of assets and, where applicable, restricting distributions or payments on own funds items.

Qualifying holdings and fit and proper supervision

Acquisitions or disposals of a 'qualifying holding' (i.e. a direct or indirect holding of at least 10 per cent. of share capital or voting rights, or any other possibility of exercising significant influence over management) require prior BoG approval under Article 43 of the Greek Insurance Regulation Law. It is also necessary to obtain the approval of the BoG for any subsequent acquisition of shares in an insurance company exceeding (or which may result in the total holding of the same person to exceed) one-fifth, one-third or half of the share capital or voting rights in, or the acquisition of direct or indirect control of, the insurance company. The BoG assesses the proposed acquirer evaluating, *inter alia*, the suitability ('fit and proper' test) of the proposed acquirer, financial soundness, transparency of the corporate/group structure, money laundering and terrorist financing risks, and the implications for the solvency and governance system of the insurance undertaking.

Senior managers and board members of insurance undertakings must satisfy fit and proper requirements under Article 31 of the Greek Insurance Regulation Law, demonstrating adequate skills, knowledge, and experience commensurate to the size, nature and complexity of the undertaking's operations, as well as good reputation and integrity. Insurance undertakings are required to maintain procedures for (i) the pre-selection, assessment and approval of new board members and key function holders, (ii) the ongoing fit and proper assessment of such persons, and (iii) immediate notification to the supervisory authority in case of changes or identified deficiencies in the suitability of such persons.

Capital adequacy supervision

The Solvency II framework, as transposed by the Greek Insurance Regulation Law, establishes a graduated supervisory response to capital adequacy deterioration. Where the Issuer's eligible own funds fall below the SCR, the BoG must be notified immediately under Article 109 of the Greek Insurance Regulation Law. The Issuer must then, within two months, submit a realistic recovery plan to restore

coverage of the SCR within six months (extendable by up to three months in exceptional circumstances). During the period of non-compliance and in exceptional circumstances, the BoG may restrict or prohibit free disposal of the Issuer's assets and may restrict or prohibit distributions on own funds items, including, where applicable, payments on certain regulatory capital instruments (including the Notes).

A breach of the MCR triggers a more severe supervisory response. Under Article 110 of the Greek Insurance Regulation Law, the Issuer must immediately notify the BoG and, within one month, submit a short-term finance scheme. The BoG may restrict or prohibit free disposal of assets and, if it considers that the Issuer's financial position will deteriorate further, may take all measures necessary to safeguard policyholder interests, including restricting or suspending distributions on own funds instruments (such as the Notes). Failure to restore compliance with the MCR within the statutory period may lead to withdrawal of the Issuer's licence and the commencement of special liquidation under Articles 235 to 248 of the Greek Insurance Regulation Law. If special liquidation proceedings were commenced in respect of the Issuer, claims against the Issuer would be treated in accordance with the mandatory creditor hierarchy applicable to Greek insurance undertakings under the Greek Insurance Regulation Law.

Solvency II amendments

On 22 September 2021, the European Commission published a legislative proposal to amend the Solvency II Directive in relation to, among other things, capital requirements, valuation of insurance liabilities, cross-border supervision, and clarifications to the proportionality principle. The final text of the amended Solvency II Directive was adopted by the Council on 5 November 2024 and published in the EU's Official Journal on 8 January 2025 as Directive (EU) 2025/2. Member States must implement the Directive into national law by 29 January 2027. In addition, the IRRD was published on the same date, also requiring transposition into national law by 29 January 2027.

EU Insurance Recovery and Resolution Directive (IRRD)

The IRRD shifts the regulatory philosophy from *ex-post* management of insurer failure to *ex-ante* management of financial distress. It requires insurers representing at least 60 per cent. of the respective insurance market to engage in forward-looking recovery planning and submit pre-emptive recovery plans to national supervisory authorities. Member States must establish national insurance resolution authorities, either within existing authorities or as new self-standing legal entities, ensuring effective cross-border cooperation, with EIOPA having a coordinating role. Resolution authorities are equipped with resolution tools and procedures, including write-down and conversion of capital instruments, debt instruments and other eligible liabilities (applying first to equity instruments and Tier 1 instruments, then to Tier 2 instruments (such as the Notes) and then to other instruments with a higher ranking in liquidation), solvent run-offs, portfolio transfers and, in limited cases, bridge institutions, to ensure continuity of cover and policyholder protection without defaulting to liquidation. Certain liabilities are excluded from write-down and conversion tools to avoid adverse outcomes for policyholders. Normal insolvency proceedings remain the alternative path for insurers that cannot be resolved, and the IRRD provides for a no-creditor-worse-off principle (i.e. that no creditor should be in a worse position through use of the tools provided under the IRRD than it would have been in the case of the insolvency of the relevant insurer).

Insurance Distribution Directive

The Insurance Distribution Directive has been transposed into Greek law by Greek Law 4583/2018, as amended, which regulates the distribution of insurance products by insurance intermediaries (such as the subsidiaries of the Issuer) and insurance undertakings when acting as insurance distributors. Compliance with Greek Law 4583/2018 is supervised by the BoG. The framework requires insurers to comply, among others, with information and disclosure requirements (including disclosure

requirements regarding remuneration, obliging insurers to disclose to their customers the nature of remuneration they receive) and certain conduct of business rules (including a general obligation to act honestly, fairly and professionally in accordance with customers' best interests). It also requires insurance distributors to establish and maintain appropriate policies and procedures for the approval, review and distribution of insurance products in accordance with the product oversight and governance requirements and the identified target market. In addition, the Insurance Distribution Directive sets out requirements relating to the remuneration of sales staff and conflicts of interest and introduces a mandatory product oversight and governance process for assessing the suitability of insurance products for customers. Greek Law 4583/2018 also establishes professional knowledge and competence requirements, including ongoing professional training obligations, for insurance distributors.

Consumer protection

In addition to the prudential supervision exercised by the BoG, certain consumer-protection authorities may have jurisdiction where an insurance undertaking deals with policyholders acting in their capacity as consumers. In particular, the Consumers' Ombudsman and the General Secretariat for Consumer Protection may exercise supervisory or enforcement powers within their respective fields of competence, with a view to safeguarding consumer rights, including in relation to transparency, the fairness of contractual terms and compliance with applicable consumer-protection legislation. The general consumer protection framework under Greek Law 2251/1994, as amended, also applies to insurance products offered to consumers, including the rules on unfair commercial practices and unfair terms in consumer contracts.

Insurance contracts are principally governed by Greek Law 2496/1997, which sets minimum standards governing the rights of insurers and insured parties, the content of insurance contracts, the pre-contractual and ongoing disclosure obligations of each party, the applicable timeframes and the rights to cancel or rescind. Greek Law 2496/1997 also contains mandatory provisions designed to protect policyholders, particularly in relation to pre-contractual disclosure, the insurer's duty to inform, the consequences of non-disclosure or misrepresentation, premium payment, termination of insurance contracts and claims handling.

Digital Operational Resilience Act (DORA)

Since 17 January 2025, insurance undertakings must comply with DORA, which establishes a directly applicable EU framework for digital operational resilience across the financial sector. DORA imposes requirements in relation to ICT risk management, incident handling and reporting, digital resilience testing, and ICT third-party risk management. DORA complements the existing outsourcing framework under the Greek Insurance Regulation Law in respect of critical or important functions, as well as cloud outsourcing requirements under BoG Executive Committee Act No. 180/3/17.12.2020, which adopted the EIOPA Guidelines on outsourcing to cloud service providers (EIOPA-BoS-20/002). Compliance with DORA by Greek insurance undertakings is subject to the supervisory oversight of the Bank of Greece.

Anti-Money Laundering and Counter-Terrorist Financing (AML/CFT)

The principal national legislation is Greek Law 4557/2018 (the "**Greek AML Law**"), which transposed Directive (EU) 2015/849 and was subsequently amended to transpose Directive (EU) 2018/843 and Directive (EU) 2018/1673. The Greek AML Law designates insurance undertakings and insurance intermediaries as obliged entities, requiring them to implement, appropriate internal policies, controls and procedures, conduct institution-wide risk assessments, risk-based customer due diligence (including identification of beneficial owners and beneficiaries prior to claims payment, where applicable), enhanced due diligence for higher-risk relationships, ongoing monitoring, record-keeping and suspicious transaction reporting to the competent anti-money laundering authority, while remaining subject to applicable supervisory oversight by the BoG.

General Data Protection Regulation (GDPR)

GDPR and Greek Law 4624/2019 apply to insurers in respect of personal data processed in the course of their business. Insurers routinely process special categories of data, including health data (such as medical history and diagnoses) for life and health insurance underwriting and claims, and are subject to obligations including transparency and fair processing, appointment of a data protection officer, technical and organisational measures, data processing agreements with service providers, and data breach notification to the Hellenic Data Protection Authority, which is the competent supervisory authority in Greece.

Sustainability-related legislation

The Issuer is subject to the EU and Greek sustainability framework applicable to insurance and reinsurance undertakings, including the CSRD, the implementation of which into Greek law was effected through amendments to Greek corporate legislation, including Greek Law 4548/2018, Commission Delegated Regulation (EU) 2023/2772 as regards sustainability reporting standards (commonly referred to as ESRS), Taxonomy Regulation and the SFDR. The SFDR and the Taxonomy Regulation impose sustainability-related disclosure obligations on market participants and financial advisers promoting investments which respect ESG criteria. In this context, a sustainability-related framework applies to insurance undertakings which make available insurance-based investment products or provide related advice.

As at the date of this Offering Circular, the Issuer and its subsidiaries are included in the consolidated sustainability report of Piraeus and rely on the applicable group reporting exemption under Article 154 of Greek Law 4548/2018, as amended. Accordingly, the Issuer does not prepare a standalone or consolidated sustainability report at company level, and the relevant sustainability and taxonomy disclosures are provided at Piraeus group level.

In addition, insurance undertakings are subject to Commission Delegated Regulation (EU) 2021/1257 relating to the integration of sustainability factors, risks and preferences into the product oversight and governance requirements as well as into the rules on conduct of business and investment advice for insurance-based investment products.

AI Act

The Issuer may be subject to the AI Act to the extent it deploys artificial intelligence systems. The AI Act classifies AI systems used in the evaluation of creditworthiness of natural persons or for risk assessment and pricing in the case of natural persons in the case of life and health insurance as high-risk AI systems under Article 6(2) and Annex III of the AI Act. Such classification may apply to AI systems used by the Issuer in underwriting, risk assessment or claims processing. Deployers of high-risk AI systems are subject to obligations under the AI Act relating to human oversight, transparency towards affected persons, data quality, risk management, conformity assessment, record-keeping and registration in the EU database. The obligations applicable to high-risk AI systems under the AI Act have applied since 2 August 2026 (with some exceptions where a later compliance date applies, such as certain AI systems which are components of the large-scale IT systems as described in Article 111(1) of the AI Act).

Directors, senior management, board committees and employees

Board

The current members of the Board are set forth below.

Name	Position	Outside activities
Georgios Kotsalos	Chairman, Independent non-executive member	Chairman of DOGUS Hellas; Board Member of EUREKO SIGORTA (Turkey); Member of the Hellenic-Dutch Association of Commerce and Industry; Member of the Hellenic Federation of Enterprises (SEV) and Foundation for Economic and Industrial Research (IOBE)
Dimitrios Mazarakis	Chief Executive Officer, Executive member	None
Georgios Georgopoulos	Non-executive member	Executive General Manager of Piraeus; Chief Human Resources and Group Change Officer; Member of Piraeus Group Executive Committee; Chairman of the Supervisory Board of JSC "PIRAEUS BANK ICB"; Chairman of the Board of Piraeus Bank Occupational Insurance Fund (TEA)
Theodoros Gnardellis	Non-executive member	Group Chief Financial Officer of Piraeus; Member of Piraeus Executive Committee
Vasileios Koutentakis	Non-executive member	Executive General Manager at Piraeus; Head of Retail Banking and Distribution Networks; Member of Piraeus Executive Committee; Executive Member of Piraeus Board of Directors Member of the Executive Committee of the Hellenic Banking Association; Vice-President of the INSEAD National Alumni Association of Greece
Triantafyllos Lysimachou	Independent non-executive member	President of Piraeus Insurance Agency; Board Member of multiple companies including European Reliance S.A., Orizon S.A., Atlantic Insurance Cyprus, ING-Piraeus Life Insurance, and Hellenic Shipyards SA; Chairman of Marine Insurance Committee; Secretary General of the Hellenic Institute of Insurance Studies; Chairman of Greek Cyprus Committee LIMRA; Member of Labor and Insurance Committee of American-Hellenic Chamber of Commerce; Postgraduate studies in Operational Research, Statistics and Computers from University of London (UCL) and University of Paris (VI); Research Associate at National Technical University of Athens and Athens University of Economics and Business

Charalambos Margaritis	Non-executive member	Executive General Manager and Group Chief Operating Officer of Piraeus; Member of Piraeus Group Executive Committee; Member of Executive Committee, ESG & Corporate Responsibility Committee, Operational Risk Committee (ORCO), and Transformation Committee for Piraeus; Vice Chairman and Non-Executive Board Member of Intrum Group companies in Greece; Board Member of Piraeus Group Cultural Foundation
Charalambos Mylonas	Independent non-executive member	None
Despina Xenaki	Independent non-executive member	Chairwoman of Aegean Baltic Bank Audit Committee; Non-Executive Member of Aegean Baltic Bank Board of Directors

The business address of the persons mentioned above is 103-105 Syngrou Avenue, 11745 Athens, Greece.

To the best of the Issuer's knowledge, there are no potential conflicts of interest between any of the directors' duties to the Issuer and their private interests or duties.

Senior management

As at the date of this Offering Circular, the following persons comprise the Issuer's senior management team.

Name	Position
Dimitrios Mazarakis	Chief Executive Officer
Efstratios Petrou	Chief Financial Officer
Giorgos Zervoudakis	Chief Commercial Officer
Michel Montbertrand	Head of Compliance and Corporate Governance
Achilleas Sdarakas	Chief Customer Experience Officer
Dallia Tombrou	Chief Human Resources Officer
Irene Halkiadaki	Chief Marketing and Corporate Communications Officer
Petros Tsonis	Chief Technology Officer
Dimitris Malaxianakis	Head of Development and Analysis Division
Artemis Pasiphae Karageorgaki	Head of Legal Services Division
Alexandros Serbetis	Chief Health Officer
Apostolos Ailamakis	Chief Strategy and Transformation Officer

The business address of the persons mentioned above is 103-105 Syngrou Avenue, 11745 Athens, Greece.

To the best of the Issuer's knowledge, there are no potential conflicts of interest between any of the duties of the members of the senior management team to the Issuer and their private interests or duties.

Board committees

As at the date of this report, the following committees are operated by the Issuer. The Risk Committee, the Audit Committee and the Remuneration and Nominations Committee are Board committees. ALCO (as defined below) is not a formal committee of the Board.

Risk Committee

The Risk Committee consists of three non-executive Board members, two of which are independent non-executive members. An independent non-executive member is appointed Chair of the committee. The Chair and the members of the Risk Committee are appointed by the Board and possess adequate knowledge and experience in risk management.

Key committee objectives include:

- The development of a comprehensive risk appetite and capital management strategy, which will cover all risk types, aligned with the Issuer's business strategy, and corresponding to the adequacy of available technical and human resources.
- The development of an appropriate risk management framework that will encompass strategies, policies, procedures, methods, systems, and reports, and will ensure that efficient mechanisms are in place to identify, assess and effectively manage risks of any type that result from the operations of the Issuer and its subsidiaries.
- The cultivation of a risk management culture across the Issuer and its subsidiaries.
- Aligning and coordinating all subsidiaries with the requirements of the Issuer's risk management framework.

Audit Committee

The Audit Committee is responsible for overseeing the integrity of the Issuer's financial reporting by reviewing financial statements, accounting policies, significant judgments, estimates, disclosures, and compliance with applicable accounting standards. In parallel, this committee is responsible for managing the external audit function by recommending the appointment, reappointment, or removal of external auditors, approving audit fees and engagement terms, assessing auditor independence and effectiveness, and reviewing audit findings and management's responses. Additionally, the Audit Committee supervises the Issuer's internal audit function by monitoring its effectiveness and reviewing its plans, scope, resources, reports, and follow-up actions, while ensuring the adequacy and effectiveness of internal control systems and overseeing risk management frameworks and fraud prevention measures. The Audit Committee also monitors compliance with laws, regulations, internal policies, ethical conduct, conflicts of interest, and whistleblower mechanisms and reports its activities, findings, and recommendations to the Board.

Remuneration and Nominations Committee

The Remuneration and Nominations Committee supports the Board in overseeing executive pay and Board composition. The remuneration part of the committee sets and reviews executive and senior management pay, including salary, bonuses, incentives, pensions, and severance and ensures rewards align with strategy, performance, and shareholder interests, while overseeing incentive schemes, ensuring compliance with relevant regulations, and reporting to the Board and shareholders. The nominations part of the committee is responsible for overseeing board composition and succession planning by evaluating the required balance of skills, experience, diversity, and independence,

identifying and nominating suitable candidates, reviewing directors' independence, planning executive succession, and making recommendations to the Board.

Asset-Liability Committee

The Asset-Liability Committee ("ALCO") is responsible for developing and executing the Issuer's asset and liability management strategies, taking into account prevailing market conditions and established risk limits. It oversees the balance between assets and liabilities to manage interest rate, liquidity, and funding risks, ensuring that the Issuer maintains an appropriate risk profile while supporting its financial objectives. In carrying out this role, ALCO monitors market developments, reviews compliance with risk limits, and guides decisions on funding, investment, and liquidity. ALCO also serves as the main forum for discussing related financial and liquidity matters, providing a structured setting in which key issues are reviewed and recommendations are made to support prudent asset management for the Issuer.

Employees

During 2025, the Issuer had an average of 665 employees, compared with 673 in 2024. The Issuer continues to invest in human capital.

Litigation

From time to time, the Issuer is involved in litigation arising in the ordinary course of its business, both as claimant and as defendant. Where relevant, as part of the prudent management of any such proceedings, the Issuer may from time to time make provisions in its accounts in respect of such proceedings.

As at 30 June 2026, there were various proceedings in respect of which the Issuer has made a provision of €10,559 thousand (2025: €10,818 thousand), which represents management's best estimate of the probable loss expected upon the resolution of these pending legal cases.

Material contracts

There are no material contracts entered into outside the ordinary course of the Issuer's business that could give rise to any obligation or entitlement material to the Issuer's ability to meet its obligations to Noteholders in respect of the Notes.

Recent events

On 2 September 2026, the Issuer priced €100,000,000 5.250 per cent. Reset Subordinated Tier 2 Notes due 2036 (XS3489952435) to be issued on 9 September 2026 (the "**New Tier 2 Notes**").

TAXATION

The comments below are of a general nature and are not intended to be exhaustive. Any Noteholders who are in doubt as to their own tax position should consult their professional advisers.

Taxation in the Hellenic Republic

The following is a summary of certain material Greek tax consequences of the purchase, ownership and disposal of the Notes, assuming that the Notes will be and remain listed either on a trading venue within the EU or an organised stock market outside the EU which is supervised by a regulatory authority accredited by the International Organisation of Securities Commissions. The discussion is not exhaustive and does not purport to deal with all the tax consequences applicable to all possible categories of purchasers, some of which may be subject to special rules and also does not touch upon procedural requirements, such as the issuance of a tax registration number or the filing of a tax declaration or of supporting documentation required. Further, it is not intended as tax advice to any particular prospective purchaser and it does not purport to be a comprehensive description or analysis of all of the potential tax considerations that may be relevant to a prospective purchaser in view of such purchaser's particular circumstances. Also, the discussion below is limited to the payment of interest under Notes as per the terms of which the redemption amount of such Notes may not be less than the principal amount thereof.

The summary is based on the Greek tax laws in force on the date of this Offering Circular, published case law, ministerial decisions and other regulatory acts of the respective Greek authorities as in force at the date hereof and does not take into account any developments or amendments that may occur after the date hereof, whether or not such developments or amendments have retroactive effect. There are still certain matters which have not, as at the date hereof, been clarified by the Greek tax administration. Further, non-Greek tax residents may have to submit a declaration of non-residence or produce documentation evidencing non-residence in order to claim any exemption under applicable tax laws of Greece.

In addition, investors should note that the appointment by an investor in the Notes, or any person through which an investor holds the Notes, of a custodian, collection agent or similar person in relation to such Notes in any jurisdiction may have tax implications. Such investors should consult their own tax advisers in relation to the tax consequences for them of any such appointment.

Individuals are assumed not to be acting in the course of business for tax purposes.

Tax considerations may be subject to the more favourable provisions of any applicable bilateral treaty for the avoidance of double taxation.

Prospective purchasers of the Notes are advised to consult their own tax advisers as to the laws of Greece and other tax consequences of the purchase, ownership and disposal of the Notes.

A. Greek withholding tax

Payment of principal under the Notes

No Greek income tax will be imposed on payments of principal to any Noteholders in respect of the Notes.

Payments of interest on the Notes

Individual Noteholders – Greek tax residents

Interest on the Notes received by Noteholders who are individuals and Greek tax residents will be subject to income tax currently at a flat rate of 5 per cent., which is exhaustive of their income tax liability from such source. If payment of interest is effected through a Greek resident paying agent or a Greek permanent establishment of a non-Greek paying agent, the entire income tax of 5 per cent. will be withheld by such agent.

Individual Noteholders – non-Greek tax residents

Interest on the Notes received by Noteholders who are individuals and non-Greek tax residents is exempt from any income or withholding tax in Greece.

Noteholders which are legal persons or legal entities – Greek tax residents

Interest on the Notes received by Noteholders who are legal persons and legal entities and Greek tax residents (including permanent establishments in Greece of non-Greek legal persons or legal entities through which the Notes are held) will be treated as part of their annual taxable income and will be taxed via the annual corporate income tax return currently at the rate of 22 per cent. (except for credit institutions participating in the scheme allowing for the conversion of deferred tax assets into final deferred tax credits against the Greek State under certain circumstances, which are taxed at 29 per cent., and in compliance with the provisions of Greek Law 4172/2013 (also referred to as the 'Greek Income Tax Code')). If payment of interest is effected through a Greek paying agent or a Greek permanent establishment of a non-Greek paying agent, a withholding tax of 15 per cent. applies, which will be credited against the income tax due for that tax year.

Noteholders which are legal persons or legal entities – non-Greek tax residents

Interest on the Notes received by Noteholders who are legal persons and legal entities and non-Greek tax residents is exempt from any income or withholding tax in Greece.

B. Disposal of Notes – capital gains

Individual Noteholders

Capital gains on the Notes arising at the level of Noteholders who are individuals will be exempted from income tax. Furthermore, the tax authorities (Circular 1032/2015 (2)(iii)) have expressed the view that the difference between the acquisition value on the secondary market and the payment of principal received upon expiry of a corporate bond, such as the Notes, does not constitute capital gains.

Noteholders which are legal persons or legal entities – Greek tax residents

Capital gains on Greek corporate bonds, such as the Notes, earned by Noteholders that are legal persons or legal entities and Greek tax residents (including permanent establishments in Greece of non-Greek legal persons or legal entities through which Notes are held) are subject to a non-definitive exemption from Greek income tax (according to Article 14 of Greek Law 3156/2003), which operates as tax deferral. Taxation of capital gains on Greek corporate bonds, such as the Notes, is deferred until capitalisation or distribution. Upon capitalisation or distribution, and regardless of the existence of losses at the time of capitalisation or distribution, corporate Noteholders which are Greek tax residents will be taxed at the corporate income tax rate applicable at the time of capitalisation or distribution.

Noteholders which are legal persons or legal entities – non-Greek tax residents

Capital gains over Greek corporate bonds, such as the Notes, earned by Noteholders which are non-Greek tax residents will be exempt from income tax in Greece (according to Article 47(5) and Article 37(5) of Greek Law 4172/2013).

Foreign Account Tax Compliance Act

Pursuant to certain provisions of the U.S. Internal Revenue Code of 1986 ("**FATCA**"), a "**foreign financial institution**" (as defined by FATCA) may be required to withhold on certain payments it makes ("**foreign passthru payments**") to persons that fail to meet certain certification, reporting or related requirements. The Issuer is a foreign financial institution for these purposes. A number of jurisdictions (including the UK and Greece) have entered into, or have agreed in substance to, intergovernmental agreements with the United States to implement FATCA ("**IGAs**"), which modify the way in which FATCA applies in their jurisdictions. Under the provisions of IGAs as currently in effect, a foreign financial institution in an IGA jurisdiction would generally not be required to withhold under FATCA or an IGA from payments that it makes. Certain aspects of the application of the FATCA provisions and IGAs to instruments such as Notes, including whether withholding would ever be required pursuant to FATCA or an IGA with respect to payments on instruments such as Notes, are uncertain and may be subject to change. Even if withholding would be required pursuant to FATCA or an IGA with respect to payments on instruments such as Notes, such withholding would not apply prior to the date that is two years after the date on which final regulations defining foreign passthru payments are published in the U.S. federal register and Notes characterised as debt (or which are not otherwise characterised as equity and have a fixed term) for U.S. federal income tax purposes that are issued on or prior to the date that is six months after the date on which final regulations defining foreign passthru payments are published generally would be grandfathered for purposes of FATCA withholding unless materially modified after such date (including by reason of a substitution of the Issuer). However, if additional Notes (as described under Condition 17) that are not distinguishable from previously issued Notes are issued after the expiration of the grandfathering period and are subject to withholding under FATCA, then withholding agents may treat all Notes, including the Notes offered prior to the expiration of the grandfathering period, as subject to withholding under FATCA. Noteholders should consult their own tax advisers regarding how these rules may apply to their investment in Notes.

SUBSCRIPTION AND SALE

Goldman Sachs Bank Europe SE, Piraeus Bank S.A. and UBS Europe SE (the "**Joint Lead Managers**") have, pursuant to a Subscription Agreement (the "**Subscription Agreement**") dated 7 September 2026, agreed with the Issuer, subject to the satisfaction of certain conditions, to subscribe for the Notes. In the Subscription Agreement, the Issuer has agreed to pay a fee to the Joint Lead Managers in consideration of their agreement to subscribe for the Notes and to reimburse the Joint Lead Managers for certain of their expenses in connection with the issue of the Notes. The Joint Lead Managers are entitled to terminate the Subscription Agreement in certain limited circumstances prior to the issue of the Notes.

United States

The Notes have not been and will not be registered under the Securities Act or the securities laws of any state or other jurisdiction of the United States and may not be offered or sold within the United States or to, or for the account or benefit of, US persons except in certain transactions exempt from, or not subject to, the registration requirements of the Securities Act.

Each Joint Lead Manager has represented and agreed that it will not offer, sell or deliver Notes (i) as part of its distribution at any time or (ii) otherwise until 40 days after the completion of the distribution of all the Notes within the United States or to, or for the account or benefit of, US persons except in accordance with Regulation S of the Securities Act and it will have sent to each distributor, dealer or person receiving a selling concession, fee or other remuneration that purchases Notes from it during the distribution compliance period a confirmation or other notice setting forth the restrictions on offers and sales of the Notes within the United States or to, or for the account or benefit of, US persons. Terms used in this paragraph have the meanings given to them by Regulation S under the Securities Act.

In addition, until 40 days after the commencement of the offering of the Notes, an offer or sale of the Notes within the United States by any dealer (whether or not participating in the offering) may violate the registration requirements of the Securities Act if such offer or sale is made otherwise than in accordance with an available exemption from registration under the Securities Act.

Prohibition of Sales to EEA Retail Investors

Each Joint Lead Manager has represented and agreed that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available the Notes to any retail investor in the EEA. For the purposes of this provision the expression "retail investor" means a person who is one (or both) of the following:

- (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; or
- (ii) a customer within the meaning of the Insurance Distribution Directive, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II.

United Kingdom

Prohibition of Sales to UK Retail Investors

Each Joint Lead Manager has represented and agreed that it has not offered, sold, distributed or otherwise made available and will not offer, sell, distribute or otherwise make available the Notes to any retail investor in the UK. For the purposes of this provision the expression "retail investor" means a person who is not a professional client, as defined in point (8) of Article 2(1) of UK MiFIR.

Other regulatory restrictions

Each Joint Lead Manager has represented and agreed that:

- (a) *Financial promotion*: it has only communicated or caused to be communicated and will only communicate or cause to be communicated any invitation or inducement to engage in investment activity (within the meaning of section 21 of the Financial Services and Markets Act 2000 ("FSMA")) received by it in connection with the issue or sale of the Notes in circumstances in which section 21(1) of the FSMA does not apply to the Issuer; and
- (b) *General compliance*: it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to the Notes in, from or otherwise involving the UK.

Greece

Each Joint Lead Manager has represented and agreed that it has complied and will comply with: (i) the provisions described in the section entitled "*Subscription and Sale – Prohibition of Sales to EEA Retail Investors*"; (ii) any applicable provisions of Regulation (EU) 2017/1129, as amended, and the relevant applicable provisions of Greek Law 4706/2020; (iii) any applicable provisions of Greek Law 4514/2018, which transposed MiFID II into Greek law; and (iv) any applicable provisions of the Bank of Greece Executive Committee Act No. 147/27.07.2018 and the HCMC Decision no. 1/808/07.02.2018, implementing the Delegated Directive (EU) 2017/593 in Greece, each as in force from time to time, with respect to anything done by such Joint Lead Manager in relation to the offering of the Notes in, from or otherwise involving the Hellenic Republic.

General

Each Joint Lead Manager has represented, warranted and agreed that (to the best of its knowledge and belief having made all due and proper enquiries) it has complied and will comply with all applicable securities laws and regulations in force in any jurisdiction in which it purchases, offers, sells or delivers the Notes or possesses or distributes this Offering Circular and will obtain any consent, approval or permission required by it for the purchase, offer, sale or delivery by it of the Notes under the laws and regulations in force in any jurisdiction to which it is subject or in which it makes such purchases, offers, sales or deliveries and the Issuer shall not have any responsibility therefor.

Neither the Issuer nor any of the Joint Lead Managers represents that Notes may at any time lawfully be sold in compliance with any applicable registration or other requirements in any jurisdiction, or pursuant to any exemption available thereunder, or assumes any responsibility for facilitating such sale.

GENERAL INFORMATION

Authorisation

The issue of the Notes has been duly authorised by resolutions of the Board of Directors of the Issuer dated 30 July 2026 and 31 August 2026.

Listing and Admission to Trading

Application has been made to the Luxembourg Stock Exchange for the Notes to be admitted to trading on the Euro MTF Market and to be listed on the Official List of the Luxembourg Stock Exchange.

Documents Available

For so long as the Notes remain outstanding, copies of the following documents will, when published, be available for inspection or collection free of charge during normal business hours at the registered office of the Issuer and from the specified office of each Paying Agent, the Registrar and each Transfer Agent or the specified office of the Noteholders Agent (if any) upon reasonable request or may be provided by email to a Noteholder following their prior written request to a Paying Agent, the Registrar or a Transfer Agent (as the case may be) and provision of proof of holding and identity (in a form satisfactory to the relevant Paying Agent, the Registrar or the relevant Transfer Agent (as the case may be)):

- the constitutional documents of the Issuer (in English);
- the 2024 Annual Financial Report, the 2025 Annual Financial Report and the 2026 Six-month Financial Report of the Issuer;
- the Agency Agreement;
- the Noteholders Agency Agreement (if any); and
- a copy of this Offering Circular and the documents incorporated by reference herein.

This Offering Circular (and any supplement thereto) will be published on the website of the Luxembourg Stock Exchange (www.luxse.com).

In addition, the documents incorporated by reference in this Offering Circular and any notices published in Luxembourg in accordance with Condition 15 are expected to be available in electronic form on the website of the Luxembourg Stock Exchange (www.luxse.com).

Clearing Systems

The Notes have been accepted for clearance through Euroclear and Clearstream, Luxembourg.

The International Securities Identification Number ("ISIN") for the Notes is XS3489952195 and the Common Code is 348995219.

The Classification of Financial Instrument code and the Financial Instrument Short Name code are set out on the website of the Association of National Numbering Agencies or may alternatively be sourced from the responsible National Numbering Agency that assigned the ISIN.

The address of Euroclear is 1 Boulevard du Roi, Albert II, B-1210 Brussels, Belgium and the address of Clearstream, Luxembourg is 42 Avenue JF Kennedy, L-1855 Luxembourg.

Yield

The yield in respect of the Notes from (and including) the Issue Date up to (but excluding) the First Reset Date is 6.875 per cent. per annum. The yield is calculated on a semi-annual basis at the Issue Date of the Notes on the basis of the issue price of 100.000 per cent. and the Initial Rate of Interest. It is not an indication of the actual yield for such period or of any future yield.

Material Change and Significant Change

There has been no material adverse change in the prospects of the Issuer or the Group since 31 December 2025 and no significant change in the financial position of the Issuer or the Group since 30 June 2026.

Litigation

In the ordinary course of business, the Group is involved in judicial or other similar proceedings. However, save as disclosed on pages 61 and 62 (note 29) of the 2026 Six-month Financial Report, neither the Issuer nor any other member of the Group is or has been, in the last twelve months, involved in any governmental, legal or arbitration, proceedings (and, so far as they are aware, no such proceedings are pending or threatened) which may have, or have had, a significant effect on their financial position or profitability.

As at 30 June 2026, there were various proceedings in respect of which the Issuer has made a provision of €10,559 thousand (2025: €10,818 thousand), which represents management's best estimate of the probable loss expected upon the resolution of these pending legal cases.

Third Party Information

The Issuer confirms that, where information has been sourced from a third party, such information has been accurately reproduced and that, so far as it is aware and is able to ascertain from information published by the relevant third party, no facts have been omitted which would render the reproduced information inaccurate or misleading.

Auditors

The current statutory auditors of the Issuer are Deloitte Certified Public Accountants S.A. ("**Deloitte**"), whose registered address is 3a Fragkoklissias & Granikou Str., GR-151 25 Maroussi, Athens, Greece. Deloitte is a member of the Institute of Certified Public Accountants of Greece ("**SOEL**") and is also registered with the Public Company Accounting Oversight Board ("**PCAOB**") and Hellenic Accounting and Auditing Standards Oversight Board ("**HAASOB**"). Deloitte has no material interest in the Issuer. Deloitte's report on the Issuer's 31 December 2025 unconsolidated financial statements prepared in accordance with IFRS as adopted by the European Union was not qualified.

The statutory auditors of the Issuer for the financial year ended 31 December 2024 were Pricewaterhouse Coopers S.A. ("**PwC**"), whose registered address is 65 Kifisias Avenue, Maroussi, Athens, GR-151 24, Greece. PwC is a member of the SOEL and is also registered with the PCAOB and HAASOB. PwC has no material interest in the Issuer. PwC's report on the Issuer's 31 December 2024 consolidated and separate financial statements prepared in accordance with IFRS as adopted by the European Union was not qualified.

The 2024 Annual Financial Report, the 2025 Annual Financial Report and the 2026 Six-month Financial Report were prepared in accordance with IFRS as adopted by the European Union.
